V.2

IN the present Work the aim has been to give ALL the words in the English language now in use, with their several significations re-investigated, re-classified, arranged afresh, and illustrated by examples, a large number of them having been brought together by independent research.

In addition to these, a very large number of obsolete words have been introduced, which, it is hoped, will afford readers much assistance in the perusal of Old English authors. Obsolete spellings and significations of existing words have also been given, the latter chronologically arranged, so as, if possible, to show the process by which the present meaning has arisen. Obsolete words and significations are marked with an asterisk,*; those which have not dropped altogether out of use, but are only rarely found, with an obelisk, †.

Special attention has been given to scientific and technical terms.

COMPOUND WORDS in which complete adhesion has taken place between the two or more constituents have been arranged as independent words; while those still so loosely united as to be usually connected by hyphens, have been placed under the first word of the compound.

THE PRONUNCIATION is indicated by diacritical marks, a key to which will be found at the foot of the several pages. The division into syllables has been made solely with reference to pronunciation, and with no reference to the etymology of the word. In syllables wherein two or more vowels come together, not forming diphthongs, only that one of them which gives its sound to the syllable bears a diacritical mark, the others being treated as mute. Thus, in *brēad, sēa, fōat*, the *a* is mute, the syllables being pronounced as if spelled *brēd, sē, fōt*. Words of more than one syllable bear a mark upon the accented syllable, as *āi-tēr*.

THE ETYMOLOGY will be found enclosed within brackets immediately following each word. To understand the plan adopted, let it be noted (1) that retrogression is made from modern languages to ancient; and (2) that when after a word there appears such a derivation as this—"In Fr. Sp. Port. Ital. from Lat.," the meaning is, not that it passed through Italian, Portuguese, Spanish, and French before reaching English, but that there are or have been analogous words in French, Spanish, Portuguese, and Italian, all derived, like the English, from a Latin original.

The illustrations are intended not for the purpose of embellishment merely, but also to impart a conception of the objects represented clearer than any mere verbal definition could afford.

4. One born or living in the same country as another.

"... people proud of the genius and success of their great countryman."—Macaulay: *Hist. Eng.*, ch. xi.

¶ Crabb thus discriminates between *countryman, peasant, swain, hind, rustic, and clown*: "All these terms are applied as epithets to persons, and principally to such as live in the country; the terms *countryman* and *peasant* are taken in an indifferent sense, and may comprehend persons of different descriptions; they designate nothing more than habitual residence in the country: the other terms are employed for the lower orders of countrymen, but with collateral ideas favorable or unfavorable annexed to them: *swain, hind*, both convey the idea of innocence in a humble station, and are therefore always employed in poetry in a good sense: the *rustic* and *clown* both convey the idea of that uncouth rudeness and ignorance which is in reality found among the lowest orders of countrymen." (Crabb: *Eng. Synon.*)

¶ *Countryman's Treacle*: An old English name for *Ruta graveolens*. (*Treas. of Bot.*)

**couin-trý-ship, s.* [*English country; -ship.*] Nationality. (*Verstegan.*)

*couin-trý, *counte, *countee, *countie, *countye, s. & a.* [*Lat. comitatus, from comes=* a companion, a count. In the Saxon times, one created an earl received a shire to govern. When the Normans took possession of the land these Saxon earls were displaced by noblemen of similar rank who had come across with the Conqueror, and who from being his companions were called *comites*. These each ruled a shire (*comitatus*), and from the Latin designation *comitatus* the English word county ultimately came. (*Trench: On the Study of Words*, pp. 206-7.)] [COUNT.]

A. As substantive:

1. A county or subdivision of a state for purposes of administration, called in some states a parish or a shire; or, more specifically, the Roman name of what in Saxon times had been called a shire.

¶ In most of the states the counties to a great extent preserve an autonomy, each being provided with its own sheriff, coroner, judiciary, and inferior legislative body (for purposes of local enactment), generally styled commissioners. Each county is charged with the administration of justice in its borders, with the support of its own paupers, with the maintenance of good roads, &c., and, for local election purposes, usually constitutes an independent constituency. It is in many instances subdivided into townships or parishes, which in turn to a less degree preserve an independence.

"Every county, every town, every family, was in agitation."—Macaulay: *Hist. Eng.*, ch. ii.

*2. An earldom.

*3. A count, an earl, a lord.

"Princes and counties! Surely, a princely testimony, a goodly count, County Comfort; a sweet gallant, surely!"—Shakesp.: *Much Ado*, iv. 1.

B. As adj.: Of or pertaining to a county.

county corporate, s. An English city or town which has received the privilege of becoming in itself a county, having sheriffs and other magistracies of its own. The cities are twelve, viz.: London, Chester, Bristol, Coventry, Canterbury, Exeter, Gloucester, Litchfield, Lincoln, Norwich, Worcester, and York. The towns five, viz.: Kingston-upon-Hull, Nottingham, Newcastle-upon-Tyne, Poole, and Southampton.

county-court, s. One of a number of tribunals established in most states of the Union, having both civil and criminal jurisdiction. Their powers and constitution necessarily vary in different states.

county-jail, s. The jail or prison in which county prisoners are confined—generally for misdemeanors; felons after conviction being generally lodged in the state prisons, known as penitentiaries, reformatories, &c. All county prisoners are lodged in jail pending trial or execution of capital sentence.

county-palatine, s. [*Palatine* is from *Lat. palatinus*=pertaining to the imperial palace, imperial.] A European county invested with what may be called royal privileges or rights. From time immemorial this was the case with the English counties Chester and Durham, to which Edward III. by creation added Lancaster. The Counties-palatine are now in the hands of the Crown, their separate jurisdiction being controlled by the Courts in London.

county-rate, county-levy, s. A tax levied upon the taxpayers of a county for the purpose of meeting such expenses as are chargeable upon the whole county, e. g., the repair and maintenance of public roads, bridges, &c.

county-seat, s. The capital of a county; the town in which are usually held sessions of the various county courts, and at which are located the County-jail, public offices, &c. The *COUNTY TOWN* (q. v.).

county-sessions, s. The general sessions of the courts of Justice for each county.

county-town, s. The chief town of any county. [COUNTY SEAT.]

côup (p. silent) (1), **caupe, s.* [O. Fr. *colp, cop*; Fr. *coup*; Ital. *colpo*; Low Lat. *colpus*; Lat. *colpus*=a blow.]

1. A stroke, a blow.

"The kyng with the coupe cast to the ground."

Destruct. of Troy, 1, 237.

2. A trick, a cheat, a snare.

3. A success in a horse-race, especially when it has been effected with cunning or sharpness.

¶ The word occurs in several French phrases, which have become more or less adopted into our language.

(1) *Coup d'état*:

(a) *Gen.*: A decisive stroke or exercise of power to alter the constitution of a country by force, and without or against the consent of the people.

(b) *Spec. (French Hist.)*: A revolution suddenly commenced and effected on December 2, 1851, by Prince Louis Napoleon, then President of the French Republic. Being of opinion that a plot against him was about to be attempted and would succeed unless he took the initiative, he dissolved the legislative assembly, established universal suffrage, and arranged that the election of a president for ten years should take place and a senate be constituted. About 180 members of the dissolved assembly having attempted to meet were arrested, and on the two subsequent days sanguinary conflicts took place in the streets of Paris between the partisans of Napoleon and the more resolute upholders of the old arrangements. The former were victorious, and from the ten years' presidency to the empire the transition was easy.

(2) *Coup de grâce*: The finishing stroke.

(3) *Coup de main*:

Mil.: A sudden assault or attack.

"It seems it could only have been carried by a *coup de main*, which unluckily failed."—Guthrie: *India within the Ganges*.

(4) *Coup d'œil*:

côup-le, ***cowpull**, ***cupple**, ***cowpylle**, *s.* [O. Fr. *copie*; Fr. *couple*; Ital. *cupola*, from Lat. *cupula*=a band, a couple: *co*=*con*=*cum*=with, together; *apo*=to join.]

I. *Ordinary Language*:

1. That which serves to join or couple two things together; a bond, a coupler. [II. 1.]

"He made the haws with *cedre couplis*."—*Wycliffe: 3 Kings* vi. 10.

2. A brace or tie which holds two dogs together.

"It is in some sort with friends as it is with dogs in *couples*; they should be of the same size and humor."—*L'Estrange*.

3. A pair or brace; two of the same kind or class considered together.

(1) *Generally*:

"... behold, Ziba the servant of Mephibosheth met him, with a *couple* of asses saddled, . . ."—*1 Sam.* xvi. 1.

(2) *Spec.*: A male and a female of any species; but more especially of the human kind when married or betrothed.

"So shall all the *couples* three,
Ever true in loving be."

Shakesp.: Mids. Night's Dream, v. 1.

II. *Technically*:

1. *Building*: One of a pair of rafters or spars in a roof, joined at the point of meeting at the top, and held together at the bottom by a tie.

2. *Physics*: Two equal parallel forces acting toward contrary parts—i. e., in contrary directions. They cannot be balanced by any single force whatever. (Ganot.)

3. *Magnetism*: The magnetic action of the earth acting on a magnetized needle. It is called a terrestrial magnetic couple.

4. *Voltaic Elect.*: A pair of plates forming a battery, or a part of one; two metals in metallic contact and a conducting liquid in which they are

placed. It is sometimes called a simple voltaic element. When the metals are not in contact the couple is said to be open, and when they are connected it is said to be closed.

5. *Thermo-electrics*: Two metals soldered together, the two ends of which can be joined by a conductor. Then there may be a bismuth-copper couple, a bismuth-antimony conductor, &c.

6. *Astron.*: A double star. It is of two kinds, an optical and a physical couple. [† (4), (5).]

† (1) *Magnetic couple*: [COUPLE, II. 3.]

† (2) *Mechanical couple*: [II. 2.]

(3) *Moment of couple*: The product of a force by a length. If *M* stands for mass, *L* for length, $\frac{ML^2}{T^2}$ and *T* for time, then moment of couple is = $\frac{ML^2}{T^2}$.

(Everett: *The C. G. S. System of Units*, ed. 1875, ch. i., p. 5.)

(4) *Optical couple*:

Astron.: & *Optics*: A double star, of which the two constituents have no apparent mutual relation, except that they look to the eye in proximity to each other.

(5) *Physical couple*:

Astron.: A double star, of which the two constituents have a mutual relation to each other in addition to the optical one.

(6) *Thermo-electric couple*: [II. 5.]

(7) *Voltaic couple*: [II. 4.]

† Crabb thus discriminates between *couple*, *brace*, and *pair*: "Couples and braces are made by coupling and bracing; pairs are either so of themselves, or are made so by others: couples and braces always require a junction in order to make them complete; pairs require similarity only to make them what they are: couples are joined by a foreign tie; braces are produced by a peculiar mode of junction with the objects themselves. Couple and pair are said of persons or things; brace in particular cases, only of animals or things, except in the burlesque style, where it may be applied to persons. When used for persons, the word couple has relation to the marriage tie; the word pair to the association or the moral union: the former term is therefore more appropriate when speaking of those who are soon to be married, or have just entered that state; the latter when speaking of those who are already fixed in that state."

***couple-beggar**, *s.* A term applied in Ireland to a suspended priest.

"No couple-beggar in the land
E'er join'd such numbers hand in hand."
Swift.

couple-close, *s.*

1. *Arch.*: Couples; a pair of rafters or spars for a roof.

2. *Her.*: An epithet applied to an ordinary inclosing the chevron by couples. (Written also *couple-close*.)

côup-le, ***cow-plyn**, ***ku-ple**, *v. t. & i.* [O. Fr. *copler*, *cupler*; Fr. *coupler*; Ital. *copulare*; Ger. *koppeln*; Dan. *koble*, from Lat. *cupulo*=to join together; *cupula*=a band, a couple.] [COUPLE, *s.*]

A. *Transitive*:

1. To tie, bind, or join together.

(1) *Generally*:
"And they shall be coupled together . . ."—*Exod.* xvi. 24.

"Waters in Africa, being rare, divers sorts of beasts come from several parts to drink; and so being refreshed, fall to couple, and many times with several kinds."—*Bacon*.

côup'-led, *pa. par. or a.* [COUPLE, *v.*]

A. *As pa. par.*: (See the verb.)

B. *As adjective*:

1. *Lit.*: Joined, tied, united.

*2. *Fig.*: United in rhyme; rhyming.

"The noble hater of degenerate rhyme,

Shook off the chains and built his verse sublime
A monument too high for coupled sounds to climb."
Watts: Adventurous Muse.

coupled columns, *s. pl.*

Arch.: Columns arranged in pairs, where the nature of the openings, doors, windows, or niches precludes the usual intercolumnar distance. In this case two systyles intercolumniations are used, the column which would otherwise occupy the middle of the space being brought to the distance of only half a diameter from the extreme column. This species has been called *areostylis*. (Weale, &c.)

***côup'-le-mént**, *s.* [Eng. *couple*; -ment.]

1. The act of coupling; the state of being coupled or joined.

"... thys conjunction and couplement of matrimonie, . . ."—*Grafton: Hen. VII.*, an. 27.

2. A couple, a pair.

"I wish you the peace of mind, most royal couplement!"
—*Shakesp.: Love's Labor's Lost*, v. 2.

côup'-lër, *s.* [Eng. *coupl*(e); -er.]

1. *Ord. Lang.*: One who or that which couples or ties together.

II. *Technically*:

1. *Music*: A connection between the corresponding keys of different banks or ranks of keys, so that they act together when one is played upon. When a key of the lower bank is touched, it actuates the one above; but the action is not reciprocal. The coupler is thrown into action by a draw-stop or pedal. Octaves in the same bank are sometimes coupled, to avoid the necessity of striking octaves by stretching the hands. Similarly, the great-organ may be coupled with the choir-organ or the swell. (Knight.)

2. *Foundry*: The ring which slips upon the handles of a crucible tongs, or a nipping tool of any kind. Also called *reins*. (Knight.)

côup'-leg, *s. pl.* [COUPLE, *s.*]

Carp.: Rafters framed together in pairs by a tie, which is generally fixed above the feet of the rafters.

† *Main Couples*: The roof-trusses. (Knight.)

***côup'-lèt**, *v. i.* [COUPLET, *s.*] To write couplets.

"Couplet it as much as your worship pleases."—*Jarvis: Don Quixote*, pt. ii., bk. iv., ch. xvi. (Davies.)

côup'-lèt, ***cup-let**, *s. & a.* [Fr., dimin. of *couple*.] [COUPLE, *s.*]

A. *As substantive*:

*1. *Gen.*: A couple or pair; a brace.

"... we'll whisper o'er a couplet or two of most sage saws."—*Shakesp.: Twelfth Night*, iii. 4.

2. *Spec.*: Two lines or verses of a poem, especially if rhyming together; a couple or pair of rhymes.

"When he can in one couplet fix
More sense than I can do in six." *Swift*.

B. *As adj.*: Pertaining to or of the nature of a couplet; consisting of or written in couplets.

"I have always found the couplet verse most easy . . . for there the work is sooner at an end, every two lines concluding the labor of the poet."—*Dryden: Annus Mirab.*, Account of the Poem.

côup'-lîng, ***cowp-lyng**, *pr. par., adj. & subst.* [COUPLE, *v.*]

coupling-pole, s.

Vehicle: A pole connecting the fore and hind gear of a wagon.

coupling-strap, s. A strap connected to the off bitting of the off horse, thence through the near bitting, and leading back to the harness of the near horse. Used with artillery horses, and also for restive horses in ordinary service.

côu-pôh, **cou-pin*, **cow-pon*, s. [Fr., from *couper*=to cut.]

I. *Ord. Lang.*: A fragment, a piece cut off, a bit. "Gin I winna gie' you a helpin' haun' mysel' tae rive him in *coupins* lith, him, an' spawl."—*Saint Patrick*, iii. 311.

II. Technically:

1. *Banking*: A warrant or certificate for the periodical payment of interest on bonds issued for any term of years. The interest being payable in different cases quarterly, half-yearly, or yearly, as many coupons are attached to each bond as represent the total number of such payments as are to be made, with the date of payment printed on each. When a payment of interest becomes due at any particular date the holder of the bond detaches the corresponding coupon and presents it for payment at the specified banking house or office.

2. *Traveling*: One of a series of tickets, usually over connecting lines of different ownership, enabling the holder to perform a certain journey or tour, each coupon which represents a certain portion of the journey to be given up on completion of that portion.

côu-pûre, s. [Fr., from *couper*=to cut.]

Fort.: A passage cut through the glacis in the re-entering angle of the covered way, to facilitate sallies by the besieged. They are sometimes made through the lower curtain, to let boats into a little haven built in the re-entering angle of the counter-scarp of the outworks.

côur, v. i. [COWER.] To cower, to stoop, to bend down, to submit.

"But here my muse her wing maun *cour*,
She flights are far beyond her pow'r."
Burns: *Tam O' Shanter*.

côur-age, **cor-age* (age as *îg*), s. [O. Fr. *corage*; Fr. *corage*; Ital. *coraggio*; Sp. *coraje*; Port. *coragem*, from Lat. *coraticum*, from *cor*=the heart.]

*1. The disposition of the mind; inclination.

"I'd such a *courage* to do him good."
Shakesp.: *Timon*, iii. 3.

*2. A heartfelt desire, wish, or longing.

"Swiche a *courage*
Hadde this knight to ben a wedded man."
Chaucer: *C. T.*, 9,130.

3. Bravery, boldness, daring, intrepidity.

"Unbounded *courage* and compassion joined
Tempering each other in the victor's mind."
J. Addison.

"The king's becoming graces . . . devotion, patience, *courage*, fortitude, I have no relish of them."—*Shakespeare*.
" . . . he was regarded by his party, and by the world in general, as a man of *courage* and honor."—*Macaulay: Hist. Eng.*, ch. xv.

*4. Encouragement.

"To the *courage* of such as would this realm any ways evil."—*State Trials* (Bp. Gardiner), 1551.

* Now only used in the singular, but the plrdal was formerly not uncommon.

"So priketh hem nature in here *courages*."
Chaucer: *C. T.*, 10.

* The *courage* of one's opinions: Fearlessness in expressing one's opinions on any subject, even when unpopular or unpopular.

* (1) Crabb thus discriminates between *courage*, *fortitude*, and *resolution*: "*Courage* respects action, *fortitude* respects passion; a man has *courage* to meet danger, and *fortitude* to endure pain. *Courage* is that power of the mind which bears up against the evil that is in prospect; *fortitude* is that power which endures the pain that is felt; the man of *courage* goes with the same coolness to the mouth of the cannon as the man of *fortitude* undergoes the amputation of a limb. *Courage* seems to be more of a manly virtue; *fortitude* is more distinguishable as a feminine virtue: the former is at least most adapted to the male sex, who are called upon to act, and the latter to the females, who are obliged to endure; a man without *courage* would be as ill prepared to discharge his duty in his intercourse with the world, as a woman without *fortitude* would be to support herself under the complicated trials of body and mind with which she is liable to be assailed. *Resolution* is a minor species of *courage*; it is *courage* in the minor concerns of life; *courage* comprehends under it a spirit to advance; *resolution* simply marks the will not to recede; *courage* always supposes some danger to be encountered; *resolution* may be exerted in merely encountering opposition and difficulty." (Crabb: *Eng. Synon.*)

(2) For the difference between *courage* and *bravery*, see BRAVERY.

**côur-age* (age as *îg*), v. t. [COURAGE, s.] To encourage, to embolden or strengthen in spirit.

"Yneth watz the fyrst course in the court kyndely served."
Gaueine, 134.

11. Ordinary, every-day occurrence; as, a matter of course.

12. Used as expressing something which must be done or said, but not from the heart; hence, form, emptiness.

"Men talk as if they believed in God, but they live as if they thought there was none; their vows and promises are no more than words of course."—*L'Estrange*.

B. Technically:

1. Sports:

(1) *Racing, Athletics, &c.*: The ground or distance marked out for a race.

(2) *Coursing*: A single chase after a hare by one greyhound or by a brace.

"... Deborah's cleverness landed her victorious in both courses."—*Field*.

2. *Masonry*: One row or tier of bricks or stones in a wall. A *pilth-course* is a lower, projecting, square-faced course; a *blocking-course* is one laid

on top of the cornice; a *bonding-course*, one in which the stones lie with their length across the wall; a *heading-course*, one being all headers; a *stretching-course*, one consisting of stretchers; a *springing-course*, one upon which an arch rests; and a *string-course*, a projecting course in a wall. Rows of slates, tiles, and shingles are also termed *courses*. The *harge-course* is one projecting over the gable of a building. (Knight.)

3. *Music*: A set of strings of the same tone placed alongside, and struck one, two, or three at a time, according to the strength of sound desired. The adjustment in a piano is made by the soft pedal, which shifts the bank of keys. (Knight.)

4. *File-cutting*: A row of parallel teeth on the face of a file. One course makes a single-cut file. A course crossing the former at right angles constitutes a double-cut file. Eight courses of cuts are required for a square file, double-cut on each side. On the half-round files for gutting saws as many as twenty-three courses are required for the convex side, and only two for the straight side. (Knight.)

5. *Mining*: The direction of a vein or lode. (Knight.)

*6. *Tilting*: The charge of two mounted knights in the lists.

"But this hot knight was cooled with a fall, which, at the third course, he received of Phalantas."—*Sidney*.

7. *Nautical*:

(1) That point of the compass toward which a ship is steering; the destination.

(2) (*Pl.*) The sails which hang from a ship's lower yards; the foresail is called the fore-course, and the mainsail the main-course. When a ship sails under the mainsail and the foresail only, she is said to sail "under a pair of her courses."

"To the courses we have devised studding-sails, spritsails, and top-sails."—*Raleigh: Essays*.

8. *Medicine*:

(1) The menstrual flux, the menses; catamenia.

"The stoppage of women's courses, if not suddenly looked to, sets them undoubtedly into a consumption, dropsy, or some other dangerous disease."—*Harvey: On Consumptions*.

2. *Of things*: Characterized by courtesy or politeness; polite, kind.

"Bystanders whom His Majesty recognized often came in for a courteous word."—Macaulay: *Hist. Eng.*, ch. iii.

¶ Crabb thus discriminates between *courteous*, *complaisant*, and *courtly*: "*Courteousness* displays itself in the address and the manners; *complaisance* in direct good offices; *courteousness* is most suitable for strangers; *complaisance* for friends or the nearest relatives; among well-bred men, and men of rank, it is an invariable rule to address each other *courteously* on all occasions whenever they meet, whether acquainted or otherwise. . . . *Courtly*, though derived from the same word as *courteous*, is in some degree opposed to it in point of sense; it denotes a likeness to a court, but not a likeness which is favorable; *courtly* consists of the form to the reality; the *courtly* consists of the exterior only, the latter of the exterior combined with the spirit; the former therefore seems to convey the idea of insincerity when contrasted with the latter, which must necessarily suppose the contrary: a *courtly* demeanor, or a *courtier-like* demeanor, may be suitable on certain occasions; but a *courteous* demeanor is always desirable. *Courtly* may likewise be employed in relation to things; but *courteous* has always respect to persons: we may speak of a *courtly* style, or *courtly* grandeur; but we always speak of *courteous* behavior, *courteous* language, and the like." (Crabb: *Eng. Synon.*)

côurt-ê-ôus-lý, *cortaisliche, *cortaisly, *cortaysly, *cortaisly, *cortaysliche, *cortaislie, *cortaisely, *cortaysly, *adv.* [Eng. *court-

"If we conclude a peace it shall be with such strict and severe *covenants*."—*Shakespeare: Henry VI.*, Pt. i., v. 4.

*3. A writing or document containing the terms of an agreement or contract between two or more persons.

"I shall but lend my diamond till your return: let there be *covenants* drawn between's . . ."—*Shakespeare: Cymb.*, i. 4.

II. Technically:

1. Law:

(1) A clause in an agreement whereby either party may stipulate for the truth of certain facts, or may bind himself to perform or give something to the other. If the covenantor covenants for himself and his heirs, it is then a *covenant real*, and descends upon the heirs, who are bound to perform it, provided they have assets by descent, but not otherwise; if he covenants also for his executors and administrators, his personal assets as well as his real are likewise pledged for the performance of the covenant. (*Blackstone: Comment.*, bk. ii., ch. xvii.)

(2) The name of an action instituted for the recovery of damages for the breach of a covenant or promise under seal.

2. *Scrip.*, *Theol.*, &c.: An engagement entered into between Jehovah and some other being or person.

(1) *Scrip.*: A vast number of passages in the Old Testament, and a few in the New, speak of covenants. There was one with Noah, as the representative, after the Deluge, of all mankind existing or who should subsequently be born; nay, as the representative also of the inferior animated creatures (*Gen.* vi. 18, ix. 9-17). An "everlasting covenant" was made with Abraham and his posterity (*xvii. 4, 7, 9*), of which circumcision was the token (*10-14*). It was renewed to Isaac and his posterity (*xvii. 19*). The covenant was in force while the Israelites were a nation. The Sabbath was part of it (*Exod. xxxi. 16*). The two tables of stone on which the moral law was written were tables of it (*Deut. ix. 11*). The priesthood entered into it (*Num. xxv. 13; Neh. xiii. 29*). It was renewed to David (*2 Sam. xxiii. 5*). Private individuals, male and female, were bound by it—departing from God they violated his covenant (*Psalm* l. 16; *Prov. ii. 17*). That covenant the Israelites broke (*Jer. xxxi. 32*). These are the chief of the Old Testament covenants.

In the New, the Christian dispensation is considered as a covenant (*Heb. viii. 13*), the covenant of promise (*Eph. i. 12*), of which Jesus is the mediator (*Heb. xii. 24*). There is reason to believe that for Testaments, in the expression Old and New Testaments, Covenants should be substituted, and the heading of the two portions of Sacred Scriptures should be the Old and New Covenants.

(2) *Theol.*: Two covenants are especially recognized by evangelical writers, the *Covenant of works* and the *Covenant of grace* (q. v.).

(3) *Ch. Hist.*: Cocceius, in the seventeenth century, carried the idea of Divine covenants more thoroughly than had before been done through his whole system of theology. Calvinists have done so to a greater extent than Arminians.

¶ (a) *Covenant of grace* or *of redemption*:

Theol.: A covenant of a twofold character: on the one hand, being between the Eternal Father and the Eternal Son, the former engaging, in consideration of the mission to earth and especially the atoning death of the Eternal Son, to grant salvation to those who should believe in the Redeemer. On the other hand, it was a covenant with men that, on their believing, they should receive eternal redemption through the blood of Christ.

(b) *Covenant of works*:

Theol.: A Divine engagement formed with Adam, the parent of our race. Its condition was, Obey and live for ever: disobey and die (*Gen. ii. 16, 17*). It is believed that it was made for him as representing all who should ultimately spring from him, and that his fall made them no less than him liable to death, and further that the same dilemma is presented to them as was to the parent of the race with the same results consequent on choice.

3. *Scottish, Ch., & Civil Hist.*: Four bonds of agreement signed by those who believed that the religious views and the political settlement which they advocated were in danger of being crushed, and therefore pledged themselves to support them notwithstanding any peril which might arise.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rale, fāl; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

(1) The first covenant was signed at Edinburgh on December 3, 1557, by the Earls of Argyll, Glencairn, and Morton, Archibald Lord of Eorn, John Erskine of Dun, with many of the lesser barons and influential country gentlemen. [CONFESSION.] It was designed to aid in carrying out the Protestant Reformation in the face of all resistance which might be offered to it by the Church of Rome.

(2) The second covenant was subscribed at Perth on May 3, 1559, by the Earls of Argyll and Glencairn, Lord James Stewart, the Lords Boyd and Ochiltree, and Matthew Campbell of Torringland. Its object was the same as that of the former one.

(3) The National Covenant was signed on Feb. 28, 1638, the first name appended being that of the aged Earl of Sutherland. The covenant was signed first in Greyfriars Church, Edinburgh, and then as it lay spread out upon a tombstone in the adjacent graveyard. The people, the great majority of whom were Presbyterian, had by a vote and resolution rid themselves the year before of episcopacy, and knew that their only hope of ultimate success lay in union.

(4) The Solemn League and Covenant, written by the Rev. Alexander Henderson, accepted by the Scottish General Assembly on August 17, 1643, and subsequently by the Convention of Estates. It was then sent to London, where, on September 25, it was subscribed by the English Parliament and the Westminster Assembly of Divines. It was designed to be a league between England and Scotland under the revolutionary leaders then dominant, and to establish in England no less than in Scotland the Presbyterian in lieu of the Episcopal Church.

This is the covenant most frequently alluded to by Sir Walter Scott in his novels. [COVENANTER.] When Scotland declared for Charles II. against Oliver Cromwell, the young king, previous to landing in 1650, subscribed the covenant. In 1661 the Scottish Parliament passed an Act absolving the lieges from the obligation, and prohibiting its renewal without their special warrant and approbation.

*Writ of Covenant:

Eng. Law: A writ which a person who was in process of purchasing land by means of a "fine" sued for as one step in the complex process. By this writ it was stated contrary to the actual fact that the vendor had covenanted to sell the lands to the purchaser, and failed to keep his agreement, on which account the writ to compel him to do so was sought. When such an action was brought, the king, by ancient prerogative, claimed a noble for every five marks of land sued for.

cōv-ēn-ānt, *cōv-en-aunt, v. t. & i. [COVENANT, s.]

***A. Trans.:** To grant or agree to by covenant.

"I shal recorde of my covenant of pees that Y covenantide with you."—*Wycliffe: Genesis ix. 15.*

B. Intransitive:

1. To enter into a covenant, to bargain, to agree, to contract, to bind one's self by a covenant.

"Jupiter covenanted with him, that it should be hot or cold, wet or dry, calm or windy, as the tenant should direct."—*L'Estrange.*

2. To enter into an agreement on certain terms.

"And they covenanted with him for thirty pieces of silver."—*Matt. xxvi. 15.*

"And spread the sacred treasures of the breast
Upon the lap of covenanted rest!"
Cowper: Conversation.

2. Bound by a covenant into which a person or a body has entered.

"Patronage had been abolished by a Covenanted Parliament in 1649, and restored by a Royalist Parliament in 1661."—*Macaulay: Hist. Eng., ch. xvi.*

cōv-ēn-ānt-ēe, s. [Eng. covenant; -ee.] The party to a covenant to or for whom the covenant is made.

"All covenantees are dischargeable by the covenantee."—*Hobbes: De Corpore Politico, pt. I, ch. II.*

cōv-ēn-ānt-ēr, cōv-ēn-ānt-ōr, s. [Eng. covenant; -er, -or.]

1. **Ord. Lang.:** One who enters into a covenant; a party to a covenant or contract.

"A covenant to do any action at a certain time or place is then dissolved by the covenantor."—*Hobbes: De Corpore Politico, pt. I, ch. II.*

II. **British Ch. & Civil Hist.:** A subscriber of or an adherent to any of the four covenants described under COVENANT, II. 2 (1), (2), (3), and (4), and especially the last two. When the third or National Covenant was signed, it was pretty apparent that civil war would be the result of the deed, and preparations for it were made both by Charles I. and by the Covenanters. On January 1, 1640, the

latter took post upon Dunse Law to the number at first of 12,000, and after a little of 24,000. Next year they entered England, made a treaty with the English parliament, and aided them in the civil war against the king. On the fall of Charles they entered into the Solemn League and Covenant, designed to promote uniformity of belief both in England and Scotland on the basis of a Presbyterian establishment, but very partial success attended the scheme. Being monarchical rather than republican, they sympathized with Charles II. against the Commonwealth, and on his subscribing the covenant on August 16, 1650, fought an obstinate battle for him at Worcester on September 3, 1651, which resulted in their defeat and a "crowning mercy" for their antagonist, Oliver Cromwell. In 1661, when the English and Scotch nations concurred in restoring Charles II., that monarch renounced the covenant, his prior subscription to which had been insincere. Parliament declared the covenant illegal, and ordered it to be burned. Many in consequence renounced it, or quietly allowed the fact that they had ever signed it to lapse into oblivion; but the more resolute spirits held to what they had done, and no severity on the part of the government could turn them aside from their purpose. Often more than once they were in arms against the government. In November, 1666, they were dispersed with loss at Rullion Green in the Pentland Hills. On June 1, 1679, they defeated Claverhouse, the "Bonnie Dundee" of song, at Drumclog, but were themselves totally routed by the Earl of Monmouth at Bothwell Bridge on the 22d of the same month and year; many of the prisoners taken being tortured and then subsequently executed. For a time the noted Richard (Cameron) was their leader, on which account they are often called Cameronians (q. v.). He, with about twenty others, well armed, entered the little town of Sanquhar, in Dumfriesshire, on June 22, 1680, and formally proclaimed the deposition of "Charles Stuart," meaning the king, but he was killed in a skirmish at Airdsmoss, in Ayrshire, on July 20. For their subsequent history, see CAMERONIANS, also REFORMED PRESBYTERIANS.

3. A convent, a monastery.

"Their monasteries, convents, hospitals, &c."—*Bale: On the Revelation (1650), i. 8.*

¶ The form still survives in *Covent-garden*, formerly the garden of a convent or monastery.

Cōv-ēn-trī, s. [A. S. *cōfanteo*, from *Cwent* [CUNE], the ancient name of a little river which runs past the town, and -*ree* or -*ry*=a river (*Somner*).] According to others, a corruption of *Covent-garden*, from a spacious convent founded, according to Leland, by Canute, and destroyed by Edric in 1016. In 1044 Earl Leofric, with his wife, the lady Godiva, founded at Coventry a magnificent Benedictine monastery (*Charnock, &c.*) The name of a town in Warwickshire, England.

¶ To send any one to Coventry: A phrase signifying to refuse to have any communication or intercourse with any one, to take no notice of him, to exclude him from society. The origin of the phrase is not very clear. Several explanations have been given, of which the most plausible is that the citizens of Coventry had, at one time, so great a dislike to soldiers, that any woman seen speaking to one was at once shut out from society, no intercourse whatever being allowed between the garrison and the townspeople; hence any soldier sent to Coventry was shut out from all social intercourse.

Coventry blue, s. Blue thread, much used for working or embroidering upon linen. The preparation of it was formerly one of the staples of Coventry, England.

"I have lost my thimble and a skein of Coventry blue."—*B. Jonson: Gipsies Metam.*

B. Military.

(1) To shelter or protect troops in their retreat.

(2) To stand exactly behind another man.

¶ Crabb thus discriminates between *to cover* and *to hide*: "To cover is to hide as the means to an end; we commonly *hide* by *covering*; but we may easily *cover* without *hiding*, as also *hide* without *covering*. The ruling idea in the word *cover* is that of throwing or putting something over a body; in the word *hide* is that of keeping carefully to one's self, from the observation of others. . . . There are many things which decency as well as health require to be *covered*; and others which from their very nature must always be *hidden*. Houses must be *covered* with roofs, and bodies with clothing; the earth contains many treasures, which in all probability will always be *hidden*." (*Crabb: Eng. Synon.*)

***cōv-ēr** (2), ***covere** (2), ***covyr** (2), ***kever** (2), ***kevere** (2), ***kevyr** (2), ***kuvere** (2), v. t. & i. [O. Fr. *cobrer*, *coubrier*; Port. & Sp. *cobrar*; Lat. *recupero*.]

(1) The cap-head or end-plate of a cylinder.

(2) A lid or hatch for a coal-hole, cistern, or vault-opening.

(3) A turret or cupola on a kitchen or boiling-house, pierced at the sides to let out steam or smoke.

(4) Steam-engine: The lap of a slide-valve. [*LAP*.] (*Knight*.)

¶ Crabb thus discriminates between *cover*, *shelter*, and *screen*: "Cover is literally applied to many particular things which are employed in covering; but in the general sense which makes it analogous to the other terms, it includes the idea of concealing: *shelter* comprehends that of protecting from some immediate or impending evil; *screen* includes that of warding off some trouble. A cover always supposes something which can extend over the whole surface of a body; a *shelter* or *screen* may merely interpose to a sufficient extent to serve the intended purpose. Military operations are sometimes carried on under cover of the night: a bay is a convenient *shelter* for vessels against the violence of the winds; a chair may be used as a *screen* to prevent the violent action of the heat, or the external air. In the moral sense a fair reputation is sometimes made the cover for the commission of gross irregularities in secret. When a person feels himself unable to withstand the attacks of his enemies, he seeks a *shelter* under the sanctity and authority of a great name. Bad men sometimes use wealth and power as a *screen* from the punishment which is due to their offenses." (*Crabb: Eng. Synon.*)

cover-point, s.

Cricket: A fielder stationed a little to the rear and right of point. [*POINT*.]

*cover-shame, s.

1. Gen.: An outward appearance or show to conceal infamy.

"Does he put on holy garments for a cover-shame of lowliness?"—*Dryden: Spanish Friar*.

2. Spec.: A kind of Juniper—*Juniperus Sabina*. The term Cover-shame is given from the criminal use of the plant in procuring abortion. (*Britten & Holland*.)

*cover-slut, s. An apron or pinafore; hence, anything used as a cover for sluttishness.

" . . . I hope she will never, in any rags and cover-sluts of infamy, be seen at such an exhibition."—*Burke: On a Regicide Peace*.

***cōv-ēt-īng-lý, adv.** [Eng. *coveting*; -ly.] In a covetous manner; with an eager or inordinate desire.

"Most covetingly ready."—B. Jonson: *Cynthia*. Revels.

***cōv-ēt-īse, *covaitis, *coveitise, *covaytise, *coveytise, *coveytise, s.** [O. Fr. *coveitise*; Sp. *covicia*; Ital. *cupidigia, cupidexza*; Low Lat. *cupiditia*; Lat. *cupiditas*, from *cupidus*=eager, covetous; *cupio*=to desire earnestly.]

1. An earnest desire or longing for anything.

"Ther is an holy coveytise and an holy enuye."
Ayenbite, p. 137.

2. Covetousness, avarice, inordinate desire.

"Whose greedy lust had lack in greatest store;
Whose need had end, but no end coveitise;
Whose welth was want, whose plenty made him pore."
Spenser: *F. Q.*, I. iv. 29.

cōv-ēt-ōus, *covatous, *covaytous, *coveitous, *coveytouse, *coveytouse, a. [O. Fr. *coveitous*, *coveitouse*; Fr. *coveitouse*; Ital. *cubitoso*.]

1. Eagerly desirous or anxious to gain or possess.

"Covetous only of a virtuous praise;
His life a lesson to the land he sways."

***cōv-ēt-ōus-lý, adv.** [Eng. *covetous*; -ly.] In a covetous manner; with an inordinately eager desire to obtain; avariciously.

cōv-ēt-ōus-ness, s. [Eng. *covetous*; -ness.]

I. Ordinary Language:

1. The quality of being covetous; an inordinate desire for money; avarice.

"They might have pardoned his covetousness . . ."
Macaulay: *Hist. Eng.*, ch. xix.

2. An eager longing or desire for anything; eagerness.

"When workmen strive to do better than well,
They do confound their skill in covetousness."
Shakesp.: *King John*, iv. 2.

II. Theol.: The desire for what is not one's own, whether it be money, other property, or anything else of a desirable kind. In Maharratta, *lobh* (covetousness) is often used for lust or concupiscence

rather than avarice, and in some Scripture passages (as Ephes. v. 5) the meaning seems to be the same.

[Crabb thus discriminates between *covetousness*, *cupidity*, and *avarice*: "All these terms are employed to express an illicit desire after objects of gratification; but *covetousness* is applied to property in general; *cupidity* and *avarice* only to money or possessions. A child may display its *covetousness* in regard to the playthings which fall in its way; a man shows his *cupidity* in regard to the gains that fall in his way; we should therefore be careful to check the *covetous* disposition in early life, lest it show itself in the more hateful character of *cupidity* in advanced years. *Covetousness* is the natural disposition for having or getting; *cupidity* is the acquired disposition. As the love of appropriation is an innate characteristic in man, that of accumulating or wanting to accumulate, which constitutes *covetousness*, will show itself, in some persons, among the first indications of character: where the prospect of amassing great wealth is set before a man, as in the case of a governor of a distant province, it will evince great virtue in him, if his *cupidity* be not excited. The *covetous* man seeks to add to what he has; the *avaricious* man only strives to retain what he has; the *covetous* man sacrifices others to indulge himself; the *avaricious* man will sometimes sacrifice himself to indulge others; for generosity, which is opposed to *covetousness*, is sometimes associated with *avarice*." (Crabb: *Eng. Synon.*)

cō-vēt-tā, s. [Etym. uncertain.] A plane used for molding framework, called also a quarter-round. (*Knicht*.)

cōv-ēy (1), s. [O. Fr. *covee*; Fr. *covée*, from O. Fr. *covee*; Fr. *couver*=to hatch, to brood; Lat. *cubo*=to lie down.]

I. Literally:

1. A hatch; an old bird with her young.

2. A small flock or number of birds feeding together.

"These birds do not go in coveys, . . ."—Darwin: *Voyage round the World* (ed. 1870), ch. iii., p. 45.

[Now exclusively confined to quail, partridges, &c.]

*II. Fig.: A pair, a number, a set.

"There would be no walking in a shady wood, without springing a covey of toasts."—Addison: *Guardian*.

cōv-ēy (2), s. [Contr. of Muscovy. (*Skinner*.)] A geraniaceous plant, *Erodium moschatum*.

[Sweet covey: The same as COVEY (q. v.).]

***cōv-īn, *cov-ine, *cov-yne, s.** [O. Fr. *covine*, from Lat. *convenio*=to come together, to agree.]

1. Ord. Lang.: A trick, treachery, scheming, artifice. (Chaucer: *C. T.*, 605.)

2. Law: An agreement or collusion between two or more persons to the prejudice or hurt of another.

covin-tree, s. Scott, in a note to *Quentin Durward*, ch. iii., where the word occurs, says that the large tree in front of Scottish castles was sometimes so called. Davies suggests it may be from Lat. *convenio*, since it was at the covin-tree that the laird received guests, and thither he accompanied them on their departure.

cōv-īng, s. [COVE, v.]

1. The overhang of the upper portions of a building beyond the limits of the ground-plan.

2. The played reveals or inclined jambs on the sides of a fireplace. These jambs were square in the old English fireplaces.

In some of the Louvre fireplaces the jambs have an angle of about 45°. These were probably erected about 1750, by Gabriel, under the orders of M. de Mavigny. Gauger had previously (1715) given to the coving a parabolic curve. Count Rumford invented or adopted the inclined coving, having an angle of 135° with the fire-back, to radiate heat into the room.

***cōv-īn-ōus, a.** [Eng. *covin*; -ous.] Fraudulent, deceitful.

cōw (1), *cou, *cu, *ku (pl. *ky, *kie, *kye, *kine, *kuyin, *kin, cows), s. & a. [A. S. *cu* (pl. *cy*). Cogn. with Dut. *koe*; Icel. *kýr*; Sw. & Dan. *kø*; O. H.

Ger. *chuo, chuo*; M. H. Ger. *kuo, ku*; Ger. *kuh*; O. Ir. & Gael. *bó*, all=a cow; Lat. *bos*; Gr. *bous*=an ox.]

A. As substantive:

I. Ordinary Language:

1. Lit.: In the same sense as II. 1, 2.

2. Figuratively:

(1) A coward.

(2) A coarse, awkward woman.

II. Technically:

1. **Zool.:** The female of the bovine species called the Ox, *Bos taurus*, of which the bull is the male. Like other domestic animals it has run into numerous varieties, and its primitive uniformity has given rise to manifold diversity. Nor is it in color alone that it has altered. It has done so in form, besides which there are horned and hornless oxen. The period of gestation of the cow is nine months, and the normal number of her offspring at a birth only one. [*Bos*, CATTLE.]

2. **Farming, Dairy Operations, &c.:** "A perfect cow," says an old writer, "should have black eyes, large clean horns, a long thin skin, a large deep belly, strong muscular thighs, round legs, broad feet, short joints, &c., white large udder with four teats." Speaking broadly this is correct; but in the choice of a cow attention should be given primarily to the nature of the pasture into which it is to be turned. The Darwinian principle of natural selection with the survival of the fittest has adapted cattle of different sizes and qualities to different parts of the country; little active cattle thriving on the scanty herbage found high up the mountain-side, and large heavy slow-going cattle of luxurious proclivities falling off unless they are allowed to revel amid the rank vegetation of river sides and meadows. The latter furnish the greatest quantity of milk. To preserve them in health, plenty of fresh air, artificial food when natural supply runs short, shelter in winter and in bad weather, and forbearance to force medicine upon them when it is not needed, are the chief requisites.

3. Mining:

(1) A wooden wedge to jam against the barrel of a gin or crab, to keep it from revolving.

(2) A rude shed erected over the mouth of a coal-pit.

4. **Mach.:** A kind of self-acting brake formerly used on inclined planes; a trailer.

cōw-pōx, *s.* [Eng. *cow*, and *pox*.]

Medical:

***C.** Any disease producing pox upon the udder or other parts of a cow. Edward Jenner discovered that there were several of these.

2. *Spec.:* That particular cutaneous disease affecting the udder of the cow, which, being transferred to the human frame, either gives an immunity from small-pox or diminishes its violence. That this is its effect had long been a popular belief among the dairy milkers in Gloucestershire, England, and when, prior to 1770, Jenner was an apprentice to Mr. Ludlow, an eminent surgeon at Sudbury, near Bristol, a young woman who came into the shop where he was, to ask advice, bearing small-pox mentioned, said with decision, "I cannot take that disease, for I have had cowpox." Jenner mused upon the statement, and spoke of it to scientific men, who all treated it with ridicule. Continued investigation, however, satisfied him of its truth, and about 1780 he struck out the brilliant thought that it might be practicable to propagate cowpox as a preservative against small-pox, by inoculating some human being from the cow, and from that person transferring the matter to another and another of the community till protection was obtained for all. This was the origin of vaccination (q. v.).

"What varied wonders tempt us as they pass!"

The cow-pox, tractors, galvanism, and gas."

Byron: *English Bards and Scotch Reviewers*.

A. As substantive:

Bot.: A well-known plant, *Primula veris*, of the same genus as the Primrose, *P. vulgaris*, the Oxslip, *P. elatior*, &c. The two last are very much akin. The first and second widely differ in appearance, but statements from time to time appear that they have been found growing from the same root, in which case they would not be two species, but varieties of one. To naturalists believing in the separate creation and subsequent immutability in essential character of each species, this would be an important fact; but Darwinians would regard it as of little moment. They would probably derive the Primrose, Cowslip, Oxslip, &c., from a now extinct primulaeous plant more generalized than any of these. The Cowslip has ovate-crenate, toothed, and wrinkled leaves, with the flowers in an umbellate scape. The flowers are sedative and diaphoretic. They make a pleasant soporific wine. The fresh root, which smells like anise, was formerly used as a tonic nerve and diuretic.

"The yellow May, who, from her green lap, throws
The yellow cowslip, and the pale primrose."

Milton: *On May Morning*.

2. Pottery: A frame on which loam-molds are placed in an oven to be burned, after the spindle is withdrawn.

3. *Hydraul. Engin.*: The frame in which a ship lies on the ways, and which accompanies her in launching; or, the frame in which a vessel lies on a way or slip, or in a canal-lift. A cradle was used in very early times in crossing the Isthmus of Corinth, from the Corinthian to the Cenchrean Sea. The place was called the *Diolos*, or drawing-place, and was five miles in length. This crossing-place was again used during the maritime warfare between the Genoese and the Turks. In its simple form, the cradle consists of three longitudinal timbers united by ribs or cross-pieces. This is floated beneath the ship, which is lashed thereto by cables. The cradle and its burden are then floated to the inclined ways or slip, up which it is hauled, being supported by rollers which intervene between the timbers of the cradle and those of the slip. (*Knight*.)

4. *Metal.*: A rocking apparatus, used in collecting gold from soil and sand by agitating the auriferous earth in water. The earth is shoveled into the sieve, and washed through its meshes by water, which also carries off the lighter earthy particles in suspension. The coarser matters, which do not pass the meshes of the sieve, are thrown out and the operation repeated. After a large quantity of earth has been thus disposed of, the contents of the cradle are washed in a pan and the gold obtained from the settings. (*Knight*.)

5. *Engraving*: A tool used by mezzotint-engravers. It consists of a steel plate with a proper tang and handle, and has angular grooves on its under surface, so that when the rounded end is obliquely ground, it will form a row of points by which a multitude of burrs are raised upon a plate. This is the mode of proceeding in mezzotint-engraving (q. v.), the cradle being rocked backward and forward, and retreating, making a zigzag series of burrs. This is crossed at right angles, and then several times diagonally, until the whole surface of the plate is roughened, so as to hold the ink of the copper-plate printer. The burnisher and scraper remove the burr in parts, according to the desired graduation of lights. (*Knight*.)

6. *Mining*: A suspended scaffold used by miners.

7. *Carp.*: The rough framework or bracketing forming ribbing for vaulted ceilings and arches intended to be covered with plaster.

"I, Robert Moth, this tenth of our king,

Give to thee, Joan Potluck, my biggest cramp ring,"

Ordinary (O. Pl.), x. 250.

cramp-stone, *s.* A stone carried about as a preservative against cramp. Such stones are said to have been first used about the middle of the eleventh century.

"A cramp-stone, as I take it,
Were very useful." *Messenger: The Picture*, v. 1.

crämp, *v. t.* [CRAMP, *s.*]1. *Literally*:

To affect with cramp.

"When the contracted limbs were cramp'd . . ."

Dryden: Virgil.

2. To bind, fasten, or confine with cramp-irons.

II. *Figuratively*:

1. To confine, to narrow down.

"There shall each poet share and trim,
Stretch, cramp, or lop the verse's limb."

Couper: An Ode; Secundum Artem, 1.

2. To hinder or restrain in growth, progress, or action.

"He who serves has still restraints of dread upon his spirits, which, even in the midst of action, cramps and ties up his activity."—*South: Sermons*.

3. To bind or unite together.

"The diversified but connected fabric of universal justice is well cramped and bolted together in all its parts . . ."

Burke: Speech at Bristol (1780).

cramped, *pa. par.* or *a.* [CRAMP, *v.*]

crämp-ērn, *s.* [Eng. *cramp*, and *iron*.] The same as CRAMP, *s.*, II. 2 (q. v.), and CRAMP-IRON (q. v.).

crämp-lāg, *pr. par.*, *a. & s.* [CRAMP, *v.*]

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As subst.*: The act of fastening or holding with cramp-irons.

***crämp-īsh**, ***crämpysse**, *v. t.* [Eng. *cramp*.] To cramp, to contract.

"She . . . crämpisheth her limmes crokeedly."

Chaucer: Queen Anelida, 174.

crämp-īt, **crämp-ēt**, ***cramp-bit**, *s.* [Gael. *crampaid*.]

1. A cramping-iron. (*Scotch*.)

2. An iron made to fit the sole of the shoe, with small spikes in it, for keeping the foot firm on ice or slippery ground.

"With crampets on our feet, and clubs in hand."

Muses' Threnodie, p. 149.

3. The cramp-iron of a scabbard.

"On the scabbard are placed four round plates of silver overgilt, two of them near to the crampit are enamelled blew, . . ."

Inventories, p. 341.

4. An iron spike driven in a wall for supporting anything.

5. The iron guard at the end of a staff.

crämp-ōn, **crämp-pōn**, *s.* [Fr. *crampion*.]

1. *Bot.*: An adventitious root, serving as a fulcrum or support.

2. *Mech.*: A clutch formed like a pair of calipers, used in raising objects.

"Man with his crampions and harping-irons can draw ashore the great Leviathan."—*Howell: Parly. of Beasts*, p. 7.

3. *Mil.*: Iron spikes worn on the boots, to assist the foothold in climbing the slopes of earthworks.

crämp-ōn-ēe, *a.* [Fr. *cramponné*, *pa. par.* of *crampionner* = to fix with a cramp.]

Her.: An epithet for a cross that has at each end a cramp or crampion.

crämp-pōon, *s.* [CRAMPON.]

†crämp-ŷ, *a.* [Eng. *cramp*;

ŷ.]

1. Suffering from or afflicted with cramp.

2. Causing or producing cramp.

crān, *crane*, *s.* [Etym. doubtful.] A sufficient quantity of unsalted herrings to fill a barrel. (*Scotch*.)

"They both fished and bought the herring fresh from the country people, at the great price of from 9s. to 12s. per crane (which is the full of a barrel of green fish) as taken out of the net."—*P. Utig. Lewis Statist. Acc.*, xix. 282. (*Jamieson*.)

***crān-age** (age as *lāg*), *s.* [Low Lat. *cranagium*.]

1. A liberty to use a crane for drawing up wares from the vessels, at any creek of the sea or wharf, unto the land, and to make profit of it. It signifies also the money paid and taken for the same. (*Cowel*.)

2. Money paid for the use of a crane.

"To this objection it might serve for a full answer, that there are other duties than customs and subsidies due upon the landing of wares: for example, wharfage, crantage, scavage, and such like."—*State Trials; The Great Cause of Impositions*, an. 1606.

crān-bēr-rŷ, **†crāne-bēr-rŷ**, *s.* [Eng. *crane*, and *berry*.]

I. *Singular*:

1. (*Of the form cranberry*): A plant, *Vaccinium oxycoccus*, having also the book-name of the Marsh Whortleberry. It has a filiform stem, ovate evergreen leaves, glaucous beneath, their margin revolute and entire; a terminal single-flowered peduncle, a four-parted revolute corolla, and a berry of a bright roseate hue. It is found in bogs. The berries are used for preserves and pies. The deeply divided revolute segments of the corolla have led Richard and other botanists to separate the species from *Vaccinium* and call it *Oxycoccus palustris*.

†1. *American Cranberry*: *Vaccinium macrocarpum*, or *Oxycoccus macrocarpus* or *macrocarpa*. It is found through a great part of North America. The berries are largely exported.

†2. *Tasmanian Cranberry*: An epacrid (*Astroloma humifusum*). It has scarlet blossoms and a green, whitish, or slightly reddish fruit, about the size of a currant; this consists of a viscid, apple-flavored pulp, inclosing a large seed.

II. *Pl. (Cranberries)*:

Bot.: The name given by Lindley to the order Vacciniaceæ (q. v.).

cranberry-gatherer, *s.* An implement shaped like a rake, and adapted to catch below the berries on the stalk, and collect them in a bag or box attached to the rake-head.

cranberry tart, *s.* A tart made of cranberries. [CRANBERRY, I. 1.]

***crānce** (1), *s.* [O. Fr. *cren*=a breach, cleft.] A crack or chink in the wall through which the wind blows.

crānce (2), *s.* [O. Fr. *crans*.]

1. *Naut.*: Any boom iron, but particularly an iron cap attached to the outer end of a bowsprit, through which the jib-boom passes.

2. *Fabric*: Probably some stuff made of hair.

***crānch**, *v. t.* [CRAUNCH.]

" . . . but she can cranch
A sack of small coal "

B. *Jonson: Magn. Lady*.

***crānch**, ***crānk**, *a.* [CRANK, *a.*] Lively, active, spirited.

crāne (1), *s.* [A. S. *cran*, *crano*, *cræn*; Sw. *krana*, *trane*; Dan. *trane* (the bird), *krane* (the machine); Dut. & Low Ger. *kraan*; H. Ger. *kranich*; Corn., Wel., & Arm. *garan*; Fr. *grue*; Sp. *grua*, *grulla*; Port. *grau*; Ital. *grua*, *gru*; Lat. *grus*; Gr. *geranos* = (1) a crane (the bird); (2) a crane for lifting weights . . . from the root *geran*.]

1. *Ornithology and Ordinary Language*:
(1) *Sing.*: Any bird of the genus *Grus*, or the family Gruidæ (q. v.). The Common Crane is *Grus cinerea*. The tip of the bill is horn-colored, its middle part greenish-black, the base reddish. The top of the head, which is naked, is of a red color; the plumage in general is an ashy-gray; the throat, neck, and occiput darker; the feet black—length 3 feet 3 in. to 3 feet 10 in. It is a gallinular bird, frequenting marshes, but has certain affinities to the Rasores. It is a migratory bird, in winter living in India, Egypt, and in summer migrating to the North. In these passages it flies, generally by night, high in air, in a large wedge-formed flock, led by a single leader, or in long lines, and with discordant cries. These movements attract the notice of the ancient classic writers. Where it breeds, which is in the north of Europe and Siberia, the nest is among rushes, or even on the walls of unfrequented houses. The eggs, two in number, are pale bluish-green, with brown markings. [GRUS, GRUIDÆ.]

"Like a crane, or a swallow, so did I chatter."—*Isa.* xxxviii. 14.

(2) *Pl.*: The birds of the genus *Grus*, or the sub-family Gruidæ, or the family Gruidæ (q. v.).

"That small infantry war'd on by cranes."—*Milton*.

2. *Astron.*: A small southern constellation, one of the twenty-seven introduced by Lacaille. It figures as *Grus*, the Crane.

3. *Mech.*: A machine for hoisting and lowering heavy weights. It consists of a vertical post or frame, which is rotatable on its axis, and a jib or projecting arm over which the chain or rope passes on its way from the winch at the foot of the post to the load to be lifted.

"In case the mold about it be so ponderous as not to be removed by any ordinary force, you may then raise it with a crane."—*Mortimer*.

"Then commerce brought into the public walk
The busy merchant, the big warehouse built,
Rais'd the strong crane."—*Thomson: Autumn*.

† The projecting arm or beam of a crane is the *jib*. The post and *jib* collectively are sometimes known as the *gibbet*. The diagonal is the *stay*.

4. *Nautical*:

(1) A forked post to support a boom or spare spar on deck.

(2) A projecting bracket to support spars, &c.

5. *Engin.*: An overhanging tube for supplying a tender with water; a water-crane.

6. *Lapid.*: A contrivance to hold a stone, and present it to the slicer of the lapidary. It consists of a clamp which moves horizontally, having its bearings on a vertical post rising from the bench of the lapidary. A weighted string is attached to the lever-arm, and keeps the stone constantly pressed up against the slicer. [SLICER.]

7. *Comm.*: A machine for weighing goods, on the principle of the crane.

8. *Domestic*: An iron arm or beam fixed to the back of a fireplace, and used for suspending pots, kettles, &c., on.

9. *Dist.*: A siphon, or bent tube, used for drawing liquors out of a cask.

*10. *Old War*: A kind of balista, or catapult, used for discharging large stones, in ancient warfare.

† (1) *Crowned Cranes*:

Ornith. (Pl.): The African Cranes of the genus *Balearica*.

(2) *Derrick Crane*:

Machin.: A form of crane having spars for jib and post. [DERRICK.]

(3) *Gigantic Cranes*:

Ornith.: A book-name for the Adjutants, which are not of the family Gruidæ, but are Ardeide (Herons) of the sub-family Ciconinæ (Storks).

(4) *Numidian Crane*:

Ornith.: The Demoiselle (*Anthropoides virgo*).

(5) *Stanley Cranes*:

Ornith., &c.: East Indian cranes of the genus *Anthropoides*.

(6) *True Cranes*:

Ornith.: A book-name for the sub-family Gruidæ, *crane-fly*, *s.*

1. *Sing.*: Any two-winged fly of the genus *Tipula* or the family Tipulidæ.

2. *Pl. (Crane-flies)*: The genus *Tipula* or the family Tipulidæ. The typical species is what is popularly known as Daddy Long-legs.

crane-necked, a. Long-necked.

crane, v. i. & t. [CRANE, s.]

A. Intrans. To stretch out one's neck like a crane; to stare.

***B. Trans.** To raise, to lift.

crane's-bill, crane's-bill, s. [Eng. crane's, and bill.]

I. Bot., &c.:

1. Sing. (Of the two forms): A general English name for the species of *Geranium*.

"Is there any blue half so pure, and deep, and tender, as that of the large crane's-bill, the *Geranium pratense* of the botanists?"—*Black: Advent of a Phaeton*, ch. xx (Davies.)

2. Pl. (Of the form Crane's-bill): The name given by Lindley to the order Geraniaceae (q. v.).

¶ Crowfoot Crane's-bill: [So called from the form of the leaves.] *Geranium pratense*.

II. Surg. (Of the form Crane's-bill): A pair of long-nosed pincers.

crāng, s. [Dut. *krang*=a carcass.] The carcass of a whale. [KRANG.]

***crān-gle, v. t.** [CRANKLE, CRINKLE.] To twist, to curl.

crāng-ōn, s. [Gr. *krangōn*=a shrimp, a prawn; or some similar animal.]

Zool.: A genus of Crustaceans, the typical one of the family Crangonidae (q. v.).

crāng-ōn-i-dæ, s. pl. [Mod. Lat. *crangon*, and fem. pl. adj. suff. -i-dæ.]

Zool.: A family of macrourous (long-tailed) Crustaceans. The internal antennae are inserted in the same line as the external ones, the first joint of the latter having a large oval or triangular appendage. The front pair of feet are terminated by a monodactylous hand or subcheliform extremity. [CRANGON.]

crā-nī-a, s. [Low Lat. *cranium* (q. v.).] [CRANIUM.]

Zool.: A genus of Mollusks, the typical one of the family Craniidae. The shell is smooth or radiately striated, the umbo of the dorsal valve subcentral; that of the ventral valve subcentral, marginal, or prominent and cap-like, with an obscure triangular area traversed by a central line. Five recent species are known from Spitzbergen, Britain, the Mediterranean, India, and New South Wales; thirty-seven fossil have been found from the Lower Silurian onward till now. The range of the former is to 150 fathoms.

crā-nī-a-dæ, †crā-nī-i-dæ, s. pl. [Mod. Lat. *crania*, and fem. pl. adj. suff. -i-dæ.]

Zool.: A family of Mollusks, class Brachiopoda. The shell, which is punctate, is orbicular, calcareous, and hingeless, attached by the umbo or by the whole breadth of the ventral valve, rarely free; the dorsal valve is limpet-like, the disk with four large muscular impressions, and digitated vascular ones. Only known genus, *Crania* (q. v.).

crā-nī-ā, s. [Mod. Lat. *cranialis*, from *cranium* (q. v.), and suff. -alis.] Pertaining or relating to the cranium (q. v.). Thus there are a cranial cavity, a cranial flexus, cranial arteries, nerves, ganglia, and sinuses.

crā-nīch-i-dæ (ch guttural), s. pl. [Mod. Lat. *cranchis* (q. v.), and fem. pl. adj. suff. -i-dæ.]

Bot.: A family of Orchids, tribe Neottieae.

crā-nīch-is (ch guttural), s. [Gr. *kranos*=a helmet, which the flower somewhat resembles, and *ichis*, an arbitrarily formed suffix (†).]

Bot.: A genus of Orchids, the typical one of the family Cranchiidae (q. v.). The flowers are inconspicuous. The genus is somewhat large. The species are natives of America.

crā-nī-i-dæ, s. pl. [CRANIADÆ.]

crā-nī-ō, in compos. [Lat. *crani*(um); o connective.] Pertaining or related to the cranium and also to some other part.

cranio-facial, a. Pertaining to the cranium and to the face. Thus there is a cranio-facial axis formed by certain bones.

cranio-vertebral, a.

Anat.: Pertaining or relating to the cranium and to the vertebrae.

†crā-nī-ōg-nō-mý, s. [Gr. *kranion*=the skull, and *gnomē*=the means of knowing, a mark, a token, . . . the organ by which one perceives or knows, the mind, . . . judgment, opinion.] The science founded on knowledge of the peculiarities of the cranium in different individuals or races.

crā-nī-ōld, s. [Mod. Lat. *crania* (q. v.), and Gr. *eidos*= . . . form.]

Zool.: Resembling the mollusks of the genus *Crania*; pertaining to the family Craniadæ.

crā-nī-ō-lār-i-s, s. [Dimin. of Low Lat. *cranium*=a skull, which the capsules somewhat resemble, and fem. sing. adj. suff. -aria.]

Bot.: A genus of Pedaliads, tribe Pedaleæ. The fleshy sweet root of *Cranio-laria annua*, a West Indian plant, when dry is said to be a bitter cooling medicine. Moreover, it is preserved in sugar as a delicacy.

crā-nī-ōl-ōg-ic-ā, a. [Eng. *craniology*(y); -ical.] Pertaining or relating to the science of craniology (q. v.).

crā-nī-ōl-ōg-ist, s. [Eng. *craniology*(y); -ist.] One who studies the science of craniology (q. v.).

crā-nī-ōl-ōg-y, s. [Fr. *craniologie*; Gr. *kranion*=the skull, and *logos*= . . . a discourse.] A scientific study of the cranium. It is generally held to be the same as Phrenology (q. v.), but the examination of the cranium is an essential part of anatomy, altogether independent of the inferences with regard to the mental proclivities which may be deduced from it. The comparison of different crania is also essential to ethnology and archaeology.

crā-nī-ōm-ēt-ēr, s. [Gr. *kranion*=the skull, and *metron*=a measure.] An instrument for measuring the sizes of skulls. Dr. Morton gives the following as the average result of numerous measurements of skulls:

European . . .	87 cubic inches.
Malay . . .	85 " "
Negro . . .	83 " "
Mongol . . .	82 " "
Ancient Egyptian . . .	80 " "
American . . .	79 " "
Ancient Peruvian 75 to 79 . . .	" "

Professor Huxley says that the most capacious European skull has a capacity of 114 cubic inches; the smallest, 55 inches. Schaeffhausen finds Hindoo skulls of 46 cubic inches.

crā-nī-ō-mēt-rī-ē-ā, a. [Eng. *craniometry*(y); -ical.] Pertaining to craniometry (q. v.).

crā-nī-ōm-ēt-rý, s. [Fr. *craniométrie*.] [CRANIOMETRY.] The measurement of the cranium.

"In connexion with the author's own special study of *craniometry*."—*Athenæum*, March 4, 1882.

crā-nī-ōs-cōp-ist, s. [Eng. *cranioscopia*(y); -ist.] One proficient in, or at least who studies cranioscopia (q. v.).

crā-nī-ōs-cōp-y, s. [French *cranioscopie*; Gr. *kranion*=the skull, and *skopeō*=to look at or after a thing.] The examination of the cranium for scientific purposes.

crā-nī-ūm, s. [Low Lat., from Gr. *kranion*=the skull.]

Anat.: The bony or cartilaginous case containing the brain. The cranium and the face taken together constitute the skull. In shape it is spheroidal, a form which offers the greatest resistance to external violence. This strength is increased by the compound structure of the cranial bones, which, as a rule, are in two tables, the one external, the other internal. The cranium is composed of eight bones; one, the occipital bone, two parietal, one frontal,

Cranium.

o. Occipital.	p. Parietal.	f. Frontal.
t. Temporal.	s. Sphenoid.	e. Ethmoid.

and two temporal bones, with the sphenoid and the ethmoid bones. The principal part of the vault of the cranium is formed by the parietal bones, which rest upon the wings of the sphenoid and upon the

temporal bones: these so overlap the lower parts of the parietal bones, as to prevent them starting out; in fact, they operate in the same way as the tie-beams in the roofs of houses.

"That substances and modes of every kind
Are mere impressions on the passive mind;
And he that splits his cranium, breaks at most
A fancied head against a fancied post."

Cooper: *Anti-Thelipphora*.

crānk, *cranke, s. [An original English root, of which other languages have only less distinct traces: the original form was *krank*=to bend, to twist. Cf. Dut. *kronkel*=a rumple, a wrinkle; *kronkeln*=to rumple, to wrinkle, to bend, to turn, to wind. (Skeat.)] [CRANK, a.]

A. Ordinary Language:

1. Lit. (Of a material body, as a planet, &c.):

1. A turn, winding, or revolution.

"So likewise grim Sir Saturne oft doth spare
His stern aspect, and calmed his crabbed looks.
So many turning cranks these have, so many crookes,"
Spenser: *F. Q.*, VII. vii. 52.

2. In the same sense as B.

II. Figuratively:

1. Any turn, revolution, or vicissitude.

"Through the cranks and offices of man."
Shakesp.: *Coriol.*, i. 1.

2. Any conceit formed by twisting or changing in any manner the form or meaning of a word; a pun.

"Haste thee, nymph, and bring with thee
Jest and youthful jollity,
Quips and cranks, and wanton wiles."

Milton: *L'Allegro*, 21.

3. A vagary; a fanciful freak; any strange or abnormal action caused by an unbalanced, unsteady or distempered mind.

"Violent of temper; subject to sudden cranks."
Carlyle.

B. Technically:

1. Machinery:

(1) An arm (called the web) at right angles to an axis, by which motion is imparted thereto or received therefrom. The crank on the axis of a grindstone or a fanning-mill is a familiar instance. The crank is also a valued device in converting a rotary into a reciprocating motion, or conversely. An example of the former is found in the saw-mill; of the latter, in the steam-engine. Watt is the inventor of the latter application of it. The crank was first used in connection with steam-navigation by William Symington, in 1802, on his second steam-boat, the "Charlotte Dundas." The crank was fixed on the paddle-shaft of the stern-wheel which impelled the vessel, and was worked from the piston-rod by means of a connecting-rod. Since then the crank has superseded the sun-and-planet wheel motion and all other devices for producing rotary motion in the steam-engine. The bell-crank, so called from its frequent use in bell-hanging, is only used to change the direction of a reciprocating motion. A two-throw or three-throw crank-shaft is one having so many cranks set at different angles on the shaft.

(2) A contrivance used for labor in prisons, consisting of a small wheel, like the paddle-wheel of a steamer, which the prisoner has to turn with a handle in a box more or less filled with gravel.

2. Naut.: Iron braces which support the lanterns on the poop-quarters.

3. Mining: That part of the axle of the fly which is bent into three knees, or right angles, and three projecting parts; one of the parts is parallel to the axis, and has the upper part of the crank-hook colored round it. (Weale.)

crānk, *cranck, *cranke, a. & s. [Icel. *krankr*=sick, ill; Dut. & Ger. *krank*.] [CRANK, s.]

A. As adjective:

1. Ordinary Language:

***1. Sick, ill.**

2. In a shaky or loose condition; cranky.

"In the case of the Austrian Empire the crank machinery of the double government would augment all the difficulties and enfeeble every effort of the State."—*London Times*.

***3. Lively, merry, brisk, active, sprightly.**

"He, who was a little before bedred and caried lyke a dead karkas on fower mannes shoulders, was now cranke and lustie."—*Udall Markii*.

***4. Strong, mighty.**

"Towered the Great Harry, crank and tall."

Longfellow: *The Building of the Ship*.

***5. Peevish, morose, sour-tempered, cranky.**

II. Naut.: Liable to upset; an epithet for a vessel when she cannot bear her sail, or when her floor is so narrow that she cannot be brought on the ground without danger.

"In playing down the river, the Revolution was found to be very crank, which made it necessary to put into Sheerness in order to remove this evil, by making some alteration in her upper works."—*Cook: Voyage*, vol. iii., bk. i., ch. i.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, there; plne, plt, sīre, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite. cūr, rāle, fūll; try, sýrian. æ, œ = ē; ey = ā. qu = kw.

B. As substantive:

1. A sick person.

"... some notable examples of such counterfeit cranks, and every village almost will yield abundant testimonies amongst us; we have Dummerers, Abraham-men," &c.—*Burton: Anat. of Melancholy*, p. 159.

2. One whose habitual conduct is out of the common course, or at variance with that which is usual to persons of well-balanced minds; a crack-brained fanatic or visionary; one given to fanciful and impracticable projects; a monomaniac.

crank-axle, s.

1. *Vehicles*: An axle bent down between the wheels, in order to lower the bed of the wagon and make loading more easy.

2. *Steam-engine*: The driving-axle to which are connected the piston-rods of a locomotive engine. This is the usual English form; in America we connect to wrists on the drive-wheels. (*Knight*.)

crank-bird, s. A name sometimes given to the Lesser Spotted Wood-pecker (*Picus minor*).

crank-brace, s. The usual form of brace, which has a bent shape by which it is rotated.

crank-hatches, s. Hatches for covering the cranks of the engines within steamboats.

crank-hook, s. The bar connecting the treadle and crank in the common foot-lathe.

crank-pin, s. A pin connecting the ends of a double crank or projecting from the end of a single crank. In either case it is for the attachment of a pitman or connecting-rod.

crank-puller, s. A machine for pulling the crank off an axle or shaft. (*Knight*.)

crank-shaft, s. A shaft driven by a crank, such as that of the grindstone

crank-wheel, s. A wheel having a wrist to which a pitman or connecting-rod is attached, and acting as a crank, while the peripheral portion may act as a fly-wheel, or may constitute a pulley or a traction-wheel. (*Knight*.)

***cránk**, v. i. & t. [CRANK, a.]

1. *Intrans.*: To run in and out, to wind and turn, to dodge.

"He cranks and crosses with a thousand doubles." *Shakesp.: Venus and Adonis*.

2. *Trans.*: To shackle; to apply the hob or hamshackle to a horse.

"As for the reward of presumption, it is in Scotland to be *crankit* before and kicked behind."—*Pertis of Men*, i. 267.

cránked, a. [Eng. *crank*; -ed.] Having a bend or turn.

cranked tool, s.

Iron-turning: A tool which is made to embrace the rest, by which it is prevented from slipping away from the work. A pin is inserted in one of the holes in the rest, to prevent the escape of the tool sideways. The direct penetration is obtained by depressing the handle; the lateral motion by rotating the tool by its transverse handle, which may be a hand-vise temporarily screwed upon the shaft, or a shoulder-rest handle. (*Knight*.)

cránk'-lág, pr. par. or a. [CRANK, v.]

***cránk'-kle**, v. i. & t. [A freq. form from *crank*, v. (q. v.)]

1. *Trans.*: To break into turns or angles; to bend, to wind.

"Old Vaga's stream,
Fore'd by the sudden shock, her wonted track
Forsook, and drew her humid train aslope,
Cranking her banks." *Philips: Cider*, bk. i.

2. *Intrans.*: To bend, to turn, to twist, to wind.

"Now on along the cranking path do keep,
Then by a rock turns up another way." *Drayton: The Barons' Wars*, bk. vi.

***cránk'-kle**, s. [CRANKLE, v.] A bend, a turn, a twist, a winding; an angular prominence.

***cránk'-kled**, a. [Eng. *crankle*(e); -ed.] Bent, twisted, turned.

***cránk'-klíng**, pr. par. or a. [CRANKLE, v.] Twisting, bending, turning, winding.

"Meander, who is said so intricate to be,
Hath not so many turns, nor cranking nooks as she." *Drayton: Polyolbion*, § 7.

cránk'-ness, s. [Eng. *crank*; -ness.]

1. *Ord. Lang.*: Health, vigor.

2. *Naut.*: A disposition to overset.

***cránk'-öus**, a. [Eng. *crank*; -ous.] Fretful, irritable, capacious, cranky.

"This while she's been in *crankous* mood,
Her lost Militia fir'd her bluid." *Burns: Earnest Cry and Prayer*.

cránk'-ý, a. [Eng. *crank*; -y.]

1. *Ord. Lang.*: Irritable, whimsical, fidgety.

"What a *cranky* old brute!"—*H. Kingsley: Geoffrey Hamlyn*, ch. xxvii.

2. *Naut.*: Liable to be overset; crank.

crā-tæg-in, *s.* [Class. Lat. *crategus* (*us*); and Eng. suff. -*in*.]

Chem.: A crystalline bitter substance obtained from the fresh-branch bark of the White-thorn, *Crategus Oxyacantha*. It is soluble in water, slightly soluble in alcohol, and insoluble in ether.

crā-tæg-is, *s.* [Lat. *crategus*, *crategon*; Gr. *krataigos*, *kratagōn*=a kind of flowering thorn, *Crategus azarolla*, or *Pyrus terminalis* (?).]

Bot.: A genus of trees, order Pomaceae. Calyx segments short and acute, petals large and roundish, styles 1 to 5, fruit oval or round, concealing the upper end of the cells, which are long. It differs from the genus *Pyrus* in containing a variable number of stones, and from the medlar by having the fruit closed. The genus contains about eighty well-marked species and varieties, occurring in the temperate parts of both hemispheres. *Crategus Oxyacantha* is the Hawthorn, or May. It is a European thorn. [HAWTHORN.] The Oriental species have heavy leaves, large fragrant flowers, and large, succulent, somewhat angular fruit; those of America are often very spinous. Finally, some species of the genus—viz., *C. mexicana* and *C. pyracantha*—are evergreens.

crā-tæg-vā, *s.* [Named after Cratævus, a Greek botanist who lived in the time of Hippocrates—i.e., about 430 B. C.]

Bot.: A genus of hypogynous exogens, order Capparidaceae, tribe Cappareae. Leaves trifoliate, flowers in cymes, sepals four, petals four, unguiculate; stamens 8 to 23; berry stalked, between oval and globose; within pulpy. *Cratæva gyanandra* is the Garlic Pear of Jamaica. The root blisters like cantharides. *C. Tapia* is the Tapia, or Common Garlic Pear, of the West Indies and South America; the bark is bitter and tonic, and the bruised leaves are used in Brazil against inflammation. *C. excelsa*, a native of Madagascar, furnishes planks four feet wide. The juicy berries of *C. nurvala* are agreeable. (*Lindley.*)

***cratayn**, *s.* [A corruption of *craven* (q. v.).] A craven, a coward. [CRAWDOWN.]

crāte, *s.* [Lat. *crates*=a hurdle.]

1. A large wicker hamper with wooden supports, in which crockery-ware is packed for transportation. *Crates* among the Romans corresponded to the English hurdles. They were of wickerwork, and were used for screens, for leveling ground after rough-raking (*rastrum*); also for drying fruit.

2. An iron cage used in crematories for conveying a corpse into the consuming furnace.

"No one else was admitted to the room where the preparations were made or to see the doors of the furnace open to receive the heavy iron crate which served as a carrier from the cooling room outside to the flames within."—*Chicago Tribune*, Dec. 21, 1893.

crā-tēr, *s.* [Lat. *crater*; Gr. *kratēr*=a mixing vessel . . . large bowl . . . any cup-shaped hollow . . . the mouth of a volcano.]

1. *Class. Archaeol.:* A large bowl. (*Etym.*)

"It was decreed that with the sum thus obtained a golden crater should be dedicated to Apollo."—*Lewis: Ear. Rom. Hist.*, ch. xii., pt. v., § 74, vol. ii., p. 305.

2. *Geol. & Ord. Lang.:* The basin-like, circular opening, generally at the apex of a volcanic cone, from which the eruption takes place. It is formed in the following way: A chasm or fissure opens in the earth, from which great volumes of steam and other gases are evolved. Shattered lava, fragments of broken stone, sand, &c., follow; and, falling in heaps, lay the basis of what, by the continuance of the same process, will ultimately become a volcanic cone.

The movement upward of steam and other gases keeps open a passage from beneath to the apex of the cone. This passage is the crater. The efflux of lava may ultimately consolidate it, or it may produce the contrary effect and break it down. There may be many cones and many craters, or one large volcano, and escape of gases may be by long fissures instead of by cup-shaped craters. (*Lyell, &c.*)

3. *Astronomy:*

(1) In the same sense as *lyell*. There are apparent craters in the moon, and much larger than those in the earth, being sometimes as much as 100 miles across.

(2) A constellation, called in English the Cup, one of the fifteen ancient southern constellations.

4. *Electricity:* The depression that forms in the positive carbon of a voltaic arc.

*[*Elevation crater theory:*

Geol.: A theory which explained the rise of volcanic cones with their craters by supposing that the concentric beds of scoriae, &c., now forming the cone were originally horizontal, but were upheaved to their present position by subterranean force. It was held by Von Buch, Elie de Beaumont, and others; but is now generally abandoned, the rival theory of *Lyell* and others being that the beds in question have been formed by the descent of materials ejected into the air by successive eruptions, and arranging themselves at or about the angle at which we now find them as they fell.

crā-tēr-ā, *s.* [Lat.=a vessel in which wine was mixed with water, a bowl.]

Bot.: The cup-shaped receptacles of certain fungi. (*Treas. of Bot.*)

crā-tēr-i-form, *a.* [Latin *cratera* (q. v.), and *forma*=form, shape.]

1. *Geol., &c.:* Shaped like a cup or a volcanic crater. (Used of mountains, hills, &c.)

"Mr. Darwin, in his 'Volcanic Islands,' has described several crateriform hills in the Galapagos Archipelago . . ."—*Lyell: Princip. of Geol.*, ch. xxiv.

2. *Bot.:* Globe-shaped, concave, hemispherical, a little contracted at the base.

***crā-tēr-ōus**, *a.* [Eng. *crater*; -ous.] Pertaining to, containing, or resembling a crater.

Crater.

crāt-ōx-ŷ-lōn, s. [Gr. *kratos*=strength, and *xylos*=firewood, timber.]
Bot.: A genus of hypogynous exogens, order Hypericaceae, tribo Elodeae. The capsule is three-lobed, with winged seeds. The species are bushes or small trees, with opposite leaves. *Cratoxylon Hornschuchii*, which grows in Java, is slightly astringent and diuretic.

créase (1), *s.* [*A Celtic word*. Cf. Bret. *kriz*=a wrinkle; Sw. *krus*=a curl, *krusa*=to curl; Ger. *krus*=crisped, curled, *kräuseln*=to curl, to crisp.]

I. Ordinary Language:

1. A line or mark made by folding or doubling anything.

2. A slight hollow or indentation.

"... small *creases* or furrows."—*Todd & Bowman*: *Physiol. Anat.*, vol. i., ch. xiv., p. 410.

II. Technically:

1. *Mech.*: A creaser.

2. *Cricket*: A name given to certain lines marked on the ground at each wicket. They are three in number, the *bowling-crease*, the *return-crease*, and the *popping-crease*. The first extends in a straight line at right angles to the line of play, 3 ft. 4 in. each side of the center of the stumps. The second is a short line drawn at an angle to the end of the bowling-crease. The bowler in delivering his ball must have one foot behind the bowling-crease, and within the return-crease. The popping-crease is a line drawn parallel to the bowling-crease, and at a distance of 4 feet from it. It is unlimited in length. The batsman cannot move out of the space between the bowling and popping-creases except at the risk of being put out.

crease (2), *s.* [*CREESE*.]

créase, *v. t.* [*CREASE*, *s.*] To make a crease or mark in by doubling or folding.

"Under a tea-cup he might lie
Or *crease*'d, like dog's ears, in a folio."

Gray: *Long Story*.

créased, *pa. par. or a.* [*CREASE*, *v.*]

créas-êr, *s.* [*Eng. crease*(e); *-er*.]

I. Ord. Lang.: One who or that which creases.

II. Technically:

1. *Leather-working*: A tool used for making single or double lines on leather, to form guides or creases to sew by. They are also used for lining leather, to give it a finished appearance.

2. *Iron-working*: A tool used by sheet-iron workers for rounding small beads and tubes. Its shank has a tang by which it is secured in a square socket

of the work-bench. Top and bottom creasing tools, of any suitable size and pattern, may be set in the jaws of a creasing-swage, the lower end of whose frame has a tang to set in the work-bench, while the upper hinged portion carries the top tool and is struck by a hammer.

3. *Book-binding*: A tool for making the band-impression distinct on the back.

4. *Sewing-machine*: An attachment which makes a mark in a line parallel with the work in hand, to indicate the place for the next seam or tuck.

créas-îng, *pr. par., a. & s.* [*CREASE*, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. *Ord. Lang.*: The act of making a crease or mark in anything by folding or doubling; a crease.

"It is rather a mass, with longitudinal parallel streaks, many of which are *creasing*."—*Todd & Bowman*: *Physiol. Anat.*, vol. i., ch. i., p. 69.

2. *Building*: A layer of tiles forming a corona for a wall.

creasing-hammer, *s.* A narrow rounded-edge hammer, used for making grooves in sheet metal.

creasing-tool, *s.* A creaser (*q. v.*).

cré-âs-ôl, *s.* [*Eng.*, &c., *creas*(ote), and Lat. *ol(eum)*=oil.]

Chem.: Creosol, $C_8H_9O_2$. A diatomic phenol, obtained by the dry distillation of guaiacum, also from creasote. It is a colorless, oily, refractive, odorless liquid, with a pungent taste. Its density is 1.037, boiling at 203°. It burns with a smoky flame.

cré-â-sôte, **cré-ô-sôte**, **†kré-â-sôte**, *s.* [*Fr. créosote*; Gr. *kreas*=flesh, and *sôzô*=to save. So named because of its ability to preserve animal substances from decay.]

1. *Comm.*: An impure creasol, mixed with phenol. Wood creasote has powerful antiseptic power. Wood smoke contains this substance, hence its power of preserving meat. Creasote is used to relieve toothache, but often injures the neighboring teeth.

2. *Phar.*: Creasotum is obtained by distilling wood-tar. It is a colorless liquid, with a strong empyreumatic odor. It is slightly soluble in water, readily soluble in alcohol, ether, and in glacial acetic acid; it coagulates albumen, and turns the plane of polarization of a ray of polarized light to the right. It is used to prepare *Mistura Creasoti*, *Unguentum Creasoti*, and *Vapor Creasoti*. A slip of deal wood dipped into it, and afterward into hydrochloric acid, acquires on exposure to the air a greenish-blue color. German creasote is prepared by distilling beech-wood. Creasote is a mixture of phenol, guaiacol, paracresol, &c.

creasote-appliance, *s.* A dentist's instrument intended to prevent fluid caustics, such as creasote or solution of nitrate of silver, from running down and cauterizing the lips when being applied to the gums. A spiral platinum-wire carries the sponge, and a glass tube attached to the handle and surrounding the wire catches any of the caustic which may run down the wire. (*Knight*.)

cré-â-sôte, **cré-ô-sôte**, *v. t.* [*CREASOTE*, *s.*] To treat or saturate with creasote.

cré-â-sô-tîng, **cré-ô-sô-tîng**, *pr. par., a. & s.* [*CREASOTE*, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: A mode of preventing decay of timber by saturating with creasote. This is said to coagulate the albumen, absorb the oxygen, resinify in the pores of the wood and exclude air, and act as a poison to prevent fungi, acari, and other parasites. (*Knight*.)

†créas-ÿ, *a.* [*Eng. creas*(e); *-y*.] Full of or marked with creases.

"The babe who reared his *creasy* arms."

Tennyson: *Enoch Arden*.

creat, *s.* [*Fr.*, from Lat. *creatus*; Ital. *creato*; Sp. *criado*=a pupil.]

Manège: An usher to a riding-master.

†cré-â-ta-ble, *a.* [*Eng. creat*(e); *-able*.] Possible to be created

cré-âte, ***creat**, *v. t.* [*CREATE*, *a.* In *Fr. créer*; Sp. & Port. *crear*, *criar*; Ital. *creare*.]

1. To make out of nothing; to cause to exist; to bring into existence.

"In the beginning God *created* the heaven and the earth."—*Genesis* i. 1.

2. To produce, to cause, to be the occasion of.

"Long abstinence is troublesome to acid constitutions, by the uneasiness it *creates* in the stomach."—*Arbuthnot*.

3. To produce, to compose, to arrange, to be the author of.

"... seem'd by some magician's art
Created and sustain'd."

Cooper: *On the Queen's Visit to London*, March 17, 1789.

- *4. To beget.
5. To appoint, to constitute, to invest with a new character.

"Arise, my knights o' th' battle: I create you
Companions to our person, and will fit you
With dignities becoming your estates."
Shakesp.: *Cymbeline*, v. 5.

- *6. To form, to make.

"King Richard might create a perfect guess."
Shakesp.: *Henry VI.*, Pt. II., iii. 1.

For the difference between to create and to cause, see CAUSE; for that between to create and to form, see FORM; and for that between to create and to make, see MAKE.

*crē-ā-tē, *creat, a. [Lat. *creatus*, pa. par. of *creo*=to create.]

1. Brought into existence, created.

"Since Adam was create, five thousand yeeres I gesse
Five hundred, forty more and five as stories do
expresse."
Gascoigne: *Dan Bartholomew of Bathe*.

2. Composed, made up.

"Hearts create of duty and of zeal."
Shakesp.: *Henry V.*, ii. 2.

crē-āt-ēd, pa. par. or a. [CREATE, v.]

crē-āt-ic-ō-lō, s. pl. [The pl. of Lat. *creaticola* = the worshiper of a created being, from *creatus*=created, i. connective, and *colō*=to worship.]

Ch. Hist.: A monophysite sect in the sixth century who followed Severus in holding that, previous to the resurrection of our Savior, His body was corruptible. They were called also Phartolatre and Kistolatre. All the three names were bestowed upon them by their foes. (Mosheim: *Ch. Hist.*, cent. vi., pt. ii., ch. v., § 8.)

crē-at-ine, s. [Ger. *kreatin*, from Gr. *kreas*, genit. *kreatos*=flesh, and suff. -ine (Chem.).]

Pharmacy and Chemistry: Methyl-glycocycamine. Methyl-guanido-acetic acid, $C_4H_9N_3O_2 + H_2O$, or $HN=C(NH_2)CH_2COOH$. Creatine is obtained from the muscular flesh of mammalia, birds, reptiles, and fishes. It has been found in the blood and urine, and in the brains of pigeons and dogs. It is obtained by chopping up the lean muscular flesh, removing the fat, and rubbing it with water and pressing it; the liquid is heated in a water-bath to coagulate the albumen, then strained; to the filtrate baryta-water is added so long as it gives a precipitate, the filtrate concentrated on a water-bath, the crystals, which separate, decolorized by animal charcoal and re-crystallized from water. Creatine crystallizes in rhombic needles containing one molecule of water, which is driven off at 100°. The water solution has a bitter taste, and is neutral to litmus. It gives a white precipitate with silver nitrate, which is soluble in potash. After a time the solution solidifies to a transparent gelatinous mass, which is reduced when heated. Creatine heated gives off ammonia and hydrocyanic acid. Creatine is dissolved by strong acids; it loses a molecule of water, and is converted into Creatinine. By boiling with baryta-water creatine is decomposed, yielding sarcosine, methyl glycocine, $C_3H_7NO_2 + urea CO < NH_2$. Creatine has been formed synthetically by heating cyanamide $C \begin{smallmatrix} NH \\ NH \end{smallmatrix}$ with sarcosine, $CH_2 < NH < COOH$, in an alcoholic solution to 100° for some hours; or leaving a mixed aqueous solution to evaporate, the creatine separates out in crystals. Creatine heated to redness with soda-lime in a tube, yields NH_3 and methylamine, NH_2CH_3 .

crē-ā-tīng, pr. par., a. & s. [CREATE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of giving existence or being to; production, creation.

"For he opens the whole discussion by stating,
That God can only exist in creating."
Longfellow: *The Golden Legend*, vi.

crē-āt-in-ine, s. [Eng. *creatin(e)*; suff. -ine in Ger. *kreatinin*.]

Pharmacy & Chemistry: Methyl-glycocycamidine, $NH-CO$.

$C_4H_7N_3O$, or $HN-C < N(CH_3)CH_2$.

Creatinine occurs in urine and in muscular flesh; it is found in the mother liquor formed in the preparation of creatine. It can be prepared by the action of strong acids on creatine, also by evaporating, below 100°, fresh urine neutralized with carbonate of sodium to a syrup. The syrup is exhausted by alcohol, and the filtrate is mixed with a concentrated alcoholic solution of zinc chloride; the precipitate, after standing some time, is washed and boiled with water; the filtrate is evaporated; the crystals are dissolved in hot water and purified by recrystallization; the solution in boiling water is then digested with hydrated lead oxide, filtered from the oxide of zinc and oxylchloride of lead,

purified by blood charcoal; strong alcohol dissolves the creatinine and leaves the creatine. Creatinine forms colorless prisms, very soluble in water and in alcohol; a concentrated solution has an alkaline taste, reddens turmeric, and turns red litmus blue. It is a strong base. Creatinine concentrated solution gives a ruby-red color, when made slightly alkaline with potash and nitro-prusside of sodium is added. Creatinine forms salts with acids. (Watts: *Dict. Chem.*, &c.)

crē-ā-tion, *creacion, s. [Lat. *creatio*, from *creo*=to create; Fr. *création*; Sp. *creacion*; Ital. *creazione*.]

I. Ordinary Language:

1. The act of creating, or of calling into existence out of nothing.

"The mind finds no great difficulty to distinguish the several originals of things into two sorts: First, When the thing is wholly made new, so that no part thereof did ever exist before; as when a new particle of matter doth begin to exist, in *rerum natura*, which had before no being; and this we call *creation*."—Locke: *Hum. Underst.*, bk. ii., ch. xxvi.

2. (Spec.): Used absolutely; the act of bringing the world into existence.

3. The point of time when the world was created.
4. The act of appointing, constituting, or investing with a new character or position.

"The Gazette which announced these *creations* announced also that the King had set out for the Continent."—Macaulay: *Hist. Eng.*, ch. xx.

5. The foundation or first constituting of anything.

"This detailed account of the *creation* of the dictatorship, and of the appointment of the first dictator, is given by Dionysius."—Lewis: *Cred. Early Rom. Hist.* (1855), ch. xii., pt. I., § 9, vol. ii., p. 27.

6. That which is created or produced.

"The treacherous colors the fair art betray,
And all the bright creation fades away!"

Pope: *Essay on Criticism*, 492-3.

1. (Spec.): The universe, the world.

"For me your tributary stores combine.

Creation's heir, the world, the world is mine."

Goldsmith: *The Traveler*.

8. An original work, composition, or production.

"... and Schubert's Trio in E flat, Op. 100, the latter one of its composer's most individual *creations*."—*Athenæum*, March 4, 1882.

II. Technically:

1. Theol.: The act of creating out of nothing, one of the three great operations attributed to God, the others being providence and redemption.

2. Geol.: In the same sense as 1.

- † (1) Center or Centers of Creation:

(a) Sing. (Center or focus of Creation): A point or place on the earth's surface where it is assumed that a certain individual species was created, and whence it is supposed that it diffused itself to the various regions in which it is now found.

(b) Pl. (Centers or foci of Creation): Certain spots on the earth's surface where not one but various, or perhaps even many species may have been created, and whence they may have been disseminated. The Darwinians would object to the use of the word *creation* in connection with "the origin of species," but admit centers or foci where they have come into being.

(2) Date, era, or epoch of the Creation: There are about 140 opinions professedly founded on calculations made from Scripture with respect to the era of the Creation. The highest date given is B. C. 6984, the lowest 3616, a difference of 3,368 years. One chief reason of the discrepancy is the fact that the Hebrew and the Septuagint chronologies of Genesis v., and some other parts of the same book, differ widely, and there may be difference of opinion as to which has been changed. [CHRONOLOGY.] The geologist draws a wide distinction between the date when man first came into being and that at which the world was produced. The first is a very recent event, if marked on the scale of geological time, but a very remote one as compared with the date assigned by those who have made their calculations solely from the Hebrew or the Greek Septuagint numbers. [ANTIQUITY OF MAN.] Various Christian harmonists have attempted to reconcile Scripture and science in this and other respects. [HARMONY.]

(3) The hypothesis of successive creations: The view was held by Murchison and many others that successive creations have taken place, each an advance on its predecessor.

"These views of the successive creation of different races are, it is true, mainly based upon the progressive rise in the scale of the vertebrate sub-kingdom."—Murchison: *Siluria*, ch. xxviii.

*creation-day, s. The day on which anything is called into existence.

"... whom God, on their *creation-day*,
Created mute . . ."

Milton: *P. L.*, bk. ix.

*crē-ā-tion-al, a. [Eng. *creation*; -al.] Of or pertaining to creation.

crē-ā-tion-ism, s. [Eng. *creation*; -ism.] The doctrine that a soul is specially created for each human being as soon as conceived in the womb.

crē-ā-tive, a. [Eng. *creat(e)*; -ive.]

1. Having the power of creating.

"But come ye generous minds, in whose wide thought,
Of all his works, *creative* beauty burns
With warmest beam."

Thomson: *Spring*.

2. Causing existence, creating.

"... both owe their origin to the same *creative* mandate."—Todd & Bowman: *Physiol. Anat.*, vol. i. (1845), introd. p. 8.

*crē-ā-tive-ness, s. [Eng. *creative*; -ness.] The quality or state of being creative; power of creation.

crē-ā-tōr, *creatur, *creatur, s. [Lat. *creator*; Fr. *créateur*; Sp. & Port. *criador*; Ital. *creatore*.]

1. Gen.: One who or that which creates or produces anything; a maker, a producer.
2. Spec.: The Almighty Maker of all things.

"And in devotion spend my latter days,
To sin's rebuke, and my Creator's praise,"

Shakesp.: *Henry VI.*, Pt. III., iv. 6.

crē-ā-tōr-ship, s. [Eng. *creator*; -ship.] The state or condition of a creator.

*crē-ā-trēss, *creatresse, s. [Lat. *creatrix*.] A female who creates, constitutes, or appoints.

"Him long she so with shadows entertain'd,
As her *creatresse* had in charge to her ordain'd."

Spenser: *F. Q.*, III. viii. 10.

*crē-ā-trix, s. [Lat.] A creatress.

"[This] is apparently *creatrix* of the wound made by the fly, when she puts her eggs there."—Derham: *Physico-Theology*, bk. iv., ch. xv., note m.

*crē-ā-tu-ral, a. [Eng. *creatur(e)*; -al.] Of or pertaining to a creature; befitting a creature.

"Their understandings being but *creatural* humanness of mind, . . ."

Annot: on *Glaville*, p. 248.

crē-ā-ture, s. & a. [Fr. *créature*; Ital. Sp. & Port. *creatura*, from Lat. *creatura*, from *creatus*, pa. par. of *creo*=to create.]

A. As substantive:

1. That which is created; anything not self-existent, but created by a supreme power.

"God's first *creature* was light."—Bacon: *New Atlantis*.

2. A living being.

"Millions of spiritual *creatures* walk the earth
Unseen, both when we wake, and when we sleep."

Milton: *P. L.*, bk. iv.

3. An animal not human.

"In killing *creatures* vile, as cats and dogs."

Shakesp.: *Cymbeline*, v. 5.

4. Man.

"A greater number of God's *creatures* believe in Mahomet's word at this hour than in any other word whatever."—Carlyle: *Heroes and Hero-Worship*, lect. ii.

5. An epithet of mingled pity and contempt, or of contempt alone.

"The women said, who thought him rough,
But now no longer foolish
The *creature* may do well enough."

Cowper: *On Himself*.

6. An epithet of affection or tenderness.

"Some young *creatures* have learnt their letters and syllables by having them pasted upon little tablets."—Watts.

7. A servant, a dependent.

"A *creature* of the queen's, lady Anne Bullen."

Shakesp.: *Henry VIII.*, iii. 2.

8. One who owes his rise or fortune to another; a dependent, an instrument.

"Whatever the Governor said was echoed by his *creatures*."—Macaulay: *Hist. Eng.*, ch. xii.

9. An offspring, produce, or result.

"And most attractive is the fair result
Of thought, the *creature* of a polish'd mind."

Cowper: *The Task*, bk. iii.

10. Drink, liquor. (Irish.)

"When they had latter a cup of the *creature*."—T. Brown: *Works*, i. 32. (Davies.)

- *11. Food generally.

"Tis pity, methinks, that the good *creature* should be lost."—Dryden: *Marriage à la Mode*, p. 25.

B. As adj.: Of or pertaining to the creature or the body; as creature comforts.

*crē-ā-ture-ize, v. t. [Eng. *creature*; -ize.] To make like a creature; to make earthly or mortal; to animalize.

"This sisterly relation and consanguinity betwixt them, would of the two, rather degrade and *creatureize* that mundane soul, which is their third God or divine hypostasis, than advance and deify those particular created souls."—Cudworth: *Intellectual System*, p. 594.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hār, thēre; pine, pīt, sire, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite. cūr, rāle, fāll; trȳ, sȳrian. æ, œ = ē; ey = ā. qu = kw.

***crēa-ture-lēss**, *adj.* [Eng. *creature*; -less.] Without created beings around; alone, solitary.

"God was alone

And creatureless at first."

Donne: To the Countess of Bedford.

***crēa-ture-lŷ**, *a.* [Eng. *creature*; -ly.] Of or pertaining to the creature; having the nature or qualities of a creature.

"The several parts of relatives, or creaturely infinities, may have finite proportions to one another."—*Cheyne: Philosophical Principles.*

***crēa-ture-ship**, *s.* [Eng. *creature*; -ship.] The state or condition of a creature.

"The laws of our creatureship and dependence do necessarily and indispensably subject us to God as our Creator; and we can as soon cease to be creatures, as become independent."—*Dr. Cave: Serm.*, p. 10.

***crēa-tur-iz-ing**, *pr. par.*, *a. & s.* [CREATURE-IZE.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of making like a creature; animalizing.

"So was it a monstrous degradation of that third hypostasis of their Trinity, and little other than an absolute creaturelizing of the same."—*Cudworth: Intellectual System*, p. 594.

creaze, *s.* [Etymol. doubtful.]

Mining: The tin in the middle part of the buddle.

crē-bri-cōs-tāte, *a.* [Lat. *creber* = frequent, close; Eng. *costate* (q. v.), from Lat. *costa* = a rib.]

Conchol.: Marked or distinguished by numerous closely-set ribs or ridges, as in the shell *Fusus crebricostatus*.

crē-bri-sūl-cāte, *a.* [Lat. *creber* = frequent, close; *sulcus* = a furrow.]

Conchol.: Marked or distinguished with numerous closely-set transverse furrows, as in the shell *Venus crebrisulca*.

***crē-bri-tūde**, *s.* [Lat. *crebritudo*, from *creber* = frequent.] Frequency, frequency.

***crē-broūs**, *a.* [Lat. *creber* = frequent.] Frequent.

"Which indeed supposeth (as their principles do) an imperfect inchoate power already in man's will to act graciously, which through assisting grace stirred up by *crebrous* and frequent acts, grows up into an habit or facility of working."—*Goodwin: Works*, vol. v., pt. i., p. 175.

crèche, *s.* [Fr.] [CRATCH.] A public institution or nursery in which the children of poor persons, who are obliged to go from home to work every day, are taken care of for a small payment, while their parents are at work.

***crede**, *v. t.* [CREE (2).] To boil to softness.

crē-denge, *s.* [Fr. *crédence*; Ital. *credenza*; Low Lat. *credentia* = belief, from *credens*, *pr. par.* of *credo* = to believe.] [CREED.]

I. Ordinary Language:

1. Belief, credit, reliance, dependence, trust, or confidence in or upon any person or thing.

"All circumstance which may compel

Full credence to the tale they tell."

Byron: Parisina, v. 8.

2. A belief, an opinion, a conviction.

"A superstitious credence held,

That never did a mortal hand

Wake its broad glare on Carrickstrand."

Scott: Lord of the Isles, v. 17.

3. That which gives a claim to credit, belief, or confidence.

"After they had delivered to the king their letters of credence, they were led to a chamber richly furnished."—*Hayward.*

*4. The act of tasting food before it was offered to others, a practice followed in order to give assurance that it was free from poison.

"... credence is used, and tastings, for drede of poyson-ynge."—*Babees Book*, p. 196.

*5. A side table where the food was set and tasted before being served to the guests.

II. Eccles.: The small table near the side of the altar, or communion table, on which the bread and wine are placed before they are consecrated.

***crē-denge**, *v. t.* [CREDESCENCE, *s.*] To give credence to, to believe, to credit.

"In credencing his tales."—*Skelton: Poems*, p. 154.

crē-dēn-da, *s.* [Lat. neut. pl. of *credendus* = to be believed; part. from *credo* = to believe.]

Theol.: Articles of faith, as distinguished from agenda or practical duties; things which must be believed.

"These were the great articles and credenda of Christianity, that so much startled the world."—*South.*

crē-dēn-dūm, *s.* [Lat. neut. sing. of *credendus* = to be believed.]

Theol.: An article of faith.

***crē-dēnt**, *a.* [Lat. *credens*, *pr. par.* of *credo* = to believe.]

1. Giving credence; believing, credulous.

"Then weigh what loss your honor may sustain,

If with too credent ear you list his songs."

Shakesp.: Hamlet, i. 3.

2. Credible; bearing credit or authority.

"For my authority bears a credent bulk,

That no particular scandal once can touch."

Shakesp.: Meas. for Meas., iv. 4.

crē-dēn-tial, *a. & s.* [Lat. *credens* (genit. *credentis*), *pr. par.* of *credo* = to believe.]

A. As adj.: Giving a title to credit; accrediting.

"Credential letters were read from the Frisians."—*Lett. from the Syn. of Dort, Hales' Rem.*, p. 106.

B. As substantive:

1. *Gen.:* Anything which gives a title to credit or confidence.

2. *Spec. (Pl.):* Certificates or letters accrediting any person or persons; the commission or warrant given to an envoy, as his claim to credit at a foreign court.

"There stands the messenger of truth; there stands The legate of the skies!—His theme divine, His office sacred, his credentials clear."

Cooper: Task, bk. ii.

crē-dēn-ī-ty, *s.* [Fr. *crédibilité*, from Lat. *credibilis* = credible.] The quality or state of being credible or entitled to credit or belief; credibility; possibility of being believed; a claim or title to credit.

"As all original witnesses must be contemporary with the events which they attest, it is a necessary condition for the credibility of a witness that he be a contemporary, though a contemporary is not necessarily a credible witness."—*Lewis: Cred. Ear. Roman Hist.* (1855), ch. i., § 5, vol. i., p. 16.

crē-dēn-ī-ble, ***credyble**, *a.* [Lat. *credibilis*, from *credo* = to believe.] Deserving of or entitled to credit or belief; that may be believed, credited, or relied on; trustworthy.

"All are equally destitute of credible attestation."—*Leaves: Cred. Ear. Roman Hist.* (1855), ch. ix., § 13, vol. i., p. 346.

***crē-dēn-ī-ble-nēss**, *s.* [Eng. *credible*; -ness.] The quality of being credible; credibility; a just claim to credit.

"The credibleness of a good part of these narratives has been confirmed to me by a practitioner of physic."—*Boyle: Works*, i. 435.

crē-dēn-ī-blŷ, ***crēd-a-blŷ**, *adv.* [Eng. *credibly* (le); -ly.] In a credible manner; in a manner deserving of credit.

"It has indeed been told me (with what weight,

How credibly, 'tis hard for me to state)."

Cooper: Conversation.

crēd-it, *s.* [Fr. *crédit*; Ital. & Sp. *crédito*, from Lat. *creditus*, *pa. par.* of *credo* = to believe.]

I. Ordinary Language:

1. Belief, trust, faith, reliance, or confidence in or upon a person or thing.

"Whatever Athenian arrogance may pretend, it will not easily gain credit with a discerning mind."—*Jeremy Bentham: Works* (1843), vol. i., ch. v.; *Essay on the Influence of Time and Place*, p. 191.

2. A ground of or title to belief, trust, or confidence.

3. A reputation or character of confidence or trust; a good name or opinion gained by upright conduct in business; a reputation for solvency.

"He traded largely: his credit on the Exchange of London stood high; and he had accumulated an ample fortune."—*Macaulay: Hist. Eng.*, ch. vii.

4. Trust reposed with regard to property handed over on the promise or understanding of payment at a future time; correlative to *debt*.

"Credit is nothing but the expectation of money within some limited time."—*Locke.*

5. Anything due to any person. [II. 1.]

6. The time for which trust is given for payment for goods bought.

7. Testimony or authority; that which procures belief or trust.

"We are contented to take this upon your credit, and to think it may be."—*Hooker.*

8. An honor, a cause of esteem or reputation.

"I published, because I was told I might please such as it was a credit to please."—*Pope.*

9. Influence, interest; power derived from character or reputation.

"Having credit enough with his master to provide for his own interest, he troubled not himself for that of other men."—*Clarendon.*

II. Technically:

1. *Bookkeeping:* The side of an account in which payment is entered; opposed to *debit* (q. v.).

2. *Comm., &c.:* [BILL OF CREDIT.]

¶ (1) *A letter of credit:* The same as a *Circular letter* (q. v.).

(2) *Public credit:* The faith put by creditors and the public generally in the honesty and financial ability of a government seeking to borrow money.

¶ (1) *Crabb* thus discriminates between *credit*, *favor*, and *influence*: "These terms mark the state we stand in with regard to others as flowing out of their sentiments toward ourselves: *credit* arises out of esteem; *favor* out of good-will or affection; *influence* out of either *credit* or *favor*; *credit* depends altogether on personal merit; *favor* may depend on the caprice of him who bestows it. *Credit*, though sometimes obtained by falsehood, is never got without exertion; but *favor*, whether justly or unjustly bestowed, often comes by little or no effort on the part of the receiver; a minister gains *credit* with his parishioners by the consistency of his conduct, the gravity of his demeanor, and the strictness of his life; the *favor* of the populace is gained by arts which men of upright minds would disdain to employ. *Credit* and *favor* are the gifts of others; *influence* is a possession which we derive from circumstances; there will always be *influence* where there is *credit* or *favor*, but it may exist independently of either: we have *credit* and *favor* for ourselves; we exert *influence* over others: *credit* and *favor* serve one's own purposes; *influence* is employed in directing others; weak people easily give their *credit* or bestow their *favor*, by which an *influence* is gained over them to bend them to the will of others." (*Crabb: Eng. Synon.*)

(2) For the difference between *credit* and *belief*, see *BELIEF*.

1. *Gen.*: A burning, a destroying by fire.

2. *Spec.*: The act of cremating or disposing of a corpse by burning instead of burying it.

"And the Chindos without cremation or urnal interment of their bodies, make use of trees and much burning, while they plant a pine-tree by their grave."—Browne: *Urn Burial*, ch. i.

¶ Cremation was practiced among the Greeks and Romans. The mass of the Hindoos properly so called thus dispose of their dead, while the Mohammedans have recourse to burial. In 1873 an eminent physician, Sir Henry Thompson, advocated its introduction into England on sanitary grounds, but public feeling was against the innovation, and it made little progress there. Lately, however, in many of the European countries cremation of the dead has received the highest indorsement of the governments, while in the United States crematories have been established in many of the cities. In Europe there are crematories at Berlin, Copenhagen, Geneva, Hamburg, London, Milan, Paris, Rome, Stockholm, Vienna, Zurich, and The Hague. The first crematory in the United States was established at Washington, Pa., in 1876. It was first used for the incineration of the body of the Baron de Palm in December of that year. Other crematories have since been established at Fresh Pond, N. Y.; Germantown, Pa.; Detroit, Mich.; St. Louis, Mo.; Los Angeles, Cal.; San Francisco, Cal.; San Antonio, Tex.; La Crosse, Wis.; Baltimore, Md.; Pittsburgh, Pa.; Troy, N. Y.; Waterville, N. crē-mōl'-ō-būs, *s.* [Gr. *kremannymi*=to hang, to hang up, and *lobos*=the lobe of the ear. So named because the fruit, a silicle, is suspended.]

Bot.: A genus of Brassicaceae, the type of the family Cremolobidae. The species have racemes of yellow flowers and are natives of Peru and Chili.

Crē-mō'-nā (1), *s.* [A town in the north of Italy.]

1. *Ord. Lang.*: The town mentioned in the etymology.

2. *Mus.*: A name given to the violins made at Cremona during the seventeenth century by Andrea and Antonio Amati, and in the beginning of the eighteenth century by Antonius Stradivarius, his pupil, and Giuseppe Guarnerius, the pupil of Stradivarius.

Cremona-fiddle, *s.* The same as CREMONA, 2.

"A lady whisking about her long train, which was then the fashion, threw down and broke a fine Cremona fiddle; upon which Swift cried out, 'Mantua, vae miserae nimium vicina Cremonae!'"—*Sheridan: Life of Swift*.

crē-mō'-nā (2), *s.* [A corruption of Ger. *krummhorn*; Fr. *cromorne*=crooked horn.]

Mus.: A reed stop in the organ. [CROMORNA.]

***crē-mor**, *s.* [Lat.] A milky substance; a soft liquor resembling cream.

"The food is swallowed into the stomach, where, mingled with dissolvent juices, it is reduced into a chyle or cremor."—*Ray*.

***cremosin**, *a. & s.* [CRIMSON.]

crē-nāte, **crē-nā-tēd**, *a.* [Mod. Lat. *crenatus*, from *crena*=a notch.]

1. *Ord. Lang.*: Notched.

"The cells are prettily crenated, or notched, quite round the edges; but not striated down to any depth."—*Woodward*.

2. *Bot., &c.* (of leaves, &c.): Having the teeth rounded. When these are again crenated the term used is bicrenate. The same as CRENELLED.

crē-nā-tō, *a.* [Modern Lat., from *crenatus*=notched.]

crenato-dentate, *a.*

Botany, &c.: Having the margin with triangular notches.

crenato-serate, *a.*

Bot.: Having the serrations rounded instead of straight.

crē-nāt'-ū-lā, *s.* [Dimin. of Lat. *crenatus* (q. v.).]

Zool.: A sub-genus of Mollusks, genus *Perna*. It consists of thin, oblong, compressed shells. Eight recent species are known from North Africa, the Red Sea, and China, and four fossil. (Woodward, ed. Tate.)

crē-nā-tūre, *s.* [Mod. Lat. *crenat(us)*; Eng., &c., suff. -ure.]

Bot.: A crenel, a small rounded tooth.

Crenate.

1. Crenate Ground-ivy. 2. Bicrenate Horse-radish. 3. Crenato-serrate *Dryas Octopetala*. 4. Crenato-dentate *Primrose*.

bōll, bōy; pōut, jōwl; cat, cēll, chorus, chīn, bench; go, gēm; thīn, thīs; sin, ag; expect, Xēnophon, exist, ph = f.
-clan, -tīan = shān. -tion, -sion = shūn; -tīon, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

crén-cle, ***cren-kle**, *s.* [Dut. *krinkel*=a curl, ring; Icel. *kringla*=a disk, circle, or orb.]
Naut.: The same as CRINGLE (q. v.).

***crén-cled**, *pa. par.* or *a.* [CRINKLED.]

***cré-nél**, ***crenell**, ***crenelle**, *s.* [O. Fr. *crenel*; Fr. *creneau*=a battlement, dimin. of O. Fr. *cren*, *cran*=a notch; Lat. *crena*.] [CARNEL.]

I. Fortification:

1. A loop-hole in a parapet, wall, or stockade, through which to discharge musketry.
2. A battlement; an embrasure in an embattled parapet.

"'Tis no deceit! distinctly clear
 Crenell and parapet appear,
 While o'er the pile that meteor drear
 Makes momentary pause."
Scott: The Bride of Triermain, iii. 9.

II. Old Armor: The peak at the crest of a helmet.

III. Bot.: A rounded tooth of a crenelled or crenate leaf. (Generally pl., *crenelles*.)

***cré-nél-ét**, *s.* [A dimin. from O. Fr. *crenel*.] An embrasure or loop-hole.

"Through the sloping crenels of the higher towers."—*C. Reader: Cloister and Hearth*, ch. xliii. (Davies.)

cré-nél-lā, *s.* [Latinized dimin. of O. Fr. *crenel*.] So named from having its hinge-margin crenulated behind the ligament.]

Zool.: A sub-genus of *Modiola* (Horse-mussel). The shell is short and tumid, partly smooth and partly ornamented with radiating striae; interior brilliantly nacreous. The species occur from low water to forty fathoms deep, spinning a nest or hiding among the roots of sea-weeds and corallines. Twenty-four species are known from Britain, Nova Zembla, New Zealand, &c. Twelve fossil species have been found, the latter from the Upper Green-sand onward.

***cré-nél-lāte**, *v. t.* [Mod. Lat. *crenellatus*, from O. Fr. *crenel*.] [CRENEL.]

Fort. (of a parapet or breast-work): To furnish with crenelles or indentations for the garrison to fire through.

cré-nél-lā-téd, **cré-nél-ā-téd**, *pa. par.* or *a.* [Eng. *crenellate*(e); -ed.]

1. *Arch.*: Embattled; furnished with crenelles or crenelated moldings.

"... the machicolated and crenelated walls of the cathedral close, . . ."—*Kemble: Saxons in Eng.*, bk. ii., ch. 7.

2. *Her.*: An epithet for an ordinary, indented as crenelles.

crenellated molding, *s.*

Arch.: A description of molding in which the beads have rectangular dentations.

***cré-nél-lā-tion**, *s.* [Eng. *crenellate*.]

1. The act of embattling.
2. The state or condition of being embattled.
3. An indentation or notch.
4. An embrasure.

"Octavo ramparts flanked with quarto crenellations."—*Lytton: Castles*, bk. xii., ch. vi. (Davies.)

cré-nèlled, ***carneled**, ***kerneled**, *a.* [CARNELED.]

1. **Fort. & Arch.**: Embattled; crenellated.
2. **Bot.**: The same as CRENATE (q. v.).

cré-nic, *a.* [Gr. *krēnē*=a spring; Eng. suff. -ic.] **crenic acid**, *s.*

Chem.: Organic acids exist in vegetable mold and in the ochreous deposits of ferruginous waters. They are extracted by boiling the deposit with potash, filtering, supersaturating the liquid with acetic acid, and adding acetate of copper, which gives a dark-brown precipitate containing apocrenic acid. The filtrate is saturated with ammonium carbonate, and acetate of copper again added, which gives a greenish-white precipitate containing *crenic acid*. The precipitates are decomposed by suspending them in water and passing H₂S gas through the liquid. Crenic acid is obtained as a pale yellow powder, soluble in alcohol, but its salts are insoluble. Crenic acid has an acid, astringent taste. Its formula is supposed to be C₁₂H₁₃O₈.

***cré-nl-lā-brūs**, *s.* [Lat. *crena*=a notch, *i* connective, and *labrus*=an unknown fish. So named from having the margin of the preoperculum denticulated.] [LABRUS.]

Ichthy.: A genus of spiny fishes belonging to the family Labridæ. Seven species are British, viz:

1. *Crenilabrus melops* or *tinca*: The Gilt-head, Connor, Golden Maid, &c.
2. *Crenilabrus norvegicus* or *cornubicus*: The Goldfinny or Goldsinny.
3. *Crenilabrus gibbus*: The Gibbous Wrasse.
4. *Crenilabrus luscus*: The Scale-rayed Wrasse.
5. *Crenilabrus multidentatus*: The Corkling, called also Ball's Wrasse.
6. *Crenilabrus rupestris*: Jago's Goldsinny.
7. *Crenilabrus microstoma*: The Small-mouthed Wrasse or Rock-cook.

crén-u-lāte, **crén-u-lā-ted**, *a.* [A dimin. formation from O. Fr. *crenel*. Cf. *crenellate*.]

Bot., &c.: Finely crenate, having the margin divided into small crenels, *i. e.*, rounded teeth.

cré-ôle, *s.* [Fr. *crôle*; Sp. *criollo*, a contr. of *criadillo*, dimin. of *criado*=one brought up, bred; *crear*, Lat. *creo*=to create, to bring up.]

1. A native of the West Indies or of Spanish America, but not of native parents.
2. One of any color born within or near the tropics of America.

"At the same time an irregular army of Spaniards, creoles, negroes, mulattoes, and Indians marched across the isthmus from Panama . . ."—*Macaulay: Hist. Eng.*, ch. xxiv.

cré-ôl'-i-an, *s.* [Eng. *creol*(e); -ian.] A creole.

"The moment a nobleman returns from his travels, a Creolian arrives from Jamaica, or a dowager from her country seat, I strike for a subscription."—*Goldsmith: Vicar of Wakefield*, ch. xx. (Latham.)

cré-ôph'-il-is, *s.* [Gr. *kreas*=flesh, and *philos* . . . =a friend.]

Entom.: A genus of Beetles belonging to the order Staphylinidæ. *Creophilus maxillosus* is British.

cré-ô-sôl, *s.* [Eng., &c., *creos*(ote), and *alcohol*?] **Chem.**: C₈H₁₀O₂ or C₆H₃(CH₃)<OH<O<H₃. Dimethyl-

pyro-catechin. A colorless liquid found in beech-
 tar, boiling at 220°. It reduces silver nitrate when
 boiling. It forms with acetic anhydride an acetate,
 which by oxidation with potassium permanganate,
 and saponification with potash, yields vanillinic
 acid.

cré-pānce, **cré-pāne**, *s.* [Lat. *crepans*, pr. par. of *crepo*=to burst.]

Farr.: An ulcer seated in the forepart of a horse's foot; a wound in one of the hind feet caused by the shoe of the other striking and cutting it.

crép-i-dô-dër-a, *s.* [Gr. *krēpis*, genit. *krēpidos* =a half boot worn by men, and *deros*=skin (f).]

Entomol.: A genus of Beetles, family Chrysomelidæ. It is akin to *Haltica*.

crép-id'-u-lā, *s.* [Lat.=a small sandal, dimin. of *crepida*=a slipper or sandal.]

Zool.: A genus of gasteropodous Mollusks, family Calyptraidæ (Bonnet Limpets). The shell is oval and limpet-like, the hinder half of its interior with a shelly partition. Known recent species fifty-four, from the West Indies, the Mediterranean, Africa, India, and Australia; fossil, fourteen species, from the Eocene onward.

crép-is, *s.* [Lat. *crepis*; Gr. *krēpis*=a plant, *Helminthia echioides*.]

Bot.: A genus of Composite plants, tribe Lactuceæ. They are known as Hawkbeards. Pappus soft, deciduous, white in color; achenes without a beak. *Crepis virens* is common in dry pastures. It is from 1 to 3 ft. high, and has yellow flowers. *C. paludosa* is found in moist woods and rocky places. It is 6 ft. high. *C. lacera*, a Neapolitan species, is considered by the Southern Italians to be venomous.

crép-i-tāte, *v. i.* [Lat. *crepitatus*, pa. par. of *crepito*=to rattle, to creak, to crackle, to clatter, to rustle, freq. of *crepo*=to rattle, to crack, to creak. Imitated from the sound. Cf. Eng. *crack*.]

1. **Ord. Lang.**: To crackle; to burst with a series of short, sharp small reports, as salt does in fire.
2. **Med.**: To emit or give out a kind of rattling sound. [CREPITATION, II. 1.]

† To *crepitate* is to make a series of minute explosions; to *detonate* is to make a single explosion with a loud report.

crép-i-tā-tiŋg, *pr. par.* *a.* & *s.* [CREPITATE.] **A. & B. As pr. par. & particip. adj.**: (See the verb.)

C. As subf.: Crepitation.

crép-i-tā-tion, *s.* [Fr. *crépitation*; Low Lat. *crepitatio*, from *crepatus*.] [CREPITATE.]

I. Ord. Lang.: The act of bursting with a series of minute explosions, each causing a short and sharp but not a loud noise.

II. Technically:

1. **Med.**: A certain rattling sound detected by auscultation in the lungs in cases of pneumonia.
2. **Surg.**: The noise of fractured bones when a surgeon feels them to ascertain whether or not there is a fracture, and in the event of there being one, then at what spot.

crép-i-tūs, *s.* [Lat.] The same as CREPITATION (q. v.).

crép-ôā, *s.* [Fr.]

Fabric: A thin stuff resembling crape, made of wool, silk, or mixed.

crēpt, *pret. & pa. par.* [CREEP.]

***cré-pūs-cle**, ***cré-pūs-cule**, *s.* [Lat. *crepusculum*, a dimin. from *creper*=dusky.] Twilight.

cré-pūs-cu-lar, *a.* [Lat. *crepusculum*]; and Eng., &c., suff. -ar. In Fr. *crépusculaire*.]

I. Ordinary Language:

1. **Lit.**: In any way pertaining to or connected with the twilight.

†2. **Fig.**: In a state intermediate between light and darkness; not very clear, somewhat obscure.

"The application of the rules of evidence to this semi-historical and crepuscular period."—*Leavis: Cred. Early Rom. Hist.*, ch. xiv., § 3, vol. ii., p. 494.

II. Zool.: Pertaining to animals which are active in the dusk or twilight.

"Others feed only in the twilight, as bats and owls, and are called crepuscular."—*Whewell: Bridgewater Treatise* (1852), p. 93.

cré-pūs-cu-lār-i-a, *s.* [Lat. *crepusculum*]=the twilight, and pl. adj. suff. -aria.]

Entom.: A tribe of lepidopterous insects, including those called Sphinxes or Hawkmoths. They are twilight flyers, as distinguished from Diurna, which, as the name implies, fly during the day, and Nocturna, which fly by night. The antennæ of the *Crepuscularia* taper to the end, where they have a club which is pointed at the apex instead of the oval club of the Diurna (Butterflies) or the filiform antennæ of the Nocturna (Moths). The larvae have sixteen legs, and some of them hairs on the back. Stainton calls the *Crepuscularia* of Latreille Sphingina, and divides them into four families, Zygenidæ, Sphingidæ, Sesiidæ, and Ægeridæ (q. v.).

cré-pūs-cu-line, *a.* [Lat. *crepusculum*], and Eng., &c., suff. -ine. In Fr. *crépisculin*, m., *crépisculine*, f.] The same as CREPUSCULAR and CREPUSCULOUS (q. v.).

"He has made apertures to take in more or less light, as the observer pleases, by opening and shutting like the eye, the better to fit glasses to crepuscine observations."—*Sprat: Hist. of the R. S.*, p. 314.

***cré-pūs-cu-lous**, *a.* [Eng. *crepuscul*(e); -ous.]

1. **Lit.**: Pertaining to the twilight; crepuscular.

2. **Fig.**: Obscure, not clear or distinct.

"The beginnings of philosophy were in a crepusculous obscurity, and it's yet scarce past the dawn."—*Glanvill: Vanity of Dogmatizing*, ch. 19.

***cre-sce**, ***cre-syn**, ***crees**, *v. i.* [Lat. *cre-sco*.] To grow, to multiply.

"He had him *cre-sce* and multiply."—*Gower*, iii. 276.

***crés'-çence**, *s.* [Lat. *cre-sens*, pr. par. of *cre-sco* =to grow, to increase.] Increase, increasing.

"To these adverse, the lunar sects dissent,
 With convulsion of opposed bent;
 From west to east by equal influence tend,
 And toward the moon's attractive *cre-sence* bend."
Brookes: Universal Beauty, bk. iii.

cre-scendo (pron. **cré-shén'-dō**), *adv.* [Ital.]

Mus.: Increasing; a gradual increase in the force of sound. Expressed by the sign <, or the abbreviation *cres.* The sign was first employed in England by Matthew Locke, in 1676. (*Stainer & Barrett*.)

crés'-çent, ***crés'-sent**, *a.* & *s.* [Lat. *cre-scens*, pr. par. of *cre-sco*=to increase, to grow.]

A. As adjective:

1. Increasing, growing; in a state of increase.
 "The nightly hunter, lifting up his eyes
 Toward the crescent moon with grateful heart."
Wordsworth: Excursion, bk. iv.

2. Crescent-shaped.

"A small crescent membranous sac."—*Owen: Anat. of Invertebrates*.

B. As substantive:

I. Ordinary Language:
 1. Anything shaped like the moon in her state of increase.

"And two fair crescents of translucent horn
 The brows of all their young increase adorn."
Pope: Odyssey.

2. The moon in her state of increase, when in her receding from the earth she shows a curved appearance terminating in points or horns.

"Jove in dusky clouds involves the skies,
 And the faint crescent shoots by fits before their eyes."
Dryden.

3. The figure of a new moon borne on the national standard of Turkey; and hence figuratively used for the Turkish power or Mohammedanism itself.

† The Turks did not bring their symbol—the Crescent—with them from Central Asia, but adopted it on conquering Constantinople in 1453. Part of that city had been built on the site of Byzantium, which was a Greek city flourishing in Xenophon's time. Being besieged in B. C. 340 by the Macedonians, led by Philip, the father of Alexander the Great, that crafty general made an effort to surprise the place on a dark night. The inhabitants, however, had their danger revealed to them by a "light" which "shone suddenly from the north."

fāte, **fāt**, **fāre**, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, there; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mātē, cūb, cūrē, unite, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

It was probably the moon, and in gratitude for the aid it had rendered them, the Byzantines built an altar to Diana, and assumed the crescent as the symbol of their city. It is found on various extant Byzantine coins long before the Turks had appeared in Europe.

"He stood alone among the host;
Not his the loud fanatic boast
To plant the Crescent o'er the Cross."
Byron: *Siege of Corinth*, xii.

II. Technically:

1. *Arch.*: A range of buildings in the form of a half-moon or crescent.

2. *Heraldry*:

(1) The half-moon; an honorable ordinary represented sometimes with the horns turned upward.

(2) A name applied to four orders of knighthood.

(a) An order instituted in 1268 by Charles I., King of Naples and Sicily.

(b) A revival of the first, instituted by René of Anjou, in 1464.

(c) An order instituted by Mohammed II., Sultan of Turkey.

(d) An order instituted in 1801 by Selim, Sultan of Turkey.

3. *Vet.*: A defect in a horse's foot, when the coffin-bone falls down.

4. *Music*: A musical instrument, consisting of a staff with arms and suspended bells, used in a band.

5. *Agric.*: An ox-bow.

"A cressent abowte the nek: torques, torquis, luna, lunula."—*Cath. Anglie*.

crescent-formed, a. Formed or shaped like a crescent.

crescent-like, a. Like a crescent in shape or form.

crescent-lit, a. Lit up by the moon in a crescent state.

"Or while the balmy glooming crescent-lit,
Spread the light haze along the river-shores."
Tennyson: *The Gardener's Daughter*.

crescent-shaped, a.

1. *Ord. Lang.*: Shaped like a crescent; lunate, lunated.

2. *Bot.*: Resembling the figure of the crescent. Example, the glandular apex of the involucre leaves of many Euphorbias. (*Lindley*.)

crescent-wise, adv. In shape of a crescent.

***crēs-çen-t, v. t.** [CRESCENT, s.] To form into or border with crescents.

"A dark wood cresents more than half the lawn."—*Seward's Letters*, vi. 195.

crēs-çen-tāde, s. [Eng. *crescent*, and Eng., &c., suff. -ade.] A word modeled after the manner of crusade. A religious war waged in defense of "the Crescent," i.e., of the Mohammedan faith.

"It has been sought to make out that many Liberals had desired to go to war against Turkey on behalf of its Christian subjects, in fact to carry on a crusade against a crescentade."—*Mr. Forsyth, M. P.: Parl. Deb. (Times)*, Feb. 17, 1877.)

crēs-çen-tēd, a. [Eng. *crescent*; -ed.]

1. Adorned with a crescent or crescents.

2. Crescent-shaped.

"Phoebe bends toward him crescented."
Keats: *Endymion*, bk. iv.

crēs-çen-tī, in compos. only. [Lat. *crescens*, *crescentis*, pr. par. of *cresco*=to increase, increasing.]

crescenti-pinnatisect, a.

Bot. (of a pinnated leaf): Having its lobes gradually becoming larger as they approach its end.

crēs-çen-tī-a (t as sh), s. [Named after Pietro Crescenti, of Bologna, who lived in the 13th century, and published various works on agricultural subjects, the principal one being "Opus Ruralium Commodorum," dedicated to Charles II. of Sicily.]

Bot.: The typical genus of the order *Crescentiaceae* (*Crescentiads*). Calyx deciduous, of two equal sepals. Corolla campanulate, with a short fleshy tube and a ventricose 5-cleft unequal crisped limb; stamens 4, didynamous, with the rudiments of a fifth; fruit gourd-like, with a solid external shell, and an internal one-celled pulpy many-seeded cavity. The genus consists of large trees with solitary flowers rising from the trunk or branches.

Crescentia cujete is the Cujete, or Common Calabash-tree. [CALABASH.] It inhabits Central America and the West Indies. The subacid pulp is eaten by the negroes, and is made into poultices. The hard shell is used for a bottle, and in Bermuda for a pitcher with which to draw water for drinking and other purposes from the inclosed rain-water tanks.

crēs-çen-tī-āds (t as sh), s. pl. [Mod. Lat. *crescentia* (q. v.), and fem. pl. adj. suff. -aceae.]

Bot.: *Crescentiads*, an order of porigynous exogens. It consists of small trees, with alternate or clustered exstipulate leaves and flowers growing out of the old stems or branches. The calyx is undivided, but ultimately splits into irregular pieces. The corolla is monopetalous and irregular, somewhat two-tipped, the stamens 4, didynamous, with the rudiments of a fifth one; the ovary one-celled; the fruit succulent, hard, with parietal placenta.

crēs-çen-tī-āds (t as sh), s. pl. [Mod. Lat. *crescentia* (q. v.), and pl. suff. -ads.] The name given by Lindley to the order *Crescentiaceae* (q. v.).

crēs-çen-tīc, *crēs-çen-tīc-al, a. [Eng. *crescent*; -ic.] Like a crescent; crescent-shaped.

"... disposed somewhat in a crescentic form."—*Todd & Bowman: Physiol. Anat.*, vol. i, ch. x., p. 256.

crēs-çen-tīc-al-ly, adv. [Eng. *crescental*; -ly.] In shape or fashion of a crescent; crescent-wise.

"Fifth segment truncate, sixth crescentically emarginate."—*Trans. Amer. Philos. Soc.*, vol. xiii., p. 113 (1873).

***crēs-çive, a.** [Lat. *cresco*=to grow, to increase.] Increasing, growing.

"And so the prince obscured his contemplation
Under the veil of wildness; which, no doubt,
Grew like the summer-grass, fastest by night,
Unseen, yet cressive in his faculty."
Shakesp.: *Henry V.*, i. 1.

crēs-sōl, s. [Eng., &c., *creas*(ote), and (alcohol); Ger. *kresole*.]

Chem.: C_7H_5O or $C_6H_4<\frac{OH}{CH_3}$. Also called Cresyl alcohol, Cresylic phenol, Oxytoluene. It occurs in the ortho (1-2), meta (1-3), and para (1-4) modifications.

Ortho-cresol: Obtained by fusing orthotoluene-sulphate of potassium with potassium hydrate, or by the action of nitrous acid on ortho-toluidine. It melts at 31°, and boils at 185°. Melted with caustic potash it yields salicylic acid. It gives a blue color with ferric chloride.

Meta-cresol: Obtained by heating thymol propyl-phenol with phosphoric anhydride; propylene gas is given off, and the resulting compound fused with potash; then, dissolving in water and agitating with ether, meta-cresol is obtained as a transparent, thick liquid, boiling at 201°. It gives a blue color with ferric chloride; fused with caustic potash it yields meta-oxy-benzoic acid.

Para-cresol: Obtained by distilling urine with hydrochloric acid; also by the action of nitrous acid on para-toluidine, and by fusing para-toluene-sulphate of potassium with potassium hydrate. It forms colorless crystals, melting at 36° into a transparent colorless liquid smelling like putrid wine, boiling at 199°. It gives a blue color with ferric chloride; fused with potassium hydrate, it yields para-oxy-benzoic acid. It is said to be formed in the decomposition of albumen and tyrosin, &c.

crēs-çōt-īc, a. [Eng., &c. *creas*(ote), and suff. -ic.] Pertaining to, or containing, more or less of cresote.

cresotic acid, s.

Chem.: $C_8H_5O_3$ or $C_6H_3(CH_3)<\frac{OH}{COOH}$. Oxytoluic acids are formed by heating the corresponding sodium cresol in a stream of carbon dioxide. Pure para-cresol yields para-cresotic acid, melting at 148°. Pure ortho-cresol yields ortho-cresotic acid, melting at 160°. It gives a deep violet color with ferric chloride.

crēs-çīe, s. [Lat. *crassus piscis*=a coarse fish.] A small whale; apparently the same with that commonly called the Grampus.

"Malcolm IV. likewise gave them [the monks of Dunfermline] a grant of the half of the blubber (*dimidium sagminis*) of the *crēsçis* or small whales, which should be taken between the Tay and Forth, for the use of the church, ad luminaria coram altarihus prænominatæ ecclesiæ."—*Stat. Acc. xlii.*, 451, N. V.; also *Sibbald's Fife*, p. 295.

crēsç, *cresce, s. [A. S. *cæsse*, *cyrse*, *cresce*. Cognate with Dut. *kars*; Sw. *karse*; Ger. *kresse*. (*Skeat*.)]

1. *Gen., Ord. Lang.*, & *Bot.*: Various cruciferous plants. In these the word *cress* is often used as the second one in a compound term.

"His court with nettles, moats with *cresses* stor'd."
Pope: *Moral Essays*, iii. 181.

† Halliwell thought that in one ancient manuscript it meant a rush, but Messrs. Britten and Holland doubt the existence of this signification. In the subjoined list of compounds, *Lapsana communis* (10), and a few others, are not cruciferous plants.

2. *Spec.*: The Golden Cress, *Lepidium sativum*, or any other species belonging to the same genus.

† (1) *American Cress: Barbarea præcox*. It is cultivated. It is called also the Belleisle Cress (q. v.).

(2) *Australian Cress*: A variety of the Common Garden Cress. It is called also the Golden Cress (q. v.).

(3) *Bank Cress*: [So called from its growing on hedge banks.] *Sisymbrium officinale*.

(4) *Bastard Cress*: The common name for the genus *Thlaspi*.

(5) *Belleisle Cress*: [*BELLEISLE-CRESS*.]

(6) *Bitter Cress*: [*BITTER-CRESS*.]

(7) *Brown Cress*: [*BROWN-CRESS*.]

(8) *Carl's Cress, Churl's Cress*: [*CARL'S CRESS, CHURL'S CRESS*.]

(9) *Cow Cress*: [*COW-CRESS*.]

(10) *Dock Cress*: *Lapsana communis*.

† Pratt calls it Succory Dock-cress. (*Britten & Holland*.)

(11) *French Cress*: *Barbarea vulgaris*.

(12) *Garden Cress*: *Lepidium sativum*. This is the cress preëminently so called.

(13) *Golden Cress*: [(2)]

(14) *Indian Cress*:

(a) *Sing.*: *Tropæolum majus*.

(b) *Pl.*: The order *Tropæaceæ*.

(15) *Land Cress*: (a) *Barbarea præcox*, (b) *Cardamine hirsuta*.

(16) *Meadow Cress*: A book-name for *Cardamine pratensis*.

(17) *Mouse-ear Cress*: *Arabis Thaliana*.

(18) *Normandy Cress*: *Barbarea præcox*.

(19) *Para Cress*: *Spilanthus oleracea*.

(20) *Penny Cress*: A modern book-name for *Thlaspi arvense*.

* (21) *Peter's Cress*: *Crithmum maritimum*.

(22) *Rock Cress*: (a) the genus *Arabis*, * (b) an old name for *Crithmum maritimum*.

(23) *Sciatica Cress*: A species of *Lepidium* (?), good for the sciatica. (*Britten & Holland*.)

(24) *Spanish Cress*: *Lepidium Cardamines*.

(25) *Spring Cress*: *Cardamine rhomboidea*.

(35) *Winter Cress*:

(a) *Gen.*: The genus *Barbarea*.

(b) *Spec.*: *Barbarea vulgaris*.

(36) *Wild Cress*: *Thlaspi arvense*.

(37) *Yellow Cress*: (a) *Nasturtium palustre*, (b) *N. amphibium*.

cress-olls, s.

Chem.: Garden Cress, *Lepidium sativum*, distilled with steam, yields a volatile aromatic oil, which is separated by agitation with benzene from the distillate. It boils at 226°, and is benzyl-cyanide, $C_6H_5CH_2CN$; when heated to 200° with hydrochloric acid, or by boiling with alkalies, it yields phenyl-acetic acid, $C_6H_5CH_2COOH$. Benzyl cyanide can also be obtained synthetically by heating benzyl chloride with potassium cyanide. It is isomeric with toluonitril, $C_6H_4<\frac{CH_3}{CN}$. Water-cress, *Nasturtium officinale*, yields an oil, boiling at 261°, being phenyl-propionitril, $C_6H_5CH_2CH_2CN$; on fusing it with potash it yielded a salt of phenyl-propionic acid.

cress-rocket, s. *Vella Pseudo-cytisus*.

cress-sēl-lā, s. [Fr. *crescelle*=a rattle.]

Ecclæs.: A wooden rattle. (Used as a substitute for a bell in Roman Catholic churches from the Mass on Holy Thursday till the Mass on Holy Saturday.)

***crēs-sēt, s.** [O. Fr. *crasset*.]

*I. *Ordinary Language*:

1. *Lit.*: A basket of open iron-work in which wood or coal is burned as a beacon. In former times the cresset was used where lighthouses are now erected, and its modern use is principally at wharves and boat-landings.

"Far downward, in the castle-yard,
Full many a torch and cresset glared."
Scott: *The Lay of the Last Minstrel*, iii. 26.

2. *Fig.*: A burning light; a meteor.

"I cannot blame him: at my nativity,
The front of heaven was full of fiery shapes,
Of burning cressets."
Shakesp.: *Henry IV.*, Pt. I., iii. 1.

II. *Coopering*: An iron basket or cage to hold fire, char the inside of a cask, and make the staves flexible.

bōl, bōy; pōut, jōwl; cat, gell, chorus, ghin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist. ph = f.

Crescent.

crĕst, *creast, *crest, *crist, s. [O. Fr. *creste*, from Lat. *crista*.]

A. Ordinary Language:

I. Literally:

1. A plume or tuft of feathers or comb on the top of the head of a bird.

"The male has also a small, longitudinal, leaden-colored, fleshy crest or comb."—*Darwin: Desc. of Man* (1871), pt. ii, ch. xiv., vol. ii., p. 129.

2. Any tuft or excrescence on the head of an animal.

"Off he bowed
His turret crest, and sleek enamelled neck."
Milton: P. L., ix. 525.

3. In the same senses as B. 4.

"The crag is won, no more is seen
His Christian crest and haughty mien."
Byron: The Giaour.

II. Figuratively:

1. A badge.

"Let's write good angel on the devil's horn,
'Tis not the devil's crest."
Shakesp.: Meas. for Meas., ii. iv.

*2. The end, the extreme, the top.

"Two golden ryngs, the whiche thou shalt putte in
either creste of the broche."—*Wycliffe: Exod.* xxviii. 23.

*3. Pride, spirit, courage, fire.

"Bristle up
The crest of youth against your dignity."
Shakesp.: Henry IV., Pt. I., i. 1.

4. The ridge or top of a wave.

5. The ridge or highest part of a mountain or hill.

"Pierce then the heavens, thou hill of streams!
And make the snows thy crest!"
Hemans: Eryri Wen.

*6. A balk or ridge of land.

"Creste of londe eryde. Porca."—*Prompt. Parv.*

B. Technically:

1. Architecture:

(1) The ridge of a roof; hence *crest-tiles*, which lie on the comb of a roof and shed water both ways.
(2) Any ornament or carved work on the top or ridge of anything; also used for the ornamental finishing surrounding a screen or canopy of a building.

2. *Engin. & Fort.*: The top of a parapet, embankment, slope, or wall.

3. *Vet.*: The upper part of the neck of a horse. [CREST-FALLEN.]

4. Heraldry:

(1) A plume or tuft of feathers, hair, or other similiar material, affixed to the top of the helmet; and hence, sometimes the helmet itself.

"So saying, a noble stroke he lifted high,
Which hung not, but so swift with tempest fell
On the proud crest of Satan."
Milton: P. L., bk. vi.

* (2) The ornament on the helmet.

(3) A figure originally representing the ornament on the helmet, but now used to denote any figure placed on a wreath, coronet, or cap of maintenance, above the helmet and shield in a coat of arms.

[Crests are of considerable antiquity. Their first introduction is attributed by Herodotus to the Carians; and their revival to Richard Cœur de Lion, who in 1189 wore one, consisting of a plume of feathers, in his helmet.]

5. *Bot.*: A fleshy appendage of fruits and seeds in the form of a crest. The middle lobe of the inferior petal of the Polygala is in the form of a crest. (*Balfour*.)

6. *Anat.*: A prominent border or elevation running some way along the surface of a bone. It is called also a line or ridge. Thus there is an external occipital crest, a nasal crest, a sphenoidal crest, &c.

crest-fallen, a.

1. *Ordinary Lang. & Fig.*: Dispirited, dejected, abashed.

"When I have feasted with Queen Margaret?
Remember it, and let it make thee crest-fall'n:
Ay, and allay this thy abortive pride."
Shakesp.: Hen. VI., Pt. II., iv. 1.

2. *Vet.*: A term used when the upper part of the neck upon which the mane grows sinks down on either side.

crest-tile, s.

Architecture:

1. A saddle-tile, one having a double slope, on the ridge of a roof. It is also called a *ridge-tile* (q. v.).

2. In Gothic architecture tiles decorated with leaves, foliage, or similar design, which run up the sides of a gable or ornamented canopy.

**crest-wounding, a.* Wounding, i. e., disgracing one's nobility; degrading.

"O unseen shame! crest-wounding private scar!
Reproach is stamp'd in Collatrinus' face,
And Tarquin's eye may read the mot afar."
Shakesp.: The Rape of Lucrece, 827-30.

crĕst, *creast, *crestyn, v. t. [CREST, s.]

*1. To ornament or furnish with a crest.

"Crestyn or arayn wyth a creste. Cristo."—*Prompt. Parv.*

*2. To serve as a crest for.

"His legs bestrid the ocean: his reared arm
Crested the world: his voice was propertied
As all the tuned spheres."
Shakesp.: Ant. and Cleop., v. 2.

3. To form a crest or top to; to crown.

"The feudal towers that crest its height
Frown in unconquerable might."
Hemans: The Troubadour and Rich. Cœur de Lion.

*4. To mark with lines or streaks, as the plume of a helmet.

"Like as the shining skie in summer's night,
What time the dayes with scorching heat abound,
Is crested all with lines of fierie light,
That it prodigious seemes in common peoples sight."
Spenser: F. Q., IV. i. 13.

crĕst'-ĕd, a. [Eng. *crest*; -ed.]

I. Ordinary Language:

1. Adorned with or wearing a crest.

"On his brave head a crested helm he plac'd."
Pope: Homer's Iliad, bk. xv. 555.

2. Wearing a comb.

"The crested bird shall by experience know,
Jove made not him his master-piece below."
Dryden: Cook and Fox.

3. Surmounted or crowned.

II. *Botany*: Having an elevated, irregular, or notched ridge, resembling the crest of a helmet. (Used chiefly of seeds or of the appendages of the anthers in some heaths, as *Erica triflora* and *E. comosa*.)

"The petal becomes crested as in *Polygala*."—*Balfour: Bot.*, § 372.

† (1) *Crested Dog's-tail Grass*:

Bot.: *Cynosurus cristatus*. A grass a foot or a foot and a half high, with a second raceme, and 3-5 flowered spikelets.

(2) *Crested Grebe*:

Ord. Lang. & Ornith.: A Grebe, *Podiceps cristatus*. It is called more fully the Great Crested Grebe, or sometimes the Great Tipped Grebe, or merely the Grebe. [GREEBE.]

crĕst'-lĭg, pr. par., a. & s. [CREST, v.]

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As subst.*: The act of adorning with a crest.

†*crĕst'-lĕss, a.* [Eng. *crest*; -less.] Destitute of or not entitled to a crest; not of a noble family.

"His grandfather was Lionel, Duke of Clarence,
Third son to the Third Edward, king of England.
Spring crestless yeomen from so deep a root!"
Shakesp.: Henry VI., Pt. I., ii. 4.

crĕst'-mā-rĭne, s. [Eng. *crest*, and *marine*.] A plant, *Crithmum maritimum*.

crĕ-sĭl, s. [Eng., &c., *creasote* (q. v.); and Gr. *hyle* = matter as a principle of being.]

Chem.: An aromatic monad radical (C₆H₄.CH₃).

crĕ-sĭl'-ic, a. [Eng. *crestyl*; -ic.] Pertaining to crestyl.

crĕ-tā, s. [Lat. (as adj.) = from *Crete*, (as subst.) = Cretan earth, i. e., chalk, or a similar kind of earth.] Chalk.

creta preparata, s.

Phar.: Prepared chalk, CaCO₃. Chalk freed from most of its impurities by elutriation, and afterward dried in small masses, which are usually of a conical form. Used in *Hydrargyrum cum Creta*, *Mistura Creta*, *Pulvis Creta aromaticus*, *Pulvis Creta cum Opio*. Chalk is an antacid, and acts as an astringent. It is used in cases of diarrhoea.

crĕ-tā'-ĉĕ-ōūs, a. [Lat. *cretaceus* = chalk-like.]

I. *Ord. Lang.*: In any way pertaining to chalk.

"Nor from the sable ground expect success,"
Nor from *cretaceous*, stubborn and jejune."
Philips.

II. Technically:

1. *Min., & Geol., &c.*: Consisting in larger or smaller amount of chalk.

2. *Bot. (Of colors)*: Like chalk, chalky; very dull white with a dash of gray.

† (1) *Cretaceous system or formation*:

Geol.: The system or formation of which at least in England and some other countries, chalk (Latin *creta*) is the characteristic rock. Pure chalk of nearly uniform aspect and composition, stretches from N. W. to S. E., from the north of Ireland to the Crimea, a distance of about 1,311 English miles; the breadth of this great band, from the south of

Sweden to the south of Bordeaux in France, being about 966 miles. But this area does not measure the superficial area of the chalk formation, which is founded not on the mineral character of chalk or any other rock, but on contemporaneity of deposit, as proved by the identity, or at least the close similarity, of the organic remains. [CRETACEOUS PERIOD.]

The Cretaceous formation has generally been divided into an Upper and a Lower series, the former familiarly called the Chalk and the latter the Greensand. Chalk is not a bad popular name for the first series, but Greensand is less appropriate, the green or chloritic grains which originated the name being local and uncharacteristic. A better term is Neocomian, from Neocomium, the old Latin name of Neufchatel, where it is extensively deposited.

Lyell, in his "Student's Elements of Geology" (1871), the last edition of his Manual or Elements, thus divided the Cretaceous rocks and the period during which they were laid down:

(a) Upper Cretaceous or Chalk period:

1. Maestricht Beds and Faxe Limestone.
2. Upper White Chalk, with flints.
3. Lower White Chalk, without flints.
4. Chalk Marl.
5. Chloritic Series, or Upper Greensand.
6. Gault.

(b) Lower Cretaceous or Neocomian:

1. Upper Neocomian
2. Middle " } Wealden Beds
3. Lower " } (Upper part).

In his Abridged General Table of Fossiliferous Strata, given in the same work, the classification is:

10. Maestricht Beds.
11. White Chalk.
12. Chloritic Series.
13. Gault.
14. Neocomian.
15. Wealden.

The Cretaceous formation is the uppermost member of the Secondary or Mesozoic rocks. The Wealden rocks, with which it begins, are fluviatile, or in parts fluvi-marine, never marine. Coniferae, Cycadeæ, and Ferns flourished on the adjacent lands, while Dicotyledonous Angiosperms were absent. It was still the reign of reptiles and specially of the giant Iguanodon, first discovered by Dr. Mantell. With the Lower Neocomian marine conditions began and continued till the end of the Cretaceous period; the water, when the chalk was deposited, being apparently deep. The seas of those times were inhabited by such cephalopodous genera as Ammonites, Baculites, Hamites, and Turritiles, while among the lamellibranchiate mollusks was the abnormal genus Hippurites. Where islands existed pterodactyls, winged reptiles, flew forth, though birds doubtless existed too. But the organisms whose remains have left the most extensive traces were minute foraminiferous animals, Globigerinae, and humble plants called Diatoms, the former forming chalk, and the latter, aided by sponges, forming flint. (Lyell, &c.)

(2) *Cretaceous period*:

Geol.: The period from first to last during which the Cretaceous formation was in process of deposition. The gap between the Cretaceous and the Eocene rocks, as yet very partially filled up, indicates a great lapse of geological time the history of which is still unknown. One or two arches have been cast from the side of the Secondary, and one or two from that of the Tertiary, across fragments of the chasm, but the mass of it still remains unbridged. Sir Charles Lyell thinks that the gap may be as great as all the time which has elapsed from the Eocene till now.

It is not correct to say that we are living in the Cretaceous period. [CHALK.] Nor is it true, as many unacquainted with geology believe, that recent discoveries have proved the Cretaceous period less remote than it was formerly held to be. The discovery that certain cretaceous species and genera once deemed extinct still exist, does not bring cretaceous times one day nearer; it only shows that vastly remote as they are, they have not produced as great a revolution as they were held to have done in the character of the animal life.

†*crĕ-tā'-ĉĕ-ōūs-ly, adv.* [Eng. *cretaceous*; -ly.] In a manner like chalk; as chalk.

Crĕ-tan, *Crĕ-ti-an, a. & s. [Eng. *Cret(e)*; -an.]

A. *As adj.*: Of or pertaining to the island of Crete.

B. *As subst.*: A native or inhabitant of Crete.

"The Cretians are always liars, . . ."—*Titus* i. 12.

**crĕ-tā'-tĕd, a.* [Lat. *cretatus*.] Rubbed or made white with chalk.

Crĕte, s. A large island in the Mediterranean Sea, now belonging to Turkey; it is also called Candia.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; try, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

crē-tic, *crē-tick, s. & a. [Lat. *creticus* (*pes*); Gr. *krētikos* *pous*=the Cretan foot or measure.]

A. As substantive:

Pros.: A measure in Greek and Latin poetry: a poetic foot consisting of one short syllable between two long ones — *v. v.*

"The first verse here ends with a trochee, and the third with a *cretic*."—Bentley: *Diss. upon Phalaris*.

B. As adjective:

Pros.: Of or pertaining to the measure described under A.

crē-ti-qlsm, s. [Latin *creticus*; Gr. *krētikos*=pertaining to Crete, and suff. *-ism*.] The same as **CRETISM** (q. v.).

crē-tin, s. [Fr. *crétin*. By some believed to be from Lat. *Christianus*, because helpless imbeciles appeal to Christian sympathy. More probably from Fr. *kreide*, *cräie*=chalk, from the blanched appearance of the cretin's skin.] The name given in the Valais and other Alpine valleys to one suffering from a particular kind of idiocy prevalent there. [**CRETINISM**.]

crē-tin-ism, s. [Fr. *crétinisme*.]

Physiol. & Med.: A kind of idiocy prevalent in various Alpine valleys. In most, if not in all cases, the afflicted person has an ugly swelling called a goitre on his neck. This varies in size from a walnut to a quarter loaf. The existence of such a protuberance does not, however, necessarily imply idiocy. The mental deficiency varies in degree, being in some cases so great that the unhappy person thus affected is unable to do anything for himself, and cannot even articulate words, but makes a sound like that of the inferior animals; in others there are some faint glimmerings of mind. Various causes of the disease have been assigned.

crē-tism, s. [Gr. *krētismos*=Cretan behavior, i. e., lying.] A lie, a falsehood. The term is derived from the old proverb alluded to by St. Paul in Titus i. 12. [**CRETAN**.]

crēt-ōnne, s. [Fr.]

Fabric: A kind of cotton fabric manufactured with pictorial patterns printed on one side. It is used for curtains, furniture covers, &c.

crē-tōge, a. [Lat. *cretosus*, from *creta*=chalk.] Chalky.

creutz-er, s. [KEETZER.]

creux (*x* silent), *s.* [Fr.=hollow.]

Engin. & Sculpt.: The reverse of relief; thus, to carve *en creux* is to carve below the surface.

crē-vässe, s. [Fr. *crevasse*; Prov. *crebassa*; Low Lat. *crepatia*, from *crepo*=to rattle, to crack, to break.]

I. Ordinary Language:

1. A crevice, a chink. [**CREVICE**.]

2. A break in the embankment of a river; an artificial lake, tank, &c., caused by the pressure of the water. (*American*.)

(1) *Gen.*: A crack or fissure in any body, as in an embankment.

(2) *Spec.*: A long deep fissure in the snow and ice of a glacier. [**II.**]

Crevasse.

II. Geol. & Ord. Lang.: A deep fissure in the snow and ice of a glacier, in general extending to the rocky mountain side on which the glacier rests.

crevasse-stopper, s. A kind of floating dock which is brought broadside against the bank and sunk in place, to act as a dam. When it is fairly anchored, the sheet-piling is driven down into the bed both on the chord and arc side of the structure. (*Knight*.)

crēv-ēt, s. [CRUET.] A crucible or melting-pot.

crēv-lce, *cravass, *crevasse, *crevesse, *crevis, *crevisse, s. [Fr. *crevasse*, from Fr. *crever*=to burst asunder, from Lat. *crepo*.] A crack, a cleft, a narrow opening, a fissure. [**CREVASSE**.]

"And still, all deadly aim'd and hot,
From every crevice comes the shot."

Byron: *The Siege of Corinth*, v. 29.

***crēv-lce, v. t.** [**CREVICE**, *s.*] To crack, to flaw, to make a crevice in.

"So laid, they are more apt in swagging down to pierce with their points, than in the jacent posture, and so to crevice the wall."—Wotton: *Architecture*.

crēv-lced, a. [Eng. *crevic(e)*; -ed.] Full of crevices or chinks.

"Trickling through the crevice'd rock."

Cunningham: *Day*.

crew, *crue (*ew* as *ū*), *s.* [Icel. *krú*, *grú*, *grú*=a swarm, a crowd; *krúa*=to swarm. (*Skeat*.)]

I. Ordinary Language:

1. In the same sense as **II.**

2. A number of persons associated or assembled for any purpose.

"The king's owne troupe came next, a chosen crew,
Of all the campe the strength, the crowne, the flower."

Fairfax: *Godfrey of Boulogne*, bk. xvii., § 29.

3. Used spec. in a bad sense: a gang, a mob.

"He was ably assisted in the work of extortion by the crew of parasites who were in the habit of drinking and laughing with him."—Macaulay: *Hist. Eng.*, ch. v.

II. Nautical:

1. The company of seamen who man a boat, vessel, or ship. Properly the term includes officers as well as men, but it is now generally restricted to the latter.

"... the Tarentines sank four of the ships, and took one with the crew."—Levins: *Cred. Ear. Roman Hist.* (1855), ch. xiii., pt. ii., § 37, vol. ii., p. 476.

2. The men assisting a gunner, boatswain, or carpenter.

crew, pret. of v. [**CROW**, *v.*]

crew-ēl (*ew* as *ū*), ***crewell, *cruel, s. & a.** [*Etym.* uncertain; possibly the same as Dut. *kiewel*=a clew or ball of thread.]

A. As subst.: Fine two-threaded worsted, used to ornament the dresses of servants and the lower classes in the sixteenth century, principally for garters, girdles, fringes, &c.

"With here and there a tuft of crimson yarn,
Or scarlet crewel, in the cushion fix'd."

Cowper: *Task*, bk. i., 53, 54.

B. As adj.: Made of the material described in A.

"Ere we contribute a new crewel garter
To his most worsted worship."

B. Jonson: *Alchemist*.

crew-ēls (*ew* as *ū*), *s. pl.* [A corruption of Fr. *écrouelles*.] The scrofula.

"... having a beloved child sick to death of the crewels, was free to exhortulate, . . ."—Scott: *Heart of Mid-Lothian*, ch. xlvii.

crēx, s. [Imitated from the voice of the bird.]

Ornith.: A genus of grallatorial birds, family Rallidae, sub-family Ralline. *Crex pratensis* is the Corn-crake (q. v.).

crēy-at, s. [The name of the plant in various languages and dialects in India.] *Andrographis* or *Justicia paniculata*. It is the basis of a celebrated French bitter tincture called *Droge amère*.

crib, *cribbe, *cryb, *crybbe, s. [A. S. *crib*, *cryb*. Cogn. with Dut. *krīb*; Icel. *krubba*; Dan. *krybbe*; O. H. Ger. *chripfa*; M. H. Ger. *krippe*; Ger. *krippe*.]

"They putte hym in a litel *cribbe*, ischape as a lite bote, and dede hym in to the see."—Trevisa, iv. 353.

4. A child's cot.

5. A small cottage, a hovel.

"Why rather, sleep, liest thou in smoky cribs,
Upon uneasy pallets stretching thee . . .
Than in the perfumed chambers of the great?"

Shakespeare: *Henry IV*, Pt. II., iii. 1.

6. A reel for winding yarn. (*Scotch*.)

II. Figuratively:

1. Anything stolen, a theft; a plagiarism.

2. A translation or key used by schoolboys, &c. (*Colloquial*.) (Lytton: *Pelham*, ch. ii.)

*3. The stomach. (*Slang*.)

4. A house. [**CRACK**, *v.*, A. ¶ (1).]

B. Technically:

1. *Agric.*: A granary with slatted sides for ear corn.

2. *Timber trade*: A small raft of timber. (*Canadian*.)

3. *Civil Engineering*: A structure of logs to be anchored with stones. Cribs are used for bridge-piers, ice-breakers, dams, &c. [**DAM**.]

A. Cards:

(1) A popular name for the game of cribbage.

(2) In the game of cribbage, a hand of cards made up of two thrown out by each player.

crib-biter, s.

Veterinary: A horse giving to crib-biting (q. v.).

"... there is no surer test of neglectful supervision than the existence of a *crib-biter*, or of a *sore-back*."—Day: *The Race-horse in Training*, 1880, ch. v., pp. 37-8.

crib-biting, s.

Veterinary: A bad habit in a horse, often occasioned by uneasiness in breeding of teeth, and from being ill-fed when hungry. It consists in seizing in the teeth the manger, rack, &c., and sucking in the air with a peculiar noise, technically known as *wind-sucking*. It frequently causes colic or gripes.

"Horses when idle often contract bad habits—*crib-biting*, *wind-sucking*, *kicking in the stable*."—Day: *The Race-horse in Training*, ch. v., p. 37.

crib-strap, s.

Ménage: A neck-throttler for crib-biting and wind-sucking horses.

crib, v. t. & i. [**CRIB**, *s.*]

A. Transitive:

1. *Lit.*: To shut up in a crib or narrow habitation; to confine.

"Now I am cabin'd, *cribb'd*, confin'd, bound in
To saucy doubts and fears."

Shakespeare: *Macbeth*, iii. 3.

2. *Fig.*: To steal, to appropriate, to plagiarize.

"... I have a habit of never writing letters but at the office; 'tis so much time *cribb'd* out of the Company."—Lamb: *Essays of Elia*; Letter to Wilson.

***B. Intrans.**: To be shut up or confined in a crib.

"Who sought to make the glory of the nation and Church truckle under a Scotch canopy, and bishops to *crib* in a presbyterian trundle-bed."—Ep. Gauden: *Anti-Baal-Berith*, 1661, p. 35.

crib-bage (*bage* as *big*), ***crib-bidge, s.** [Prob. from *crib*, *s.*]

Cards: A game at cards played usually by two players, but sometimes by three or even four. The whole pack of cards is used, and the dealer deals out five (or sometimes six) cards to each player. The crib is made up of two cards thrown out by each player, the non-dealer discarding first. The points are counted by the number of separate sets of fifteen formed by the pips, and also by pairs of any cards and runs or successions of three or more cards in regular order. The crib, or cards discarded, belong to the dealer, who scores all the points gained by it.

"For cards, the philologie of them is not for an essay. A man's fancy would be summ'd up in *cribbidge*."—John Hall: *Horæ Vœvæ*, p. 150 (1846).

cribb'd, pa. par. or a. [**CRIB**, *v.*]

crib-blīng, pr. par., a. & s. [**CRIB**, *v.*]

crick-ēt (2), s. [A. S. *crice* = a staff, and Eng. dimin. suff. -et.]

1. **Sports**: The national game of England, played by two sides, generally of eleven players each. At a distance of twenty-two yards apart the wickets, that is, the three stumps, are pitched; on the tops of these stumps are transverse pieces of wood called *bails*. As soon as it has been determined which side is to bat first, the game begins. The batsmen take their places one at each wicket: the players on the opposite side are placed in different positions about the field, wherever it appears most advantageous to their captain. [FIELD.] One bowls the ball from behind the bowling-crease (CREASE) at one wicket, and endeavors with it to hit the stumps at the other end. This the batsman endeavors to prevent, by hitting the ball away with his bat. The batsmen must not move out of their ground, that is, outside the popping-crease, except at the risk of being put out, that is, of having to give up batting to another of their own side. Should the batsman drive the ball a sufficient distance, the two batsmen endeavor to cross from one wicket to the other before the ball can be returned to the wicket by the fielders. Each time the batsmen thus change wickets a "run" is scored, which is put to the credit of the striker. Should one of them fail to reach his ground before one of the opposite side can knock the bails off the stumps, he is out. A batsman can also be put out by any of the fielders catching a ball hit by him before it touches the ground, or by the bowler knocking off the bails of his wicket, or if he places any part of his body in such a position as to prevent the ball from hitting the wicket. When all the players of one side are out, the other side begins to bat, while their opponents take their places in the field, and the game is won by the side which scores the greatest number of runs. Cricket is supposed to be a development of the old English game of club-ball which was played with a crooked stick. The word itself is first mentioned in 1598. [BOWLER, INNINGS, FIELDER, OVER, s.; WICKET.]

2. A low stool, or a low table or portable shelf for kitchen uses.

"I rue
 The error now which is become my crime."
Milton: P. L., ix., 1181.

2. Any act contrary to some law human or divine; a failure to perform some act ordered by law; a gross violation of some law.

"A crime or misdemeanor is an act committed or omitted, in violation of a public law, either forbidding or commanding it."—Blackstone: *Comment.*, bk. iv., ch. I.

3. Any great act of wickedness; a sin.

"No crime was thine, if 'tis no crime to love."
Pope: Elegy on an Unfortunate Lady.

*4. The cause or source of any crime.

"Great God it planted in that blessed stedd
 With his Almighty hand, and did it call
 The tree of life, the crime of our first father's fall."
Spenser: F. Q., I. xi. 46.

¶ Though the word *crime*, in its most general interpretation, comprehends all offenses against public law, yet in its limited sense it is confined to felony. The term *misdemeanor* is used of offenses inferior to felony, punishable by indictment, or by particular prescribed proceedings.

¶ (1) Crabb thus discriminates between *crime*, *vices*, and *sins*: "A crime is a social offense; a vice is a personal offense; every action which does injury to others, either individually or collectively, is a crime; that which does injury to ourselves is a vice. The crime consists in a violation of human laws; the vice in a violation of the moral law; the sin in a violation of the Divine law: the sin, therefore, comprehends both the crime and the vice; but there are many sins which are not crimes and vices: crimes are tried before a human court, and punished agreeably to the sentence of the judge; vices and sins are brought before the tribunal of the conscience; the former are punished in this world, the latter will be punished in the world to come, by the sentence of the Almighty: treason is one of the most atrocious crimes; drunkenness one of the most dreadful vices; religious hypocrisy one of the most heinous sins. Crimes cannot be atoned for by repentance; society demands reparation for the injury committed; vices continue to punish as long as they are cherished; sins are pardoned through the atonement and mediation of our blessed Redeemer, on the simple condition of sincere repentance. Crimes and vices disturb the peace and good order of society, they affect men's earthly happiness only; sin destroys the soul, both for this world and the world to come: crimes sometimes go unpunished; but sin carries its own punishment with it: murderers who escape the punishment due to their crimes commonly suffer the torments which attend the commission of such flagrant sins. Crimes are particular acts; vices are habitual acts of commission; sins are acts of commission or omission, habitual or particular: personal security, respect for the laws, and regard for one's moral character, operate to prevent the commission of crimes or vices; the fear of God deters from the commission of sin. . . ." (Crabb: *Eng. Synon.*)

(2) He thus discriminates between *crime* and *misdemeanor*: "The former of these terms is to the latter as the genus to the species; a misdemeanor is in the technical sense a minor crime. House-breaking is under all circumstances a crime; but shoplifting or pilfering amounts only to a misdemeanor. Corporal punishments are most commonly annexed to crimes; pecuniary punishments frequently

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

to misdemeanors. In the vulgar use of these terms, *misdemeanor* is moreover distinguished from *crime*, by not always signifying a violation of public law, but only of private morals; in which sense the former term implies what is done against the state, and the latter that which offends individuals or small communities." (Crabb: Eng. Synon.)

**crime*-fūl, a. [Eng. *crime*; *-ful*(l).] Involving a ground of accusation; criminal, wicked; contrary to law or right.

"Sponged and made blank of crimeful record all
My mortal archives."

Tennyson: St. Simon Stylites.

**crime*-lēss, a. [Eng. *crime*; *-less*.] Free from crime or fault; faultless, innocent.

"My foes could not procure me any scathe,
So long as I am loyal, true, and crimeless."

Shakespeare: Henry VI., Pt. II., ii. 4.

crim-in-əl, **criminal*, a. & s. [O. Fr. *criminal*; Lat. *criminalis*, from *crimen* (genit. *criminis*) = a crime, a charge; Fr. *criminel*; Ital. *criminale*; Port. & Sp. *criminal*.]

A. As adjective:

I. Ordinary Language:

1. Of things: Of the nature of a crime; involving a crime; contrary to duty, law, or right.

"For on his back a heavy load he bare
Of nightly stealths, and pillage several,
Which he had got abroad by purchases criminal."

Spenser: F. Q., I. iii. 16.

2. Of persons: Guilty of a crime; tainted with crime.

"The neglect of any of the relative duties renders us
criminal in the sight of God."—Rogers.

II. Law: Relating to crimes; opposed to civil (q. v.).

"The discussion and admeasurement of which (the general nature of crimes and their punishment), forms in every country the code of criminal law."—Blackstone: Comm., bk. iv., ch. I.

Crabb thus discriminates between *criminal* and *guilty*: "*Criminal* respects the character of the offense; *guilty* respects the fact of committing the offense. The *criminality* of a person is estimated by all the circumstances of his conduct which present themselves to observation; his *guilt* requires to be proved by evidence. The *criminality* is not a matter of question, but of judgment; the *guilt* is often doubtful, if not positively concealed. The higher the rank of a person, the greater his *criminality* if he does not observe an upright and irreproachable conduct: where a number of individuals are concerned in any unlawful proceeding, the difficulty of attaching the *guilt* to the real offender is greatly increased. *Criminality* attaches to the aider, abettor, or encourager; but *guilt*, in the strict sense, only to the perpetrator of what is bad. A person may therefore sometimes be *criminal* without being *guilty*. He who conceals the offenses of another may, under certain circumstances, be more *criminal* than the *guilty* person himself. On the other hand, we may be *guilty* without being *criminal*: the latter designates something positively bad, but the former is qualified by the object of the *guilt*. Those only are denominated *criminal* who offend seriously, either against public law or private morals; but a person may be said to be *guilty*, either of the greatest or the smaller offenses. He who contradicts another abruptly in conversation is *guilty* of a breach of politeness, but he is not *criminal*. *Criminal* is moreover applied as an epithet to the thing done; *guilty* is mostly applied to the person doing . . ." (Crabb: Eng. Synon.)

B. As substantive:

1. One who is guilty of a crime; one who has committed some great offense against law, duty, or right; a malefactor, a culprit, a felon.

"Suppose a civil magistrate should have a *criminal* brought before him, accused, for instance, of murder, burglary, or the like, and the fact is proved, would not he have him in that case to pronounce the sentence that the law has awarded to all such malefactors?"—Sharp, vol. vi., ser. 6.

2. One who is accused of crime.

"Was ever criminal forbid to plead?
Curb your ill-manner'd zeal!"

Dryden: Spanish Friar.

*3. (Pl.): Criminal cases.

"By the civil law, albeit probation, especially in *criminals*, cannot proceed unless the defender be present, yet the chief criminal doctors except the case of lese majesty."—Stair: Suppl. Dec., p. 159.

Crabb thus discriminates between *criminal*, *culprit*, *malefactor*, *felon*, and *convict*: "When we wish to speak in general of those who by offenses against the laws or regulations of society have exposed themselves to punishment, we denominate them *criminals*: when we consider them as already brought before a tribunal, we call them *culprits*: when we consider them in regard to the moral turpitude of their character, as the promoters of evil

rather than of good, we entitle them *malefactors*: when we consider them as offending by the grosser violations of the law, they are termed *felons*: when we consider them as already under the sentence of the law, we denominate them *convicts*." (Crabb: Eng. Synon.)

*1. Criminal conversation:

Law: An action for adultery committed with a married woman. The individual arraigned generally figures as co-respondent in a suit, the respondent to which is the erring wife, against whom the injured husband may petition for a divorce or for judicial separation.

(2) Criminal information:

Law: An action in a court of criminal jurisdiction, nominally at the instance of the people, without a previous indictment by a grand jury. It is of two kinds: (1) *Ex-officio*, for misdemeanors and not for felonies, and (2) *By an individual*, with the permission of the Court, for gross batteries, riots, immoralities, libel, &c.

(3) Criminal jurisdiction: [JURISDICTION.]

(4) Criminal law:

Law: The law which defines what wrong acts are serious enough to be considered crimes, and indicates the penalty affixed by the legislature to each. Formerly it was almost by a Draconian severity, but upon the foundation of the republic special safeguards were introduced into the Constitution against the enactment of unjust criminal laws with cruel penalties annexed.

(5) Criminal letters:

Scots Law: A form of criminal prosecution in Scotland, nominally at the instance of the Crown, corresponding to the first kind of criminal information.

(6) Criminal prosecution:

Law: The whole proceedings in a prosecution of a person for a criminal offense.

(7) Criminal statutes:

crî-nôl-dê-s, *s. pl.* [CRINOID.] [From the lily-like appearance of the stalked and branched animals so named.]

1. *Zool.:* Crinoideans. An order of Echinodermata, in which the body is fixed during the whole or a

portion of the existence of the animal to the sea-bottom, by means of a longer or shorter jointed and flexible stalk. There are five to ten "arms," each provided with branches or pinnule; the body is composed of articulated plates, perforated centrally by a canal. The mouth is central and looks upward. The embryo is free. At the summit of the stem is placed a calyx. The Crinoidea are divided into three families—(1) Cystocrinidae, found only fossil, (2) Encrinuridae or Sealilies, and (3) Comatulidae (Hair-stars), the last two both recent and fossil. The living Crinoids, however, are but few, and occur sparingly in most seas. The Pentactinidae are stalked during the whole of their existence, while the Comatulidae are ultimately free. The Crinoidea are called also PINNIGRADA (q. v.).

Crinoidean (Sea-lily).

2. *Palæont.*: The Crinoidea are found from Silurian times on through the whole Paleozoic period, reaching their maximum in the Carboniferous rocks. Other forms flourish through the whole Mesozoic period. Most of these are stalked, but forms resembling the modern Comatula have been found in the Jurassic and the Cretaceous rocks.

The species are nautiloid, and present a resemblance in miniature to the Nautilus. Dr. Carpenter, Mr. Parker, and Prof. T. Rupert Jones also recognize the family *Cristellaridæ*.

2. *Palæont.*: They extend from the Cretaceous period till now.

cri-têr-lî-ôn (pl. *criteria*), *s.* [Gr. *kritêrion*, from *kritês*=a judge; *krinô*=to judge, to decide.]

1. A standard by which anything is or can be judged; an established law, principle, or fact by which the quality of anything may be estimated.

"The great criterion of the state of the common people is the amount of their wages."—*Macaulay: Hist. Eng.*, ch. iii.

2. Any ground or basis of judging.

"Certain inferences, founded on such enduring *criteria*, can be drawn from the historical times to the dark and unknown ages, . . ."—*Lewis: Cred. Early Rom. Hist.* (1856), ch. viii., § 1, vol. 1, p. 268.

Crabb thus discriminates between *criterion* and *standard*: "The *criterion* is employed only in matters of judgment; the *standard* is used in the ordinary concerns of life. The former serves for determining the characters and qualities of things; the latter for defining quantity and measure. The language and manners of a person are the best *criterion* for forming an estimate of his station and education. In order to produce a uniformity in the mercantile transactions of mankind one with another, it is the custom of government to set up a certain *standard* for the regulation of coins, weights, and measures. The word *standard* may likewise be used figuratively in the same sense. The Bible is a standard of excellence, both in morals and religion, which cannot be too closely followed. It is impossible to have the same *standard* in the arts and sciences, because all our performances fall short of perfection, and will admit of improvement." (*Crabb: Eng. Synon.*)

crith, *s.* [Gr. *krithê*=barley, . . . a barley-corn.] A term introduced by Hoffmann, and signifying 0.0896 grammes—the weight of a liter of hydrogen at 0° Centigrade, and under a barometric pressure of 0.76 meters.

"The weight of 1 liter of hydrogen being called 1 *crith*, the volume-weight of other gases, referred to hydrogen as a standard, may be expressed in terms of this unit. For example, the relative volume-weight of chlorine being 35.5, that of oxygen 16, that of nitrogen 14, the actual weights of 1 liter of each of these elementary gases at 0° C. and 0.76 m. pressure, may be called respectively 35.5 *criths*, 16 *criths*, and 14 *criths*. So, again, with reference to compound gases, the relative volume-weight of each is equal to half the weight of its product-volume. Hydrochloric acid, for example, consists of 1 volume of hydrogen and 1 volume of chlorine=2 volumes; or by weight 1+35.5=36.5 units, whence it follows that the relative volume weight of hydrochloric acid gas is 36.5÷2=18.25 units, which last figure, therefore, expresses the number of *criths* which 1 liter of hydrochloric acid gas weighs at 0° C. temperature and 0.76 meters pressure, and the *crith* being 0.0896 grammes, we have 18.25×0.0896=1.6352, as the actual weight in grammes of a liter of hydrochloric acid gas. . . . Thus by aid of the hydrogen liter weight, or *crith*, 0.0896 grammes employed as a common multiple, the actual or concrete weight of 1 liter of any gas, simple or compound, at standard temperature and pressure, may be deduced from the mere abstract figure expressing its volume-weight relatively to hydrogen."—*Hoffmann: Modern Chemistry*, pp. 131, 132.

crith-mûm, *s.* [Gr. *krêthmos*, *krêthmon*, *krithmos*=sapphire. According to Hooker and Arnott from Gr. *krithê*=barley, to the grain of which the fruit of the plant has some resemblance.]

Bot.: A genus of umbelliferous plants, family *Seselinidæ*. The involucres are many-leaved; the carpels spongy, with five elevated, sharp, somewhat winged ribs, and marked with numerous vittæ; fruit elliptic. *Crithum maritimum*, a plant with biternate fleshy leaves, is the Sea-sapphire alluded to by Shakespeare [*SAMPHIRE*] in connection with the cliffs of Dover, where it grows. It is found along the Atlantic coast in Europe, in the Mediterranean, the Black Sea, &c. It is one of the best ingredients in pickles.

***crith-ô-mân-gÿ**, *s.* [Gr. *krithê*=barley, and *manteia*=prophecy, divination.] An ancient method of divination performed by examining the dough or matter of the cakes offered in sacrifices, and the meal strewed over the victims to be killed.

crit-ic, ***crit-ick**, ***crit-ique**, *s. & a.* [Gr. *kritikos*, *kritês*=a judge; *krinô*=to judge, to decide.]

crō-cē-tin, *s.* [Lat. *crocus*; *t* connective; Eng. suff. *-in* (Chem.).]

Chem.: $C_{24}H_{36}O_{11}$. A dark red amorphous powder, obtained by boiling crocin in an atmosphere of carbon dioxide with dilute sulphuric acid. Stuffs mordanted with tin salts acquire by boiling with crocetin a dingy yellow-green color, which by ammonia is turned bright yellow. The yellow robes of the Chinese mandarins are dyed with the fruit of *Gardenia*.

***croche**, *s.* [O. Fr. Cf. *crook*, and Gael. *croic*=a deer's antler.] A little knob which grows at the top of a deer's horn.

***cro-chet** (1), ***crochett**, *s.* [CROCHET.]

crō-chēt (*t* silent) (2), *s.* [Fr. dimin. from *croc*=a hook.] A kind of knitting performed with a little hook, the materials used being cotton, worsted, or silk.

crochet-lace, *s.* Hand-knitted lace.

crochet-needle, *s.* A needle with a hooked end, used for catching the thread and drawing it through the loop in crochet-work.

crochet-type, *s.* Type with fancy faces, to set up in imitation of lace, crochet, or worsted work. (*Knight*.)

crō-chēt (*t* silent), *v. t.* [CROCHET (2), *s.*] To knit or make in the style of crochet.

***croch-e-teur**, *s.* [Fr.] A common porter.

"Rescued? 'Slight I would
Have hired a crocheteur for two carduecs.
To have done so much with his whip."
Beaumont & Fletcher: Hon. Man's T., iii. 1.

***crō-qi-ar-y** (*ci* as *shī*), *s.* [Mid. Eng. *croisier*=a crozier; suff. *-y*.] [CROZIER.]

Eccles.: The official who carries the cross before an archbishop.

crō-čid-ō-lite, *s.* [Ger. *krokydolith*, from Gr. *krokis*, *krokys*=wool, in allusion to the fibrous structure.]

Min.: A fibrous opaque mineral, in aspect like asbestos. Hardness, 4; specific gravity, 3.2-3.26; luster, silky; color, blue or green. Composition: Silica, 51-53; protoxide of iron, 26-34; soda, 5.6-7.0; water, 2.5-5.5, &c. Occurs in South Africa, in Moravia, and in Norway. (*Dana*.)

crō-čin, *s.* [Lat. *crocus*; Eng. suff. *-in* (Chem.).]

Chem.: $C_{20}H_{12}O_{15}$. A yellow coloring substance, occurring in Chinese yellow, obtained from the fruit of *Gardenia grandiflora*. It is a bright red powder, soluble in water and in alcohol; with strong sulphuric acid it turns indigo-blue, then violet. Boiled with dilute acid in an atmosphere of CO_2 it yields crocetin and sugar.

crock (1), *s. & v. t.* [A. S. *crocca*. Cogn. with O. Fr. *krokha*; Dut. *cruike*; Icel. *krukka*; Sw. *kruka*; Dan. *krukke*. Skeat thinks it is probably from Gael. *crog*=a pitcher, a jar; Ir. *crogan*; Wel. *cruc*, *crochan*.]

1. An earthenware vessel; a pot, a pitcher, a cup.

"... these crocks were most sufficiently kiln-baked to withstand percolation."—*Dr. Hume: Ancient Meals*, p. 334.

2. (For definition see extract.)

"Black or soot of a pot, or a kettle, or chimney-stock, is called crock."—*Ray: South and East Country Words*.

3. A pot covered with dirt or soot.

"As black as a crock."—*C. Brontë: Jane Eyre*, ch. xviii.

crock-saw, *s.* A bar of iron, toothed like a saw, which hangs at the back of the fire to carry pots and crocks. (*Blackmore: Lorna Doone*.)

crock (2), *s.* [Etym. unknown.]

1. *Lit.*: A ewe that has given over bearing. (*Burns: The Two Herds*.)

2. *Fig.*: Any useless or worthless animal, especially a horse. (*Slang*.)

crock (3), *s.* [Etym. unknown.] A little stool.

"I bid her come out of the crowd, and seated her upon a little crock at my left hand."—*Tatler*, No. 116.

crock (1), *v. t. & i.* [CROCK (1), *s.*]

A. Trans.: To black with soot of a pot, kettle, &c. "I couldn't condescend to touch with kitchen tongs without crocking myself by the contact."—*Dickens: Nicholas Nickleby*, ch. xliii.

B. Intrans.: To give off soot or smut; to give off coloring matter, as the dye from cloth, &c. Hosiery is often warranted not to *crock*.

crock (2), *v. t.* [CROCK (1), *s.*] To put up in a crock; as, to *crock* butter.

***crocker**, ***crockere**, ***crockere**, *s.* [Eng. *crock* (1), *s.*; *-er*.] A maker of earthenware vessels; a potter.

"As a vessel, of a crockere."—*Wycliffe: Ps.* ii. 9.

crock-ēr-y, *s.* [Eng. *crocker*; *-y*.] Earthenware; vessels manufactured of clay, baked and glazed.

"... articles of domestic crockery."—*Dr. Hume: Ancient Meals*, p. 330.

crockery-ware, *s.* The same as CROCKERY (*q. v.*).

crock-ēt, *s.* [Fr. *crochet*=a little hook.]

1. *Arch.*: An upwardly projecting carved ornament on a Gothic gable or flying-buttress.

"The earliest crockets are to be found in the early English style."—*Glossary of Architecture*.

2. Applied to the croches or knots on a stag's head.

"Of the antlers and the crockets."—*Blackmore: Princess of Thule*, ch. xxv.

crock-ēt-ēd, *a.* [Eng. *crocket*; *-ēd*.]

1. *Lit. & Arch.*: Furnished or ornamented with crockets.

2. *Fig.*: Ornamented as with crockets.

crock-y, *a.* [Eng. *crock* (1), *s.*; *-y*.] Covered with soot or smut.

crōc-ō-dīle, ***cokedrill**, *s. & a.* [Dan. *crocodil*; Sw. *D. krokodil*; Ger. *Krokodil*; Fr. *crocodile*; Prov. *cocodrill*, *cocodrille*; Sp. & Port. *cocodrilo*; Ital. *cocodrilo*; Lat. *crocodilus*; from Gr. *kroko-deilos*, properly an Ionic word,=(1) a kind of lizard, (2) the crocodile or alligator of the Nile. Little or no weight is to be attached to the statement that this is from *krokos*=(1) the crocus, (2) saffron, and *deilos*=... afraid of, and that the Egyptians placed saffron before their beehives to protect them from the animal.]

A. As substantive:

I. Ordinary Language and Zoology.:

1. *Spec.*: A huge reptile, in general contour most resembling a great lizard, found in or near the Nile and some other rivers. It is the *Lacerta crocodilus* of Linnaeus, the *Crocodilus vulgaris* of Cuvier. Its jaws project moderately; there are six cervical plates; the dorsal shields or scuteons are quadrangular and surrounded by six rows of slightly elevated carinae. The hinder feet are palmated, their posterior border with a festooned crest. It is about twenty-five feet long. At least four varieties of it exist. It was held sacred among the ancient Egyptians. The Nile was and is its best known habitat. It darts with rapidity through the water after the fish, which is its appropriate food, but is dangerous also to dogs, or to human beings entering the water or lingering incautiously on the bank. The way to elude it on land is to turn rapidly and repeatedly in retreating from it, leaving it on each occasion to wheel its clumsy body round.

The Leviathan of Job is almost certainly the crocodile, but in other parts of Scripture different animals are designated by the same word.

"By muddy shore of broad seven-mouthed Nile,
Unweeting of the perilous wandering ways,
Doth meete a cruell craftie crocodile."—*Spenser: F. Q.*, I. v. 18.

2. *Gen.*: Any closely allied animal. [CROCODILUS, CROCODILIDE.]

II. Logic.: A fallacious dilemma mythically supposed to have been first propounded by a crocodile.

B. As adjective:

1. In any way pertaining to the animal described under *A.*, or to its congeners.

2. Resembling the crocodile.

3. Consisting of crocodiles or animals akin to them, as the crocodile family or genus.

crocodile tears, *s. pl.* [So named from the ancient fable that the crocodile shed tears over its prey. It is averred that they sigh and moan like persons in sore distress.] Hypocritical tears shed by a man of pitiless cruel disposition.

crō-cō-dīl-ī-a, *s. pl.* [Lat. *crocodil(us)*, and *pl. neut. adj. suff. -ia*.]

1. *Zool.*: An order of Reptiles, one of four which have modern representatives, the others being Lacertilia (Lizards), Ophidia (Serpents), and Chelonia (Turtles and Tortoises). They are most closely akin to the first, but differ in having a bony dermal exoskeleton in addition to the ordinary epidermic covering of scales, in having the teeth lodged in distinct sockets, and in internal anatomical characters. In all living crocodiles the centers of the dorsal vertebrae are concave in front; in the fossil species they may be either doubly concave or concave behind. The heart consists of two auricles and two ventricles; the fore feet have five toes, the hind ones four. All the species are oviparous. The

Crocodile.

order contains the modern Crocodiles, Alligators, and Caimans, with the extinct Teleosauria and Belodonts. Professor Owen divides the Crocodilia into three sub-orders: (1) Procolia, or those which have the dorsal vertebrae concave in front; (2) Amphicelia, or those which have them concave at both ends, and (3) Opisthocelia, in which they are concave behind. The first sub-order comprehends all the living forms, whether Crocodiles proper, Alligators, or Gavials. Professor Huxley divided the Crocodilia into three sub-orders, founded on characters derived from the base of the skull and from the nostrils, &c.: (1) Parasuchia, (2) Mesosuchia, and (3) Eusuchia. (See these words.) Under the first were ranked Stagonolepis and Belodon, under the second Teleosaurus, &c., and under the third Crocodilus and other modern genera.

2. *Palaeont.*: Professor Huxley points out that the Parasuchia came first in time, being specialized from the Lacertilia at least as early as the Upper Trias. The Mesosuchia began not later than the Upper Trias, from which they go on to the Cretaceous period. The Eusuchia begin in the Greensand and continue till now. He is of the opinion that all this is exactly accordant with what is required by the theory of evolution, and the case of the crocodiles is as cogent evidence of the actual occurrence of evolution as that of the horses.

crōc-ō-dīl-ī-an, **tercō-ō-dīl-ē-an**, *a. & s.* [Eng. *crocodil(e)*, *i* or *e* connective, and suff. *-an*.]

A. As adjective:

1. *Lit. (of a reptile)*: Akin to the crocodile.

"I think it is clear that Stagonolepis is, in the main, a crocodilian reptile."—*Prof. Huxley, in Q. J. Geol. Soc.*, vol. xv. (1859), pt. i., p. 455.

2. *Fig.*: Crocodile-like in character; treacherous and cruel.

"O what a crocodilian world is this,
Compos'd of treach'ries and insinuating wiles!"
Quarles: Emblems.

B. As subst.: A member of the order Crocodilia (*q. v.*).

"... the dorsal scales of the same Crocodilians."—*Prof. Huxley, in Q. J. Geol. Soc.*, vol. xv. (1859), pt. i., p. 450.

crōc-ō-dīl-ī-dae, *s. pl.* [Lat. *crocodil(us)*, and fem. *pl. adj. suff. -idae*.]

1. *Zool.*: A family of Reptiles, the typical one of the order Crocodilia. It contains the Crocodiles, Alligators, and Gavials (*q. v.*).

2. *Palaeont.*: The genera Crocodilus, Alligator, and Gavialis have all representatives in the Eocene beds of England.

crō-cō-dīl-īne, *a.* [Lat. *crocodilinus*.] Like a crocodile.

tercō-ō-dīl-ī-tŷ, *s.* [Lat. *crocodil(us)*, and suff. *-ity*.]

Logic.: A captious or sophistical method of argumentation. [CROCODILE, *A. II.*]

crōc-ō-dīl-lūs, *s.* [Latin=the crocodile (*q. v.*).]

Zool.: A genus of Reptiles, the typical one of the family Crocodilidae and the order Crocodilia. They have an oblong, blunt, and flattened snout, with two long canine teeth, those of the lower jaw received into a notch in the upper one. The Nilotic, or Common Crocodile, *Crocodilus vulgaris*, belongs to the genus. The Alligators of the West Indies also belong to the genus, but those on this continent are ranked under the genuine genus Alligator (*q. v.*).

crō-cō-īte, ***crō-cōlg-īte**, *s.* [Ger. *crocoisit*, *crocoise*, *krokoit*, from Gr. *krokos*=saffron.]

Min.: A hyacinth-red translucent mineral, adamantine to vitreous in luster; hardness 2.5-3, specific gravity 6. Composition: Oxide of lead, 68.9; chromic acid, 31.1=100. Found in Siberia, Brazil, Hungary, and the Philippian Islands. (*Dana*.) Dana prefers the form Crocoite.

crō-cōn-āte, *s.* [Eng. *crocon(ic)*, and suff. *-ate*.] A salt of croconic acid (*q. v.*).

crō-cōn-īc, *a.* [Gr. *krokos*=saffron.] Saffron-colored.

croconic acid, *s.*

Chem.: $C_5H_2O_6$. Obtained by dissolving in water the compound formed by the union of carbon monoxide with potassium, after it has been exposed to the air for several weeks or else it explodes. It is a dibasic acid, and is obtained from the water solution in long yellow needles of croconate of potassium; oxalate of potassium remains in solution. The free acid is obtained in orange-yellow crystals, by decomposing the potassium salt with sulphuric acid. It is soluble in water. The croconates are yellow, hence the name of the acid.

crō-cō-xān-thin, *s.* [Lat. *crocus*, and Gr. *xanthos*=yellow.]

Chem.: A yellow coloring matter, occurring in the flowers of *Crocus luteus*. It is not acted on by acids or bases. It is soluble in water and in alcohol, but insoluble in ether.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō. sōn; mūte. cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw

croc-, **cūs**, *s.* [Lat. *crocus*; Gr. *krokos*=the crocus.]

1. *Ord. Lang. & Bot.*: A genus of Iridaceæ. The perianth, which is single, is colored. The tube is long and the limb cut into six equal segments. Stamens three, distinct; stigma three-parted or three-cleft, segments widening upwards, plaited; ovary three-celled, many-seeded. The root a corm, the leaves grassy. The appropriate habitat of the crocuses is in the south and east of Europe and in Asia Minor. Some are vernal, others flower in autumn. *Crocus luteus* is the Common or Large Yellow Crocus. It was carried from Turkey to various parts of Europe in A.D. 1629. *C. asiaticus*, imported from Greece in the same year, may not be distinct; nor may *C. aureus*, the Small Yellow Crocus, also from Greece. *C. lageneiformis*, another Greek species, has red-yellow, pale-yellow, and more typical yellow varieties. *C. vernus* is the Common Purple or White Spring Crocus. *C. sativus* is an autumnal plant, brought from the East. It has long been cultivated for its long reddish-orange drooping stigmas, which when dried become the saffron of the shops. According to Gussone *C. odoratus* furnishes Sicilian saffron.

"A certain young gentleman, called *Crocus*, went to plait at coits in the field with Mercurie, and being heedless of himself, Mercurie's coit happened by mishap to hit him on the head, whereby he received a wound that yet long killed him altogether, to the great discomfort of his friends. Finally, in the place where he bled, saffron was after found to grow, whereupon the people seeing the color of the chine as it stood (although I doubt not but it grew there before), adjudged it to come of the blood of *Crocus*, and therefore they gave it his name."—*Holinshed: England*, ch. viii.

2. *Hortic.*: A dry sandy soil is the best for the several crocuses. Their chief foes are slugs, which may be driven away by the application of lime-water.

3. *Phar.*: Saffron. The dried stigma and part of the style of *Crocus sativus*. It has a powerful aromatic odor, and stains the wet skin an intense orange-yellow. Saffron has a slight stimulating action. It is used as a coloring agent, as *Tinctura croci*, and is an ingredient of the decoction of aloes, pill of aloes and myrrh, compound tincture of cinchona, ammoniated tincture of opium, and tincture of rhubarb.

4. *Chem.*: A name given by the alchemists to orange or red-colored metallic oxides and oxysulphides. *Crocus antimonii* or *metallorum* was oxysulphide of antimony; *C. Martii* sesquioxide of iron, and *C. Veneris* cuprous oxide.

5. *Metal.*: A polishing powder composed of peroxide of iron. It is prepared from crystals of sulphate of iron, calcined in crucibles. The portion at the bottom, which has been exposed to the greatest heat, is the hardest, is purplish in color, and is called crocus. It is used for polishing brass or steel. The upper portion is of a scarlet color, and is called rouge. It is used for polishing gold, silver, and speculum metal. Rouge, the cosmetic, is made from safflower, or from carmine, which is a preparation of cochineal.

croft (1), *s.* [A corruption of *carafe* (q. v.).] A glass water-bottle.

"The bishop . . . pushed the croft to the vicar."—*Savage: R. Medlicott*, bk. iii., ch. xiii.

croft (2), **craft**, ***crofte**, *s.* [A. S. Cogn. with Dut. *kroft*=a hillock.]

1. A close or piece of inclosed ground adjoining a house.

"I knew a Scottish peasant who possessed
A few small crofts of stone-encumbered ground."
Wordsworth: *Excursion*, bk. v.

2. A small farm.

"This have I learn'd,
Tending my flocks hard by, 't' th' hilly crofts
That brow this bottom glade."
Milton: *Comus*, 590-92.

croft-land, *s.* The land of superior quality, which, according to the old mode of farming, was still cropped.

"Time and manure were unknown, except on a few acres of what is called *croft-land* . . ."
—*P. Tinevald: Dumfri. Statist. Acc.*, i. 181.

croft-ër, **craft-er**, ***croiteir**, *s.* [Eng. *croft*; -er.] One who rents a small piece of land.

"There cannot be too many day-laborers, nor too few large crofters, who hold their grounds of the farmers."—*Agr. Surv. Aberd.* (Pref. Obs.), p. 14.

croft-ìng, *s.* [Eng. *croft*; -ing.]

1. The state of being successively cropped.

"By turning this croft-land into grass, the labor and manure that has yearly been bestowed upon it, may be employed in improving and enriching the other third part, and bringing it into crofting."—*Maxwell: Sel. Trans.*, p. 12.

2. Transferred to the land itself which is cropped in this way.

"The lands are generally divided into crofting and outfield-land. The crofting consisteth of four breaks."

They shall dung no part of their former crofting, till these four new breaks are brought in."—*Maxwell: Sel. Trans.*, p. 316. (*Jamieson*.)

3. Exposing linen on the grass to the influence of air and sunshine, after being bucked or soaked in an alkaline lye.

***croğ-an** [Gael. *crog*=a crock.] A term used in the West Highlands of Scotland to denote a bowl, or vessel of a similar shape, for holding milk.

***croich-lies**, *s. pl.* [Etym. doubtful.] A disease affecting the cattle on the coast of Moray, Scotland, and described as peculiar to that district.

"The only name by which it is any where known is the *croichlys*.—At first one apprehends a dislocation, or other cause of lameness, in the hip-joint. While attending to that, the other leg is discovered to be in the same state, and in a short time the lameness appears in all the legs."—*Agr. Surv. Nairn and Moray*, p. 316.

***croil**, *s.* [Dut. *krieh*.] A dwarf, a crooked person.

***croīn**, ***croon**, ***croyne**, *v. i.* [CROON, *v.*]

1. To make a continued cry or noise, as a bull.

"He said he was a lichelus bul,
That crouyd even day and nyght."
Maitland: *Poems*, p. 960.

2. To whine, to persist in moaning; often used concerning peevish children, or adults who habitually utter heavy complaints under slight indisposition.

3. To hum or sing in a low tone.

"Whiles holding fast his gude blue bonnet;
Whiles crouching o'er some auld Scots sonnet."
Burns: *Tam o' Shanter*.

***croīn**, ***crone**, ***croyne**, ***crune**, *s.* [CROON, *s.*]

1. A hollow continued moan.

"Like as twa boustous bullis by horn and by,
With front to front and horne for horne attanis
Buschand togiddir with crones and fereful grania."
Doug.: *Virgil*, 497, 49.

2. A simple piece of music; a chant.

3. An incantation, as being uttered with a hollow murmuring sound.

"She can o'ercast the night, and cloud the moon,
And mak the deils obedient to her crune."
Ramsay: *Poems*, li. 95.

croīn-tër, *s.* [Prob. a corruption of *crooner* (q. v.).] One of the names given, on the Frith of Forth, to the Gray Gurnard.

"Trigla Gurnardus, Gray Gurnard; Crooner, or Croīnter."—*Neill: List of Fishes*, p. 14.

***crois**, *s.* [CROSS.]

***crois-àde**, ***crois-a-dò**, *s.* [Fr. *croisade*, from *croiz*=a cross.]

1. A crusade, a holy war.

"See that he take the name of Urban, because a pope of that name did first institute the *croisado* . . ."
—*Bacon*.

2. A crusader.

"If envy make thy labors prove thy loss,
No marvel if a *croisade* wear the cross."
Verses prefixed to *Fuller's Holy War*.

3. A cross.

"Like the rich *croisade* on th' imperial ball."
Zouch: *Dove*, 1613.

***croise** (1), ***croisee**, *s.* [Fr. *croisé*=a crusader, from *croiz*=a cross.]

1. A pilgrim who carried a cross.

2. A crusader; a soldier fighting against infidels under the banner of the cross.

"The clergy, whose wealth and policy enabled them to take advantage of the necessity and weakness of the *croises*, were generally the purchasers of both."—*Burke: Abridgement of English History*.

***croise** (2), *s.* [CRUISE (2), *s.*]

***croise**, *v. t.* [Fr. *croiser*.] To brand with the mark of the cross; to mark in any way with a cross. [CROSS.]

"Himself the first was *croised* on his flesh."
Langtoft, p. 226.

crois-ant, ***crois-sant**, *a. & s.* [CRESCENT, *a.*]

***A. As adj.**: Increasing.

"So often as she [the Moone] is seene westward after the sunne is gone downe, and shineth the forepart of the night onely, she is *croisant*, and in her first quarter."
—*Holland: Pliny*, bk. xviii., c. 32.

B. As substantive:

1. *Ord. Lang.*: A crescent.

" . . . seates a little imbowed neere the forme of a *croisant*."—*The Masque of the Inner Temple and Grayes Inn* (1612).

2. *Her.*: A cross, the ends of which terminated in crescents.

***crois-ër-le**, ***croys-er-le**, ***croys-er-ye**, *s.* [O. Fr. *croiserie*.] A crusade.

"The prechede of the *croyserye* wide."
Rob. of Glouc., p. 486.

***crois-ëy**, ***croysay**, *s.* [Fr. *croisé*=a crusader.] A crusade.

" . . . they were greatly abashed, and then ordeyned a *croysay*, against these yuell Christen people, . . ."
—*Berners: Frois. Cron.*, c. 216.

***crois-ì-ër**, *s.* [O. Fr. *croisier*, from *crois*=a cross.]

Ch. Hist.: A religious order, founded in honor of the invention of the Holy Cross by the Empress Helena. They followed the rule of St. Augustine. In England they obtained the name of *Crouched Friars* or *Crutched Friars* (q. v.). (*Staunton*.)

***crok-ard**, *s.* [Etym. doubtful.] A counterfeit coin, value about one halfpenny, introduced from abroad in the reign of Edward I.

***cro-kër**, *s.* [Eng. *croc*(us); -er.] A cultivator of or dealer in saffron.

"The *crokers*, or saffron-men . . ."
—*Holinshed: England*, c. 8.

cro-mà, *s.* [Ital.]

Music: A quaver (q. v.).

***crombe**, ***cromwbe**, *s.* [Cf. Gael. *crom*=(*s.*) a bending, (*a.*) bent.] A staff with a hooked end.

crom-bolle, *s.* [Mid. Eng. *crom*=crumb, and *bolle*=bowl.] A bread dish (†).

"At the londes ende laye a litell *crombolle*."
P. Plowman: *Crede*, 437.

crom-cruach, *s.* [Gael. *cromchruach*.] The name of the chief idol of the Irish before their conversion by St. Patrick.

***crome**, *s.* [Gael. *crom*=bent.] A hook, a pincer. "Rent apieces with hot burning *cromes*."—*Bacon: Works*, li. 150.

crom-förd-ite, *s.* [Named from Cromford, in Derbyshire, England, near to which it was first found, about the year 1800.]

Min.: A chloro-carbonate of lead, its composition being represented by the formula PbOCO₂·PbCl. It crystallizes in the Pyramidal (*Miller*) or Tetragonal system (*Dana*), and mostly in simple forms of great beauty, in which the square prism predominates. Cleavages parallel to two prisms, and basal. Has occurred in late years in magnificent crystals in lead mines near Monte Ponì, Sardinia, but is still scarce. The same as PROSEGNITE (q. v.). (*Thos. Davies, F. G. S.*)

crom-ì-lech (*ch guttural*), **ì-crom-leh**, *s.* [Wel.=an incumbent flag, a stone of covenant (*Spurrell*); from *crom*=bending, bowed, and *lech*=a flat stone, a flag.]

Archæology: An erection consisting of two or more stones standing like pillars, with a large flat, or rather a slightly inclined one, placed upon the top, so as to make the whole present a rude resemblance to a table. Two fine cromlechs exist at Plas Newydd in Anglesea; others, less notable, are scattered through Wales; they exist also in Scotland, Jersey, Brittany, and throughout the Celtic area. Formerly they were generally held to be old altars for sacrifices. Borlase long ago suggested that they were sepulchres, an opinion which, meeting with but little credit at first, is now the one generally held. A cromlech is called also a Dolmen (q. v.). Somewhat similar erections are seen in various parts of Europe, in Arabia, in India, and North and South America, other races than the Celtic having adopted the same idea.

¶ Nature can ape the formation of at least the top of a rude cromlech. If amid the subsidence which took place during the glacial period, an iceberg grounded on the top of a submarine shoal and melted, a flat tabular stone may have been deposited horizontally upon the summit. On the relevation of the land it may have remained in position. Pseudo-cromlechs of this kind are seen on various mountain-tops.

" . . . and, there, behold

A Druid cromlech!"
Wordsworth: *Excursion*, bk. iiii.

cro-mor-na, *s.* [Ger. *krummhorn*=a crooked horn; Fr. *cornorne*.] [CREMONA.]

Music: The cornorna or krummhorn is a reed-pipe stop of an organ, tuned in unison with open-diapason, and depending for the peculiar timbre or quality of its tone upon the shape and proportions of the tube through which the sound of the tongue is emitted. (*Knight*). [STOP.]

Crom-wèl-ìl-àn, *a. & s.* [From Oliver Cromwell, who was born at Huntingdon, England, April 25, 1599; made Lord Protector of the Commonwealth of England, Scotland and Ireland December 16, 1653; and died September 3, 1658.]

A. As adj.: Pertaining or relating to Oliver Cromwell.

B. As substantive:

1. A follower of Oliver Cromwell.

***cross**-lēt-ēd, *a.* [Eng. *croset*; -ed.] Marked with a crosslet.

"The Saracens, Curdmans, and Ishmaelites yield, To the scallop, the saltier, and crosetled shield,"

Scott: *The Fire-King*.

cross, ***croiz**, ***croice**, ***crois**, ***croiz**, ***cross**, ***croise**, ***croyc**, ***croys**, ***croys**, *s.*, *a.*, *adv.* & *prep.* [O. Fr. *crois*; Fr. *croix*; Sp. & Port. *crúz*; Ital. *croce*, from Lat. *crucem*, accus. of *crux*=a cross; Sw. & Dan. *kors*. The root is the same as in Eng. *crook* (q. v.).]

A. As substantive:

1. **Ordinary Language:**

1. **Literally:**

(1) A gibbet consisting of two pieces laid across each other at various angles, and in various patterns.

"At Costantynople is the *cross* of our Lord Jesu Crist."—*Maunderville*, p. 9.

(2) A monument or ornament, either made in form of a cross or surmounted with a cross.

"She doth stray about

By holy *crosses*, where she kneels and prays."

Shakespeare: *Merchant of Venice*, v. 1.

¶ In some countries rude crosses or crucifixes are set up to mark the scene of a fatal accident, a murder, or other tragic occurrence.

"This happened close to a *cross*, the record of a former murder."—*Darwin*: *Voyage round the World* (ed. 1870), ch. iii., p. 41.

(3) **Anything in the shape of a cross.**

"The mysterious *cross* of yew, first set on fire, and then quenched in the blood of a goat, was sent forth to summon all the Campbells, from sixteen to sixty."—*Macaulay*: *Hist. Eng.*, ch. v.

(4) **A crucifix (q. v.).**

"They kneel before the *Cross*, that sign

Of love eternal and divine."

Hemans: *A Tale of the Secret Tribunal*.

(5) A mark in the shape of a cross, spec. one placed on a deed or other document by a person who cannot write, in lieu of his signature.

(6) A market-place; so called from the crosses so commonly erected in them.

"... the place called Charing *Cross*."—*Baker*: *Edwards I.*, an. 1306.

(7) A line drawn through another.

"And some against all idolizing

The *cross* in shop-books."

Butler: *Hudibras*, iii. 2.

"Hit sholde gon to the Holi lond

And fihite there for the *croiz*."

Polit. Songs, p. 334.

(2) The chosen symbol of Christianity. The universally accepted sign of the Christian religion.

"In the *cross* of Christ I glory,

Towering o'er the wrecks of time;

All the light of sacred story

Gathers round its head sublime."

Sir John Bowring.

* (3) **Money; so called because formerly on the reverse of a coin was stamped a cross, for convenience in dividing the coin into halves or quarters.**

"... he had not a *cross* to pay them salary."—*Howell*: *Vocal Forest*.

* (4) **The reverse of a coin; that stamped with a cross.**

"Why, in tossing up a halfpenny, do we reckon it equally probable that we shall throw *cross* or pile?"—*J. S. Mill*: *System of Logic*, iii. 13, § 81.

* (5) **The church lands in Ireland.**

"... the church lands lying within the same, which were called the *cross*..."—*Sir J. Davies*.

(6) **Trouble, affliction, regarded as a test of patience or virtue; trial.**

"... we are on the earth,

Were nothing lives but *crosses*, care, and grief."

Shakespeare: *Rich. II.*, ii. 2.

(7) **Anything done on the cross—i. e., unfairly or dishonestly; a swindle. (Slang.)**

(8) **A hybrid, a mixture.**

"Toning down the ancient Viking into a sort of a *cross* between Paul Jones and Jeremy Diddler."—*Lord Dufferin*: *Lett. from High Latitudes*, lett. xiii., p. 387.

II. **Technically:**

1. **Her.**: The most ancient and noble of all the honorable ordinances, formed by the meeting of two perpendicular with two horizontal lines near the left point, where they make four right angles. The numerous forms of cross fall under three leading types: (1) The *Cruz decussata*, the St. Andrew's

Cross, formed like the letter X; (2) the *Cruz commissa*, or joined cross, like the letter T; and (3) the *Cruz immissa*, like the dagger used in printing (†). [CROSSFIXION.]

2. **Law**: The sign of a cross made to a deed or writing by such as cannot write.

3. **Min.**: Two nicks cut on the surface of the ground in the form of a cross, to mark the ground to be taken by miners who will dig for ores.

4. **Manège**: The cross movement of a horse, as to make a cross in ballottades.

5. **Sports**: The act of impeding another in his course, and probably preventing him from winning a race by crossing in front of him.

6. **Telegr.**: Accidental metallic connection between two wires on a line.

7. **Surv.**: An instrument for laying off lines perpendicular to the main course.

8. **Breeding**:

(1) The mixing of two distinct breeds in producing animals.

"... the above-described appearances are all due to ancient crosses with the dun stock."—*Darwin*: *Origin of Species* (ed. 1859), ch. v., p. 164.

(2) An animal of a cross-breed.

* 9. **Old Arm.**: The horizontal piece near the top of a dagger.

11. **Theol.**: Christian doctrine, regarded as having for its central truth the atoning death of Christ upon the cross. It is founded on such passages as the following: 1 Cor. i. 17, 18; Gal. v. 11, vi. 12, &c.

11. **Ch. & Civil Hist.**: Early in the second century the Christians seem to have signed with the cross. In the third century they supposed that the cross was a preservative against all evils, especially against the machinations of evil spirits, and therefore entered on no enterprise of importance without first crossing themselves. The allegation was made by Constantine that when advancing, in A. D. 312, to encounter Maxentius, he saw in the heavens a great shining cross, with the inscription, *In hoc signo vinces*. After his victory in that year he adopted the cross as his standard. According to Theodoret and others, Helena, the mother of the Emperor Constantine, found at Jerusalem three crosses with a superscription. One of these, having (reputedly) cured a dying woman, was held to be the true cross of Christ; one part was given to Jerusalem, another part to Constantinople, where it was enshrined within the emperor's statue, became the palladium of the city, and so venerated that the people used to assemble round the statue with wax candles. Chosroes, king of Persia, carried off the moiety of the cross kept at Jerusalem, but it was retaken by the Emperor Heraclius in A. D. 615, an auspicious event celebrated by the establishment, in A. D. 642, of a festival called the Exaltation of the Cross. Crosses were introduced into churches about A. D. 431, and began to be set up on steeples about A. D. 568. The Anglo-Saxons were accustomed to sign documents with the cross, accompanying it with their own name if they could write, and leaving it unaccompanied if they could not; this is the reason why the mark made by the illiterate is still a cross. A charter of King Caedwalla, signed with a cross, has a note appended at the instance of the monarch in which he frankly admits his inability to write. In 1641, when the Puritan party were dominant, crosses were removed from the churches.

B. **As adjective:**

1. **Literally:**

1. Transverse, oblique; falling across or athwart something else.

"... they either advance toward one another in direct lines, or meet in the intersection of *cross* ones."

—Bentley.

2. Oblique; lateral, zigzag.

"... the most terrible and nimble stroke

Of quick, *cross* lightning."

Shakespeare: *King Lear*, iv. 7.

II. **Figuratively:**

1. Adverse, opposing or contrary; unpropitious, obstructing.

"We're both love's captives; but with fate so *cross*,

We must be happy by the other's loss."—*Dryden*.

2. Contrary, contradictory.

"... all the appearing contrarieties and contradictions, that seemed to lie *cross* and uncouth, and to make the whole unintelligible."—*South*.

3. Perverse, untractable, untoward.

"... the *cross* circumstances of a man's temper or condition,..."—*South*.

4. Peevish, ill-humored; out of temper.

"... a fine high-spirited young woman, who could now and then be *cross* and arbitrary."—*Macaulay*: *Hist. Eng.*, ch. vii.

* 5. Contrary to wishes or hopes; unfortunate; unlucky.

"... the *cross* and unlucky issue of my design..."—*Glavinille*.

* 6. **Interchanged.**

"*Cross* marriages, between the king's son and the archduke's daughter..."—*Bacon*: *Reign of Hen. VII.*

7. **Done in reply, replication, or opposition; as, a cross interrogatory.**

8. **Cross-bred.**

* C. **As adverb:**

1. **Lit.**: Across, athwart

"... give him another staff; this last was broke *cross*."—*Shakespeare*: *Much Ado about Nothing*, v. 1.

2. **Fig.**: In opposition or contrary to; adversely, opposite. (Followed by the *prep. to*.)

"It runs *cross* to the belief and apprehension of the rest of mankind..."—*Atterbury*.

* D. **As preposition:**

1. **Across.**

crossed belt, s.

Mach.: A belt crossed between pulleys so as to revolve them in opposite directions. [BELTING.] To prevent the rubbing of the belts, rollers may be interposed. (Knight.)

crossed-check, s.

Banking: A check with two lines drawn across its face, between which the name of a particular banker or banking company may be written, stamped, or printed. Such checks will only be paid by the bank on which they are drawn, when presented through another bank. When the name of the payee's banker is unknown to the person who draws the check, it is usual to insert the words "& Co.," leaving the payee himself to fill in the banker's name. The abbreviation "& Co." is not, however, essential, and may be omitted, the drawing the lines across the face of the check being sufficient.

Crossed Friars, s. pl.

Ch. Hist.: [CRUTCHED FRIARS.]

crossed lens, s.

Optics: A form of single convex lens having the least spherical aberration. The refractive index of the glass should be 1.5, and the radius of the posterior surface six times that of the anterior surface, both surfaces being convex.

crossed out, a.

Mach.: When the web of a wheel is sawed and filed away so as to leave a cross of four spokes or arms, it is said to be crossed out. This is common in watch and clock wheels. (Knight.)

crōs-sōp-tēr-yg'-ī-dēs, s. pl. [Gr. *krossos*=a tassel, a fringe, and *pteryx*, genit. *pterygos*=a wing, a fin.]

Ichthy. & Palæont.: Fringe-finned fishes. The name given by Professor Huxley to a family of Ganoid fishes in which the fin rays of the paired fins are so arranged as to form a fringe round a central lobe. The majority have a heterocercal, the rest a homocercal tail. The *Crossopterygidae* are of the sub-order *Lepidoganoidei*. Prof. Huxley raises them into a sub-order, and divides them into the following families: (1) *Polypterini*, (2) *Saurodipterini*, (3) *Glyptodipterini*, (4) *Ctenodipterini*, (5) *Phaneropterygini*, and (6) *Cœlacanthini*. Dr. Traquair divides the *Crossopterygidae* into six families: (1) *Polypteridae*, (2) *Cœlacanthidae*, (3) *Rhombodipteridae*, (4) *Cyclodipteridae*, (5) *Holoptychiidae* and (6) *Phaneropterygidae*.

¶ For the terminations of these "sub-orders" and "families" see FAMILY and CLASSIFICATION. Most of the genera and species of *Crossopterygidae* are Silurian, some are Devonian, and a smaller number Carboniferous. Only the *Cœlacanthini* are Mesozoic. In the present day the only living genus known is *Polypterus*.

crōs-sōp-tēr-yg'-ī-ōūs, a. [Mod. Lat. *crossopterygi* (dœ), and Eng. suff. -ous.]

Ichthy. & Palæont.: Pertaining to the family *Crossopterygidae* or its characters.

crōs-sō-pūs, s. [Gr. *krossōtos*=tasseled, fringed, from *krossō*=tassels, fringes, and *pous*=a foot.]

Zool.: A genus of Soricidae (Shrews). *Crossopus fodens* is the Water-Shrew or Oared-Shrew.

cross-wise, ***cross-wyše**, adv. [Eng. *cross*, and *wise*.]

1. Across.

"Till they found all further passage
Shut against them, barred securely,
By the trunks of trees uprooted,
Lying lengthwise, lying crosswise,
And forbidding further passage."
Longfellow: Song of Hiawatha, vi.

2. In figure of a cross.

"And killed [killed] him on crosswise, to Calvary on a Friday."
Piers Ploughman, p. 373.

cross-wōrt, s. [Eng. *cross*, and suff. -wort (q. v.).]

Bot.: A name given to several plants, specially (1) *Galium cruciata* or *cruciatum*, (2) the genus *Crucianella*, and (3) *Eupatorium perfoliatum*.

crōt-a-cōn'-īc, adj. [Eng. *crot*(on), and *acon*(it)ic.]

crotaconic acid, s.

Chem.: $C_5H_5O_4$ or $C_3H_4(CO_2OH)_2$. A dibasic acid, isomeric with citraconic, itaconic, and mesaconic acids. It is formed by the action of potassium cyanide on ethylic chlorocrotonate. On supersaturating the potassium salt of the resulting cyanocrotonic acid with hydrochloric acid, agitating with ether, and allowing the solution to evaporate, ammonium crotaconate is obtained, from which the acid is obtained by adding sulphuric acid and agitating with ether. Crotaconic acid is very soluble in water; it melts at 119°. Heated above 130° it gives off CO_2 , and crotonic acid is formed.

crōt-a-lār'-ī-a, s. [Lat. *crotalum*; Gr. *krotalon*=a rattle made of split reeds, pottery or metal, and Lat. fem. sing. adj. suff. -aria. So named, because, when the inflated legumes are shaken, the seeds rattle inside.]

Bot.: A genus of papilionaceous plants, the typical one of the family *Crotalariae* (q. v.). The leaves are simple or compound, the inflorescence in racemes, the flowers generally yellow, the legume oblong, curved inward, with puffed out or swollen sides. Between 250 and 300 species are known. *Crotalaria juncea* is cultivated in India and Southern Asia generally for the fiber yielded by the inner bark. It is called San, Sun, Shunum, or Sunn Hemp, a name which has no connection with the luminary of day, but is the Hindustani *san* or *sun*=hemp. It is termed also Madras hemp, Bombay hemp, Brown hemp, and Taag, &c. Bags and low-priced anvas are made in India from its fibers. It is also grown as a fodder plant. *C. retusa* is sometimes grown in India for its fibers. The branches of *C. Burhia* are twisted by the people of Scinde into tough ropes. A decoction of *C. espadilla* is employed in Venezuela as sudorific in fevers.

crōt-a-lār'-ī-ō-ēs, s. pl. [Mod. Lat. *crotalar* (ia), and fem. pl. adj. suff. -eae.]

Bot.: A family of papilionaceous plants, sub-tribe Genisteae.

crō-tāl'-ī-dēs, s. pl. [Mod. Lat. *crotal* (us) (q. v.), and fem. pl. adj. suff. -idae.]

Zool.: A family of serpents, sub-order Viperina. There is a deep pit on each side of the nose lined with small plates. The crown of the head is scaly, the belly covered with shield-like plates. The poison fangs are very large; the other teeth are small. [CROTALUS.] The rattlesnake of this country is the most formidable of the family, taking the name *C. horridus*.

Head of Crotalus.

crōt-a-lī'-nēs, s. pl. [Mod. Lat. *crotal* (us) (q. v.), and fem. pl. adj. suff. -inae.]

Zool.: The typical sub-family of the *Crotalidae*. The tail ends in a rattle.

crō-ta-lo, s. [Gr. *krotalon*=a rattle.] [CROTALUM.] A Turkish musical instrument.

crōt-a-lūm, s. [Gr. *krotalon*=a rattle.]

Music: A rattle or clapper used sometimes to mark the rhythm of dancing in the worship of Cybele. It was generally made of wood, having a loose piece hinged midway, so that when shaken in the hand a clattering noise was produced, called by the Greeks *platage*. (Stainer & Barrett.)

crōt-a-lūs, s. [Mod. Lat., from Class. Lat. *crotalum*; Gr. *krotalon*=a rattle. So called because a series of horny bodies, loosely united together at the tail of the animal, rattles when it moves.]

Zool.: A genus of serpents, the typical one of the family *Crotalidae*. *Crotalus horridus* is the Rattlesnake (q. v.).

***crōt-aph-īc**, a. [Gr. *krotaphos*=the temple.] Belonging to the temples. (Ash.)

***crōt-aph-ī-tis**, s. [Gr. *krotaphitis*=pertaining to the temples.]

Med.: A pain in the temples. (Ash.)

Crotalum.

"Item two paintit broddis the aue of the muses and the uthor of crottesque or conceptis."—*Inventories* (A. 1561), p. 180.

crõt-tôn (1), *s. & a.* [Lat. *croton*=the Castor-oil plant; Gr. *krotôn*=(1) a dog-louse, a tick, (2) the Castor-oil plant, *Ricinus communis*, the seeds of which were thought remotely to resemble ticks.]

A. Assubstantive:

Bot.: A genus of Euphorbiaceæ, the typical one of the tribe Crotonæ. The flowers are monocious, the males with a five-parted valvular calyx, five petals, five glands alternate with the petals, definite stamens distinct from each other; the females with a five-parted calyx, no petals, styles bifid or multifid, three glands round the ovary, and tricoecous fruit. Some are trees, others bushes, and yet others herbaceous plants; the leaves and inflorescence are also variable. They occur in the warmer parts of both hemispheres. Some are purgative. A

decoction of *Croton perdicipes* is used in Brazil as a cure for syphilis and as a diuretic. The purgative root of *C. campestris*, and the leaves and bark of *C. origanifolius*, are diaphoretic and antispastic. The wood of *C. Tiglium* is sudorific, and used against syphilis; the seeds are purgative. The oil of *C. Tiglium* and *Pavona*, two East Indian trees, is so acrid as to blister the skin. They are used as diuretics and purgatives. Many are balsamic. *C. balsamifer* is used in Martinique in the preparation of the liquor called Eau de Mantes. Frankincense is extracted from *C. thurifer* and *C. adipsus*, which grow on the Amazon. *C. humilis*, found in the West Indies, has aromatic qualities, and is used in medicating baths. *C. gratissimus* is fragrant, and is used as a perfume by the Koras in South Africa. The balsam of *C. origanifolius* is employed as a substitute for copaiva. *C. cascarrilla* is aromatic. Yet others have a coloring matter. *C. Draco* and *C. sanguiferum* furnish a red substance like gum-lac. *Croton cascarrilla*, a Jamaica bush, was thought to furnish the cascarrilla of commerce, which is now known to be derived from *C. Eleuteria*, a Bahama shrub; that of Mexico comes from *C. pseudo-China*; and *C. nitens*, *C. cascarrilloides*, *micans*, and *suberosus* might also be made to yield cascarrilla.

B. As adj.: Derived from any plant of the genus *Croton*. [CROTON-OL.]

croton-oil, *s.*

Phar.: A fatty oil expressed from the seeds of *Croton Tiglium*. The oil is brownish-yellow, slightly viscid, and has an acrid nauseous taste. The seeds are smaller and duller than those of the castor-oil plant. Croton oil is a powerful irritant drastic purgative, often causing nausea and vomiting. In overdoses it is a dangerous poison. It is useful in emptying the intestines quickly in cases of obstinate constipation or of accidental poisoning. The dose is from 1 to 5 drops in extreme cases. It is used externally as a counter-irritant.

Crotonic acids:

Chem.: Croton oil when saponified with soda yields salts of acetic, isobutyric, and valaric acids, which are volatile, and a crystalline acid called tiglic, or methyl-crotonic acid, $C_5H_8O_2$, or $C_5H_7(CH_3)COOH$, which is the chief product. It melts at 64° , and boils at 197° . A small quantity of higher acids of the acrylic series are also obtained.

crõt-tôn (2), *s.* [From the Croton river, which furnishes the water of New York City.]

croton-bug, *s.* A long-winged species of Cockroach, *Blatta germanica*. (Goodrich & Porter.)

† A Cockroach and a proper Bug belong to different orders.

crõt-tôn-âte, *s.* [Eng., &c., *croton(ic)*, and suff. -âte.] A salt of crotonic acid.

crõt-tôn-nê-s, *s. pl.* [Lat. *croton*, and fem. pl. adj. suff. -eæ.]

Bot.: A tribe of Euphorbiaceæ. The ovule is solitary, the flowers, which usually have petals, are in clusters, spikes, racemes, or panicles. (Lindley.)

crõt-tôn-ic, *a.* [Lat., &c., *croton* (q. v.), and Eng. suff. -ic.] Pertaining to or in any way derived from some plant of the genus *Croton*.

crotonic acids, *s. pl.*

Chem.: $C_4H_6O_2$. The three modifications are: *Crotonic acid*, $C_4H_7CH=CHCOOH$; *Isocrotonic acid*, $CH_3CH=CH_2COOH$; and

Methacrylic acid, $H_2C=C(CH_3)COOH$.

1. *Crotonic acid*: A solid substance crystallizing in white needles, melting at 72° , and boiling at 182° . It can be formed synthetically by dropping ethylic alpha monobromobutyrate into a warm alcoholic solution of potash. Both crotonic acid and isocrotonic acid are formed by the action of phosphorus pentachloride on ethyl-diacetic acid. Crotonic acid, fused with potash, yields only acetate of potassium. Crotonic acid, heated to a yellow liquid, which, on cooling, deposits large rhombic crystals of isobutyric acid, when boiled with potash, are converted into oxybutyric acid; on converting this acid into a zinc salt and gradually adding alcohol to the solution, the zinc salt of alpha oxybutyric acid crystallizes out first, and the last mother liquids yield the beta oxybutyrate of zinc as an amorphous varnish. Crotonic acid is formed by the oxidation of croton aldehydes, formed by the condensation of acetic aldehyde. Also by distilling allyl cyanide with caustic potash.

2. *Isocrotonic acid*: A liquid formed by the action of nascent hydrogen on the modification of chlorocrotonic acid, which melts at 59.5° . It is an oily liquid, boiling at 172° , but when heated in a sealed tube to 180° it is converted into solid crotonic acid.

3. *Methacrylic acid*: Obtained by heating to 100° citraconic anhydride saturated at 0° with hydrochloric acid, and boiling the product with strong soda solution. It crystallizes from water in long

colorless prisms, which melt at 16° , and boil at 160.5° . When fused with potash it yields propionic acid and carbon dioxide.

crotonic aldehyde, *s.*

Chem.: Croton aldehyde, C_4H_6O , or $CH_3CH=CHCOH$. Obtained by heating pure aldehyde in soda-water bottles with a very little zinc chloride and a few drops of water, for a day or two, at 100° . It is purified by distillation in a current of steam. Crotonic aldehyde is a colorless liquid, having an extremely pungent odor, and boils at 104° . It reduces silver oxide. In contact with the air it oxidizes to crotonic acid. Crotonic aldehyde, saturated with hydrochloric acid gas, is converted into chlorobutyric aldehyde, C_4H_7ClCOH , which crystallizes in white needles, melting at 97° ; insoluble in water, sparingly soluble in alcohol.

crotonic chloral, *s.*

Chem. & Pharm.: Croton chloral, a substance which has been found to be butyric chloral, $C_4H_7Cl_3O$, or $CCl_3CH_2CH_2COH$ (Trichlorobutylaldehyde). It is prepared by passing chlorine into aldehyde, cooled in a freezing mixture, and heated to 100° at the close of the reaction. The liquid was distilled; the fraction which passed over between 160° and 180° yielded, by fractional distillation, a colorless, peculiar-smelling oil, boiling at 164° . It combines with water, forming a crystalline hydrate $CCl_3CH_2CH_2CH(OH)_2$, which is slightly soluble in water. It is stated by Garrod to produce a deep sleep accompanied by anesthesia of the head, the fifth nerve being completely paralyzed, while the pulse and respiration continue unaffected, and the voluntary muscles retain their tone. It is given in cases of trigeminal neuralgia, and where chloral hydrate is inadmissible owing to disease of the heart.

crõt-tôn-îl-tril, *s.* [Eng. *croto(n)*, and *nitri(l)*.]

Chem.: C_2H_5CN . Allyl cyanide. A liquid boiling at 117° , obtained by heating allyl iodide with potassium cyanide to 110° for two days.

crõt-tôn-öl, *s.* [Eng. *croton*, and Lat. *oil(eum)*=oil.]

Chem.: $C_8H_{14}O_2$. A yellow, viscid substance, said to occur in croton-oil.

crõt-tôn-ýl, *s.* [Eng. *croton*; -yl.]

Chem.: An organic nomad radical (C_4H_9).

crotonyl amines, *s. pl.*

Chem.: Organic bases, $C_4H_9NH_2$, &c., formed together with butylene diamines by heating isobutylene dibromide to 100° with alcoholic ammonia, part of the dibromide being resolved into HBr and crotonyl bromide; the latter is converted by the ammonia into crotonyl amines.

crotonyl bromide, *s.*

Chem.: C_4H_9Br . A liquid boiling at 90° . Formed by the action of alcoholic potash on isobutylene dibromide, $C_4H_8Br_2$.

crõt-tôn-ýl-ène, *s.* [Eng. *crotonyl*, and suff. -ène.]

Chem.: C_4H_6 or $HC=CHCH_2CH_3$. Ethylacetylene. A hydrocarbon which occurs among the products obtained by the compression of coal-gas. It boils at 20° to 25° , and forms a tetrabromide, which melts at 116° and crystallizes in shining needles.

crõt-tôph-a-ga, *s.* [Gr. *krotôn*=a dog-louse, a tick, and *phagên*=to eat.]

Ornith.: A genus of birds, the typical one of the sub-family Crotophagæ (q. v.). The bill is greatly compressed, and the ridge of the upper mandible keeled. The species are found in South America. *Crotophaga ani* is the Ani or Anno of the Latin races of South America, the Razor-billed Blackbird of Jamaica, called also the Savanah Bird and the Great Blackbird. It feeds on small lizards, insects, and seeds. It lives in flocks, and when one individual is slain the rest gather again almost at the same spot. Several females are said to use the same nest.

crõt-tôph-äg-in-s, *s. pl.* [Modern Lat. *crotophag(a)* (q. v.), and fem. pl. adj. suff. -inæ.]

Ornith.: A sub-family of Cuculidæ (Cuckoos). The bill is compressed, the ridge of the upper mandible curved, the wings usually short and rounded, and the two outer toes longer than the rest. [CROTOPHAGA.]

***crott**, *s.* [Fr. *crotte*.] Excrement, ordure.

2. The place behind the saddle.

"Each warlike feat to show;
To pass, to wheel, the croupe to gain."
Scott: *Marmion*, v. 2.

croup (2), ***croop**, *s.* [A. S. *hrōpan*=to cry out; Icel. *hrōpa*; Goth. *hropan*; Dut. *roefen*; Ger. *rufen*.]

Med.: Membranous laryngitis. An inflammatory affection of the trachea and larynx, specially characterized by the formation of a false membrane, distinct from other diseases apparently but not really identical, especially so from diphtheria (*q. v.*) (*Niemeyer, Aitken, &c.*), although the diagnosis is by no means easy, and the two affections are frequently combined; distinct also from acute laryngitis, asthma, nervous croup, and others. It is not contagious. Daviot says, "Croup is non-contagious, and diphtheria and croup are the same;

therefore diphtheria is non-contagious." This is sufficient condemnation of the identity theory from one of its chief supporters. Croup is peculiarly a disease of infancy, generally arising from damp. It has a brassy or ringing sound, like the crow of a cock or the sound of a piston forced up a dry pump, which is very unmistakable. When fatal it is early in the disease, usually on the fourth or fifth day, and produces death by mechanical strangulation and exhaustion of the sufferer, while a fatal issue in diphtheria is usually more protracted and results from a vitiation of the entire constitutional forces—real sepsis.

croup (3), *s.* [A. S. *cropp*, *crop*.] A berry.

croup (1), ***crope**, ***crowpe**, ***crupe**, *v. i.* [*CROUP* (2), *s.*]

I. Ordinary Language:

1. In the same sense as II. 1.

"The crow may bathe his coal-black wings in mire,
And unperceived fly with the filth away."
Shakesp.: *Rape of Lucrece*.

2. The cry of a cock.

II. Technically:

1. Ornithology:

(1) Singular:

(a) *In this Country*: A large black bird of the family *Corvidæ*, its generic name being *C. americana*. It is of a glossy black plumage, strong of wing, about 10 or 12 inches in length, and is well known all over this country by reason of its gathering in large flocks in the agricultural districts, and the familiarity of its harsh cry. It feeds principally

upon young corn shoots, grain, vegetables, etc. It does not, however, disdain other food. It is very destructive to crops, and in many instances has become so troublesome that the state governments have offered bounties for its destruction. The bird does not fly gracefully, its flight being marked by incessant flapping of the wings, but it can sustain the fatigue of traveling long distances, and is said to fly in an undeviating line toward its destination.

(b) *In England*: The rook, *Corvus frugilegus*. Called also the Common Crow. [*ROOK*.]

(c) *Gen.*: Any one of various other birds belonging to the family *Corvidæ* (*q. v.*).

(2) Plural:

(a) *Gen.*: The family *Corvidæ* (*q. v.*).

(b) *Spec.*: The sub-family *Corvinæ*, or even the genus *Corvus*.

2. *Mech.*: An iron bar used as a lever; it had usually a bent end, which was frequently forked, and may have been named from its fancied resemblance to a beak.

"Go, get these gone; fetch me an iron crow."
Shakesp.: *Comedy of Errors*, iii. 1.

3. *Naut.*: Formerly, the beak or rostrum on the stem of a war-galley. Also a device formerly used, consisting of a pivoted lever and chain, with hooks for engaging an enemy's vessel or picking off her men. A *Corvus*.

4. *Anat.*: The mesentery or ruffle of a beast.

III. Special phrases and compounds:

1. Special phrases:

(1) *As the crow flies*: In a direct line.

(2) *To have a crow to pluck with any one*: To have some fault to find with or an explanation to demand from one.

(3) *To pluck or pull a crow*: To be contentious about that which is of no value.

(4) *If I dispute, we must even pluck a crow about it.*—*Sir E. D'Estrange*.

(5) *To eat crow*: To retract a hasty assertion, or to apologize for an ill-considered action, in a sheepish and undignified manner.

2. Compounds:

(1) *Alpine Crow*: *Pyrrhocorax alpinus*.

(2) *Black Crow*: [*4*.]

(3) *Bunting Crow*: [*13*.]

(4) *Carion Crow*: *Corvus corone*. It is a crow, black with purple reflection above, green beneath, the plumage with glossy luster. It is a solitary bird, feeding chiefly on carrion, but also eating shell-fish, small quadrupeds, nay, even young lambs. It also can subsist on grass. It is a European bird, being the common species in England. The eggs are 4 to 5, bluish-green, speckled and spotted with ash-color and clove-brown. The Carion Crow is called also the Flesh Crow, the Black Crow, the Corby Crow, the Gor Crow, the Hoody Crow, or Hoody, and the Bran.

(5) *Common Crow*: The rook, *Corvus frugilegus*.

(6) *Corby Crow*: [*4*.]

(7) *Dun Crow*: [*13*.]

(8) *Fruit Crows*: The sub-family *Gymnoderinæ* (*q. v.*). [*FRUIT-CROWS*.]

(9) *Gor Crow*: [*4*.]

(10) *Gray-backed Crow*: [*13*.]

(11) *Gray Crow*: [*13*.]

(12) *Heedy Crow*: [*13*.]

(13) *Hoody Crow*: *Corvus cornix*. A crow with the head, fore-neck, wings, and tail black, the other parts ash-gray. It is found on European sea-coasts. It frequents estuaries, feeding on fishes and mollusks, but attacking also small quadrupeds, and even lambs. It is called also the Gray or Gray-backed Crow, the Dun Crow, the Bunting Crow, the Heedy Crow, and the Royston Crow.

(14) *Indian Crow*: *Corvus splendens*.

(15) *King Crow*: A chatterer—*Dicrurus macrocerus*. [*DICRURUS, KING CROW*.]

(16) *Laughing Crow*: *Garrulax leucolophus*, one of the *Timalinæ*.

(17) *Piping Crows*: The *Streperinæ*, a sub-family of *Corvidæ*.

(18) *Red-legged Crow*: The Cornish (though—*Fringiles gadulæ*).

(19) *Royston Crow*: [*13*.]

(20) *Tree Crows*: The *Collocalinæ*, a sub-family of *Corvidæ*.

crow-bar, *s.* [*CROW*, *s.*, II. 2.]

"... masons, with wedge and crowbar, begin demolition."—*Carlyle*: *French Revolution*, iii. v. 3.

crow-bells, *s.* [The form is *pl.*, the meaning sing.] *Scilla nutans*.

† *Yellow Crow-bells*: *Narcissus pseudo-narcissus*. (*Lyte*.)

crow-blackbird, *s.* A name given in America to *Quiscalus versicolor*, a bird of the family *Sturninæ* (Starlings), and the sub-family *Quiscalinæ* (Boat-bills). It comes from South to North in this country in spring, returning again to the South in autumn, and making great depredation on the crops of grain. It is black, but with blue, violet, and copper reflections.

1870), ch. xiv, p. 60 (note).

2. A very fine pen used in lithography.

crow-silk, s. [**CROWSILK**.]

crow-stone, s.

1. *Build*: The top stone of the gable end of a house.

2. *Geol*: A local term for sandstone in Yorkshire and Derbyshire, England.

crow-toe, s.

1. (*Sing*): Probably the same as **crow-foot**.

"Bring the rathe primrose that forsaken dies,
The tufted *crow-toe*, and pale jessamine."

Milton: *Lycidas*, 142, 143.

2. (*Pl*): (a) *Lotus corniculatus*, (b) *Scilla nutans*.
(Britten & Holland.)

crow's-bill, s.

Surg: A bullet forceps.

crow's-feet, *crowis-feete, s. pl. The wrinkles under the eyes which become manifest in old age.

"So longe mote ye liven, and all proude,
Till *crowis-feet* growin under your eie."

Chaucer: *Troil. and Cress.*, ii. 404.

crow's-foot, s.

1. *Bot*: *Echinochloa crus-galli*. *Daucus Carota*, Wild Carrot. (Britten & Holland.) Halliwell and Wright had supposed it to be "wild parsley."

2. *Well-boring*: A bent hook adapted to engage the shoulder or collar on a drill-rod or well-tube while lowering it into a well or drilled shaft, or to hold the same while a section above it is being attached or detached. In well-boring the auger or drill-rod passes through a hole in the staging, but the *crow's-foot* is too large to pass through the hole, and is thus the means of holding the sections of rod or tubing which are suspended therefrom.

3. *Fort*: A ball armed with spikes, so arranged that one is always presented upwardly; such are strewn on the ground for defense against the approach of cavalry. A caltrop (q. v.) (*Knight*).

crow's-nest, s.

Naut: A tub or box at the top-gallant mast-head, for the lookout-man who watches for whales.

1. To boast, to brag, to swagger, to vapor.

"Selby is *crowing*, and though always defeated by his wife, is *crowing* on."—*Richardson*.

2. To utter a sound expressive of joy or pleasure; to chuckle.

"The sweetest little maid,
That ever *crowed* for kisses."—*Tennyson*.

***B. Trans.:** To proclaim, to announce by crowing.

"There is no cock to *crowe* day."—*Gower*, ii. 102.

crōw-bēr-rȳ, s. [*Eng. crow, and berry*.] So named because crows greedily devour the berries of the plant.]

1. (*Sing*): *Empetrum nigrum*, a small procumbent, greatly-branched plant, with recurved leaves, small purplish axillary flowers and black berries, abundant in Scotland on mountainous heaths. Its berries are subacid and unpleasant to the taste. They are eaten, however, in the north of Europe, and are regarded as scorbutic and diuretic. A fermented liquor is made from them by the Greenlanders.

2. *Pl*. (*Crowberries*): The name given by Lindley to the botanical order *Empetraceae* (q. v.).

"... few blackberries or *crowberries*, and only here and there, unless in very favorable localities, a cranberry or an arbutus."—*W. Macgillivray: Nat. Hist., Dee Side and Braemar*.

A. *As substantive*:

1. *Ordinary Language*:

1. *Literally*:

(1) A wreath or garland for the head, given as the reward of victory or of some noble deed. Among the Romans they were of several kinds: *Castrensis*, or *vallaris*, given to the individual who first scaled the rampart in assaulting the camp of an enemy; *muralis*, to him who first mounted the breach in storming a town; *navalis*, to him who first boarded an enemy's ship; *obsidionalis*, given by soldiers who had been beleaguered to the commander by whom they had been relieved; and *civica* (the most honorable of all), bestowed on him who had saved the life of a citizen. [CORONA.]

Crowns.

(2) The ornament of the head, worn as a badge of sovereignty by emperors, kings, and princes. Those worn by the nobility are called *coronets* (*q. v.*). That worn by the Pope is more commonly called a *tiara* (*q. v.*).

¶ The monarchical practice of wearing crowns on state occasions is of considerable antiquity. Saul, the first king of Israel, did so (2 Sam. i. 10). So did the king of Ammon (2 Sam. xii. 30). Tarquinius Priscus, B. C. 616, is said to have been the first Roman sovereign who wore one. Constantine, who began to reign in A. D. 306, wore a crown. From him, it is said, the several European kings, from the fourth to the eighth centuries, borrowed the practice. Egbert, king of Kent, who began to reign in A. D. 786, is represented on his coins as crowned.

"In Queen Victoria's crown there are 1,363 brilliant diamonds, 1,273 rose diamonds, and 147 table diamonds, besides one large ruby, 17 sapphires, four small rubies, and 227 pearls." — *Weekly Review*.

The stem, which is proportionally large, is secured by a wedge; the cutter is composed of three or four saw-teeth, closely followed by a hooked router, which sweeps out the bottom of the groove.

2. A groove for the reception of the edge of the head of a cask.

cröz'-ing, pr. par. or a. [CROZE, v.]

crozing-machine, s.

Coopering: A machine for cutting on staves the croze or groove for the reception of the edge of the head.

cröz'-öph'-ör-a, s. [First element in the compound doubtful. It would not bring a suitable meaning out if it were derived from *Gr. krözö*=to caw like a crow or raven. Cf. *krössos*=a water-pail, a pitcher, second element *phoros*=bearing.]

Bot.: A genus of plants, order *Euphorbiaceae*, tribe *Crotonæ*. The flowers are monocious: the male flowers with a 5-parted calyx and five petals, the female ones with a 10-parted calyx and no petals. *Crotophora tinctoria* is a small, prostrate, hairy annual, growing wild in barren places in the south of Europe, and cultivated around Montpellier, because it produces a deep purple dye called *tournesole*. The juice of the plant is acrid, and the seeds cathartic.

cruban (1), s. [Gael.] A disease of cows.

cruban (2), s. [Gael. *croghan*=a hook.] In Caithness, a sort of pannier, made of wood, for fixing on a horse's back.

"The tenants carry home their peats, and some lead their corn, in what they call *crubans*."—*P. Wick: Statist. Acc.*, x. 24.

***cruce, s.** [O. Fr.] A jug or goblet.

"They had sucked such a jug Out of the good ale *cruce*." *The Unluckie Firmentte*. (Nares.)

***cruched friars, s. pl.** [CRUTCHED FRIARS.]

***crü'-çi-a'-da, s.** [Sp. *crusada*=(1) a crusade, (2) a bull.] A papal bull, giving certain privileges to those who joined in a crusade.

"The Pope's *Crucjada* drew thousands of soldiers."—*Hacket: Life of Williams*, ii. 196. (Davies.)

crü'-çi-al (çi as shi), a. [Fr. *crucial*, from Lat. *crux* (genit. *crucis*)=a cross, and Lat. suff. -alis; Eng. suff. -al.]

I. Ordinary Language:

*1. *Lit.*: In the form of a cross.

"Whoever has seen the practice of the *crucial* incision, must be sensible of the false reasoning used in its favor."—*Sharp*.

2. *Fig. (of an experiment)*: So severe as to bring a disputed matter to a decisive test, as if it had to stand the ordeal of crucifixion.

II. *Anat.*: In the same sense as I. 1.

† *Crucial ligaments*:

Anat.: Two ligaments placed in the center of the knee-joint. They are called the anterior or external ligament, and the posterior or internal ligament. (*Quain.*)

crû-çî-ân (çî as shî), *s.* [*Ger. karusche*; *Dan. karuse*; *Sw. karussa.*]

Ichthy.: The German Carp, *Cyprinus carassius*. It was long confounded with the Prussian Carp, *C. gibelio*. The length of the head is to the depth of the body as 1 to 2; and to the whole length of head, body and tail, as 1 to 5; the depth of the body to the whole length as 2 to 5; the tail nearly square at the end.

crû-çî-âr (çî as shî), *s.* [*Lat. cruciator*, from *crucio*=to crucify, and *crux*=a cross.] A crucifier.

"He . . . prayed for his cruciators."—*Wycliffe: Apology*, p. 21.

crû-çî-âte (çî as shî), *a.* [*Lat. cruciatus*=crucified, *pa. par.* of *crucio*=to crucify.]

Botany:

1. *Gen.*: In the form of a cross.

2. *Spec. (of a flower)*: Having four valvaceous sepals, four petals, and six tetradynamous stamens. (*Link.*)

crû-çî-âte (çî as shî), *v. t.* [*Lat. cruciatus*, *pa. par.* of *crucio*.]

1. *Lit.*: To torment, to torture.

2. *Fig.*: To torment.

"They vexed, tormented, and cruciated the weak consciences of men."—*Bale: Discourse on Revelations*, i. 5.

crû-çî-ât-êd (çî as shî), *a.* [*Eng. cruciat(e)*; *-ed.*] Tortured, tormented.

"The thus miserably cruciated spirit needs must find its unit habitation."—*Glanville: Pre-existence of Souls*, ch. xiv.

crû-çî-â-tion (çî as shî), *s.* [*Lat. cruciatus*, *pa. par.* of *crucio*=to torture, from *crux* (*genit. crucis*)=a cross.] The act of torturing; torture.

" . . . the cruciation and howling of his enemies."—*Bishop Hall: Soul's Farewell to Earth*, § 7.

crû-çî-â-tôr-ÿ (çî as shî), *a.* [*Lat. cruciat(us)*, *pa. par.* of *crucio*, and *Eng. adj. suff. -ory.*] Torturing, excruciating.

"These cruciatory passions do operate with such a violence."—*Hovell: Part. of Beasts*, p. 7. (*Davies.*)

crû-çî-ble, **crû-si-ble**, *s.* [*Low Lat. crucibulum*, *crucibolus*=a hanging-lamp, a melting-pot, from a base which appears in *Fr. cruche*=an earthen pot, a pitcher; *Dut. kroes*=a cup, a pot, a crucible. (*Skeat.*)]

A. *Ordinary Language*:

1. *Lit.*: In the same sense as B. 1.

II. *Figuratively*:

1. Anything presenting the appearance of a furnace.

"Where, in a mighty crucible, expire

The mountains, glowing hot, like coals of fire."

Wordsworth: Descriptive Sketches.

† 2. A severe or searching trial or test.

"Seek from the torturing crucible."

Wordsworth: Excursion, bk. v.

B. *Chemistry*:

1. A melting-pot of earthenware, porcelain, or of refractory metal, or of plumbago, adapted to withstand high temperatures, without sensibly softening, to stand sudden and great alterations of temperature without cracking, to resist the corrosive action of the substance fused in them, and the action of the fuel. They are mentioned by the Greek authors, are shown in the ancient Egyptian paintings, were early used in domestic operations, and were made by the old alchemists for their own use. Metallic crucibles are of platinum, silver, or iron.

† Metallic oxides, sulphides, &c., which are easily reduced, should not be heated in silver or platinum crucibles. A fused hard mass of silicate can be often removed from a platinum crucible by heating it on the outside, and plunging it in cold water.

2. A basin at the bottom of a furnace to collect the molten metal.

crucible-mold, *s.* Crucibles are molded on a wheel or in a press. Different materials, qualities, and sizes require different treatment.

crucible-oven, *s.* A heater for crucibles, to dry them before burning in a kiln. Plastic clay is molded into green crucibles, assumes the biscuit form by drying, and is burned to constitute a crucible.

crucible-steel, *s.* [*CAST-STEEL.*]

crucible-tongs, *s.* A form of tongs for lifting crucibles from the furnace.

crû-çî-fër, *s.* [*Lat.*=the cross-bearer, from *crux* (*genit. crucis*)=a cross, and *fero*=to bear.]

Botany:

1. *Sing.*: A plant of the order Cruciferae.

2. *Pl. (Crucifers)*: The name given by Lindley to his order Brassicaceæ, by many called Cruciferae (*q. v.*).

crû-çî-fër-æ, *s. pl.* [*Lat. crux* (*genit. crucis*)=a cross, and *fero*=to bear. So named because the petals of the flowers are four in number, and arranged crosswise. (*Hooker.*)]

Bot.: An order of hypogynous exogens, alliance Cistales. Jussieu and many others used the name, which is still showing no symptoms of becoming obsolete. Lindley altered it to Brassicaceæ, to make it harmonize with the ending of other orders, but he appends the English name Crucifers. [*BRASSICACEÆ.*]

crû-çî-fër-ous, *a.* [*Lat. crucifer*, and *Eng. suff. -ous.*]

Bot., &c.: Bearing a cross. (Used specially of any petals of the order Cruciferae, or of that order collectively viewed.)

crû-çî-fied, *pa. par.* or *a.* [*CRUCIFY.*]

crû-çî-fi-ër, **crû-çÿ-fÿ-ër**, *s.* [*Eng. crucify*; *-er.*] One who puts another to death by crucifixion.

"For hys crucifiers mekely he preyd."

Robert de Brunne: Meditations, 710.

crû-çî-flîx, *s.* [*Fr.* from *Lat. crucifixus*, *pa. par.* of *crucifigo*=to crucify (*q. v.*); *Ital. crucifisso*.] 1. *Lit.*: A cross or figure of a cross, having on it a figure of Christ crucified.

"There stands at the upper end of it a large crucifix, very much esteemed. The figure of our Savior represents him in his last agonies of death."—*Addison: Travels in Italy.*

† Its use began about the fourth and became general about the eighth century.

* 2. *Fig.*: The cross or religion of Christ.

crû-çî-flîx, *v. t.* [*CRUCIFIX*, *s.*] To crucify.

"Who mockt, beat, banisht, buried, crucifixed,

For our foule sins."

Sylvester: Du Bartas, 1,082. (*Latham.*)

crû-çî-flîx-ion (*xion* as *zahun*), *s.* [*Fr. crucifixion*; *Sp. crucifixion*; *Port. crucifixão*; *Ital. crocifissione*, *crucifixione*, all from *Lat. crux* (*genit. crucis*)=a cross, and *figo*, *fixi*, *fixum*=to fix, to fasten, drive in, attach.]

I. *Literally*:

1. *Gen.*: The act of affixing to a cross with the view of inflicting capital punishment, attended by lingering torture. It was in use among the Egyptians, the Assyrians, the Carthaginians, the Persians, the Indians, the Germans, and the Greeks and Romans. Whether it was a Jewish punishment has been a matter of dispute; the preponderance of evidence seems to show that it was not. Among the Romans it was considered the most cruel and at the same time the most infamous of punishments, being, as a rule, confined to slaves, though in cases of extreme guilt freemen also, if of humble rank or from the provinces, might be condemned to this method of death. Scourging of a severe character preceded crucifixion. (For the forms of crosses used see *CROSS*.) Sometimes the cross was first reared, and then the sufferer raised to be affixed to it; at others it was laid down horizontally, and he was affixed to it before it was raised. In some cases he was simply tied to it; in others nails were driven through his hands, while the feet were tied; and yet again in others nails were driven both through the hands and feet. In the last-named case the unnatural position of the victim, causing tension of every joint, the lesions to the nerves and tendons of the hands and feet, the burning fever, with its attendant thirst produced by the fever, which arose when the constitution in general had begun to sympathize with the local injuries, constituted untold agonies. Nevertheless it was found that a frame of average strength could bear up against this heavy load of suffering for about three days, and sometimes die at the last, it is said, of hunger, though more probably of gangrene. Constantine, in A. D. 330, abolished crucifixion as a punishment among the Romans, and sacred considerations prevented the Christian nations, even when they were in a backward state of civilization, from introducing it again. It was, however, practiced in the thirteenth century by the Mohammedans of Syria, and in modern times by the Burmese. Anciently, a person doomed to crucifixion might in certain cases be put to death out of mercy before being affixed to the cross; to this there may be an allusion in *Deut. xxi. 22, 23.*

2. *Spec.*: The method of death in the case of Christ. Tradition represents this as of the most cruel type—viz., that in which both hands and feet were pierced with nails, and there are Scripture

passages which lend countenance to the statement (*Matt. xxvii. 22-50*; *Mark xv. 12-37*; *Luke xxiii. 21-46*; *John xix. 15-30*; cf. also *xx. 25*, and *Ps. xxii. 16*). Though in the last-named passage the Hebrew has an anomalous form, yet the English rendering of the verse which agrees with that of the Septuagint, *ôrycan cheiras mou kai podas*, is probably correct. Several dates have been assigned to the Crucifixion—viz., Friday, April 5, A. D. 30; or April 15, A. D. 29, or April 3, A. D. 33, or March 31, A. D. 31.

"This earthquake, according to the opinion of many learned men, happened at our Savior's crucifixion."—*Addison: On Italy.*

II. *Fig.*: Torture.

"Do ye prove
What crucifixions are in love?"

Herrick: Hesperides, p. 169.

crû-çî-form, *a.* [*Lat. crux* (*genit. crucis*)=a cross, and *forma*=form.]

1. *Ord. Lang.*: Of the form of a cross.

" . . . that tremendous cruciform image, with three round bores on the head-board, in the Cornmarket,"—*T. Warton: The Student*, ii. 375.

2. *Bot.*: In the same sense. [*† (1).*]

"The polypetalous corolla if regular is cruciate or cruciform when composed of four petals, so as to form a cross, as in the wallflower, mustard, &c."—*Henfrey: Rudiments of Botany.*

† (1) *Cruciform corolla*:

Bot.: A corolla in which four unguiculate petals are arranged in the form of a cross. It exists in the Cruciferae.

(2) *Cruciform ligament*:

Anat.: A name given to the transverse ligament of the atlas and its appendages.

crû-çî-fÿ, **crû-çî-fie**, **crû-çî-fÿe**, **crû-çÿ-fÿe**, *v. t.* [*Fr. crucifier*; *Prov. Sp. & Port. crucificar*; *Ital. crucifiggere*, *crucifiggere*, all from *Low Lat. crucifigo*; *Class. Lat. crux* (*genit. crucis*)=a cross, and *figo*=to fix.]

1. *Lit.*: To fix in any way to a cross with the view of inflicting capital punishment, or for some other purpose. [*CRUCIFIXION.*]

" . . . and put his own clothes on him, and led him out to crucify him."—*Mark xv. 20.*

2. *Figuratively*:

(1) *Scripture*:

(a) To cause to die or cease to exist, with every expression of scorn, to destroy the influence of.

" . . . the cross of our Lord Jesus Christ, by whom the world is crucified unto me, and I unto the world."—*Gal. vi. 14.*

(b) To put to mental torture and shame.

" . . . they crucify to themselves the Son of God afresh, and put Him to an open shame."—*Heb. vi. 6.*

(2) *Ord. Lang.*: To torture, to torment.

"It does me good to think how I shall conjure him,
And crucify his crabbedness."

Beaumont & Fletcher: Pilgrim.

A. As adjective:

I. Of persons:

1. Disposed to hurt or to take pleasure in the hurt
of others; inhuman, unfeeling, hard-hearted; void
of pity or feeling for others; savage.

"They shall lay hold on bow and spear; they are cruel,
and have no mercy."—*Jer.* vi. 23.

*2. Keen in battle.

"Perseus war trow, and ay of full gret wail,
Sobyr in pèss, and cruell in battail." Wallace, iii. 308.

II. Of acts, words, &c.:

1. Characterized by or indicative of a disposition
to take pleasure in the hurt of others; causing pain
or hurt to others; savage, unfeeling, inhuman.

"Consider mine enemies; for they are many; and they
hate me with cruel hatred."—*Psalms* xxv. 19.

2. Painful.

"And now, it is my chance to find thee out,
Must I behold thy timeless cruel death?" Shakespeare: *Henry VI.*, Pt. I., v. 4.

*B. As subst.: A cruel person.

"If wolves had at thy gate howl'd that stern time,
Thou shouldst have said, Good porter, turn the key;
All cruels else subscribed." Shakespeare: *King Lear*, iii. 7.

†C. As adv.: Cruelly, extremely.

"I would now aske ye how ye like the play,
But as it is with school boys, cannot say;
I'm cruel fearful." Beaumont & Fletcher: *Two Noble Kinsmen*.

¶ (1) Crabb thus discriminates between *cruel*,
barbarous, *brutal*, *inhuman*, and *savage*: "Cruel
is the most familiar and the least powerful epithet
of all these terms; it designates the ordinary propen-
sity which is innate in man, and which, if not
overpowered by a better principle, will invariably
show itself by the desire of inflicting positive pain
on others, or abridging their comfort: *inhuman* and
barbarous are higher degrees of *cruelty*; *brutal* and
savage rise so much in degree above the rest, as
almost to partake of another nature. A child gives
early symptoms of his natural *cruelty* by his ill
treatment of animals; but we do not speak of his
inhumanity, because this is a term confined to men,
and more properly to their treatment of their own
species, although extended in its sense to their
treatment of the *brutes*: *barbarity* is but too com-
mon among children and persons of riper years. A
person is *cruel* who neglects the creature he should
protect and take care of; he is *inhuman* if he with-
hold from him the common marks of tenderness or
kindness which are to be expected from one *human*
being to another; he is *barbarous* if he find amuse-
ment in inflicting pain; he is *brutal* or *savage*
according to the circumstances of aggravation
which accompany the act of torturing. *Cruel* is
applied either to the disposition or the conduct;
inhuman and *barbarous* mostly to the outward con-
duct; *brutal* and *savage* mostly to the disposition." (Crabb: *Eng. Synon.*)

(2) For the difference between *cruel* and *hard-
hearted*, see *HARD-HEARTED*.

cruel-hearted, a. Having a cruel heart; without
feeling or pity for others.

"They call me *cruel-hearted*, but I care not what they
say, . . ." Tennyson: *May Queen*.

crû-êl-ly, *crew-el-ly, *crû-el-liche, adv.
[Eng. *cruel*; -ly.]

1. In a cruel, inhuman, unfeeling, or barbarous
manner: with a disposition to cause pain or hurt;
so as to cause pain or hurt.

"Since you deny him entrance, he demands
His wife, whom *cruelly* you hold in bands." Dryden: *Aurengzebe*, i. 1.

2. Painfully.

"Brimstone and wild fire, though they burn *cruelly*,
... —*Bacon*.

†3. Extremely, exceedingly.

"... a speculation which shows how *cruelly* the
country are led astray in following the town."—*Spectator*:
No. 123.

†crû-êl-nêss, *crû-êl-nêsse, s. [Eng. *cruel*;
-ness.]

1. The quality of being cruel; cruelty, inhumanity.

"My people's daughters live
By reason of the foe's great *cruelness*, . . ." Donne: *Poems*, p. 362.

*2. Destructiveness.

"Once have the winds the trees despoiled clean,
And once again begins their *cruelness*." Lord Surrey: *Songs and Sonettes*.

*crû-êl-s, s. [Fr. *écrouelles*.] Scrofula; the
king's evil.

"Not long after, his right hand and right knee broke
out in a running sore, called the *cruels*."—*Wodrow*, ii. 445.

crû-êl-tî, s. [O. Fr. *cruellé*; Fr. *cruauté*, from
Lat. *crudelitas*, acc. of *crudelitas*=cruelty; Sp.
crueldad; Port. *crueldade*; Ital. *crudeltà*.]

1. A cruel disposition or temper; a disposition to
take pleasure in inflicting pain or hurt on others,
or in looking at the pain of others.

"All was obstinacy, *cruelly*, insolence."—*Macaulay*:
Hist. Eng., ch. xiii.

2. A cruel, barbarous, or inhuman act; any act or
conduct which causes pain or hurt to others.

"... the *cruelties* of conquering, and the calamities
of enslaved nations."—*Temple*.

*crû-ênt-âte, a. [Lat. *cruentatus*, pa. par. of
cruento=to make bloody; *cruentus*=bloody; *crur*
=blood.] Smeared with blood.

weapon to the wound."—*Glanville*: *Seepsia Scient*.

*crû-ênt-ôus, a. [Lat. *cruentus*.] Bloody.

"Thus a cruel and most *cruentous* civil war began,
... —*A Venice Looking-Glass*, &c. (1648), p. 9.

crû-êt, *crew-et, *crew-ete, s. [A word of
doubtful etymology. Skeat suggests that it is a
doublet from Dut. *kruck*=a pot, a pitcher; Wedg-
wood, that it is due to the loss of z in O. Fr. *cruzet*,
dim. of *cruse*.]

1. A bottle or vessel. (*Palsgrave*.)

2. A small glass pot or bottle for holding vinegar,
oil, &c.

"[I] filled the *cruet* with the acid tide."—*Swift*.

cruet-stand, s. A frame in which cruets stand
on the table.

crûise, s. [Dut. *kruis*=a cross, from Latin
crucem, acc. of *crux*.] A voyage made in several
directions; a sailing here and there for pleasure,
exercise, or in search of an enemy.

"In his first *cruise*, 'twere pity he should founder."

Smollett: *Epitome to the Keprisal*.

crûise, v. t. [Dut. *kruisen*, from *kruis*=cross.]
To sail here and there; to rove about on the sea for
pleasure, exercise, or in search of an enemy.

"Mid sands and rocks and storms to *cruise* for pleas-
ure." Young: *Night Thoughts*, viii. 986.

crûis-êr, s. [Eng. *cruis(e)*, v.; -er.] One who
cruises about; specifically, an armed vessel which
cruises about, either to protect the commerce of its
own country or to inflict damage on that of another.

"... some ships which had been sent with him, and
which were laden with stores, had been taken by English
cruisers."—*Macaulay*: *Hist. Eng.*, ch. xiii.

¶ The finest and swiftest cruiser now afloat (1894)
is the United States Cruiser No. 12, the "Columbia,"

Lat. *crux* (genit. *crucis*)=a cross.]

1. *Ord. Lang. & Hist.*: Properly an expedition conducted by those who wore a cross upon their breast, that symbol indicating that they fought for the interests of the cross. In the case of the crusaders described in this article the cross, which was of woolen cloth, was white, red, or green, and sewed upon the right shoulder of the crusader's dress.

¶ In the first vigor of Mohammedan conquest, Jerusalem and the Holy Sepulchre itself fell into Moslem hands. This did not deter Christian pilgrims from thronging to the Holy Land, and as long as the Saracens were in power in the East they had the prudence to act with tolerable kindness to the pilgrims. When the Saracens yielded their dominion to the Turks all this passed away. The pilgrims were pillaged, insulted, or even barbarously murdered, and those who returned filled all Europe with their complaints of Turkish insolence and barbarity. The Christians of every land felt humiliated that places of the most sacred interest should be in such custody, and as early as the concluding years of the tenth century Pope Sylvester II. attempted to reduce the Christian world to succor the afflicted Church of Jerusalem, but, with the exception of the Pisans, none responded to the call, and the feeble and abortive effort of the people of Pisa is not reckoned a crusade.

The following seven are the enterprises against the Mohammedans regarded as crusades:

(1) The daring pontiff Gregory VII. wished to lead a crusade, but his contest with Henry IV. turned his energy in another direction. His successor, Urban II., was also strongly in favor of an expedition to the East, and the matter was discussed at the Council of Placentia (Piacenza) in March, 1095, and decided on at that of Clermont, in Auvergne, in November of the same year. Universal enthusiasm in favor of the enterprise had been stirred up by the preaching of Peter the Hermit, who had traveled over Europe for the purpose, and the orator, with a number of others too impatient to wait for the prudent preparations of the men who understood what fighting meant, led to the East an immense but motley assemblage of people unadapted for military enterprise, who misbehaved all along the road, were especially cruel to the Jews, and nearly all perished miserably in Asia Minor. The warriors having at length completed all necessary preparations, started for the East under such capable leaders as Godfrey (Godfrey) of Bouillon, Duke of Lower Lorraine, his brother Baldwin, Count of Flanders, &c. In 1097 they took Nice, the capital of Bithynia; in 1098, Antioch in Syria; and in 1099 Jerusalem, where a Christian kingdom was set up. The institution of the two great military and religious orders, the Knights of Jerusalem and the Knights Templars, dates from this crusade.

(2) Edessa having been taken by the Mohammedans in A. D. 1144, Jerusalem was believed to be in danger, and Bernard, abbot of Clairvaux, preached a second crusade, as Peter the Hermit had done the first. Lewis VII., king of France, and Conrad III., Emperor of Germany, took the cross and went forth in 1147, but their enterprise ended in complete failure. In A. D. 1157 the Christians were totally defeated at the battle of Tiberias, and Jerusalem soon after being captured by the celebrated Saladin (Salaheddin), the Christian kingdom, which had continued there for about 100 years, came to an end.

(3) In A. D. 1190, first Italian, German, and other warriors, and then Frederick Augustus, king of France, and Richard the Lion-hearted, king of England, departed for the East. Some success attended the crusading wars; the exploits and even the successes of Richard were remarkable, but, in 1192, hostile action on the part of his late colleague the French king, who had returned home, compelled him to conclude a truce for a time with Saladin, leaving the latter potentate in possession of Jerusalem.

(4) The fourth crusade was successful, but in an unexpected direction. The Western Christians captured Constantinople from their Greek brethren in the East, and founded a Latin kingdom there, which lasted fifty-seven years.

(5) This crusade left under the leadership of Andrew, king of Hungary, and with the benediction of Pope Honorius III., in A. D. 1217. The crusaders temporarily took Damietta in A. D. 1220. In 1227 the German Emperor, Frederick II. of Hohenstaufen, then excommunicated, followed and obtained the city of Jerusalem by treaty, without expenditure of human blood.

(6) This crusade was twice conducted by Louis IX., king of France; in the first expedition he was taken prisoner and Damietta surrendered; in the second he died of pestilence at Tunis.

(7) In A. D. 1240, Richard, Earl of Cornwall, brother of Henry III., king of England, and grandson of Richard the Lion-hearted, led a new crusade to the East. It failed, however, and in 1291 the Latin kingdom of Jerusalem expired.

When the crusades to Palestine were abandoned similar enterprises were attempted against the Mussulmans of Spain, against European heathens, who still were numerous in Prussia and Lithuania, against the Albigenian "heretics," and others.

Enterprises conducted for two centuries with all the might of Europe could not fail of producing great changes in the several kingdoms. Millions of lives had been lost, yet more millions of money spent unproductively, and the domination of the Papacy unduly increased. But Europe was made more than previously one great federation, feudal power was broken, and the commercial and laboring classes received an impulse, bigotry was diminished, and the germs of new ideas sown in inquiring minds, which, in future centuries, were to advance to maturity.

"With gallant Frederick's princely power
He sought the bold Crusade."

2. The casing or covering of a pie.

"They stitched and spun, . . . and made the *crust* for the venison pasty."—Macaulay: *Hist. Eng.*, ch. iii.

3. The outer hard portion of bread.

¶ The formation of the *crust* of bread is due to the almost total expulsion of moisture and the roasting of the outside of the loaves. Most of the starch is converted into gum by the heat of the oven.

"Th' impenetrable *crust* thy teeth defies."
Dryden: *Juven*.

4. An incrustation or collection of matter into a hard body.

5. A deposit from wine as it ripens, consisting of tartar and coloring matter.

6. A waste piece of bread.

"... a *crust* of moldy bread would keep him from starving."

Massinger: *A New Way to pay Old Debts*, ii. 1.

*II. *Fig.*: A casing or covering.

"What penetrating power of sun or breeze,
Shall e'er dissolve the *crust* wherein his soul
Sleeps, like a caterpillar sheathed in ice?"
Wordsworth: *Excursion*, bk. viii.

B. Technically:1. *Geol.*: [*Crust of the earth.*]2. *Anatomy*:

(1) An external portion of anything less fluid than the rest.

"... the buffy coat or inflammatory crust."—*Todd & Bowman: Physiol. Anat.*, vol. 1, ch. 1, p. 37.

(2) The rendering of the Latin word CRUSTA (q. v.).

3. *Zool.*: A chitinous or subcalcareous exoskeleton protecting the body of a crustacean."It has generally been supposed that the Trilobite occupied the median lobe of the crust."—*Nicholson: Zool.* (5th ed.), 281.4. *Bot.*: [*CRUSTA.*]† *Crust of the Earth*:*Geology, Physical and Mathematical Geography*, &c.:

(1) *In a more extended sense*: The outer shell or rind of the earth at and beneath its surface which is solid, as distinguished from fluid or melted parts assumed to exist in the interior. If we suppose the whole of the earth to have once been perfectly fluid, and then a certain portion of the exterior to have acquired solidity by gradual refrigeration, the question arises—Are there means of ascertaining how much is now solid, and how much fluid? Mr. Hopkins—proceeding from the fact that the precession of the equinoxes produced by the attraction of the moon and that of the sun, specially the former, on the protuberant parts of the earth at the equator will be different according to the solidity or fluidity of the mass on which the two attractions operate—has calculated that one-fourth or one-fifth of the earth's radius, viz., from 800 to 1,000 miles, must be solid, though, as Lyell adds, great lakes or seas of melted matter may be distributed through the nominally solid area.

(2) *In a more limited sense*: Such superficial parts of our planet as are accessible to human observation, or on which we are enabled to reason by observations made at or near the surface (*Lyell*). No mine yet opened is a mile deep, but when strata dip they bring to the surface oblique sections across lower beds which but for that dip would be buried hopelessly deep for human investigation, so that strata, collectively about ten miles thick, have been discovered and studied—about $\frac{1}{10}$ th part of the earth's radius, or about as much proportionately to the diameter of the earth as the thickness of a sheet of paper to the diameter of a globe a foot across.

crust, *v. t. & i.* [*CRUST*, *s.*]**A. Transitive:****I. Literally:**

1. To envelop; to cover with a hard case or crust.

"Why gave you me a monarch's soul,
And crusted it with base plebeian clay?"
Dryden.

2. To foul or incrust with concretions.

"... many musty, or very foul and crusted bottles,"
—*Swift.****II. Fig.**: To cover, to obscure."... their minds are crusted over, like diamonds in the rock."—*Felton.***B. Intrans.**: To become incrust; to acquire a hard case or crust."I contented myself with a plaster upon the place that was burnt, which crusted and healed in very few days."—*Temple.***crūs-tā-ċē-ā**, *s.* [*Lat.*=a hard shell, rind, or crust.]1. *Anat.*: A crust, a fasciculated portion of anything. Thus there is a crust of each cerebral peduncle, and a *crusta petrosa* of a tooth.2. *Zool.*: The same as CRUST, *s.*, B. 3.3. *Bot.*: A brittle crustaceous thallus, constituting the upper surface of some lichens.4. *Gem Engraving*: A gem engraved for inlaying a vase or other object.† *Crusta petrosa*:*Anat.*: The cement of a tooth. It is distinct both from the dentine and the enamel.**crūs-tā-ċē-ā**, *s. pl.* [*Mod. Lat. crustacea*, *n. pl.* of *adj. crustaceus*, from *Class. Lat. crusta* (q. v.).]1. *Zool.*: Crustaceans: a great and important class of animals, ranked under the sub-kingdom Articulata, better called Annulosa (Ringed Animals), and the higher division of it, that called Arthropoda—animals with jointed limbs. Speaking broadly, the smaller the number of limbs in the Annulosa the higher the organization. If this principle be carried out, then the insects stand highest as having but six legs; the spiders come next with eight, though anatomically they, in some respects, approach more closely than the insects do to the human organization. The Crustaceans are the third in order as possessing ten or more limbs, then follow the Centipedes and Millepedes, which, etymologically rather than zoologically, have the former "100" and the latter "1,000" limbs. The Annelids

bring up the rear, with numerous imperfect limbs vegetatively repeated in indefinite numbers in the higher orders and none at all in the lower. Both the English book-name Crustaceans and the corresponding one in Latin point to the fact that the class of animals so designated possess a crusta, crust, or shell, cast periodically. [*CRUSTA, Zool.*] The body consists of a variable number of "somites" or definite segments, in the higher members of the class divided into three regions: a head, a thorax, and an abdomen. Of the "somites," in the view of some zoologists, theoretically twenty-one in number, seven belong to the head, seven to the thorax, and seven to the abdomen. Professor Huxley believes that their number should be six, eight, and six. All these somites, except the last, may have appendages; the last, called the "telson," does not possess any. Generally the head and thorax are welded together into a single mass called the cephalo-thorax; it is generally covered by a great shield or buckler called the "carapace." The upper part of a somite is termed its "tergum," and the lower one its "sternum," while the plate, constituted by the dividing line produced downward and outward, is called in the singular "pleuron," or in the plural "pleura." Of the appendages in the higher Crustacea, the first segment of the head has a pair of compound eyes borne upon long stalks, the second the lesser antennae or antennules, a pair of jointed feelers; the third, the great antennae; the fourth, the mandibles or jaws; the fifth, the first pair of maxillae, a kind of jaws; the sixth, the second pair of maxillae; the seventh, three pairs of foot-jaws or maxillipedes. The eighth segment, the first of the thorax, carries a second pair of foot-jaws, and the ninth, a third pair; the tenth, a pair of jointed limbs, constituting the nipping claws in a crab or lobster. The tenth to the fourteenth somites carry ambulatory limbs; these, taken collectively, constitute the appendages of the cephalo-thorax. The fifteenth to the twentieth segments have swimming appendages, called "swimmerets;" the last of all, called the "telson," have none. Respiration is by branchiae. Crustacea occur in all seas; there are also fresh-water and terrestrial species.

To all but the naturalist the classification will look unnatural, which brings together the eatable crab, shrimp, and lobster on the one hand, the "slater" (Oniscus), the little one-eyed animals with bivalve shells (Cyprides, &c.), of fresh water brooks, the barnacles from returned ships' bottoms, and the Dudley trilobite of the quarries, but all are really akin to each other. It has cost even the scientific inquirer much observation and research to constitute the modern class Crustacea; one main difficulty being that many of the species undergo a metamorphoses, which makes them in their adult state totally unlike what they were when immature. [*CANCER, &c.*]

The following constitute the Sub-classes and Orders of Crustacea:

Sub-class I.—Epizoa or Haustellata.	Sub-class III. (continued):
Order 1.—Ichthyophthira.	Order 4.—Phyllopora.
" 2.—Rhizocephala.	" 5.—Trilobita.
Sub-class II.—Cirripedia.	" 6.—Merostomata.
Order 1.—Thoracica.	Sub-class IV.—Malacostraca
" 2.—Abdominalia.	Division I.—Edriophthal-
" 3.—Apoda.	mata.
Sub-class III.—Entomostraca.	Order 1.—Lamodipoda.
Order 1.—Ostracoda.	" 2.—Isopoda.
" 2.—Copepoda.	" 3.—Amphipoda.
" 3.—Cladocera.	Division II.—Podophthal-
	mata.
	Order 1.—Stomapoda.
	" 2.—Decapoda.

2. *Palaeontol.*: The Crustacea are highly important for palaeontological inquiries, as to the age of strata, &c. The less highly-organized members of the class come into existence apparently as early as the Cambrian period. Trilobites abounded in the Silurian, and went upward into the Carboniferous rocks. The Stalk-eyed Crustaceans, begun in the last-named formation, went on increasing in numbers through the secondary and tertiary rocks, and apparently reach their maximum now. (*Woodward, Huxley, Nicholson, &c.*)

B. Technically:

1. *Hor.*: The fork at the end of the arm which depends from the axis of the anchor-escapement. The pendulum-rod is contained within the limbs of the crutch, and vibrates the anchor, itself also receiving a slight impulse from the train. (*Knight*.)

2. *Saddlery*: One form of pommel for a lady's saddle, consisting of a forked rest which holds the leg of the rider.

3. *Shipwrighting*:

(a) One of the struts or stay-plates in the prow or stern of an iron vessel, which supports the sides where they nearly approach each other. They occupy a position corresponding to that of the dead-wood in a timber-vessel, and are used to prevent the crushing in of the plating.

(b) A knee-timber placed inside a vessel to secure the heels of the cant timbers abaft.

(c) A support upon the taffrail for the boom.

(d) A forked row-lock upon the gunwale.

4. *Founding*: The cross-handle on the end of a shank (a founder's metal-ladle), by which it is tipped.

¶ For the difference between *crutch* and *staff*, see *STAFF*.

*crutch-back, s. A crooked back.

"Esopos for all his crutch-back had a quick wit."—*Nine Worthies of London*, 1592. (*Davies*.)

crutch-like, a. Like a crutch, acting as a crutch or support.

"... a crutch-like rod,
Whose touch turns Hope to dust,—the dust we all
have trod." *Byron: Childe Harold*, iv. 125.

***crütch, v. t.** [*CRUTCH, s.*] To support, as a cripple on crutches.

"I hasten Og and Doeg to rehearse,
Two fools that crutch their feeble sense on verse."
Dryden: Absalom and Achitophel.

***crütched** (1), a. [*Eng. crutch; -ed.*] Supported on crutches.

***crütch-éd** (2), a. [*Corrupted from crossed.* Remotely from Norm. Fr. *crux, crous, croise, croisse*=a cross.] Marked or badged with a cross.

¶ *Crutched Friars, Crouched Friars, Crossed Friars*:

Ch. Hist.: The name given to three orders of friars—one in England, one in Flanders, and one in Bohemia. All traced back their origin to St. Cleus, whom they considered to have been Pope at Rome from A. D. 78 to 91, and acknowledged as the restorer of their fraternity St. Cyriacus, bishop of Jerusalem in 331. Their real origin was evidently much less antique. In 1169, Pope Alexander III. framed rules and a constitution. In 1462 they adopted the blue robe and silver cross, from the latter of which they derived their name of Crossed, Croised, or "Crutched" friars. In 1568, Pius V. enlarged and confirmed their privileges, but having long lost their original sanctity, they were suppressed by Pope Alexander VII. in A. D. 1656. (*Townsend*.)

"On the west side of this portion of the walls, stood the house of the *Crutched* or *Crossed Friars*, or *Fratres sanctae Crucis*. This order was instituted, or at least reformed, about the year 1169, by Gerard, Prior of St. Mary de Morell, at Bologna."—*Pennant: London*, p. 347.

crûx, s. [*Lat.*=a cross.]

I. *Ordinary Language*:

*1. *Lit.*: A cross.

2. *Fig.*: Anything exceedingly puzzling or difficult to explain; a puzzle.

"But the next feast visited by Jesus (v. 1), which is indefinitely designated a *feast of the Jews*, has been the perpetual *crux* of New Testament chronologists."—*Strauss: Life of Jesus* (transl.), vol. i., § 59, pp. 415, 416.

II. *Astron.*: The cross, a constellation in the Southern hemisphere. [*CRUX AUSTRALIS.*]

¶ *Crux Australis*: The Southern Cross.

Astron.: A small but brilliant southern constellation, situated near the Pole, and close to the hinder legs and under the body of Centaurus. The name and grouping on the celestial map seem to have been the work of Augustin Royer, who turned to account the observations of Halley. It contains seven stars, one of which is of the first magnitude. It is a constellation to which voyagers from India, Australia, and elsewhere attach a sacred interest, and which, though a striking object in the sky, has had its splendor exaggerated.

cruy-shage, s. [*Dan. kruisshaag*, from *kruis*=cross, and *haag*, *haai*=a shark.]

Ichthy.: *Lamna cornubica*, a shark with a somewhat triangular head and mouth.

crý, *crie, *crien, *crye, *cryn, *krie, v. i. & t. [*Fr. crier*; Sp. & Port. *gritar*; Ital. *gridare*; from Low Lat. *querito*=to shriek, a freq. of Lat. *queror*=to lament.]

A. *Intransitive*:

1. To speak or call out loudly or vehemently; to shout, to exclaim.

"And about the ninth hour Jesus *cried* with a loud voice, . . ."—*Matt.* xxvii. 46.

2. To call earnestly and importunately; to utter earnest prayers.

"... and he *cry* unto the Lord against thee, and it be sin unto thee."—*Deut.* xv. 9.

3. To proclaim; to make anything public.

"Go and *cry* in the ears of Jerusalem, . . ."—*Jerem.* ii. 2.

4. To talk eagerly or incessantly; to repeat words continually.

"... therefore they *cry*, saying, Let us go, . . ."—*Exod.* v. 8.

*5. To exclaim, to complain; to call for vengeance or punishment. [*CRY OUT.*]

"... my guiltless blood must *cry* against them."
Shakesp.: Henry VIII., ii. 1.

6. To utter lamentations; to lament loudly.

"... ye shall *cry* for sorrow of heart, and shall howl for vexation of spirit."—*Isaiah* lxx. 14.

7. To weep, to shed tears.

"For sometimes she would laugh and sometimes *cry*."
Thomson: Castle of Indolence, i. 76.

8. To squall as an infant.

"Thus, in a starry night, fond children *cry*
For the rich spangles that adorn the sky."
Waller.

9. To utter an inarticulate sound.

"Far from her nest the lapwing *cries* away."
Shakesp.: Comedy of Errors, iv. 2.

10. To yelp as a hound.

B. *Transitive*:

1. To utter loudly; to call out, to exclaim.

*2. To proclaim, to declare publicly.

"The Jewys dedyn *cryn* her parliament."
Songs and Carols, p. 42.

*3. To beg for, to implore. [*CRY MERCY.*]

*4. To demand, to call for.

"... the affair *cries* haste, . . ."
Shakesp.: Othello, i. 3.

¶ (1) *To cry against*: To exclaim against, to accuse vehemently.

"What is the matter
That in these several places of the city,
You *cry* against the noble senate,"
Shakesp.: Coriolanus, i. 1.

(2) *To cry aim.* [*AIM.*]

(3) *To cry down*:

(a) To depreciate, to decry, to blame.

"... a band of stockjobbers in the city, whose interest it happened to be to *cry down* the public securities."—*Macaulay: Hist. Eng.*, ch. xxi.

(b) To declare publicly the crimes or faults of any one.

"... her husband first *cried* her down at the cross, and then turned her out of his doors."—*Bunyan: Pilgrim's Progress*, pt. ii.

(c) To prohibit.

"By all means *cry down* that unworthy course of late times, that they should pay money."—*Bacon: To Villiers*.

(d) To overbear, to overwhelm.

"I'll to the king,
And from a mouth of honor quite *cry down*
This Ipswich fellow's insolence."
Shakesp.: Henry VIII., i. 1.

(4) *To cry mercy*: To implore mercy.

"Ever among *mercy* she *cries*."—*Gower*, i. 149.

(5) *To cry one mercy*: To beg one's pardon.

"Then said Mr. Honest, I *cry* you *mercy*."—*Bunyan: Pilgrim's Progress*, pt. ii.

(6) *To cry on or upon*: To call upon earnestly or importunately; to address or name with earnestness.

"No longer on St. Denis will I *cry*."
Shakesp.: Henry VI., Pt. I., i. 6.

(7) *To cry out*:

(a) To call or cry loudly, to vociferate.

"His Lady, sad to see his sore constraint,
Cried out, 'Now, now, Sir knight, shew what ye bee.'"
Spenser: F. Q., i. 1. 19.

(b) To proclaim, to declare publicly.

"Art thou a man? thy form *criest* out thou art."
Shakesp.: Rom. and Jul., iii. 3.

(c) To complain.

"They groan as pitifully, and *cry* out as loud as other men."—*Tillotson*.

(d) To be in labor; to be brought to bed.

"What! I is she *crý*ing out?
So said her woman; and that her suffrance made
Each pang a death."—*Shakesp.: Henry VIII.*, v. 1.

(8) *To cry out against*: To exclaim or complain loudly.

"Tumult, sedition, and rebellion, are things that the followers of that hypothesis *cry out against*."—*Locke*.

(9) *To cry out of*: To complain loudly, to find fault with.

"We are ready to *cry out of* an unequal management, and to blame the Divine administration."—*Atterbury*.

(10) *To cry out on or upon*: To complain loudly; to blame, to exclaim against.

"*Cry out upon* the stars for doing
Ill offices, to cross their wooing."
Butler: Hudibras.

(11) *To cry up*:

(a) To extol, to praise highly; to applaud.

"Everybody will *cry up* the goodness of men . . ."
—*Bunyan: Pilgrim's Progress*, pt. ii.

(b) To raise the price of anything by proclamation.

"All the effect that I conceive was made by *crý*ing up the pieces of eight, was to bring in much more of that species, instead of others current here."—*Temple*.

¶ (1) Crabb thus discriminates between *to cry* and *to weep*: "*Crying* arises from an impatience in suffering corporeal pains; children and weak people commonly *cry*: *weeping* is occasioned by mental grief; the wisest and best of men will not disdain sometimes to *weep*. *Crying* is as selfish as it is weak; it serves to relieve the pain of the individual to the annoyance of the hearer; *weeping*, when called forth by other's sorrows, is an infirmity which no man would wish to be without; as an expression of generous sympathy it affords essential relief to the sufferer."

(2) He thus discriminates between *to cry*, *to scream*, and *to shriek*: "*To cry* indicates the utterance of an articulate or an inarticulate sound; *scream* is a species of *crý*ing in the first sense of the word; *shriek* is a species of *crý*ing in its latter sense. *Crying* is an ordinary mode of loud utterance resorted to on common occasions; *one cries* in order to be heard: *screaming* is an intemperate mode of *crý*ing, resorted to from an impatient desire to be heard, or from a vehemence of feeling. People *scream* to deaf people from the mistaken idea of making themselves heard; whereas a distinct articulation will always be more efficacious. It is frequently necessary to *crý* when we cannot render ourselves audible by any other means; but it is never necessary or proper to *scream*. *Shriek* may be compared with *crý* and *scream*, as expressions of pain; in this case *to shriek* is more than *to cry*, and less than *to scream*. They both signify *to cry* with a violent effort. We may *crý* from the slightest pain or inconvenience; but one *shrieks* or *screams* only on occasions of great agony, either corporeal or mental. A child *cries* when it has hurt its finger; it *shrieks* in the moment of terror at the sight of a frightful object; or *screams* until some one comes to its assistance."

(3) He thus discriminates between *to cry*, *to exclaim* and *to call*: "We *cry* from the simple desire of being heard at a distance; we *exclaim* from a sudden emotion or agitation of mind. A *crý* bespeaks distress and trouble; an *exclamation* bespeaks surprise, grief, or joy. . . . *To cry* is louder and more urgent than *to call*. A man who is in danger of being drowned *cries* for help; he who wants to raise a load *calls* for assistance; a *crý* is a general or indirect address; a *call* is a particular and immediate address." (*Crabb: Eng. Synon.*)

crý, *cri, *orie, *crye, *kri, *kry, s. [*O. Fr. cri; Fr. cri; Ital. grida, grido; Sp. & Port. grito, grita; O. Sp. crida, grida. (cf. M. H. Ger. krei.)*]

1. The act of crying out; a shriek, a scream, a loud noise, expressive of pain or suffering.

"And all the first-born in the land of Egypt shall die, and there shall be a great *crý* throughout all the land."—*Exod.* xi. 5, 6.

2. A tumult, a clamor, an outcry.

"*Crye* or *grete* noyse among the peple. *Tumultus*."—*Prompt. Parv.*

3. A public outcry or demand for any particular course of action.

"But again that *crý* was found to have been as unreasonable as ever."—*Macaulay: Hist. Eng.*, ch. xix.

4. An exclamation expressive of any emotion, as wonder, alarm, &c.

"... so the *crý* goes round, without examining into the cheat."—*Swift*.

5. An importunate or earnest call or prayer.

"... I would not cease
To weary Him with my assiduous *cries*."
Milton: P. L., xi. 309, 310.

*6. A proclamation or public notification by authority.

"Than was it kenly komanded a *kri* to make newe."
William of Paternre, 2, 174.

fäte, fät, färe, amidst, whät, fäll, father; wë, wët, hère, camël, hâr, thère; pine, pît, sîre, sîr, marîne; gö, pôt, or, wöre, wöf, wörk, whö, sôn; müte, cüb, cüre, unite, cür, räle, füll; trý, sýrian. æ, œ = é; ey = ä. qu = kw.

7. A proclamation or public calling out of goods for sale, as by hawkers.

8. Popular acclamation or favor.

"The cry went once for thee."

Shakesp.: *Troil. and Cres.*, iii. 3.

9. A political or electioneering catchword.

"And to manage them you must have a good cry," said Taper. "All now depends upon a good cry." "So much for the science of politics," said the Duke, bringing down a pheasant.—*Disraeli: Coningsby*, bk. ii., ch. iii.

*10. Noise, fame, report.

"... the cry goes that you shall marry her."—*Shakesp.: Othello*, iv. 1.

*11. A complaint or calling for punishment or vengeance.

"And the Lord said, Because the cry of Sodom and Gomorrah is great, and because their sin is very grievous; I will go down now, and see whether they have done altogether according to the cry of it, which is come unto me; and if not, I will know."—*Gen.* xviii. 20, 21.

12. The act of weeping.

13. An inarticulate or confused noise, as of beasts, infants, &c.

"There shall be the noise of a cry from the fish-gate, and an howling from the second, and a great crashing from the hills."—*Zeph.* i. 10.

14. The yelping of dogs.

"He scorns the dog, resolves to try
The combat next; but if their cry
Invades again his trembling ear,
He strait resumes his wonted care."—*Waller*.

*15. A pack of dogs.

"You common cry of curs, whose breath I hate
As reek of th' rotten fens . . ."

Shakesp.: *Coriolanus*, iii. 3.

*16. A company, a band. (Used in contempt.)

"... get me a fellowship in a cry of players."—*Shakesp.: Hamlet*, iii. 2.

¶ 1. Out of cry, out of all cry: Out of or beyond all estimation.

"And then I am so stout, and take it upon me, and stand upon my pantofles to them, out of all crye."—*Old Taming of Shrew*, 6 pl., l. 174.

(2) Cry of tin: A sound emitted by tin when bent.

"The cry of tin is due to crystalline structure; it is not, however, characteristic of tin only, as generally supposed, but may be emitted by zinc and probably by other metals when crystalline in texture."—*Abstracts of Chem. Papers*, Chem. Soc., 1881.

*cry'-én, v. [CRY, v.]

*cry'-ér (1), s. [CRIER.]

*cry'-ér (2), s. [Prob. from cry, v.; suff. -er.] A kind of hawk, called the falcon gentle, an enemy to pigeons, and very swift. (*Ainsworth*.)

crý'-lîng, *cri-înge, *crieng, *criyng, *cryeng, pr. par., a. & s. [CRY, v.]

A. As pr. par.: (See the verb.)

B. As adjective:

1. Calling out loudly; shrieking, lamenting.

2. Weeping, shedding tears.

"... the passengers were grievously annoyed by invalids and crying children."—*Macaulay: Hist. Eng.*, ch. iii.

3. Calling for vengeance, punishment, or reformation; outrageous, notorious.

"... imposed the limit of 500 jurgers, as a necessary remedy for a crying evil."—*Lexis: Cred. Early Roman Hist.* (1865), ch. xiii., pt. 1, § 9, vol. ii., p. 391.

C. As substantive:

1. A calling out; a cry, a shout.

"There is a crying for wine in the streets . . ."—*Isaiah* xiv. 11.

2. Lamentation, mourning; a loud expression of grief.

"A voice of crying shall be from Horonaim, spitting and great destruction."—*Jer. xlvii. 3*.

3. An importunate cry or prayer.

"So will I pray that thou mayst have thy will,
If thou turn back, and my loud crying still."—*Shakesp.: Sonnets*, 143.

4. The noise of children.

"Voices of women were heard, and of men, and the crying of children."—*Longfellow: Evangeline*, l. 5.

*crýll, s. [CREEL (?).] A creel, a basket (?).

"The hedge creeper that goes to seek custom from ship to ship, with a cryll under his arme."—*Tom of all Trades* (1831). (*Hallistell: Cont. to Lexicog.*)

crý-ô-gên, s. [Gr. kryos=cold, and gennaô=to engender.]

Nat. Phil. & Chem.: (For def. see extract.)

"By cryogen I mean an appliance for obtaining a temperature below 0° Centigrade. In this paper it always signifies a freezing mixture."—*Prof. Frederick Guthrie, in Proceedings of Physical Society of London*, pt. ii.

crý-ô-hý-dráte, s. [Gr. kryos=cold, and Eng., &c., hydrate (q. v.).]

Chem.: (For def. see extract.)

"By cryohydrate I mean the body resulting from the union of water with another body, and which hydrate can only exist in the solid form below 0° Centigrade. Examples, Cryohydrate of sulphate of zinc, cryohydrate of magnesium, cryohydrate of nitrate of potassium, &c."—*Prof. Frederick Guthrie, in Proceedings of Physical Society of London*, pt. ii.

crý-ô-lite, krý-ô-lite, s. [Gr. chryolith; Gr. kryos=cold, and lithos=a stone.]

Min.: A brittle mineral subtransparent to translucent. Hardness, 2.5; specific gravity, 2.9-3.1. Luster generally vitreous, color snow-white, red, or black. Composition: Aluminium, 13.0; sodium, 32.8; fluorine, 54.2=100. Fusible in the flame of a candle. It occurs in great abundance at Arksut-fjord in Greenland, whence it has been carried to Europe and this country for the manufacture of soda and alumina salts, as also the metal aluminium. (*Dana*.)

cryolite-glass, s. A semi-transparent glass made from cryolite and sand, and sometimes known as fusible porcelain or milk-glass.

crý-ôph'-ôr-ús, s. [Gr. kryos=ice, and phoros=bearing, pherô=to bear, to carry.] An instrument to illustrate the process of freezing by evaporation, invented by Dr. Wollaston. It consists of two bulbs and a connecting tube, air being expelled from the interior by heating the body of water inclosed and hermetically closing the opening. The water being poured into one bulb, the other bulb is placed in a mixture of ice and salt, which condenses the vapor and causes so rapid evaporation from the former bulb as to freeze the water therein. (*Knight*.)

crý-ôph'-ýl-lite, s. [Gr. kryos=cold; phyllon = a leaf, and suff. -ite (Min.). (q. v.).]

Min.: An orthorhombic mineral crystallizing in six-sided prisms. Hardness, 2.2-5; specific gravity, 2.9. Luster of the cleavage faces, pearly to resinous. Color by transmitted light, emerald green, except transverse to the axis, where it is brownish red. Streak, greenish gray. Composition: Silica, 51.49; alumina, 16.71; sesquioxide of iron, 1.97; sesquioxide of manganese, 0.34; protoxide of iron, 7.78, &c. Occurs in the granite of Cape Ann. (*Dana*.)

crýpt, s. [Lat. crypta; Gr. kryptô = a vault or crypt; kryptos=hidden, secret; kryptô=to hide.]

1. Arch.: A vault beneath a church or mausoleum, and either entirely or partly underground.

"... it was thought proper to deposit his body in the crypt of that magnificent church."—*Malone: Life of Sir Joshua Reynolds*.

2. Anat.: A tubular or saccular simple gland. It is called also a follicle or a lacuna.

3. Bot. (Pl.): [CRYPTA.]

¶ 1. Crypts of Lieberkühn:

Anat.: Comparatively short tubular glands in the small and in the large intestines.

(2) Multilocular crypt:

Anat.: A gland in which the sides or extremity of a simple tube or sac becomes pouched or loculated. It is intermediate between a simple and a compound gland. The term was introduced by Quain.

crýpt'-ta (pl. cryptæ), s. [Lat.]

1. Arch.: Any long narrow vault, whether wholly or partially below the level of the earth.

2. Anat.: The same as CRYPT, 2.

3. Bot.: One of the receptacles of oily secretion in the leaves of the Aurantiaceæ (Oranges), the Myrtaceæ (Myrtle blooms), and various other orders of plants.

crýpt'-tal, a. [Eng. crypt; -al.] Pertaining to or connected with a crypt.

"The use of the cryptal or follicular secretion."—*Dunglison, in Ogilvie*.

crýpt-tân'-dra, s. [Gr. kryptos=hidden, secret, and anēr (genit. andros)=a man; by botanists used for a stamen.]

Bot.: An Australian genus of undershrubs, order Rhamnaceæ. They look like heaths. About seventy are known. (*Mr. Carruthers, in Treas. of Bot.*)

*crýpt'-tic, *crýpt'-tick, *crýpt'-tic-al, a. [Gr. kryptikos=fit for hiding; kryptô=to hide.] Hidden, secret, occult, private.

"Speakers, whose chief business is to amuse or delight, do not confine themselves to any natural order, but in a cryptical or hidden method adapt everything to their ends."—*Watts*.

*crýpt'-tic-al-ly, adv. [Eng. cryptical; -ly.] In a secret or occult manner; secretly, occultly.

crýpt'-ti-cûs, s. [Gr. kryptikos=fit for concealing; kryptô=to conceal.]

Entom.: A genus of Beetles, family Tenebrionidæ.

crýpt'-tid-in, s. [Gr. kryptos = secret; eidos = form; and suff. -in (Chem.).]

Chem.: A base, C₁₂H₁₁N, homologous with chinolin. Formed in the fraction of the bases from coal-tar, which boils at 274°.

crýpt-to-brânch-i-â'-ta, s. [Gr. kryptos=secret; branchia=the gills.]

Zool.: Animals which have no conspicuous gills.

crýpt-to-brânch-i-â-te, a. [CRYPTOBRANCHIATA.]

Zool.: Having concealed gills; having no conspicuous gills; a term used of various molluscous and annulose animals.

crýpt-tô-câl'-vin-ists, s. pl. [Gr. kryptos=hidden, secret, and Eng. Calvinists (q. v.).]

Ch. Hist.: Certain German theologians in the 16th century, who, though nominally Lutherans, really held Calvinistic sentiments with regard to the Lord's Supper. Casper Peucer, the son-in-law of Melancthon, a physician and medical professor at Wittenberg, was their head. The views of the Cryptocalvinists having been clearly stated in 1574 at the Convention of Torgau, some, including Peucer, were imprisoned and others banished by Augustus, the Prince-Elector of Saxony. (*Mosheim: Ch. Hist.*, Cent. xvi., ch. i., § 38, 39.)

crýpt-tô-câr'-ý-a, s. [Gr. kryptos = hidden, secret, and karua=the walnut tree.]

Bot.: A genus of plants, order Lauraceæ. There is a 6-cleft perianth, twelve stamens in four rows, the nine outer fertile, the three inner sterile. *Cryptocarya moschata* produces Brazilian nutmegs.

crýpt-tô-cêph'-al-ús, s. [Gr. kryptos=hidden, secret, and kephalê=the head.]

Entom.: A genus of Beetles, family Chrysomelidæ. They are small insects, with the head deeply inserted into the thorax, the antennæ long and filiform, the body short and cylindrical. *Cryptocephalus sericeus* is about a quarter of an inch long. It is of a fine golden-green color, and is found during July on the flowers of some composite plants. *C. lineola* is glossy black, the elytra red, except the margin. It is found on oaks and hazels.

crýpt-tô-chi'-li-dæ, s. pl. [Mod. Lat. *cryptochilus* (q. v.), and fem. pl. adj. suff. -idæ.]

Bot.: A family of Orchids, tribe Vandææ.

crýpt-tô-chi'-lûs, s. [Gr. kryptos = hidden, secret, and cheilos=a lip. So named because the labellum is not easily seen on account of the contraction of the mouth of the calyx.]

Bot.: A genus of Orchids, the typical one of the family Cryptochilidæ. *Cryptochilus sanguinea* is an Indian orchid with spikes of crimson tubular flowers.

crýpt-tô-côr'-ý-nê, s. [Gr. kryptos = hidden, secret, and korymê=a club. So named from the shape of its flowers.]

Bot.: A genus of Aracææ. *Cryptocoryne ovata* is used to bring sugar to a good grain when it is too viscid, and cannot be made to granulate properly by the application of lime alone. (*Lindley*.)

crýpt-tô-côr'-ý-nê-æ, s. pl. [Mod. Lat. *cryptocorynæ* (e), and fem. pl. adj. suff. -æ.]

Bot.: A tribe of Aracææ. The stamens are distinct from the pistils. The latter are several in number, whorled round the base of the spadix, and each combined into a many-celled ovary. (*Lindley*.) [CRYPTOCORYNÆ.]

crýpt-tô-dôn'-tî-a, s. pl. [Gr. kryptos=hidden, secret, and odon (genit. odontos)=a tooth.]

Zool. & Palæont.: In Professor Owen's classification, the second family of the Anomodontia, the fifth order of Reptilia or Reptiles. (*Owen: Palæontology*, ed. 1860.)

crýpt-tô-gâm, s. [CRYPTOGAMIA.]

1. Sing.: A plant of the Linnean order Cryptogamia (q. v.).

2. Pl. (Cryptogams): The English name of Linneus' class Cryptogamia (q. v.).

"... well-developed cryptogams, . . ."—*Herbert Spencer: Data of Biology*, § 22.

crýpt-tô-gâm'-mî-a, s. pl. [Gr. kryptos=hidden, secret, and gamos=a wedding, a marriage.]

Bot.: The twenty-fourth and last order in the artificial botanical system of Linneus. The class Cryptogamia is, however, essentially a natural one, the only question being whether it should not be divided into two. It corresponds to Lindley's Thallophytes and Acrogens taken together. Linneus divided it into the following orders: Filices, Musci, Algæ, Fungi, which are not artificial but natural groups of genera.

crýpt-tô-gâm'-mî-an, a. [Mod. Lat. *cryptogamia*, and Eng., &c., suff. -an.]

Bot.: The same as CRYPTOGAMIC (q. v.).

crýpt-tô-gâm'-ic, a. [Mod. Lat. *cryptogamia* (ia), and Eng., &c., suff. -ic.]

Bot.: Having the organs of reproduction concealed, or at least having organs of reproduction the precise character of which is difficult to understand; pertaining to the class Cryptogamia (q. v.).

¶ Much light has been thrown upon the nature of the organs of reproduction in the Cryptogamia since Linneus wrote, but the term Cryptogamic is still retained.

bell, boy, pout, jowl; cat, gell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tian = shan. -tion, -sion = shün; -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del.

crÿp-tôg'-a-mist, s. [Mod. Lat. *cryptogamia*], and Eng., &c., suff. -ist.]
Bot.: One who studies cryptogamic botany.

crÿp-tôg'-a-mous, a. [Mod. Lat. *cryptogamia* (q. v.), and Eng. suff. -ous.]
Bot.: The same as CRYPTOAMIC (q. v.).

crÿp-tôg'-a-my, s. [From Mod. Lat. *cryptogamia* (q. v.), and Eng., &c., suff. -y.]
Bot.: A term applied to cases in which there is obscurity about the organs and methods of reproduction of plants. The term is used only of the Cryptogamia (q. v.).

"The idea of cryptogamy inspired Timæus with ideas of loves of other kind. . . ."—Pennant: *Hist. of Whiteford and Holywell* (1796).

crÿp-tô-grâm'-ma, s. [Gr. *kryptos* = hidden, secret, and *gramma* = a written character, a letter; or from *grammê* = a line. So called from the concealed line of capsules.]

Bot.: A genus of ferns, order Polypodiaceæ. The sori at length confluent and marginal. Involucre formed from the revolute margins of the pinnules. *Cryptogramma crispa* is the Curled Rock-brake. The sterile fronds are bipinnate, the pinnules bi-tripinnatifid, the fertile ones are tripinnate below, bipinnate above.

crÿp-tô-grâph, s. [Gr. *kryptos* = secret, and *graphê* = a writing; *graphô* = to write.] A system of writing in secret characters or cipher; a secret writing; a cipher.

***crÿp-tôg'-raph-al**, a. [Eng. *cryptograph*; -al.] Secret, occult.

" . . . neither have I any zeal for the character, as *cryptographal* or universal."—Boyle: *Works*, vol. vi, p. 339.

crÿp-tôg'-raph-êr, s. [Eng. *cryptograph*; -er.] One who writes in secret characters or in cipher.

crÿp-tô-grâph-ic, **crÿp-tô-grâph-ic-al**, a. [Gr. *kryptos* = secret, and *graphikos* = suited for writing; *graphô* = to write.] Written or writing in secret characters or in cipher.

"A *cryptographic* machine was patented 1860."—Hayden: *Dates* (ed. 1878), p. 210.

***crÿp-tôg'-raph-ist**, s. [Eng. *cryptograph* (y); -ist.] The same as CRYPTOGRAPHER (q. v.).

crÿp-tôg'-raph-y, s. [Gr. *kryptos* = secret, and *graphê* = a writing.]

1. The art or system of writing in secret characters or in cipher.
2. Secret characters, cipher; enigmatical language.

" . . . the strange *cryptography* of Gaffarel in his *Starry Book of Heaven*."—Browne: *Cyrus' Garden*, c. 3.

crÿp-tô-hÿp'-nûs, s. [Gr. *kryptos* = hidden, secret, and *hypnos* = sleep.]

Entom.: A genus of Beetles belonging to the family Elateridae.

crÿp-tô-lite, s. [Gr. *kryptolith*, from Gr. *kryptos* = hidden, secret, and *lithos* = stone.]

Min.: An apparently hexagonal mineral, occurring in acicular prisms and minute grains. Specific gravity, 4.6; color, wine-yellow. Transparent to translucent. Composition: Phosphoric acid, 27.37; protoxide, either of cerium or of didymium, 73.70; protoxide of iron, 1.51. Found at Arendal in Norway, in the Tyrol, and in Siberia. It is very closely akin to PHOSPHOCERITE (q. v.).

crÿp-tô-line, **crÿp-tô-lin'-ite**, s. [Gr. *kryptos* = hidden, secret, *linon* = anything made of flax, a net, and suff. -ite (Min.) (q. v.).]

Min.: A colorless transparent fluid, resembling Brewsterite, but more dense than that species. It is found in cavities of crystals. Index of refraction, 1.2946. Hardens, when exposed to the sun, into a yellowish transparent resin. (Dana.)

crÿp-tô-lô-gÿ, s. [Gr. *kryptos* = secret, and *logos* = a word, a discourse.] Enigmatical or occult language.

crÿp-tô-mor'-phite, s. [Gr. *kryptos* = hidden, secret, and *morphê* = form, shape. In allusion to the impossibility of seeing the structure unless with the aid of a microscope.]

Min.: A mineral without luster, lying between crystals of glauconite, at Windsor in Nova Scotia. Composition: Boric acid, 55.6; lime, 16.7; soda, 6.2; water, 21.5 = 100. (Dana.)

crÿp-tô-nê-ma-ta, s. pl. [Gr. *kryptos* = hidden, secret, and *nêma* = that which is spun, yarn.]
Bot.: Small cellular threads produced by Cryptotomata.

crÿp-tô-nê-mê-æ, s. pl. [Mod. Lat. *cryptonemæ* (q. v.), and Lat. suff. -æ.]

Bot.: A sub-order of Algae (Sea-weeds), order Ceramiales. The frond is cellular, favicellid containing a firm mass of compact granules within a gelatinous envelope. Tetraspores globose or oblong, formed out of cells of the circumference. The

sub-order is a large one. Among the genera are Chondrus and Iridaea, species of which, abounding in gelatine, are used for food.

crÿp-tô-nê-mi-a, s. [Gr. *kryptos* = hidden, secret; *nêma* = that which is spun, yarn, *nêo* = to spin.]

Bot.: A genus of Algae, the typical one of the sub-order Cryptonemæ (q. v.).

crÿp-tô-nê-mi-â-çê-æ, s. pl. [Mod. Lat. *cryptonemæ* (a), and Lat. fem. pl. adj. suff. -æcæ.]

Bot.: An order of Sea-weeds, identical in its character and extent with the sub-order Cryptonemæ of other classifications. [CRYPTONEMÆ.]

crÿp-tô-pên-tâm-êr-a, s. [Gr. *kryptos* = hidden, secret, and *pentameros* = in five parts.]

Entom.: A term sometimes applied to the Beetles ranked by Latreille under his section Tetramera or Beetles, with four joints to the tarsi. They have really five, but the fifth joint is minute and concealed within the one adjacent to it.

crÿp-tô-phâg'-i-dæ, s. pl. [Mod. Lat. *cryptophagus* (us), and Lat. pl. fem. adj. suff. -idæ.]

Entom.: A family of Beetles, order Pentamera. They are minute in size, and are beetles found in fungi.

crÿp-tôph'-a-gûs, s. [Gr. *kryptos* = hidden, secret, and *phagêin* = to eat, or its root (*phag*).]

Entom.: A genus of Beetles, the typical one of the family Cryptophagidae (q. v.).

crÿp-tô-phân'-ic, a. [Gr. *kryptos* = hidden, secret, and *phanô* = to bring to light, to make to appear, whence *phanos* = light, *phanê* = a torch, &c. (?)]

Chem.: A word occurring only in the subjoined compound.

cryptophanic acid, s.

Chem.: A dibasic acid, C₅H₉NO₅, which occurs in normal human urine. The acid is amorphous and soluble in water, nearly insoluble in ether. The calcium salt is crystalline. Cryptophanic acid reduces alkaline copper solution.

crÿp-tô-phÿ-tês, **crÿp-tô-phÿ-ta**, s. pl. [Gr. *kryptos* = hidden, secret, and *phyta*, pl. of *phyton* = a plant.]

Bot.: A name sometimes given to Cryptogams. [CRYPTOGAMIA.] The Latin form of it, Cryptophyta, was introduced by Link.

crÿp-tô-pin, s. [Gr. *kryptos* = hidden, secret; *opion* = poppy-juice [OPIUM], and Eng., &c., suff. -ine (Chem.).]

Chem.: An organic base, C₂₁H₂₃NO₅, which is found in opium, about one ounce in a ton. It is found in alcoholic matter liquid from which morphine has been crystallized, and is precipitated by milk of lime, and purified. Cryptopine crystallizes from hot alcohol in colorless, six-sided short prisms; it melts at 217°. It is a strong alkaloid, and forms crystalline salts. Nitric acid converts it into yellow nitro-cryptopine; with strong sulphuric acid it gives a yellow solution, turning violet, then dark violet; ferric salts give a beautiful violet color, turning dirty green on warming. Cryptopine has a bitter taste. Caustic potash precipitates it as a white amorphous powder, soluble in excess.

crÿp-tô-pôr-ti-cûs (Lat.), **crÿp-tô-pôr-ti-cô** (Ital.), s. [Gr. *kryptos* = secret, hidden; Lat. *porticus* = a portico, &c.] An inclosed gallery or portico, having a wall with openings or windows in it, instead of columns at the side. (Weale.)

crÿp-tô-prôc'-ta, s. [Gr. *kryptos* = hidden, secret, and *prôktos* = hinder parts, bottom . . . tail.]

Zool.: A genus of mammals, family Viverridae. It has, however, the retractile claws of the Felidae, with which it is a connecting link. *Cryptoprocta ferox* is a native of Madagascar.

crÿp-tô-rhÿnch-i-dês, s. pl. [Gr. *kryptos* = hidden, secret, and *rhynchos* = snout.]

Entom.: According to Schoenherr, author of an elaborate work on the Curculionidae, this is a family of Rhynchophora. It contains upward of twenty genera.

crÿp-tô-rûs, s. [Gr. *kryptos* = hidden, secret, and *ornis* = a bird.]

Paleont.: A genus of birds, apparently allied to the Hornbills. It is founded on ornithic remains from the Upper Eocene. (Nicholson.)

crÿp-tô-stê-gl-a, s. pl. [Gr. *kryptos* = hidden, secret, and *stêgê* = a roof.]

1. Zool.: A family of Foraminifera with a perforate test, in the classification of Reuss. The order does not figure in the systems of Dr. Carpenter, Mr. Parker, and Prof. T. Rupert Jones.

2. Bot.: A genus of twining Asclepiadaceæ with reddish-white flowers in terminal cymes. Two species are known; one from India, the other from Madagascar.

crÿp-tô-stôm'-a-ta, s. pl. [Gr. *kryptos* = hidden, secret, and *stomata*, pl. of *stoma* = mouth.]

Bot.: Little circular nuclei found on the surface of some Algae. (Treas. of Bot.)

crÿp-tô-tân'-i-a, s. [Gr. *kryptos* = hidden, secret, and Lat. *tænia*; Gr. *tainia* = a band, a fillet.]

Bot.: A genus of Umbelliferae. Only described species, *Cryptotania canadensis*, known in its native country as the Honewort.

crÿp-tô-têt-râm-êr-a, s. pl. [Gr. *kryptos* = hidden, secret, and *tetrameros* = quadrupartite, divided into four.] [TETRAMERA.]

Entom.: A name sometimes given to Latreille's section of Coleoptera (Beetles). They are called Trimera because they have apparently only three joints to the tarsi. The term Cryptotetramera implies that there is a fourth joint concealed, as is the case. It is nearly inclosed within the adjacent one.

crÿp-tô-thê-gl-i, s. pl. [Gr. *kryptos* = hidden, secret, and *thêkê* = a box, a chest.]

Bot.: A small group of Muscaceæ (Mosses). Type *Spiridens*.

crÿp-tûr-i-dæ, s. pl. [Mod. Lat. *cryptur* (us), and fem. pl. adj. suff. -idæ.]

Ornith.: In the classification of Prince Bonaparte, a family of Gallinaceous birds, type *Crypturus* (q. v.).

crÿp-tûr-i-næ, s. pl. [Mod. Lat. *cryptur* (us) (q. v.), and fem. pl. adj. suff. -inæ.]

Ornith.: A sub-family of Tetraonidae. [CRYPTURUS.]

crÿp-tûr-ûs, s. [Gr. *kryptos* = hidden, secret, and *oura* = tail.]

Ornith.: A genus of Gallinaceous birds, by Swainson and others placed under Tetraonidae, and by some made the type of a sub-family Crypturinae, but by Prince Bonaparte elevated into a family, Crypturidae.

***crÿs'-ô-lite**, s. [CHRYSLITE.]

***crÿs'-ô-pâse**, s. [CHRYSPRASE.]

crÿs'-tal, ***cres-tel**, ***cris-tal**, ***cris-tallê**, ***crÿs-talle**, s. & a. [Fr. *crystal*; Sp. & Port. *crystal*, from Lat. *crystalum*, from Gr. *krystallos* = ice, crystal, *kryos* = ice.]

A. As substantive:

I. Ordinary Language:

1. Lit.: In the same sense as II.

"The gold and the crystal cannot equal it. . . ."—Job xxviii. 17.

2. Figuratively:

(1) A body or substance resembling crystal in purity, transparency, or brightness, as water.

" . . . the blue crystal of the seas." Byron: *The Giaour*.

(2) Pl.: The eyes.

"Therefore caveat be thy counsellor. Go, clear thy crystals." Shakespeare: *Henry V*, ii. 3.

†(3) The glass of a watch-case.

(4) It is used by Wycliffe to express the appearance of frost.

"He sendes his *crystal* [crystallum, Vulg. hoar-frost, A. V.] as musselis."—Wycliffe: *Ps.* cxlvii. 17.

II. Technically:

1. Chem., Min., &c.: A more or less symmetrical, geometrical solid, commonly bounded by plane surfaces, called planes or faces. Two such planes

Forms of Crystals.

1. Regular Dodecahedron. 2. Crystal of Copper. 3. Crystal of Potassium. 4. Crystal of Amethyst.

meeting form an edge. The terms solid angle, base, apex, prism, pyramid, &c., used in describing crystals, are used in the same senses as they are in geometry. [CRYSTALLOGRAPHY.] Crystals of various substances can be produced by dissolving them in water, alcohol, &c., if they are soluble in one or other of these liquids, or if not them by fusing the liquid and allowing them to cool slowly. In the chemistry of nature crystals continually occur, and the study of their structure and the laws which have operated in their formation constitute the science of crystallography, which is an essential part of Mineralogy. [CRYSTALLOGRAPHY.]

2. Glass-making: A peculiarly pellucid kind of glass. (Knight.)

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pine, pît, sire, sîr, marine; gô, pôr, or, wôre, wolf, wôrck, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

B. As adjective:

1. *Lit.*: Consisting or made of crystal.

"Through crystal walls each little mote will peep."
Shaksp.: *Rape of Lucrece*, l. 251.

2. *Fig.*: Clear, transparent or bright as crystal.

Applied—

(1) To water.

"... in the crystal spring I view my face."
Pope: *Pastorals*; *Summer*, 27.

(2) To the eyes. (*Shaksp.*: *Romeo and Juliet*, i. 2.)

(3) To tears. (*Shaksp.*: *Venus and Adonis*, 491.)

(4) To hail-stones.

"The crystal pellets at the touch congeal,
And from the ground rebounds the rattling hail."
Brookes: *Universal Beauty*, bk. ii.

† (1) *Iceland crystal*:

Min.: An old name for Iceland Spar (q. v.).

(2) *Rock crystal*: A general term for quite or nearly colorless quartz, whether in distinct crystals or not. Dana makes it identical with ordinary crystallized quartz, the first sub-variety of his Phenocrystalline, or Vitreous varieties of Quartz.

† Obvious compounds: *Crystal form*, *crystal-girded*.

Crystal Palace. A well-known building at Sydenham, England, for public instruction and entertainment, one of the greatest attractions of the suburbs of London. The Great Exhibition, opened by Queen Victoria on February 25, 1851, and the great promoter of which was Prince Albert, was held in Hyde Park. Important as it was, it could not be allowed to occupy that site permanently, and on October 11 it was closed to the public, and soon afterward emptied and taken down. A company formed for the purpose bought the materials, and erected on a site obtained in perpetuity at Sydenham, in Kent, a building in various respects resembling its predecessor. Both were built mainly of glass, and were poetically called crystal palaces. The term Crystal Palace has now become the everyday name of the Sydenham edifice, and has to a certain extent been used also of all subsequent buildings of a similar kind erected throughout the British empire. The Sydenham Crystal Palace was opened by Queen Victoria on June 10, 1854. The name was also given to a large building erected in New York city in 1853 for exhibition purposes, which after a successful career of five years was burned in the year 1858. Its site was Reservoir Square.

crýs-tal-hý-drá-tion, *s.* [Eng. *crystal*, and *hydration*.]

Chem.: The formation of a hydrate which is also a crystalline body.

"... the temperature of the salt and its degree of crystallization."—*Proceedings of the Physical Society of London*, pt. ii., p. 81.

crýs-tal-lín, *s.* [Eng. *crystal*; suff. *-in*.]

Chem.: An aluminous substance contained in the crystalline lens of the eye. [GLOBULIN.]

crýs-tal-line, *a. & s.* [Lat. *crystallinus*; Gr. *krystallos*.]

A. As adjective:

I. *Literally*:

1. Consisting or made of crystal.

"They pass the planets seven, and pass the fix'd,
And that crystalline sphere whose balance weighs
The trepidation talk'd, and that first moved."
Milton: *P. L.*, iii. 482.

2. Made of crystal glass.

"... small receivers, blown of crystalline glass."—*Boyle*.

3. Formed by crystallization.

"... their crystalline structure."—*Whewell: Hist. Scient. Ideas*, ii. 27.

II. *Fig.*: Bright, transparent, pellucid, or clear as crystal.

"He on the wings of cherub rode sublime
On the crystalline sky, in sapphire throned."
Milton: *P. L.*, vi. 772.

B. As substantive:

1. *Geol. & Min.*: Having the internal texture which regular crystals exhibit when broken, *i. e.*, having internally a confused assemblage of ill-defined crystals. (*Lyell*.)

† There is a difference between *crystalline* and *crystallized*, the latter term implying that the crystals are well defined and of regular forms. Loaf sugar and statuary marble have a *crystalline* texture; rock-candy and calcspar are *crystallized*. (*Lyell*.)

2. *Chemistry*:

(1) In the same sense as B. 1.

(2) An old term for aniline (q. v.).

† (1) *Crystalline heavens*:

Ancient Astron.: Two orbs supposed in the Ptolemaic system to exist between the *primum mobile*, or first power, and the firmament.

(2) *Crystalline humor*:

Anat.: The same as CRYSTALLINE LENS (q. v.).

(3) *Crystalline lens*:

Anat.: A transparent solid body placed behind the iris of the eye, but very near it. It is sometimes called simply the lens. In form it is doubly convex, with the circumference rounded off. The convexity is greater behind than in front, and less at the center than at the margin. It is above one-third of an inch across, and one-fifth from side to side. It is inclosed in a transparent elastic membrane, called the capsule of the lens. Both it and the imbedded lens are very transparent. Around the latter is an annular wreath called the ciliary ligament. The Crystalline Lens is called also the Crystalline Humor.

(4) *Crystalline limestone*:

Geol.: A kind of limestone of Permian age, called also Concretionary Limestone. Among its characteristic fossils are *Schizodus Schlotheimi* and *Mytilus septifer*. (*Lyell*.)

(5) *Crystalline rocks*:

Geol.: A term often applied to the Plutonic rocks, such as granite, certain porphyries, and also to the Metamorphic rocks, such as gneiss, mica-schist, &c. The term refers to the fact that they are highly crystalline. Their structure almost necessarily leads to their being destitute of organic remains. This does not imply that they were laid down before life began upon the planet, for even in the most antique examples of them the same operation, or series of operations, which rendered the rocks crystalline, may have destroyed the organic remains. It is demonstrable that this has taken place in certain crystalline rocks of comparatively modern date. Crystalline rocks were once called by many primitive, but when it was shown that some of the rocks so designated had been deposited in Secondary, nay even in Tertiary times, the erroneous designation Primary was abandoned. (*Lyell*.)

(6) *Crystalline schists*:

Geol.: Metamorphic rocks of crystalline structure, and notably gneiss, mica-schist, hornblende-schist, statuary marble, clay, slate, chlorite-schist, &c. (*Lyell*.)

(7) *Crystalline stylet*:

Zool.: A peculiar transparent glossy body on the right side of the stomach or opening into it in some lamellibranchiate bivalve Mollusks. Its use is unknown, but Mr. S. P. Woodward conjectured that it may be to crush the food and render it more easy of digestion.

crýs-tal-líz-a-ble, *a.* [Eng. *crystalliz(e)*; *-able*.] Capable of being crystallized or of being formed into crystals.

"... the crystallizable and the oily portion of the fat."—*Todd & Bowman: Physiol. Anat.*, vol. i., ch. iii., p. 85.

crýs-tal-líz-á-tion, ***chrýs-tal-líz-á-tion**, *s.* [Eng. *crystalliz(e)*; *-ation*.]

I. *Ordinary Language*:

1. The act or process of becoming crystallized.

"... Hatty's theory of crystallization."—*Phillips: Mineralogy* (2d ed.), Pref.

2. The body formed by crystallizing.

II. *Chem., Min., &c.*: In the same sense as I. 1—*i. e.*, the act of assuming the crystalline form or the state of being in that shape. As a rule, bodies which pass slowly from the liquid to the solid state tend to crystallize before the process is complete. When this takes place with a generally solid body in a state of fusion, then crystallization is said to take place by the dry way. When, on the contrary, it is produced during the slow evaporation of a salt in solution, it is said to be effected by the moist way. Sometimes also crystals are formed when a body passes from the gaseous to the solid state. This is the case with iodine. Nearly all substances will crystallize when allowed to pass slowly into the solid state; those which do not crystallize are generally of very complex organization. [CRYSTAL, CRYSTALLOGRAPHY.]

† *Water of crystallization*:

Chem.: Water combining with a saline substance less intimately than is the case when a hydrate is formed. Still it has to do with the geometric figure of the salt. It is easily driven off by the application of heat.

crýs-tal-líze, ***chrýs-tal-líze**, *v. t. & i.* [Eng. *crystal*; *-ize*.]

A. Trans.: To cause to congeal or concrete in crystals.

"If you dissolve copper in *aqua fortis*, or spirit of nitre, you may, by crystallizing the solution, obtain a goodly blue."—*Boyle: Works*, i. 607.

B. Intrans.: To become congealed or concreted into crystals; to form crystals.

"Recent urine will crystallize by inspissation."—*Arbuthnot: On Aliments*.

crýs-tal-lized, *pa. par. & a.* [CRYSTALLIZE.]

A. As pa. par.: (In senses corresponding to those of the verb.)

B. As adjective:

Chem. and Min.: Existing in the state of regular forms or crystals.

† *Crystallized tin-plate*, or *moiré métallique*: A variegated crystallized appearance produced on the surface of tin-plate by applying to it, in a heated state, some dilute nitro-muriatic acid, washing, drying, and coating it with lacquer.

crýs-tal-líz-íng, *pr. par., a. & s.* [CRYSTALLIZING, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act or process of forming into crystals; crystallization.

crýs-tal-ló, *in comp.* [Gr. *krystallos*=crystal.]

crystallo-ceramic, *s.* A kind of glass incrustation. It consists of an opaque substance imbedded in a mass of colorless glass. A medallion or bas-relief is molded in a peculiar kind of clay, and inclosed between two pieces of soft glass in their melted state. The molten glass is dropped upon the surface of the medallion, and the surface afterward polished. The white clay seen within the clean and highly refractive glass presents an appearance nearly resembling that of unburnished silver.

crystallo-engraving, *s.* A mode of ornamenting glassware by taking impressions from intaglio, and impressing them on the ware while casting. The die is first sprinkled over with Tripoli powder, then with fine dry plaster and brick-dust, and then with coarse powder of the same two materials; it is placed under a press, and at the same time exposed to the action of water, by which the sandy layers become solidified into a cast. This cast thus obtained is placed in the iron mold in which the glass vessel is to be made, and becomes an integral part of the vessel so produced; but by the application of a little water the cast is separated, and leaves an intaglio impression upon the glass as sharp as the original die. The cake thus used seldom suffices for a second impression.

crýs-tal-ló-gén-ic, **crýs-tal-ló-gén-ic-al**, *a.* [Eng. *crystallogen(y)*; *-ic*, *-ical*.] Relating or pertaining to crystallogeny; crystal-producing.

"The crystallogenic forces that produce the cyanose of the mine."—*S. Highley, in Cassell's Technical Educator*, pt. ii., p. 358.

crýs-tal-lóg-én-ý, *s.* [Gr. *krystallos*=crystal; *gennaō*=to produce.] That branch of science which treats of the formation of crystals.

crýs-tal-lóg-ráph-ér, *s.* [Eng. *crystallograph(y)*; *-er*.] One who describes or investigates crystals and the manner of their formation.

"... the chemist and crystallographer, . . ."—*E. Forbes: Literary Papers*, 165.

crýs-tal-ló-gráph-ic, **crýs-tal-ló-gráph-ic-al**, *a.* [Eng. *crystallograph(y)*; *-ic*, *-ical*.] Of or pertaining to crystallography.

"The following are convenient, simple rules for use in connection with crystallographic measurements and calculations."—*Dana: Mineralogy* (5th ed.), p. xxviii.

crýs-tal-ló-gráph-ic-al-íý, *adv.* [Eng. *crystallographical*; *-ly*.]

1. After the manner of a crystallographer, or of crystallography.

"... crystallographically speaking, . . ."—*Whewell: Hist. Scientific Ideas*, p. 69.

2. By crystallization.

crýs-tal-lóg-ráph-ý, *s.* [Gr. *krystallos*=crystal; *graphē*=a writing; *-graphō*=to write.] The science which describes or delineates the form of crystals. In A. D. 1672, Romé de Lisle published his "Essay on Crystallography," but the honor of being regarded as the founder of the science is given to the Abbe René-Just Haüy. He was born at St. Just, in what is now called the department of Oise, and, among other works, published his "Essay on the Structure of Crystals," in 1784, as also his "Treatise on Mineralogy" and his "Treatise on Crystallography" both in 1822—the year of his death. His view was that all the varieties of crystals which a particular mineral may assume are derivable from one simple form, which is the type of the mineral. That form he attempted to ascertain in each individual case. Essentially the same view is still held. Imaginary lines may be supposed to be drawn through a simple crystal longitudinally from end to end, transversely from side to side, or in either of those ways, or obliquely from angle to angle, around which imaginary lines all the

particles of matter composing the crystal may be supposed to arrange themselves. Such imaginary lines are called the axes of the crystal. If skillfully chosen they become somewhat more than imaginary lines, for they may coincide with the optical axes of the crystal if it possess double refraction. According to the number, relative length, position, and inclination to each other of these lines depends the outward form of the crystal.

Dana enumerates the following "systems of crystallization":

- (1) Having the axes equal—the Isometric system.
- (2) Having only the lateral axes equal—the Tetragonal and Hexagonal systems.
- (3) Having the axes unequal—the Orthorhombic, Monoclinic, and Triclinic systems. (See these words.)

"Instruction in crystallography is also attainable."—*Phillips: Mineralogy* (2d ed.), Pref.

crýs-tal-lóid, *a. & s.* [Gr. *krystallos*=crystal, and *eidos*=appearance].

A. As adj.: Having the form or likeness of a crystal.

B. As substantive (pl.):

Physics: Bodies capable of crystallization. They form a solution free from viscosity, are always rapid and are especially endowed with the tendency to diffuse through colloids (q. v.). [DIALYSIS.]

***crýs-tál-lò-mán-gý**, *s.* [Gr. *krystallos*=a crystal, and *manteia*=divination, prophecy.] A method of divination by means of a crystal or other transparent body, especially a beryl.

crýs-tal-lóm-ét-rý, *s.* [Gr. *krystallos*=a crystal, and *metron*=a measure.] The art or method of measuring the forms of crystals.

***crýs-tál-lò-týpe**, *s.* [Gr. *krystallos*=crystal, and *typos*=a blow, . . . a stamp.] A photographic picture on glass.

***crýs-tal-lól-ò-gý**, *s.* [Gr. *krystallos*=crystal, and *logos*=a discourse.] The same as CRYSTALLOGRAPHY (q. v.).

***crýs-tal-lúr-gý**, *s.* [Gr. *krystallos*=crystal, and *ergon*=work.] Crystallization.

crýs-tal-wórts, *s. pl.* [Eng. *crystal*, and *wort*.] **Bot.:** A name given by Lindley to his natural order Ricciaceae (q. v.).

cshát-riy-a, *s.* [KSHETRIYA.]

ctén-a-cán-thús, *s.* [Gr. *kteis*, genit. *ktenos*=a comb, and *akantha*=a thorn, a prickle.]

Palæont.: A genus of fossil Placoid fishes, ichthyodolurites (spines) of which have been found in the Old Red Sandstone and the Mountain Limestone.

ctén-iz'-a, *s. pl.* [Gr. *ktenizō*=to comb; from *kteis*, genit. *ktenos*=a comb.]

Zoöl.: A genus of spiders, family Mygalidae. The species are of large size, and live in a subterranean burrow closed by a trap-door. Hence they are called Trap-door Spiders.

ctén-ò-bránch-1-á-ta, *s. pl.* [Gr. *kteis*, genit. *ktenos*=a comb, and *branchion*=a fin, pl. gills.]

Zoöl.: The name given by Van der Hoven to a family of Mollusks characterized by spiral shells, in the last turn of which are comb-like branchiæ. Example, the Whelk.

ctén-ò-gýst, *s.* [Gr. *kteis*, genit. *ktenos*=a comb, and *kustis*=the bladder, . . . a bag.]

Zoöl.: The organ of sense which exists in the Ctenophora. It is probably the auditory one. (Nicholson.)

ctén-ò-dác-týl-ús, *s.* [Gr. *kteis*, genit. *ktenos*=a comb, and *daktylos*=a finger. So called because the toes are pectinated internally.]

Zoöl.: A genus of Rodentia, family Octodontidae. There are on each foot four perfect toes and an imperfect thumb, the latter destitute of a claw. The tail is short and hairy. Masson's Comb-rat comes from the Cape of Good Hope. Excluding the tail, it is about nine inches long. It is akin to the lemmings.

ctén-ò-díp-tér-ine, *s.* [CTENOPIPTERINI.] An animal belonging to the family Ctenodipterini (q. v.).

" . . . unless Ceratodus be a Ctenodipterine."—Huxley.

ctén-ò-díp-tér-in'-1, *s. pl.* [Gr. *kteis*, genit. *ktenos*=a comb; Mod. Lat. *dipterus* (q. v.), and masc. pl. adj. suff. -ini.]

Ichthy. & Palæont.: A family of Crossopterygidae in Professor Huxley's classification of these fishes, but which may be a section of the Dipnoi. The dorsal fins are two, the scales cycloid, the pectorals and ventrals acutely lobate, the dentition ctenodont. It contains the genus *Dipterus*, and perhaps *Ceratodus* and *Tristichopterus*. Dr. Günther considers the first two genera closely akin, but Dr. Traquair would place *Tristichopterus* with the cycloferous division of the Glyptodipterini. *Ceratodus* has also been found to be closely allied to

Lepidosiren, till lately considered as an Amphibian. These are now placed together in the order Dipnoi, which, however, is reduced by Günther to the rank of a sub-order of Ganoideans. The genus *Dipterus*, the typical genus of the order, is of Devonian age.

ctén-ò-dónt, *a. & s.* [Gr. *kteis*, genit. *ktenos*=a comb, and *odous, odontos*= . . . tooth.]

A. As adj.: Having ctenoid teeth.

†B. As subst.: An animal with ctenoid teeth.

ctén-ò-dón-tl-dæ, *s. pl.* [Gr. *kteis*, genit. *ktenos*=a comb, *odous*, genit. *odontos*=a tooth, and Lat. fem. pl. adj. suff. -idae.]

Bot.: A family of Algae, order Ceramiales, tribe Cryptonemee.

ctén-ò-dús, *s.* [CTENODONTIDÆ.]

1. Palæont.: A genus of fossil fishes, probably belonging to the order Dipnoi, and the section Ctenodipterini.

2. Bot.: A genus of Algae, the typical one of the family Ctenodontidae (q. v.).

ctén-òid, *a. & s.* [Gr. *kteis*, genit. *ktenos*=a scale, and *eidos*=form.]

A. As adjective:

Ichthyology and Palæontology:

1. Comb-shaped, pectinated; toothed like a comb, or having such a structure in some of its parts.

"In the tertiary limestones of Monte Bolca there are numerous Ctenoid Ichthyolites."—Mantell: *Fossils of the British Museum* (1851), p. 440.

2. Containing species with toothed comb-like scales.

"Fossil fishes of the Ctenoid Cycloid, and Placoid orders."—Mantell: *Fossils of the British Museum*, p. 440.

B. As substantive:

Ichthyology and Palæontology:

1. (*Sing.*) A fish of the order of Ctenoids [2].

2. (*Pl.* Ctenoids): An order of fishes founded by Agassiz for those families which have ctenoid scales (q. v.). It is one of four orders into which Agassiz divided fishes, founding his classification on the character of the scales. The fossil Ctenoids first began in the Cretaceous formation, those from the slate of Glaris being the most ancient known. They abound in the white chalk of the South of England, and in that of Germany. Almost all the genera, however, of this age are extinct. Ctenoids go on through the whole Tertiary period, and are numerous in the modern seas.

†Ctenoid scales:

Ichthy. & Palæont.: Scales formed of plates which are toothed or pectinated on their posterior margin or edge like a comb. As the scales are imbricated, the lower over the upper, like slates on the roof of a house, the toothed margins, which alone are presented to the touch, make the scales feel very rough. Example, the Perch.

ctén-òid-ì-1, *s. pl.* [Gr. *kteis*, genit. *ktenos*=a comb, *eidos*=form, and Lat. m. pl. adj. suff. -ei.]

Ichthy. & Palæont.: One of four orders into which Agassiz divided the class of Fishes. It consists of those which have ctenoid scales. Orders founded on a single character are generally artificial, and this is no exception to the rule. It is, however, useful for paleontological purposes, inasmuch as scales are often the only remains found of certain fishes. It is, therefore, retained provisionally for the classification of some fragmentary exuvie, but the zoölogist is prepared to re-classify each species when more of it is found. The Ctenoidei are now merged in the Teleostean order.

ctén-òid-1-an, *a. & s.* [Eng., &c., *ctenoid*; i connective, and suff. -an.]

Ichthyology and Palæontology:

A. As adj.: Pertaining to any fish of the order Ctenoidei or to that order itself; a fish with ctenoid scales.

B. As substantive:

1. (*Sing.*) A fish covered with toothed or pectinated scales.

2. (*Pl.*) The order Ctenoidei (q. v.).

"The Ctenoideans first appear in the Cretaceous formation."—Mantell: *Fossils of the British Museum*, p. 440.

ctén-ò-mýs, *s.* [Gr. *kteis*, genit. *ktenos*=a comb, and *mýs*=a mouse.]

1. Zoöl.: A genus of rodent animals, family Octodontidae. The toes are five on all the feet, the innermost one much shorter than the others. The best known species is *Ctenomys magellanicus*. The body is brownish-gray, tinged with yellow; its length, 7½ inches without the tail; the latter 2¾ inches. The animal is found on the shores of the Straits of Magellan, on the plains north of the Rio Colorado, &c., where it lives in burrows.

2. Palæont.: Mr. Darwin found a species of *Ctenomys* in a cliff of red earth of Pliocene age at Bahia Blanca, in the Argentine Confederation, on the east coast of South America.

ctén-òph-òr-a, *s. pl.* [Gr. *kteis*, genit. *ktenos*=a comb, and *phora*, neut. pl. of *phoros*=bearing, carrying; *phoros*=to bear, to carry.]

1. Zoöl.: An order of Actinozoa, consisting of marine animals which swim by means of ctenophores. [CTENOPHORE.] The body, which is gelatinous and transparent, is generally more or less oval in form. Most of the species have a pair of very extensible filiform tentacles. There are two tribes, Eurytomata and Stenotomata, the first containing the family Beroidae, and the second the families Saccatæ, Lobatæ, and Taniatæ. The Ctenophora are found in all seas.

Palæont.: The Ctenophora, being soft-bodied, have left no traces which have been discovered in the rocks.

ctén-òph-òr-ai, *a.* [Eng. *ctenophor(e)*; -al.]

Zoöl.: Pertaining to a ctenophore or to ctenophores.

ctenophoral canals, *s. pl.*

Zoöl.: Longitudinal vessels coinciding in their course with the locomotive bands in one of the ctenophora.

ctén-ò-phòre, *s.* [CTENOPHORA.]

Zoöl.: A band of cilia arranged in comb-like plates. Such an apparatus is used by the Ctenophora for swimming purposes. [CTENOPHORA.]

ctén-òs-tò-ma, *s.* [Gr. *kteis*, genit. *ktenos*=a comb, and *stoma*=mouth.]

Entom.: A genus of Coleoptera, family Cicindelidae. The species are from South America. The best known is *Ctenostoma macilentum*, from Buenos Ayres.

ctén-òs-tóm-a-ta, *s.* [Gr. *kteis*, genit. *ktenos*=a comb, and *stomata*, pl. of *stoma*=mouth.] [CTENOSTOMA.]

Zoöl.: A sub-order of marine Polyzoa, order Gymnolemata. It consists of animals in which the cells arise from a common tube, and the closure of the mouths, which are terminal, is effected by means of a fringe of hairs, from which the name of the order is derived. The consistence of the cells is horny or fleshy.

Cu. [The first two letters of Lat. *cuprum*=copper.]

Chem.: The symbol for the metallic element copper.

cúb (1), *s.* [Etym. doubtful. Skeat refers to Fr. *cuib*=a cub, a whelp, and compares Wel. *cenan*=a whelp; Gael. *cuain*=a litter of whelps.]

1. Lit.: The young of certain animals, as of a dog, a lion, a bear, a fox; a puppy, a whelp.

"I would outstare the sternest eyes that look, . . ."
Pluck the young sucking dogs from the she-bear,"

Shakesp.: *Mer. of Ven.*, ii. 1.

† In the following Waller applies the word to the young of a whale.

"One as a mountain vast, and with her came
A cub, not much inferior to his dam."

Waller: *Battle of the Summer Islands*, 87.

2. Fig.: A young boy or girl. (Used in contempt or aversion.)

"O thou dissembling cub! what wilt thou be
When time hath sow'd a grizzle on thy case?"

Shakesp.: *Twelfth Night*, v. 1.

***cub-drawn**, *a.* Sucked by cubs.

"This night wherein the cub-drawn bear would couch,"

Shakesp.: *King Lear*, iii. 1.

cub-hood, *s.* The time during which an animal is a cub or young.

"The numerous teeth and jaws in the cave, ranging from cub-hood to old age."—W. Boyd Dawkins: *Early Man in Britain* (1880), p. 177.

***cúb** (2), *s.* [A variant of *coop* (q. v.).]

1. A stall for cattle.

"And why are they not turned out of their cubbes, if
vowes may not be broken?"—Confutation of N. Shaxton, H. vi. b. (1546).

2. A press, a cupboard.

"The great leiger-book of the statutes is to be placed
in arches, . . . not in any cub of the library."—*Archbishop Laud: Chancellorship at Oxford*, p. 132.

***cúb** (1), *v. t.* [CUB (1), *s.*] To bring forth. [Accepted in contempt.]

"Cubb'd in a cabin, on a mattress laid."

Dryden: *Persius*, sat. v.

***cúb** (2), *v. t.* [CUB (2), *s.*] To shut up or confine; to coop up.

"To be cubbed up on a sudden, how shall he be perplexed, what shall become of him?"—Burton: *Anat. of Melancholy*, p. 153.

c.u.b. An abbreviation for cubic. (Everett: *Illustrations of the C. G. S. System of Units*, 1875).

cû-ban, *s.* [Ger. *cuban*, from Cuba, where it occurs.]

Min.: The same as CUBANITE (q. v.).

cū-ban-ite, *s.* [Eng., &c., *cuban*, from Cuba, and suff. *-ite* (*Min.*) (q. v.).] [**CUBAN.**]

Min.: An isometric mineral, cleaving in cubes. It is a bronze or brass-yellow color, with a dark-reddish bronze or even a black streak. The hardness is 4; the specific gravity 4.41 or 4.2. Composition: Sulphur, 39.01-39.57; iron, 37.10-42.51; copper, 18.23-22.96. It occurs at Barracane in Cuba. (*Dana.*)

***cū-bā-tion**, *s.* [Lat. *cubatio*, from *cubo*=to lie down.] The act or state of lying down.

***cū-bā-tōr-ry**, *a.* [Lat. *cubatum*, sup. of *cubo*=to lie down.] Recumbent, reclining, lying down.

cū-bā-tūre, *s.* [Fr. *cubature*, an irregular formation, on the model of quadrature. (*Litré.*)]

Geom.: The act, operation, or process of finding exactly the solid contents of any proposed body by reducing it to a cube of equivalent bulk.

***cūbbed** (1), *pa. par. or a.* [**CUB** (1), *v.*]

***cūbbed** (2), *pa. par. or a.* [**CUB** (2), *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of bringing forth.

cūb'-blāg (2), *pr. par., a. & s.* [**CUB** (2), *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of shutting or cooping up.

cūb-bridge-head, *s.* [Ety. unknown.]

Naut.: A partition across the forecabin and half-deck of a ship.

cūb'-by, *a. & s.* [Eng. *cub* (2), *s.* -y.]

A. As adj.: Narrow, close, confined, cooped up.

B. As subst.: A narrow, close or confined place.

cubby-hole, *s.* The same as **CUBBY** (q. v.).

cūbe, *s. & a.* [Sw. *kub*; Dan. *kubus*; Dut. & Ger. *kubus*=a die, a cube, a cubic number; Wel. *cub*=a mass, a heap, a cube; Fr. *cube*; Ital., Sp., & Port. *cubo*; Lat. *cubus*, all from Gr. *kubos*=a cube.]

A. As substantive:

1. *Geom.*: A solid figure contained by six equal squares; a regular hexahedron. From the simplicity of its form it is the unit for measuring the contents of other solids. [**CUBATURE**, **CUBIC**.] Cubes are to each other as the third power of any of the lines inclosing their sides.

2. *Arith.*: The third power of a number; a number multiplied by itself, and the product multiplied again by the original number; thus, 125 is the cube of 5, for it is $5 \times 5 \times 5$.

B. As adjective:

1. In any way pertaining to or standing in a geometrical or arithmetical relation to a cube in either of the senses described under A. [**CUBE-ROOT**.]

2. **Cubical**. [**CUBE-ORE**, **CUBE-SPAR**.]

† (1) *Duplication of the cube*: [**DUPPLICATION**.]

† (2) *Leslie's cube*:

Nat. Phil.: A cubical canister filled with hot water, designed to be used in experiments on the reflection of heat.

cube-numbers, cube numbers, *s. pl.*

Arith.: Numbers produced by the multiplication of three equal factors; thus, $2 \times 2 \times 2 = 8$.

† *Series of cube-numbers*:

Arith.: The cubes of the natural numbers taken in order—viz., 1, 8, 27, 64, 125, &c.

cube-ore, cube ore, *s.* [Named from the cubical cleavage of the crystals.] The same as **PHARMACOSIDERITE** (q. v.).

cube-root, cube root, *s.*

Arith., *Alg.*, &c. (of a given number or quantity): A number or quantity which twice multiplied by itself will have for the double product that given number or quantity. Thus the cube root of 8 is 2, because $2 \times 2 \times 2$ will make 8. Similarly, 3 is the cube root of 27, and 4 of 64.

cube-spar, cube spar, *s.*

Min.: A variety of Anhydrite, which is pseudomorphous in cubes after rock-salt.

cūbe, *v. t.* [From *cube*, *s.* (q. v.).]

1. To raise a number or quantity to the third power.

2. To ascertain or work out the cubical contents of.

"... other kinds of material which are taken by the cubic foot or yard, the three dimensions of length, breadth, and thickness being multiplied together, and the cubical contents obtained; such work is said to be cubed."—*W. Tarn*, in *Cassell's Technical Educator*, pt. ii., p. 366.

cū-bēb, cū-bēbs, *s.* [Dut. *kubeber*; Ger. *kubebe*; Fr. *kubèbe*; Prov. & Sp. *cubeba*; Port. *cubebas*; Ital. *kubebe*; Low Lat. *cubeba*; Pers. *kabābah*; Hind. *kababa*; Arab. *kabābat*; corrupted, according to Endlicher, from Arab. *rihababath*=the Butcher's Broom (*Ruscus aculeatus*).]

1. *Bot.*: The small spicy berry of the plant or plants described under **CUBEBA** (q. v.).

2. *Pharm.*: *Cubeba*. The dried unripe fruit of *Cubeba officinalis*. *Cubeb* has a warm camphoraceous taste and peculiar odor. The volatile oil extracted from it is colorless, boiling at about 260°. *Cubeb* is used in the form of tincture, and the oil is also used to arrest abnormal discharges of the mucous membranes of the urethra and the bladder.

"Aromatics, as *cubeb*, cinnamon, and nutmegs, are usually put into crude poor wines, to give them more oily spirits."—*Floyer*: *On the Humors*.

cubeb *camphor*, *s.*

Chem.: The volatile oil of *cubeb*, after rectification with water, deposits this compound in rhombic crystals, melting at 67°, and distilling at 150° without decomposition. It is insoluble in water, but soluble in alcohol and ether. Nitric acid converts it into a brown resin.

cū-bē-bā, *s.* [**CUBE.**]

Bot.: A genus of hypogynous Exogens, order Piperaceae, tribe Piperideae. The flowers are dioecious, invested by sessile bracts; the fruits contracted at the base into what look like pedicels. They are found in Asia and Africa. The ripe fruits of *Cubeba officinalis* and, to a certain extent, also those of *C. canina* and *C. Walltchii*, constitute the *cubeb* of the shops. The first of these named species is a native of Java.

cū-bēb-ēne, *s.* [Eng. *cubeb*; and suff. *-ene* (*Chem.*).]

Chem.: $C_{15}H_{24}$. An oil isomeric with oil of *cubeb*, from which it is obtained by distillation with sulphuric acid. *Cubebene*, heated to 280° with fifty-six parts of concentrated hydriodic acid, yields pentane, C_5H_{12} ; decane, $C_{10}H_{22}$; pentadecane, $C_{15}H_{32}$, and an oil volatilizing at about 360°.

cū-bēb'-ic, *a.* [Eng. *cubeb*; -ic.]

cubebic acid, *s.*

Chem.: A resinous bibasic acid, $C_{13}H_{14}O_7$, melting at 45°. It is obtained from the ethereal extract of *cubeb*. It is insoluble in water, but soluble in alcohol and in ether; it forms salts with the alkalis which are soluble in water. *Cubebic acid* with strong sulphuric acid gives a crimson color.

cū-bēb-in, *s.* [Eng. *cubeb*; -in.]

Chem.: $C_{13}H_{24}O_8$. A crystalline substance obtained by exhausting with alcohol the pulpy residue left after the preparation of the essential oil of *cubeb*. *Cubebin* crystallizes in small white needles, melting at 120°. Strong sulphuric acid gives with *cubebin* a bright red color, which afterward changes to crimson.

cūbed, *pa. par. or a.* [**CUBE**, *v.*]

cū-bic, *cū-bick, cū-bic-al, *a.* [Fr. *cubique*; Sp. *cúbico*; Port. *cúbico*; Ital. *cubico*; Lat. *cubicus*, all from Gr. *kubikos*=cubic, from *kubos*=cube.]

"Far otherwise the inviolable saints,
In *cubic phalanx* firm, advanced entire."

Milton: *P. L.*, vi. 398, 399.

II. *Technically*:

1. *Geom.* (of solid figures): Consisting of a cube; having the properties of a cube.

2. *Arith. & Alg.* (of numbers or quantities): Existing as or containing the third power of one or more numbers or quantities.

3. *Crystallog. & Min.*: Monometric or tessaral. [**CUBOID**.]

† (1) *Cubic equation*:

Alg.: An equation in which the highest power of the unknown quantity is a cube.

† (2) *Cubic foot*:

Geom.: A solid of the form of a cube, measuring a foot each way, or the equivalent in solid contents of such a body.

† (3) *Cubic number*:

Arith.: A number produced by multiplying a number by itself, and then the product by the original number again; or produced by multiplying a square number by its root. It is now called also a *Cube number*.

† (4) *Cubic quantity*:

Alg.: The third power in a series of continued geometrical proportionals, as a^3 in the series a , a^2 , a^3 , &c.

cū-bic-a, *s.* [Ety. doubtful.]

Fabric: A very fine kind of shalloon. (*Ogilvie*, old ed.)

cū-bic-al, *a.* [**CUBIC**.]

Cubical system:

Crystallog.: A system in which the axes are rectangular. It is now merged in the isometric system (q. v.).

***cū-bic-al-ly**, *adv.* [Eng. *cubical*; -ly.] So as to raise a number to a cube.

***cū-bic-al-nēss**, *s.* [Eng. *cubical*; -ness.] The state or quality of being cubical.

cū-bī-čite, *s.* [Ger. *cubizit*. Named from its cubical cleavage.]

Min.: The same as **ANALCITE** or **ANALCIME** (q. v.).

cū-bī-cle, *s.* [Lat. *cubiculum*.] A portion of a large dormitory or bedroom partitioned off so as to make a separate sleeping apartment. In many schools the dormitories are arranged upon the cubicle system.

***cū-bīc-u-lār**, *a.* [Fr. *cubicalaire*; Ital. *cubicolare*=a groom of the chamber, from Lat. *cubicularius*=pertaining to a chamber, from *cubiculum*=a sleeping-place; *cubo*=to lie down.] Belonging or pertaining to a chamber or cubicle.

"... the inseparable cubicular companion the king took comfort in."—*Hovell*: *Letters*, iv. 16.

***cū-bīc-u-lā-rīy**, *a.* [Eng. *cubicular*; -y.] Fitted for the posture of lying down or reclining.

"Custom, by degrees, changed their cubicular beds into discubitory, . . ."—*Brownie*: *Vulgar Errors*.

cū-bī-cūle, *s.* [Lat. *cubiculum*.] A bed-chamber, a chamber.

***cū-bīc-u-lō**, *s.* [Lat. *cubiculum*.] A cubicle; a bed-chamber.

"We'll call thee at the *cubiculo*: go!"—*Shakesp.*: *Twelfth Night*, iii. 2.

cūb'-l-form, *a.* [Lat. *cubus*=a cube, and *forma*=form, appearance.] Having the form or shape of a cube.

cū-bī-lō, *s.* [Lat.]

Masonry: The ground-work, or lowest course of stones in a building.

cū-bīl-ōse, *s.* [Lat. *cubile*=a couch, a bed, from *cubo*=to lie down, and Eng. suff. *-ose*.]

Chem.: A constituent of the edible birds' nests of India, having the properties of neutral albuminoids.

cū-bīt, †cū-bite, *s. & a.* [In Port. *cubito*; Ital. *cubito*, from Lat. *cubitum*, *cubitus*=(1) the elbow, (2) (of length) an ell, a cubit; Gr. *kubiton*=the elbow. A Sicilian Doric word.]

A. As substantive:

I. *Ord. Lang. & Script.*: In the same sense as II. 2.

II. *Technically*:

1. *Anat.*: The forearm, the ulna, a bone of the arm from the elbow to the wrist.

2. *Measures*: A measure of length, usually from the elbow to the tip of the middle finger, but to a certain extent varying in different countries.

(1) *The Hebrew cubit*: This was called *ammah*, according to Gesenius, from *em*=mother, as if the forearm were the mother of the arm, though others take it from the Egyptian *mahe*=cubit, which occurs in Coptic as *mahi*. It is mentioned in connection with the building of the ark (Gen. vi. 15, &c.), the deluge waters (vii. 20), the tabernacle (Exod. xxvi., xxvii.), the Temple (1 Kings vi. 2), &c. The cubit varied in length, so that it was needful to define which one was meant; thus there are the cubits of a man (i. e., apparently of a full grown man), as if there had been other cubits, viz., measured on boys. The great cubit of Ezek. xli. 8, is literally a "cubit to the joint," and appears to be the same as the cubit and a handbreadth of Ezek. xl. 5; besides which the length of the cubit evidently varied at different periods of Jewish history, if, as is believed, the "first" measure of 2 Chron. iii. 3, means the first in point of time, that length which had become obsolete before the Chronicles were penned. Arbuthnot considered the Hebrew cubit twenty-two inches. This must have been the larger cubit; the ordinary one was probably only eighteen inches.

(2) *Roman cubit*: Arbuthnot considered this to be seventeen and a half inches.

(3) *English cubit*: Arbuthnot considered this to be eighteen inches (a foot and a half). Lindley defines a cubit, when used as a measure of length in botanical books, as "seventeen inches, or the distance between the elbow and the tip of the fingers."

B. As adj.: Pertaining to a cubit in either of the senses defined under A.

cubit-arm, *s.*

Her.: An arm cut off at the elbow, represented as part of a crest.

cubit-bone, *s.*

Anat. & Ord. Lang.: The bone described under **Cubit** II. 1.

Scotland for the punishment of scolds or refractory women, or dishonest tradesmen. The culprit was placed in the chair, there to be hooted and pelted at by the mob. It was sometimes used as a ducking-stool (q. v.). It was in common use up to the seventeenth century. Chambers says that one was used at Kingston-on-Thames as late as A. D. 1745, and one at Cambridge till 1780. Townsend states that a woman was punished by means of the

A. As substantive:**I. Ordinary Language:****1. Literally:**

(1) *Sing.*: *Cuculus canorus*, a well-known bird. The head and upper parts are of dark ash, the throat, the under side of the neck and fore part of the breast of a paler ash or brown, the rest of the breast and the belly white, with transverse undulating black lines, the tail feathers with white on their inner webs, the tail ash, white, and black commingled, feet yellow; length, fourteen inches. The common cuckoo arrives in Northern climates in April, from Northern Africa and Asia Minor, its note ("cuckoo") being welcomed as the harbinger of spring. It remains only till about the end of June. It feeds chiefly on caterpillars. It builds no nest of its own, but deposits its egg in the nest of the hedge-sparrow, the water-wagtail, the yellow-hammer, or similar birds. When the egg is hatched the young cuckoo unceremoniously pushes out of the nest the actual offspring of the foster parent, to which she herself looks for nurture.

Cuckoo.

"To left and right
The cuckoo told his name to all the hills."
Tennyson: The Gardener's Daughter.

(2) *Pl.*: The English name for the family Cuculidae, the sub-family Cuculinae, or the genus Cuculus. (See these words.)

2. Figuratively:

(1) A term of jesting or of contempt used for an individual.

"Prince H. Why what a rascal art thou then, to praise him so for running!
Falstaff. O' horseback ye cuckoo; but afoot he will not budge a foot."—*Shakesp.: Henry IV., Pt. I.*, ii. 4.

(2) An appellation applied to a member of Congress who supports the policy of the President in any and every emergency. The word was first used in its present sense at the special session of the Fifty-third Congress, convened on the 30th day of June, 1893, for the purpose of repealing the silver purchase clause of the Sherman Act of July 14, 1890. The appellation originated with Senator Morgan of Alabama, who, in a speech in the Senate, likened the unswerving supporters of the President to the "cuckoo" in the great clock at the White House, which, whenever the clock strikes the hours, pops out and apparently cries, "cuckoo! cuckoo!"

"The tone of the talk of the cuckoos, as those who defend the administration through thick and thin are called, is exceedingly unfriendly."—*Washington Dispatch in Chicago Daily Record*, Jan. 8, 1894.

II. Script. The Cuckoo of Scripture, Heb. *schach-haphar*, Lev. xi. 16 and Deut. xiv. 15. The Septuagint translators render it *laros*, and the Vulgate has it *larus*, both signifying a gull.

Other plants are locally called Cuckoo-flower. In the following example, Messrs. Britten and Holland believe No. 4 (*Arum maculatum*) to be the one intended.

"Where peep the gaping speckled cuckoo-flowers,
Prizes to rambling schoolboys' vacant hours."
Clare: *Poems*, p. 8.

"The same botanists believe that Nares is not correct in supposing the cuckoo-flower of Shakspere's *King Lear* to be the cowslip.

"Nettles, cuckoo-flowers,
Darnel, and all the idle weeds,"
Shaksp.: *King Lear*, iv. 4.

"It is doubtful which are Wordsworth's and Tennyson's Cuckoo-flowers.

"Here are daisies, take your fill!
Pansies and the cuckoo-flower."
Wordsworth: *Forethought*.

"And by the meadow-trenches blow the faint sweet cuckoo-flowers."
Tennyson: *May Queen*.

cuckoo-gillflower, s. *Lychnis flos-cuculi*.

cuckoo-hood, s. *Centaurea cyanus*. (Scotch.) (Brown, MS.; Britten & Holland.)

cuckoo-meat, cuckoo's-meat, s. *Oxalis acetosella*.

cuckoo-orchis, s. *Orchis mascula*.

cuckoo-pint, *cucko-pintell, *cockow-pintell, s. *Arum maculatum*.

"... the root of the cuckoo-pint was frequently scratched out of the dry banks of hedger, and eaten in severe snowy weather." — White: *Nat. Hist. Selborne*, let. xv.

cuckoo-sorrel, s. *Oxalis acetosella*.

cuckoo-spice, s. *Oxalis acetosella*.

cü-cür-bi-tä, s. [Lat. *cucurbita*=a gourd.]

Bot.: The typical genus of the order Cucurbitaceæ. The flowers are monoecious; the corolla campanulate, yellow; the petals united together, and found also in the calyx, stamens, &c., in three bundles; stigmas three, thick and two-lobed; fruit three to five-celled; seeds ovate, compressed; the margins but slightly tumid. *Cucurbita pepo* is the Pumpkin, Pumpkin Gourd, or Pompon Gourd; *C. ovifera succada* is the Vegetable Marrow or Egg-bearing Gourd; *C. maxima*, the Common Large Gourd or Melon Pumpkin.

cü-cür-bi-tä-çë-ä, s. pl. [Lat. *cucurbit(a)*, and fem. pl. adj. suff. -aceæ.]

Bot.: The Gourd tribes, called by Lindley Cucurbitis (q. v.); an order of plants belonging to the subclass Diclinox Exogens and the alliance Cucurbitales. The flowers are usually unisexual; the calyx generally five-toothed; the corolla five-parted, scarcely distinguishable from the calyx, sometimes fringed; the stamens five, either distinct or in three parcels, with long sinuous anthers; the ovary inferior, with three parietal placentæ; the fruit succulent, with flat ovate seeds; the stem succulent, climbing by tendrils; the leaves often palmate, generally rough; the flowers white, red, or yellow. Their habitat is India and other tropical countries. Lindley estimated the known species at 270. The order contains the melon and the cucumber. There is a bitter laxative quality in the pulp of them all, but the seeds are sweet, oily, and capable of forming an emulsion. The colocynth is almost poisonous. The order is divided into three tribes: (1) Nandirobæ, (2) Cucurbitæ, and (3) Siccæ. For further details, see Benincæa, Bryonia, Cucumis, Feuillea, Joliffia, Momordica, and Trichosanthes; also Colocynth.

cü-cür-bi-tä-çë-öus, a. [Mod. Lat. *cucurbitaceus*, from Class. Lat. *cucurbit(a)*=a gourd, and suff. -aceus.] Pertaining to the Cucurbitaceæ; gourd-like.

"Cucurbitaceous plants are those which resemble a gourd; such as the pumpkin and melon." — Chambers.

1. *Mil.*: Armor for the body; formerly of leather, but now of metal. It consists of a breast and a back-plate, lapping on the shoulders and buckled

together beneath the arms. It succeeded the hauberk, or coat-of-mail, and the hacqueton, or padded leather jacket, about 1350. It has survived all other forms of defensive armor for the body, being yet in use in the heavy cavalry of some European armies. The surcoat or jupon, which usually covered the former styles of armor, was laid aside about the time the cuirass was adopted, say the reign of Edward III. The early cuirass of the Greeks was of linen, which was afterward covered with plates of horn or scales of horse-hoofs. The Roxalani wore leather with thin plates of iron. The Persians wore a similar cuirass. The Romans introduced flexible bands of steel, folding over one another during the flexure of the body. The Roman *hastati* wore chain-mail (hauberk). The same nation, as well as the Greeks, used the back and breast-plate. Napoleon had several regiments of cuirassiers. The first act of the battle of Waterloo was that an immense body of French cuirassiers swept across the plain to embarrass the British army in its formation. Most European powers have cavalry similarly equipped as an essential part of their army.

"We have forgotten one thing, a cuirass for yourself."
Macaulay: Hist. Eng., ch. xii.

Cūl-dées, *s. pl.* [Apparently an abbreviation and corruption of Lat. *cul(t)ores Dei*=worshippers of God, or from Gael. *gille De*=servants of God, or from Gael. *cul*, *ceal*=a sheltered place, a retreat.]

Ch. Hist.: A name which seems originally to have been given to certain Christians who, in the early centuries, fled from persecution to those districts of Scotland which were beyond the limits of the Roman empire. One of their number, Columba, who is said to have been from Ireland and of royal extraction, founded the monastery or abbey of Iona, the date assigned to the event being A. D. 563. They founded other semi-monastic houses at Dunkeld, Abernethy, Arbroath, Brechin, Monymusk, Lindisfarne, and St. Andrews, each establishment having twelve monks with a president. In the time of keeping Easter they followed the Eastern and not the Western Church, till the Synod of Whitby, in the year A. D. 662, when the Culdees in essential matters conformed to the Church of Rome. In the ninth and tenth centuries the monastery at Iona was often taken once pillaged by the Danes. In 1176 the Culdees placed themselves under the Roman pontiff. In 1203 a Roman Catholic monastery was built at Iona in opposition to that of the Culdees, who seem to have retired to Kyle and Cunningham in the west of Scotland. They soon after became untraceable, yet their tenets never really died out; but to a certain extent sowed here and there over the land the seeds of future reformation. (*Hetherington, &c.*)

"These Culdees, and overseers of others, had no other emulation but of well doing—not striving, but to advance true piety and godly learning."—*D. Buchanan: Pref to Knox's Hist., C. i. b.*

*2. Of a person, a power, an enterprise, &c.: The act or state of coming to the highest point which he or it can ever reach.

"We . . . wonder how that which in its putting forth was a flower, should in its growth and *culmination* become a thistle."—Farington: *Sermons*, p. 429 (1667).

II. *Astron.* (of a heavenly body): The act or state of coming to the meridian, which is the highest point it can ever reach.

"All celestial objects within the circle of perpetual apparition come twice on the meridian, above the horizon, in every diurnal revolution; once above and once below the pole. These are called their upper and lower *culminations*."—Herschel: *Quintessence of Astronomy*, § 24, 125.

***cūl-mīn-l-ā**, *s. pl.* [Lat. pl. of *culminia*, *colminiana*=an unknown kind of olive tree.]

Bot.: The twenty-sixth class of plants in Linneus' Natural System of Botany, published in 1751, in his *Philosophia Botanica*. He included under it the genera *Tilia*, *Bixa*, *Dillenia*, *Clusia*, &c.

***cūl-ōt-tic**, *a.* [Fr. *culotte*=breeches, and Eng. adj. suff. -ic.] Wearing breeches, and hence belonging to the more respectable classes, as opposed to the *sansculottes*.

"Young Patriotism, *culottic* and *sansculottic*, rushes forward emulous."—Carlyle: *French Revolution*, pt. ii., bk. vi., ch. iii.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

"A new singular system of culottism and arrangement."
—*Carlyle: French Revolution*, pt. iii., bk. vii., ch. i.

***cūl-pa-bil-l-tŷ**, *s.* [Eng. *culpable*; *-ity*.] The quality of being culpable; blamableness, culpableness.

"No blame attached to me: I am as free from culpability as any of you there."—*C. Brontë: Jane Eyre*, ch. xxi.

cūl-pa-ble, ***coul-pa-ble**, ***cou-pa-ble**, *a. & s.* [O. Fr. *culpable*; Fr. *culpable*; Sp. *culpable*; Ital. *colpabile*, from Lat. *culpabilis*, from *culpa*=a fault.]

A. As adjective:

1. Blamable; blameworthy; deserving of censure or blame.

"... artifices which even in an advocate would have been culpable."—*Macaulay: Hist. Eng.*, ch. vi.

2. Guilty, in fault.

"Proceed no straiter 'gainst our uncle Glo'ster,
Than from true evidence of good esteem
He be approved in practice culpable."
—*Shakespeare: Hen. VI., Pt. II., iii. 1.*

* Followed by *of* before the crime or fault alleged.

"Flatrours culpable were of thre errors."—*Gower*, iii. 168.

***B. As subst.:** A culprit.

"Talked . . . by those only who were the culpables."
—*North: Life of Lord Guilford*, ii. 247.

† Crabb thus discriminates between *culpable* and *faulty*: "We are *culpable* from the commission of *one fault*; we are *faulty* from the number of *faults*; *culpable* is a relative term; *faulty* is absolute; we are *culpable* with regard to a superior whose intentions we have not fulfilled; we are *faulty* whenever we commit any *faults*. A master pronounces his servant as *culpable* for not having attended to his commands; an indifferent person pronounces another as *faulty* whose *faults* have come under his notice. It is possible, therefore, to be *faulty* without being *culpable*, but not *vice versa*." (Crabb: *Eng. Synon.*)

***cūl-pa-ble-ness**, *s.* [Eng. *culpable*; *-ness*.] The quality of being culpable; culpability.

"All those who have known me cannot be ignorant of my culpableness in those particulars."—*W. Mountague: Devout Essays*, p. 145 (1648).

cūl-pa-bly, *adv.* [Eng. *culpab(ly)*; *-ly*.] In a culpable, blameworthy, or censurable manner.

"Cultter for a plowe. Cultrum."—*Prompt. Parv.*

***cūl-ti-vā-ble**, *a.* [Eng. *cultiv(ate)*; *-able*.] Capable of being cultivated; fit for cultivation.

***cūl-ti-vāt-a-ble**, ***cūl-ti-vāt-l-ble**, *a.* [Eng. *cultivat(e)*; *-able*.] The same as *CULTIVABLE* (q. v.).

cūl-ti-vāte, *v. t.* [Low Lat. *cultivatus*, *pa. par.* of *cultivo*=to till, to cultivate, from Low Lat. *cultivus*=cultivated, from Lat. *cultus*, *pa. par.* of *colo*=to cultivate; Fr. *cultiver*; Sp. *cultivar*; Ital. *cultivare*.]

I. Literally:

1. To till; to prepare for crops; to manure, plow, harrow, sow, mow, or reap land.

2. To raise by cultivation.

II. Figuratively:

1. To labor to improve by attention and study; to endeavor to advance, refine, or increase intellectually; to cherish, to foster.

2. To make an object of study; to direct special attention to; to devote one's self to the study of.

3. To endeavor to strengthen or improve.

4. To seek the friendship of.

5. To cherish, to foster.

6. To civilize; to meliorate; to raise intellectually or morally.

cūl-ti-vāt-éd, *pa. par. & a.* [CULTIVATE, *v.*]

cūl-ti-vāt-ing, *pr. par., a. & s.* [CULTIVATE, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. *Lit.*: The act or process of the cultivation of land.

2. *Fig.*: The endeavoring to improve, refine, or strengthen intellectually; a fostering or cherishing.

cūl-ti-vā-tion, *s.* [Eng. *cultivat(e)*; *-ion*.]

I. Literally:

1. The act, art, or practice of tilling and preparing land for crops; husbandry.

2. The act or process of producing by tillage.

3. The state or condition of being cultivated.

II. Figuratively:

1. The act of endeavoring to improve or refine intellectually by study, application, and attention; the practice of such means as are likely to enlarge or refine any art or study; culture; a devoting or applying one's self to any study or pursuit.

2. A state or condition of refinement or culture.

† (1) Crabb thus discriminates between *cultivation*, *culture*, *civilization*, and *refinement*: "Cultivation is with more propriety applied to the thing that grows; culture to that in which it grows. The cultivation of flowers will not repay the labor unless the soil be prepared by proper culture. In the same manner, when speaking figuratively, the cultivation of any art or science; the cultivation of one's taste or inclination, may be said to contribute to one's own skill or the perfection of the thing itself; but the mind requires culture previous to this particular exertion of the powers. Civilization is the first stage of cultivation; refinement is the last stage; we civilize savages by divesting them of their rudeness, and giving them a knowledge of such arts as are requisite for civil society; we cultivate people in general by calling forth their powers into action and independent exertion; we refine them by the introduction of the liberal arts. . . . Cultivation is applied either to persons or things; civilization is applied to men collectively, refinement to men individually; we may cultivate the mind or any of its operations, or we may cultivate the ground or anything that grows in the ground; we civilize nations; we refine the mind or the manners."

(2) He thus discriminates between *cultivation*, *tillage*, and *husbandry*: "Cultivation has a much more comprehensive meaning than either tillage or husbandry. Tillage is a mode of cultivation that

extends no farther than the preparation of the ground for the reception of the seed; cultivation includes the whole process by which the produce of the earth is brought to maturity. We may till without cultivating; but we cannot cultivate, as far as respects the soil, without tillage. Husbandry is more extensive in its meaning than tillage, but not so extensive as cultivation. Tillage respects the act only of tilling the ground; husbandry is employed for the office of cultivating for domestic purposes. A cultivator is a general term defined only by the object that is cultivated, as the cultivator of the grape, or the olive; a tiller is a laborer in the soil that performs the office for another; a husbandman is a humble species of cultivator, who himself performs the whole office of cultivating the ground for domestic purposes." (Crabb: *Eng. Synon.*)

cūl-ti-vā-tōr, *s.* [Eng. *cultivat(e)*; *-or*; Fr. *cultivateur*; Sp. & Port. *cultivador*; Ital. *cultivatore*.]

A. Ordinary Language:

I. Literally:

1. One who cultivates or tills the ground; a farmer, an agriculturist.

2. One who raises or produces any crop by cultivation.

II. Fig.: One who seeks to improve, promote, or refine by study, application, and attention; one who applies or devotes himself earnestly to any study.

"The most celebrated historians are manifestly inferior to the most successful cultivators of physical science . . ."

—*Buckle: Hist. Civil.*, i. 1.

B. Agric.: This term, in a broad signification, includes harrows, drags, grubbers, scarifiers, scufflers, pulverizers, spiked harrows and rollers, horse-hoes, shovel-plows, and some other implements. The essential idea of cultivation is of course broader still, as it comprehends all the means of tillage, which would include plows, the dominant implement in the art of husbandry. The term cultivator, in this country, also embraces specifically two implements which are used in tending growing crops. These are: (1) The implement specifically known as a cultivator, having a triangular frame set with teeth or shares, and drawn by one horse, which walks in the balk between the rows of corn, potatoes, or other plants. The animal is hitched to the apex of the frame, and the implement is guided by a pair of handles at the rear. (2) Single and double shovel-plows, which are used for precisely the same purpose, but are known as plows. [SHOVEL-PLOW.] The cultivator is an improved harrow. (Knight.)

cultivator-plow, *s.* A plow used in tending crops, such as a shovel-plow, a double shovel-plow, &c.

cūl-trāt-éd, **cūl-trāte**, *a.* [Lat. *cultratus*, from *cultus*=a knife.] Shaped like a pruning-knife, and sharp edged, straight on one side and curved on the other.

*2. *Geol.*: The Cambrian formation. [¶]

(1) *Cambrian formation*:

Geol.: The same as 2 and 3 (q. v.).

(2) *Cambrian group*:

Geol.: The same as 1 and 3 (q. v.).

(3) *Cambrian rocks*:

Geol.: Ancient rocks constituting the lowest of the slaty deposits in Skiddaw and Grasmere Fell in Cumberland, England. They consist of the Skiddaw Slates—i. e., the equivalent in age of the Lower Llandoil Flags, above which are the Coniston Limestone=Bala Limestone, and the Coniston Grits=Llandoil group. The term Cambrian was introduced by Prof. Sedgwick, who believed the beds in Cumberland thus designated to be the equivalents in age of others in Wales, on which, when occurring in the latter locality, he had bestowed the name Cambrian. There was no use for two terms if one would do, and Cambrian is now disused, Cambrian being retained. Sir Roderick Murchison would also have designated with Cambrian, and brought Sedgwick's rocks so designated, with the Cambrian beds, also under his Silurian system. Sir Charles Lyell, however, in his *Student's Elements of Geology*, has retained the word Cambrian, omitting Cambrian.

Under the heading Upper Cambrian, he places Tremadoc Slates, and the Lingula Flags of Britain, enumerating as their foreign equivalents in age part of Barrande's Primordial Zone of Bohemia, the Alum Schists of Sweden and Norway, and the Potsdam Sandstone; and under the Lower Cambrian Rocks the Menavien beds of Wales, and the Longmynd group, the latter consisting of the Harlech Grits and the Llanberis Slates. The foreign equivalents of these are the lower portion of Barrande's Primordial Zone in Bohemia, the Fucoid Sandstones of Sweden, and perhaps the Huronian series of Canada. The Cambrian as thus described, is made immediately to follow the Laurentian and precede the Silurian formation.

cūm-brouś, a. [Eng. *cumber*; -ous.]

1. Burdensome, weighty, oppressive; embarrassing by reason of weight.

"The strong and cumbrous arms the valiant wield,
The weaker warrior takes a lighter shield."
Pope: *Homer's Iliad*, xiv. 441, 442.

2. Causing trouble or annoyance; vexatious, annoying.

"A cloud of cumbrous gnats doe him molest,
All striving to infixe their feeble stings,
That from their annoyance he no where can rest."

Spenser: *F. Q.*, i. i. 23.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāll; trȳ, sȳrian. æ, œ = ē; ey = ē. qu = kw.

3. Confused, unmanageable, awkward.

"Ur of Chaldees, passing now the ford
To Harran; after him a cumbrous train
Of herds and flocks and numerous servitude."
Milton: P. L., xii. 131, 132.

4. Confused, mixed up, not simple or plain.

"... the provisions which have been recapitulated
are cumbrous, puerile, inconsistent with each other."
—*Macaulay: Hist. Eng., ch. xi.*

***cūm-brou-s-lŷ**, adv. [Eng. *cumbrous*; -ly.] In a cumbrous, burdensome, embarrassing or confused manner.

"Capitals to every substantive are cumbrously intrusive upon the eye."—*Seaward: Letters, l. 164.*

cūm-brou-s-ness, s. [Eng. *cumbrous*; -ness.] The quality of being cumbrous, embarrassing, or confused; awkwardness, want of simplicity and plainness.

"The cumbrousness, imperfection, and even expense, of this process would render such a mode of government intolerable."—*Sir G. C. Lewis: Authority in Matters of Opinion, ch. vii.*

cū-mē-ne, s. [Eng. *cum(in)*; -ene.]

Inorganic Chem.: C_6H_{12} or $C_6H_5 \cdot CH < \begin{smallmatrix} CH_3 \\ CH_3 \end{smallmatrix}$ Isopropyl-benzene. An aromatic hydrocarbon which exists in Roman cumin oil, and can be produced by distilling cumic acid with baryta, and is also formed synthetically by the action of sodium on bromobenzene and isopropyl-iodide. Cumene is a colorless oil, boiling at 151°. By boiling with nitric acid it yields benzoic acid and nitro-benzoic acid. It will not mix with water. Bromine forms substitution products.

cumene-sulphonic acid, s.

Chem.: An acid obtained by the action of fuming sulphuric acid on cumene. It forms small crystals, which are decomposed on heating into sulphuric acid and cumene. Its barium salt $(C_6H_{11}SO_3)_2Ba$ is soluble in water.

cūm-ēng-ite, s. [From Cummenge, who analyzed it.]

Min.: The same as VOLGERITE (q. v.). (*Dana.*)

cūm-ēn-ŷl, s. [Eng., &c., *cumen(e)*, and suff. -yl (*Chem.*) (q. v.).]

Chem.: The principle of cummin or cumin (q. v.). Occurs chiefly in compos. (See the subjoined compounds.)

cumenyl-acrylic acid, s.

Inorganic Chem.: Isopropyl-phenyl-acrylic acid.

$C_{12}H_{14}O_2$ or $C_6H_5 \cdot CH < \begin{smallmatrix} CH_3 \\ CH_3 \end{smallmatrix} \cdot CH=CH \cdot CO \cdot OH$. Obtained by

heating cumic aldehyde with sodium acetate and acetic anhydride. It is purified by repeated crystallization from alcohol. Cumenyl-acrylic acid, crystallized in white needles, melting at 158°, is soluble in alcohol and hot glacial acetic acid, but only slightly soluble in boiling water. When boiled it is decomposed into CO_2 and isopropyl-cinnamene; oxidized with chromic acid mixture, it yields a distillate of cumic aldehyde. Nitric acts on it, forming nitro-substitution compounds.

cumenyl-angelic acid, s.

Chem.: $C_{14}H_{18}O_2$ or $C_6H_5 \cdot CH < \begin{smallmatrix} CH_3 \\ CH_3 \end{smallmatrix} \cdot CH=CH \cdot CH_2 \cdot CO \cdot OH$. Obtained by heating cumic aldehyde with butyric anhydride and sodium butyrate. It is a crystalline substance, melting at 123°. Soluble in hot alcohol.

cumenyl-crotonic acid, s.

Chem.: $C_{13}H_{16}O_2$ or $C_6H_5 \cdot CH < \begin{smallmatrix} CH_3 \\ CH_3 \end{smallmatrix} \cdot CH=CH \cdot CH_2 \cdot CO \cdot OH$. Obtained by heating cumic aldehyde with sodium acetate and three parts of propionic acid, and purified. It crystallizes from alcohol in nodular masses, from petroleum spirit in oblique prisms, and melts at 91°.

cū-mēn-ŷl-ām-lī-ne, s. [Eng. *cumenyl*; *amine*.] Also called CUMENYL UREA. [CUMYL-CARBAMIDE.]

cūm-frēy, ***cūm-for-y**, ***cūm-ār-īe**, s. [COMFREY.]

1. (*Of the form Cumfrie*): The daisy, *Bellis perennis*.

2. (*Of the other forms*): [COMFREY.]

"They gave them a decoction of cumfory to bouze."—*Str T. Browne: Tracts, No. 5.*

cūm-īc, a. [Lat. *cuminum*; Gr. *kuminon*=cumin, and Eng., &c., suff. -ic, from Lat. -icus; Gr. *ikos*.] Pertaining to or derived from cummin.

cumic acid, s.

Chem.: Cuminic acid; otherwise Cumylic acid, $C_{10}H_{12}O_2$, or $C_6H_{11} \cdot CO \cdot OH$ or $C_6H_4 \cdot \begin{smallmatrix} CH_3 \\ CO \cdot OH \end{smallmatrix}$. By dropping cumic aldehyde on fused potassium hydrate, hydrogen is liberated and cumate of potassium is formed; this salt is dissolved in water and decomposed by an acid; the cumic acid is deposited

and purified by crystallization from alcohol. It is also obtained by oxidizing cumic aldehyde with potassium permanganate. It forms colorless prismatic tables, which melt at 114° and boil at 250°. It is very slightly soluble in cold water, but easily soluble in alcohol and in ether. By oxidation with chromic acid mixture it yields terephthalic acid.

cumic aldehyde, s.

Chem.: Cuminic aldehyde, Cumyl hydride, or Cuminol.

$C_{10}H_{12}O$, or $C_6H_{11} \cdot CO \cdot H$, or $C_6H_4 \cdot \begin{smallmatrix} CH_3 \\ CH \cdot CO \cdot H \end{smallmatrix}$ Cumic

aldehyde occurs in the essential oil of cumin, on distilling which the cymene distils over first at 200° and afterward the cumic aldehyde. If the cumin oil is agitated with a concentrated solution of acid sodium sulphite it forms a crystalline compound with cumic aldehyde, which can be decomposed by potash. These compounds also occur in the volatile oil obtained from the seeds of water-henlock, *Cicuta virosa*. Cumic aldehyde is a colorless liquid, boiling at 230°. It should be distilled in an atmosphere of CO_2 . It oxidizes into cumic acid and a resinous substance; when heated with chromic acid mixture it yields terephthalic acid; when boiled with alcoholic potash it is converted into cuminate of potassium and cymylic alcohol.

cūm-īd-īc acid, a. [Eng. *cum(ene)*; Suff. -idic.]

Chem.: $C_{10}H_{10}O_4$, or $C_6H_5 \cdot \begin{smallmatrix} CH_3 \\ CH_3 \\ CO \cdot OH \\ CO \cdot OH \end{smallmatrix}$ An acid

formed along with cymylic acid, but it is not volatilized in a current of steam. It is insoluble in water, slightly soluble in ether, more soluble in boiling alcohol. It crystallizes in long transparent needles, on adding benzene to its alcoholic solution. At high temperatures it sublimes without fusion.

cūm-īd-lī-ne, s. [Gr. *kuminon*=cumin; *eidos*=form, appearance, and Eng. suff. -ine.]

Inorganic Chem.: Amido-cumene, $C_6H_{11}(NH_2)$, or $C_6H_4 \cdot \begin{smallmatrix} NH_2 \\ CH_3 \end{smallmatrix}$. Obtained by the reduction of nitro-cumol by alcoholic ammonium sulphide. Also by the distillation of amido-cumenic acid with baryta. It is purified by crystallizing the oxalate and precipitating by potash. It is a pale yellow refractive oil, having a peculiar smell and a burning taste, boiling at 225°. The name has been given to other compounds.

cūm-īn, s. [Lat. *cumin(um)*.] [CUMMIN.]**cumin oil**, s.

Chem.: A volatile oil obtained from the seeds of *Cuminum cyminum* by extraction with absolute alcohol and precipitation by water. It is a mixture of cuminal and cymene.

cūm-īn-ām-īde, s. [Eng. *cumin(ate)*; -amide.]

Inorganic Chemistry: Cumylamide $C_{10}H_{13}NO$, or $C_6H_{11} \cdot CO \cdot NH_2$. Obtained by the action of heat on cuminate of ammonium. It is a crystalline substance, sparingly soluble in water, easily soluble in alcohol and ether.

cūm-īn-āte, s. [Eng. *cumin(ic)*; -ate.] A salt of cumic or cuminic acid.

cūm-īn-īc, a. [CUMIC.]

cūm-īn-ī-dā, s. pl. [Lat. *cumin(um)*, and pl. adj. suff. -idæ.]

Bot.: A family of Umbelliferous plants. Type Cuminum (q. v.).

cūm-īn-ōl, s. [CUMIC ALDEHYDE.]

cū-mī-nūm, s. [Lat.] [CUMIN.]

Bot.: A genus of Umbelliferous plants, the typical one of the family Cuminidae.

There are both general and partial involucres, the latter one-sided; calyx five-toothed; fruit elongated, with five filiform ridges and four intermediate ones prominent and slightly prickly, with a vitta between each. The species are annuals with multifid leaves and pink or white flowers.

Cuminum cyminum is the Cummin or Cumin (q. v.).

***cūm-lŷ-cā-tion**, s. [A corruption of compli-

cation (q. v.).] A complication.

***cūm-mar**, s. [CUMBER, s.] Vexation, difficulty, entanglement.

cūm-mēr, s. [COMMERE, GAMMER.] A gossip, a female acquaintance, a midwife.

cūm-mīn, **cūm-īn**, s. [In Sw. *kummin*; Dan. *kommen*; Dut. *komijn*; Ger. *kummel*; Fr. *cumin*; Sp. & Ital. *comino*; Port. *cominho*; Lat. *cuminum*; Gr. *kuminon*, from Arab. *qamoun*=the name of the plant.] *Cuminum cyminum*: The common cummin or cummin. It is a dwarf plant, resembling fennel, and is cultivated in the south of Europe, Asia Minor, &c., for its seeds, which are hot and aromatic, and used like those of anise, caraway, &c. It is not used medicinally, but only in veterinary practice.

"When he hath made plain the face thereof, doth he not cast abroad the fitches, and scatter the cummin, . . ."
—*Isaiah xxviii. 25.*

¶ **The cummin of Scripture**: It is in New Testament Gr. *kuminon*, and in Heb. *kummon*, and is undoubtedly the plant described in this article (*Isaiah xxviii. 25-27*, Matt. *xxiii. 23*).

¶ (1) **Black cummin**: *Nigella sativa*, a ranunculaceous genus, the pungent seeds of which are used by the Afghans, who call them Scabdana, for the flavoring of curries.

(2) **Common cummin**: *Cuminum cyminum*. (Loudon.)

(3) **Sweet cummin**: The anise, *Pimpinella anisum*. Used as an aromatic and as a carminative for infants.

(4) **Wild cummin**: *Lagecia cuminoides*. (Loudon.)

cumin-seed, s. The seed of the cummin.

¶ Cumin-seed was used for attracting pigeons to inhabit a dovecot.

"He [the gamester] is only used by the master of the ordinaire, as men use cumin-seed, to replenish their culver-house."—*Critics Whims., p. 54.*

cūm-mīng, s. [From the verb *to come* (q. v.), said of malt.]

Brewing: A vessel for holding wort.

"Item, ane maskin fett—an kettle—twa gyle fates—an cummyng."—*Inventories, A. (1566), p. 174.*

cūm-mīng-tōn-īte, s. [Named from Cumington in Massachusetts, where it occurs.]

Min.: Two minerals—

(1) **Cumingtonite of Dewey**: A variety of Actinolite (*Brit. Mus. Cat.*). Iron-magnesia Amphibole (*Dana*). It is fibro-laminar, often radiated. The color gray to brown.

(2) **Cumingtonite of Rammelsberge**: A variety of Rhodonite. Dana arranges it with Photocite, which he ranks under his heading Carbonated Rhodonite.

cūm-mōck, s. [CAMMOCK.] A short staff with a crooked head.

"Until you on a cummock driddle,
A grey hair'd carle,
Burns: Epistle to Major Logan.

cūm-ō, in compos. [Eng., &c., *cum(ene)* (q. v.), and o connective.]

Chem.: Having cumene in its composition.

cumo-phenol, s.

Inorganic Chemistry: Also called Cumol. $C_9H_{12}O$, or $C_6H_4 \cdot \begin{smallmatrix} CH_3 \\ CO \cdot H \end{smallmatrix}$. Obtained by fusing potassium cumene sulphate with potash, acidifying the aqueous solution of the fused mass, dehydrating the crude oily product, and purifying it with fractional distillation. It crystallizes in colorless needles, melting at 61°.

cūm-ōl, s. [Eng. *cum(ene)*, and Lat. *ol(eum)*=oil.]

Chem.: A name which has been given to cumo-phenol, and also to cumene.

cūm-ō-nī-trīl, s. [Eng. *cumene*; *nitril*.]

Chemistry: $C_{10}H_{11}N$, or $C_9H_{11}CN$, or $C_6H_4 \cdot \begin{smallmatrix} CH_3 \\ CN \end{smallmatrix}$.

Also called Cumenyl cyanide. It is obtained by heating cuminate of ammonium; also by heating cyanogen bromide with cuminate of sodium, $CNBr \cdot C_6H_4 \cdot CO \cdot ONa = C_6H_4 \cdot CN + CO_2 + KBr$. Cumonitril is a colorless, strongly refractive, pleasant smelling liquid; it is slightly soluble in water.

cūm-ō-nī-trīl-ām-lī-ne, s. [Eng. *cumonitril*; -amine.]

Chem.: $C_{10}H_{10}(NH_2)N$, Amido-cumonitril. When cumonitril is added drop by drop to a cooked mixture of strong nitric and sulphuric acids, a crystalline nitro-cumonitril, $C_{10}H_9(NO_2)N$, is formed, which is dissolved in alcohol, and reduced by nascent hydrogen, from zinc and hydrochloric acid into cumonitrilamine. It is sparingly soluble in water, and crystallizes in large needles, which melt at 45°, and boils at 305°. It forms crystalline salts, which are mostly soluble in water and in alcohol.

cūm-ō-ŷl, s. [Eng. *cuminol*; -yl.]

Chem.: An aromatic monad radical ($C_9H_{11} \cdot CO$).

Cuminum.

1. Plant. 2. Flower.

bōll, bōy, pōut, jōwl; cat, gell, chorus, ghin, bench; go, gem; thin, thīs; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tlan = shān. -tion, -sion = shūn; -tīon, -sion = shūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

cumoyl chloride, s.

Chemist.: Commonly called Cumyl chloride, $C_{10}H_{11}OCl$, or $C_6H_5CH_2COCl$. Obtained by the action of pentachloride of phosphorus, PCl_5 , on cumic acid. It is an oil, boiling at 230° . It is decomposed by water into hydrochloric acid and cumic acid.

cūm-ō-yī-lc, a. [Eng. cumoyl; -ic.]

cumoylic acid, s. [HYDROCINNAMIC ACID.]

cūm-shaw, s. [Chin. *kom-tsie*=a present.] A present or bonus; originally, that paid on vessels entering the port of Canton.

cūm-shaw, v. t. [CUMSHAW, s.] To make a present or bonus to.

cū-mu-lāte, v. t. [Lat. *cumulatus*, pa. par. of *cumulo*=to heap up; *cumulus*=a heap; Fr. *cumuler*.]

1. *Lit.*: To heap up or together, to accumulate.

2. *Fig.*: To bring together; to combine.

"All the extremes of worth and beauty that were cumulated in Camilla."—Shelton: *Translation of Don Quixote*, iv. 6.

***cū-mu-lā-tion, s.** [Lat. *cumulatio*, from *cumulus*, pa. par. of *cumulo*=to heap up.]

1. *Ord. Lang.*: The act of heaping up or together; an accumulation.

2. *Eng. Universities*: The taking of two degrees by accumulation (q. v.).

"For cumulation, I must needs profess I never liked it."—Archbishop Laud: *History of his Chancellorship at Oxford*, p. 17.

***cū-mu-lāt-ist, s.** [Eng. *cumulat(e)-ist*.] One who gathers, collects, or accumulates; an accumulator.

cū-mu-lāt-ive, a. [Fr. *cumulatif*.]

1. *Ord. Lang.*: Consisting of parts heaped or accumulated together.

"As for knowledge which man receiveth by teaching, it is cumulative."—Bacon: *On Learning*.

II. Technically:

1. *Law*:

(1) Augmenting or increasing the same point.

(2) Applied to a legacy when the legatee is more than once benefited in the same will.

2. *Logic*: Specially applied to a series of arguments, each of which may be by itself weak, but which give in the whole a sum of which the strength is greater than that of its component parts taken separately.

"Whatever objections may be made to this or that particular fact, . . . on the whole, I consider that a cumulative argument rises from them, . . ."—Gladstone: *Relation of the State to the Church*, p. 23.

3. *Med.*: Specially applied to drugs which remain in the system some time without showing signs of action, and, after an interval, exert their influence suddenly; digitalis, or foxglove, being formerly considered a typical medicine of this kind, but since the days of Fothergill acquitted of the imputation, and rightly, too.

¶ (1) *Cumulative legacy*: [II. 1 (2).]

(2) *Cumulative remedy*:

Law: A second mode of procedure in addition to one already available. It is opposed to an alternative remedy, for in the latter case, though there are two remedies provided, one or other must be chosen; both cannot, as in the former case, be enforced.

(3) *Cumulative vote*:

In stock companies: An arrangement which, when several candidates present themselves, enables an elector to accumulate his votes upon the one whom he prefers, instead of compelling him to bestow them singly on more candidates than one. This is feasible only in those organizations in which the stockholder has one vote for each share of stock held by him.

cū-mu-lō, in compos. [Lat. *cumul(us)*=a heap, and *o* connective.]

cumulo-cirro-stratus, s.

Meteorol.: The same as the Nimbus or Rain-cloud.

cumulo-stratus, s.

Meteorol.: A cloud intermediate between the cumulus and the stratus. It tends to spread, settle down into a nimbus, and descend in rain.

***cū-mu-lōse, a.** [Formed as if from a Lat. *cumulosus*, from *cumulus*=a heap.] Full of heaps.

cū-mu-lūs (pl. cumuli), s. [Lat.=a heap, a pile.]

1. *Meteorol.*: One of the simplest forms of clouds. It consists of round masses like bales of wool or mountains heaped on mountains. It is more frequent in summer than in winter. In the former season they may often be seen in the morning, their tendency, however, being to become reduced in bulk or even vanish altogether before evening. If, on the other hand, they increase in number, especially if they become surmounted by cirrus clouds, rain or storm may be expected. (*Ganot*.)

2. *Anat.*: The name given by Von Baer to the thickened portion of a cellular layer in which the ovum is imbedded.

cūm'-yī, s. [Eng. *cum(ene)*; -yl.]

Chem.: An aromatic monad radical, having the formula C_6H_5 . This radical has been wrongly called cumoyl, but it corresponds to benzyl (C_6H_5) and not to benzoyl (C_6H_5CO).

cumyl chloride, s. [CUMOYL CHLORIDE.]

cūm'-yī'-am-ide, s. [CUMINAMIDE.]

cūm'-yī'-ene, s. [Eng. *cumyl*; suff. -ene (*Chem.*).] (See the compound.)

cumylene diamide, s.

Chem.: $C_6H_4N_2$, or $C_6H_{10}(NH_2)_2$. A crystalline base, obtained by distilling dinitrocumene with acetic acid and iron filings. It melts at 47° .

cūm'-yī'-ic, a. [Eng. *cumyl*; -ic.] Pertaining to cumyl; having cumyl in its composition.

cumylic acid, s.

Inorganic Chem.: $C_{10}H_{12}O_2$, or $C_6H_5CH_2COOH$.

Obtained by oxidizing durenene (tetra-methyl-benzene, $C_6H_2(CH_3)_4$) with dilute nitric acid. It is separated from cumidic acid by distilling in a current of steam; is nearly insoluble in cold water; easily soluble in alcohol and ether, and crystallizes in needles, melting at 140° to 150° .

cūm'-yī'-ide, s. [Eng. *cumyl*; -ide.]

Chem.: Cumylide of potassium, $C_{10}H_{11}OK$. Produced by heating cumyl hydride with potassium.

***cun, *cunne, s.** [KIN.]

1. Race, family, kin.

"Seinte Katherine of noble cunne com."

St. Katherine, i.

2. Kind.

"Alles cunnes wilde dor."—O. Eng. *Homilies*, p. 79.

***cun, *cunnen, v. t. & i.** [A. S. *cunnian*; O. H. Ger. *cunnen*.]

A. *Trans.*: To taste, to try.

"They sall not than a cherrie cun,

That wald not enterpryse."

Cherrie and Sloe, st. 47.

B. *Intrans.*: To try.

"He wolde cunnen swa to bringnen inn hisse herte

Erthlike thingess lufe." Ormulum, 12, 137.

†cu-nāb-u-lā, s. [Lat. pl.=(1) a cradle, (2) birth, origin.]

Bibliog.: The existing copies of the first printed books; those dating in the generality of cases from the fifteenth century.

***cūnc-tā-tion, s.** [Lat. *cunctatio*, from *cunctor*=to delay.] Delay, procrastination, dilatoriness.

"... celerity should always be counterpoised with cunctation."—Browne: *Vulgar Errors*.

***cūnc-tā-tive, a.** [Formed as if from a Lat. *cunctativus*, from *cunctatus*, pa. par. of *cunctor*.] Delaying, procrastinating, dilatory.

***cūnc-tā-tōr, s.** [Lat.] A delayer, a procrastinator; one who is cautiously slow.

"... unwilling to discourage such cunctators,"

—Hammond: *Fundam.*

The title was especially given to Quintus Fabius Maximus, who, when elected dictator of Rome after the fatal battle at Lake Trasymene, in B. C. 217, by a succession of skillful movements, marches, and countermarches, without ever coming to an engagement, greatly harassed the army of Hannibal.

***cūnd, v. t.** [CONDER.]

1. To give notice or intimation to; to guide by signal.

"They are directed by a balker or huer on the cliff, who, discerning the course of the pilchard, *cundeth*, as they call it, the master of each boat."—Carew: *Survey of Cornwall*.

2. To pilot or steer a ship; to con a vessel.

***cūn-dle, *cūn-dy, s.** [Prob. a corruption of Eng. *conduit* (q. v.).]

1. A sewer, a conduit; a channel for water, &c.

2. A grating in a road, a gully.

3. An apartment, a place for lodging.

***cūndle-hole, *cūndy-hole, s.** A conduit, as one across a road.

cūn-dū-rāng-ō, s. The name of a bark and wood of a species of vine found in Ecuador. It was formerly supposed to be a cure for cancer.

***cū-nē-ā, a.** [Lat. *cuneus*=a wedge.] Of or pertaining to a wedge; wedge-shaped.

cū-nē-āte, cū-nē-ā-tēd, a. [Lat. *cuneatus*=wedge-shaped, from *cuneus*=a wedge.]

1. *Ord. Lang.*: Wedge-shaped; made in the form of a wedge.

2. *Bot.* (chiefly of the form *cuneate*): Wedge-shaped, inversely triangular, with rounded angles, as the leaf of *Saxifraga tridentata*. (*Lindley*.) A cuneate leaf passes gradually at its base into the petiole.

cū-nē-āt-ic, a. [Lat. *cuneatus*=wedge-shaped, and Eng. &c., adj. suff. -ic.] Pertaining to what is wedge-shaped, spec. wedge-shaped letters. [CUNEIFORM.]

"... at the beginning of cuneatic decipherment."—Prof. Sayce, in *Bib. Arch. Soc. Trans.*, vol. iii. (1874), p. 465.

cū-nē-i-form, cū-ni-form, a. & s. [Fr. *cunéiforme*, from Lat. *cuneus*=a wedge, and *formus*=form.]

A. As adjective:

1. *Archæol.*: Wedge-shaped.

2. *Anat.*: In the same sense as 1. There are cuneiform bones of the head and others of the foot. There are also cuneiform cartilages of the larynx.

3. *Bot.*: The same as CUNEATE (q. v.).

B. As subst.: Cuneiform characters or writing (q. v.).

¶ (1) *Cuneiform characters*: Characters resembling a series of wedges or arrow heads, commonly found covering the surface of Ninevite sculptures. The first step toward the discovery of the cuneiform alphabet was taken by Prof. Grotefend as long ago as 1802. In a paper read during that year before the Royal Society of Göttingen, and published in the *Literary Gazette* of the same town, he announced that in examining Persian cuneiform he had succeeded in deciphering the names of Cyrus, Darius, Xerxes, and Hytaspes, and had thus obtained the true determination of nearly a third of the entire alphabet. English-speaking races were late in entering this field of inquiry, but they have since had very eminent students of cuneiform writing, such as Sir Henry Rawlinson, Mr. George Smith, of the British Museum, and others. The (*English*) *Journal of the Royal Asiatic Society*, vol. x., and the first part of vol. xi. (the former published in 1846 and the latter in 1849), were entirely devoted to papers by Sir Henry Rawlinson on cuneiform writing. Adopting a classification which use had made extremely convenient, he divided the arrow-headed writing known to him into three classes—Babylonian, Median, and Persian. The first of these, which he also called Complicated Cuneiform, he further subdivided into Primitive Babylonian, Achaemenian Babylonian, Medo-Assyrian, Assyrian, and Elymæan. (*Journal of the Royal Asiatic Society*, vol. x., pp. 1-52.)

In 1874 Mr. George Smith spoke of the fact that the cuneiform system of writing was the invention of a race having a Turanian language totally different from the Semitic language of the Assyrians and Babylonians. (*Bib. Arch. Soc. Transact.*, vol. iii. (1874), p. 462.) The Turanian or Ural Altaic people referred to by Mr. George Smith were shown by Professor Sayce and others to be the Accadians who descended into Chaldea from the highlands to the east of the Euphrates. Professor Sayce considers that their language, only recently known, stands to the other Turanian tongues in the same relation that Sanscrit does to the Aryan family of languages. He traces the cuneiform inscriptions of Media to the Amardi, the Cassi or Kossseans, and the Anzanites or Susaites, all akin to the Accadian. (*Professor Sayce, in Bib. Archæol. Soc. Trans.*, vol. iii., pp. 465-485.)

The earliest deciphered cuneiform inscription may be placed about 2000 B. C.; the latest about the time of Alexander the Great, B. C. 336-323.

(2) *Cuneiform writing*: Writing in which the characters described under ¶ (1) are those employed. Every visitor to the Assyrian rooms in the British Museum, or to the Crystal Palace, is familiar with its appearance.

cu-nētte', s. [Fr.]

Fort.: A small ditch in the middle of a dry ditch, to drain the water off the place. (*Knight*.)

***cu-nic-u-lar, a.** [Lat. *cunæ*=a cradle.] Pertaining to the cradle or infancy; childish.

"In his cunicular days."—Anecdote of Lodowick Muggleton (1876). (*Davies*.)

cu-nic-u-lāte, a. [Lat. *cuniculus*=(1) a rabbit, (2) a rabbit-hole, a mine.]

Bot.: Pierced with a long passage open at one end, as the peduncle of *Tropeolum*.

***cu-nic-u-lōus, a.** [Lat. *cuniculus*=a rabbit.] Of or pertaining to rabbits.

cū-ni-form, a. [CUNEIFORM.]

***cūnig, *cūning, *cūnyng, s.** [CONING, CONY.] A rabbit.

"The con, the cuning, and the cat."

Cherrie and Sloe, st. 3.

cū-ni-lā, s. [Etyim. doubtful. "A Roman name applied by Linnaeus to this genus." (*Loudon*.) By some botanists it is supposed to be from *conus*=a cone, and by others to be from *Cunila*, the name of a town.]

Bot.: A genus of Lamiaceæ, the typical one of the family Cunilidæ (q. v.). The calyx is thirteennerved, the stamens two. An infusion of *Cunila mariana* is used in North America in slight fevers and colds, as is *C. microcephala* in Brazil.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rāle, fāll; trŷ, sŷrian. æ, œ = ē; ey = ā. qu = kw.

cū-nīl'-ī-dæ, *s. pl.* [Lat. *cunil(a)*, and fem. pl. adj. suff. *-īdæ*.]
Bot.: A family of Lamiaceæ, tribe Satureæ, type *Cunila* (q. v.).

***cunner** (1), *s.* [CONNER.]

cūn-nēr (2), *s.* [Etym. unknown.] A kind of shell-fish less than an oyster, that sticks close to the rocks. (*Ainsworth*.)

***cunnes-man**, *s.* [KINSMAN.] A kinsman, a relation.

"His men made the deol ynough . . .
 And namliche his cunnesmen." *Beket*, 1656.

cūn-nīng, ***con-ning**, ***con-nyng**, ***con-nyngce**, ***cun-nand**, ***cun-nyng**, ***kun-nyng**, *a. & s.* [As adj., pr. par. of Mid. Eng. *cunnen*=to know; *A. S.* *cunnan*. As subst., from Icel. *kunnandi*=knowledge, from *kunna*=to know.]

A. As adjective:

1. Of persons:

1. In a good sense:

(1) Having knowledge, skill, or learning.

"A konyng man of lore." *William of Palerne*, 2,917.

(2) Skillful, dexterous.

"And he made in Jerusalem engines, invented by cunning men, . . ." *2 Chron.* xvi. 15.

(3) Precocious; roguish; interesting; as, we say of a sprightly little boy, "The cunning little rogue." (*U. S. Collog.*)

2. In a bad sense: Artful, crafty, sly, designing, shrewd, astute.

" . . . the supple and slippery consciences of cunning priests, . . ." *Macaulay: Hist. Eng.*, ch. xv.

II. Of things:

1. Made or wrought with skill and art, ingenious, curious.

"To devise cunning works, to work in gold, and in silver, and in brass." *Eccl.* xxxi. 4.

2. Artful, crafty, sly.

"With all the cunning manner of our flight,
 Determined of." *Shakesp.: Two Gent. of Ver.*, ii. 4.

B. As substantive:

1. (Originally): Skill (no bad sense being implied).

"If I forget thee, O Jerusalem, let my right hand forget her cunning." *Psalms* cxxxvii. 6.

¶ As early as the time of Lord Bacon, the word was degenerating in meaning, owing to the fact, discreditable to human nature, that skill is often used to defraud those less highly gifted.

*2. A profession, a trade.

"Shame not these words

By putting on the cunning of a carper."

Shakesp.: Timon, iv. 3.

3. Art, craft, artfulness, artifice, shrewdness, williness.

"Cunning is the natural defense of the weak." *Macaulay: Hist. Eng.*, ch. i.

¶ Crabb thus discriminates between *cunning*, *crafty*, *subtle*, *sly*, and *wily*: "The *cunning* man shows his dexterity simply in concealing; this requires little more than reservedness and taciturnity; the *crafty* man goes farther; he shapes his words and actions so as to lull suspicion; hence it is that a child may be *cunning* but an old man will be *crafty*; a *subtle* man has more acuteness of invention than either . . . the *cunning* man looks only to the concealment of an immediate object; the *crafty* and the *subtle* man have a remote object; to conceal: thus men are *cunning* in their ordinary concerns; politicians are *crafty* or *subtle*; but the former is more so as to the end, and the latter as to the means. A man is *cunning* and *crafty* by deeds; he is *subtle* mostly by means of words alone, or words and actions combined. *Slyness* is a vulgar kind of *cunning*; the *sly* man goes cautiously and silently to work. *Witiness* is a species of *cunning* or *craft*, applicable only to cases of attack or defense." (*Crabb: Eng. Synon.*)

cunning-man (or **woman**), *s.* A man (or woman) who pretends to tell fortunes, to teach how to recover stolen goods, &c.

"He sent him for a strong detachment

Of beadle, constable, and watchmen.

T'attach the cunning-man for plunder

Committed falsely on his lumber." *Butler: Hudibras*.

cunning-simple, *a.* Simple but with some artfulness.

"So innocent, so *cunning-simple*,

From beneath her gather'd wimple."

Tennyson: Lillian, ii. 17.

***cun-nin-gaire** ***cun-in-gar**, ***cun-nyn-garth**, *s.* [Prob. a corruption of Mid. Eng. *cuny-garthe*=a rabbit-warren: *cuny*=a rabbit, and *garth*=a garden, an inclosure. Cf. Sw. *kuningsgård*=a rabbit-warren.] A rabbit-warren.

"That na man tak cunnynys out of vtheris cunnyn-garthis." *Acts Ja. III.*, 1474 (ed. 1814), p. 107.

cūn-nīng-hām'-ī-ā, *s.* [Named after J. & A. Cunningham, botanists and travelers in New South Wales.]

Bot.: A genus of Pinaceæ, section Abietinæ. *Cunninghamia sinensis* is a handsome tree now introduced into northern temperate climates. It will grow in these climates in the open air, if protected in winter.

cūn-nīng-īŷ, ***con-ning-ly**, *adv.* [Eng. *cunning*; *-ly*.]

1. Skillfully; with art or skill.

"A stately pallas built of squared bricks,"

Which cunningly was without mortar laid."

Spenser: F. Q., i. iv. 4.

2. In a cunning, artful, or crafty manner; artfully, slyly, wily, craftily.

"But, good my lord, do it so cunningly,

That my discovery be not aimed at."

Shakesp.: Two Gent. of Ver., iii. 1.

cūn-nīng-nēss, *s.* [Eng. *cunning*; *-ness*.] *Cunning*, art, artfulness, craft, wiliness.

"But mine is such a drench of balderdash,

Such a strange carded cunningness."

Beaumont & Fletcher: Tamer Tamed.

***cun-ny**, *s.* [CONY.]

***cunny-berry**, *s.* A rabbit-burrow; hence, a retreat, a refuge.

"He would fetch him out of his cunny-berry." *Sidney: Arcadia*, p. 277.

***cunny-catch**, *v. t.* [CONY-CATCH.]

"He will not suffer himself to be cunny-catcht." *S. Lennard: Of Wisdome*, bk. ii., ch. 1, § 4, p. 212 (1670).

cū-nō-nī-ā, *s.* [Named after John Christian Cuno, of Amsterdam, who in 1750 described his own garden in verse.]

Bot.: A genus of plants, the typical one of the order Cunoniaceæ. There are a five-parted deciduous calyx, five petals, ten stamens, two diverging styles, a conical two-celled capsule, separable into two many-celled carpels. *Cunonia capensis*, the White Cunonia, is the Rood Elze of the Dutch residents at the Cape of Good Hope. It is a small tree with opposite pinnate leaves and dense racemes of small white flowers.

cū-nō-nī-ā-ŷe-ā, *s. pl.* [Mod. Lat. *cunoni(a)* (q. v.), and fem. pl. adj. suff. *-acæ*.]

Bot.: Cunoniads. An order of Perigynous Exogens, alliance Saxifragales. It consists of trees or shrubs with large interpetiolar stipules, a four or five-cleft nearly inferior calyx, petals four to five or none; stamens perigynous, definite, or indefinite; styles two; ovary two-celled, with two or many seeds; fruit two-celled, capsular, or indehiscent. The species are found at the Cape of Good Hope, in South America, the East Indies, and Australia. Lindley enumerated 22 genera, and estimated the known species at 100.

cū-nō-nī-āds, *s. pl.* [Lat. *cunoni(a)*, and Eng., &c., pl. suff. *-ads*.]

Bot.: The name given to the botanical order Cunoniaceæ (q. v.).

cūn-tēy-cūn-tēy, *s.* [Etym. doubtful.]

Law: A kind of trial by an ordinary jury.

cūp, ***cop**, ***coppe**, ***coupe**, ***cowpe**, ***cupe**, ***cuppe**, *s.* [Lat. *cupa*=a cask, a vat; Dan. & Dut. *kop*; Sw. *kopp*; Sp. & Port. *copa*; Ital. *coppa*; Ger. *kopf*; Fr. *coupe*; Gr. *kupellon*=a cup.]

" . . . can ye drink of the cup that I drink of? and be baptized with the baptism that I am baptized with?" *—Mark* x. 38.

"My cup runneth over." *—Psalm* xliii. 5.

B. Technically:

1. *Bot.*: The calyx.

" . . . an acorn in its cup." *—Woodward: On Fossils*.

2. *Surg.*: A glass placed above a scarified place, to extract blood in cupping; a cupping-glass.

" . . . in applying of cups, the scarification ought to be made with crooked instruments." *—Arbuthnot*.

3. *Naut.*: The step of the capstan-spindle.

4. *Boilers*: One of a series of little domes attached to a boiler-plate and serving to extend the fire-surface.

5. *Eccles.*: The chalice used in the administration of the Holy Communion.

6. *Ch. Hist.*: The cup was first denied to the laity by the Council of Constance, by a decree issued on June 14, 1415. The Council of Basle in 1433 restored the cup to the Calixtines, and thus reconciled them to the Roman Pontiff. [CALIXTINES.]

¶ (1) *A cup too low*: With less than the ordinary allowance of wine or other stimulating liquor.

"To be sure I am what one calls a cup too low, but when thoroughly cleared I hope to feel fully equal to any business that may appear." *—Letter from George III. to Pitt, in Stanhope's Life of Pitt*, ii., App. 2.

(2) *Cup and can*: Familiar companions; boon companions.

"That you and he are cup and can." *—Swift*.

(3) *In one's cups*: Drinking; intoxicated.

" . . . reasoning, as one friend with another, by the fireside, or in our cups, . . ." *—Knolles: History of the Turks*.

cup-and-ball joint, *s.* A ball-and-socket joint.

cup-and-cone, *s.*

Metal.: An apparatus used for charging iron furnaces which are worked with clamped tops for collecting the waste gases.

cup-and-saucer, *s. & a.*

A. As substantive:

1. *Sing.*: In the literal sense.

2. *Pl. (cups and saucers)*: A child's name for acorns and the cups that contain them.

B. As adj.: Resembling a cup and saucer.

¶ *Cup-and-saucer limpet*: A popular name for the molluscons genus *Calyptrea*, given because a process like half a cup is in the interior of the limpet-like shell. [CALYPTREA.]

cup-flower, *s.* *Scyphanthus elegans*. (*Treas. of Bot.*)

cup-gall, *s.* A gall of a cup-like form found occasionally on oak leaves.

cup-goldlocks, *s.* *Trichomanes radicans*.

cup-lead, *s.* A long leaden weight with a cup-shaped cavity closed by a leather valve, used for deep-sea dredging.

cup-lichen, *s.* [So called from the form of the thallus.] *Scyphophorus pyxidatus*.

***cup-man**, *s.* A hard drinker; a boon companion.

cup-moss, *s.*

1. *Scyphophorus pyxidatus*.

2. *Lecanora tartarea*. Neither of the two is a genuine moss; but both are lichens.

"They find the red cup-moss where they climb."

Hemans: The Adopted Child.

cup-mushroom, *s.* A name given to various species of *Peziza*.

cup-plant, *s.* An American name for *Silphium perfoliatum*.

***cup-rose**, *s.* A name for the Poppy.

cup-shaped, *a.*

Bot.: Cyathiform, resembling a drinking-cup. Nearly the same as pitcher-shaped. Example, the limb of the corolla of *Symphytum*.

***cup-shotten**, *a.* Intoxicated; tipsy.

cups and ladles, *s. pl.* The husks of the acorn, from their resemblance to these utensils.

cup-valve, *s.*

Steam-engine:

1. A cup-shaped or conical valve, which is guided by a stem to and from its flaring seat.

2. A form of balance-valve which opens simultaneously on top and sides.

3. A valve formed by an inverted cup over the end of a pipe or opening.

Cup-lichen.

cūp, *v. t.* [CUP, *s.*]

I. Ordinary Language:

1. Trans.: To supply with cups—*i. e.*, with liquor.

"In thy vats our cares be drown'd;
With thy grapes our hairs be crown'd;
Cup us, till the world go round,
Cup us, till the world go round!"
Shaksp.: *Ant. and Cleop.*, ii. 7.

2. Intrans.: To drink.

"The former is not more thirsty after his cupping."—*Adams: Works*, i. 484.

II. Surg.: To bleed by means of a cupping-glass.

"Him the damn'd doctors and his friends immur'd,
They bled, they cupp'd, they purg'd; in short, they
cur'd."—*Pope: Satires*, vi. 193.

cu-pā-nī-a, *s.* [Named after Francis Cupani, an Italian monk and botanical author, who died in A. D. 1710.]

Bot.: A genus of hypogynous Exogens, order Sapindaceæ, tribe Sapindæ. It has a capsular dehiscent fruit; the flowers in racemes; calyx five-parted; petals five; stamens ten, inside a fleshy rim; style trifid. The species are found chiefly in South America, but also in other parts of the tropics. More than fifty are known. The succulent root of the Akee tree, *Cupania sapida*, sometimes called *Blighia sapida*, is eaten. Boiled down with sugar and cinnamon it is used also in diarrhoea. *C. cunninghami* is a large timber tree, growing in Australia.

cūp-beār-ēr, *s.* [Eng. *cup*, and *bearer*.]

1. Gen.: An attendant or official whose duty it is to hand round the wine to the guests.
"... his carrying away his son Ganymede to be his cupbearer."—*Broome*.

***2. Spec.:** An officer whose duty it was to taste the wine before handing it to his lord, thus guarding against poison.

"I was the king's cupbearer."—*Nehem.* i. 11.

cup-board (pron. cūb-bōrd), ***cup-borde**, ***cup-burde**, *s.* [Eng. *cup*, and Mid. Eng. *borde*=a table.] [BOARD, *s.*]

***1. A board, shelf, or buffet on which cups, &c., were placed.**

"Some trees are best for planchers, as deal; some for tables, cupboards, and desks, as walnut."—*Bacon: Nat. Hist.*

2. A small case with shelves, on which plates, dishes, cups, &c., are placed; sometimes applied to a press without shelves; a wardrobe.

"Yet their wine and their victuals these curmudgeon-lubbards
Look up from my sight, in cellars and cupboards."—*Swift*.

3. A sideboard or piece of furniture for the display of plate.

¶ (1) Cupboard love: Interested love; that which has an eye to what can be gained by a pretense of love.

"A cupboard love is seldom true,
A love sincere is found in few."
Poor Robin. (Nares.)

(2) To cry cupboard: To call for or demand food.
"My belly began to cry cupboard."—*Swift: Polite Conv.*, ii.

***cupboard** (pr. cūb-bōrd), *v. t.* [CUPBOARD, *s.*]

To treasure or hoard up in a cupboard.

"Still cupboarding the viand, ..."

Shaksp.: *Coriolanus*, i. 1.

***cupboarded** (pr. cūb-bōrd-ēd), *pa. par. or a.* [CUPBOARD, *v.*]

***cupboardy** (pr. cūb-bōrd-y), *a.* [Eng. *cupboard*; -y.] Like a cupboard or press in size; diminutive.

"Lucy was glad to have her funny little cupboardy room all to herself."—*Miss Braddon: Weavers and West*, p. 815 (ed. 1877).

***cupe**, *s.* [A. S. *cypa*.] A basket.

"Yif I myght gadre eny scrappes of the releef of the twelf cupes."—*Trevisa*, i. 15.

cū-pel, ***cup-pel**, *s.* [Lat. *cupella*=a small vat or cask; dimin. of *cupa*=a vat, a cask.]

***1. Ord. Lang.:** A small cask, a firkin.

"Item, 4 cuppells of butter and cheese."—*Depred. on the Clan Campbell*, p. 112.

2. Assaying: A porous vessel, usually made of pulverized bone-ashes, and employed in assaying for separating the precious metals from their oxidizable alloys. Cupels are made in a mold with a die having a boss-like projection for forming the cavity for containing the specimens to be assayed. Cupels of bone-earth are described by the great Arabian chemist Djafar, who lived about A. D. 875. He was the discoverer of nitric acid and aqua regia. (Knight.)

"There be other bodies fixed, as we see in the stuff whereof cuppels are made, which they put into furnaces, upon which fire worketh not."—*Bacon: Nat. Hist.*

cupel-dust, *s.* Powder used in the purifying of metals.

cupel-pyrometer, *s.* An alloy pyrometer which indicates the heat by incipient or total liquefaction. (Knight.)

tcū-pel, *v. t.* [CUPEL, *s.*] To purify or refine in a cupel.

"Alloys containing both silver and gold are cupelled with lead and a quantity of silver . . ."—*Graham: Chemistry* (2d ed.), vol. ii., p. 382.

cū-pēl-lā-tion, *s.* [Lat. *cupell(a)*, and Eng. suff. -ation.]

Assaying: The act or process of purifying or refining gold or silver by a cupel. An alloy of silver and lead is exposed to a red heat on the floor of a muffle, where a current of air plays over its surface. The lead is converted into the protoxide, melts, and runs off, leaving the refined silver. In assaying silver it is purified in a small cupel subjected to an oxidizing heated blast. This leaves it pure silver, the lead passing into the porous vessel. The assay of gold is more complex. The copper and other oxidizable metals are removed by cupellation with lead. A large excess of silver is then added to the alloy, which is rolled into a sheet called a cornet. The silver is dissolved out with nitric acid, which leaves the gold as a sponge. This is called parting. (Knight.)

"... refined by cupellation . . ."—*Babington: System of Mineralogy* (1799).

tcū-pel-liŋg, *pr. par., a & s.* [CUPEL, *v.*]

A. & B. As. pr. par. & particip. adj.: (See the verb.)

C. As subst.: Cupellation.

"... the quick melting down of ores, and cupelling of them, . . ."—*Boyle: Works*, vol. iii., p. 453.

cū-pēl-lō, *s.* [Lat. *cupella*.] A small furnace for assaying.

cūp-fūl, ***cupe-ful**, *s.* [Eng. *cup*, and *ful(l)*.] The quantity which a cup will hold.

cū-phē-a, *s.* [Gr. *kuphos*=curved, in reference to the form of the capsule.]

Bot.: A genus of perigynous Exogens, order Lythraceæ, tribe Lythreæ. The leaves are opposite; the flowers solitary; calyx tubular, inflated below, and gibbous or spermed at the base on the upper side; petals 6 or 0, unequal in size; ovary one to two-celled; ovules few; fruit an oblong capsule. Habitat chiefly tropical America. In Brazil a decoction of *Cuphea balsamona* is sometimes prescribed in intermittent fever.

cū-pīd, *s.* [Lat. *cupido*, from *cupio*=to desire.]

***1. Gen.:** The god of Love, generally represented as a beautiful naked boy, winged, blind, and armed with a bow and a quiver full of arrows, with which he transfixed the hearts of lovers, kindling desire in them. He was equivalent to, but not perfectly identical with, the *Erōs* of the Greeks. He was supposed to be the son of Mercury and Venus.

***2. To look for Cupide in the eyes:** A phrase expressive of the amorous gazing which lovers bestow upon each other.

cū-pīd-l-tŷ, *s.* [Fr. *cupide*, itel, from Lat. *cupiditas*, from *cupido*=desirous; *cupio*=to desire, to long for.]

***1. Love:** the affection over which Cupid presides.

"She calls her idle flame love—a cupidity which only was a something she knew not what to make of."—*Richardson: Sir C. Grandison*, vi. 179.

2. An eager or inordinate desire to possess something, especially wealth; covetousness, avarice.

***cup-meal**, ***cuppe-mele**, *adv.* [Eng. *cup*, and *meal*=a bit. Cf. *piecemeal*.] Cup by cup; by cups at a time.

"It cam in cuppemele."—*P. Ploverman*, 2,921.

cup-of-gold, *s.* The *eschscholtzia*, or California poppy.

"Strangers visiting California are attracted by the great splashes of gold that appear in the pasture lands and by the waysides. It is the *eschscholtzia* (*esch-scholtz-lā*), which is now the flower emblem of California. The appropriateness of this selection is seen in many ways. It is the wild wine-coblet of the state, suggestive, in color, of the orange and the precious metal. The Spaniards, indeed, called it *el copa de oro*—the cup of gold. In the month of October, 1816, the ship *Rurick* entered the Bay of San Francisco. The naturalist Adalbert von Chamisso was on the *Rurick* and named the poppy for his companion of the voyage, one Herr Eschscholtz. * * * This flower has a wide distribution. It is found from Oregon to the central highlands of Mexico, from Nevada and Arizona to the islands off the coast."—*London Illustrated News*.

cū-pō-lā, ***cu-po-lo**, ***cup-po-lā**, *s.* [Ital. *cupola*, a diminutive from Lat. *cupa*=a cup.]

1. Architecture:

(1) A lantern or small apartment on the summit of a dome.

(2) A spherical or spheroidal covering to a building or any part of it. (Knight.)

2. Metallurgy:

(1) A furnace for melting metals for casting. [CUPOLA-FURNACE.]

(2) A furnace for heating shot to be fired at ships and other inflammable objects. (Knight.)

3. Anat.: The dome-like extremity of the canal of the cochlea.

cupola-furnace, *s.*

Metal.: A furnace for melting iron in a foundry. The name is derived from a cupola or dome leading to the chimney,

which is now frequently omitted. A cupola of ordinary size may be thus described: At the base is a pedestal of brickwork 20 to 30 inches high, upon which stands a cast-iron cylinder from 30 to 40 inches diameter, and 5 to 8 feet high; this is lined with fire-clay, brick, or other refractory matter, which contracts its internal diameter some 18 or 24 inches. The furnace is open at the top for the escape of the flame and gases, and for the admission of the charge, consisting of pig-iron, waste or old metal, coke, and lime in due proportion. The lime acts as a flux, and much assists the fusion; chalk or oyster-shells are used where conveniently accessible. At the back of the furnace are several tuyere-holes, one above another, through which the air is urged by a blower. As the fluid metal collects below, the air is admitted at a higher aperture, and the lower blast-hole is stopped. The front of the furnace has a large opening at which clinkers, slag, and unconsumed fuel are removed when cleaning the furnace. This aperture is closed by a guard-plate, fixed on by staples attached to the iron case of the furnace. In the center of the guard-plate is the tapping-hole, which is closed during the melting by a ramming of sand. Some furnaces are made rectangular or cylindrical, with separate plates like staves, bound by hoops, so that the furnace may be taken down if the charge should accidentally become solidified therein. (Knight.)

Cupola-furnace.

cupola-ship, *s.*

Naut.: An iron-clad war vessel, low in the water, but having projecting above it a cupola or turret for firing. The first vessel of the kind constructed was designed by Captain Ericsson, and was called the "Monitor." It figured quite prominently in our late civil war, and worked a revolution in the construction of iron-clad war-ships. The idea had been previously discussed in England, and as a result the British Government afterward adopted

Cupola-ship.

it, and several of their ships are on the cupola or turret principle. The strong points about such vessels are—first, the difficulty of hitting them; secondly, the probability that, even if they be struck, the shot, impinging obliquely, will glance off without doing serious injury. The weak point is that, lying very low in the water, and being the reverse of buoyant, they may ship enough water by the funnel to founder at sea, as the "Monitor" itself ultimately did. A cupola-ship is called also a turret-ship.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ=ē; ey=ā. qu=kw.

cū-pō-laed, *cū-po-loed, a. [Eng. *cupola*; -ed.] Having a cupola.

"Opposite to this palace is a fair temple—cupolaed, compassed with walls, and open to the air."—*Sir T. Herbert: Travels*, p. 163.

cūp-pa, s. [Ety. unknown.]

Her.: One of the furs composed of any metal and color. Called also Potent-counter-potent (q. v.). (*Ogilvie*.)

cūpped, pa. par. or a. [CUP, v.]

**I. Ord. Lang.*: Intoxicated; in one's cups.

"All night with one that had bin shrieve I sup'd,
Well entertain'd I was, and halfe well cup'd."—*Taylor: Works*, 1650.

II. Technically:

1. *Surg.*: Bled by means of a cupping-glass.

2. *Medic.*: Depressed at the center; dished. The depression around the eye of a millstone is called the bosom. (*Knight*.)

cūp-pēr, s. [Eng. *cup*, v.; -er.] One who bleeds by means of a cupping-glass; a scarifier.

cūp-plīg, pr. par., a. & s. [CUP, v.]

A. & B. As *pr. par. & particip. adj.*: (See the Verb.)

C. As substantive:

1. The act of drinking.

2. The act of bleeding with a cupping-glass; scarifying.

"Blistering, cupping, and bleeding, are seldom of use but to the idle and intemperate."—*Addison: Spectator*.

¶ Cupping was known to Hippocrates. It was practiced a good deal in the second decade of the nineteenth century, but has since gone into disuse, as blood-letting in all forms has done.

cupping-glass, s.

Surg.: A glass vessel resembling a cup, used in the operation of cupping. It is first heated, by which means the included air becomes rarefied. It is then applied to the skin, and as the heated air becomes cooler it produces a partial vacuum, by which means the skin and integuments are drawn into the cupping-glass. There are several varieties of cupping-glasses; in some cases the air is exhausted by means of a syringe. Dry cupping is the application of air-exhausted cups to an unscarified place to excite the part, and on an extended scale is known as a depurator (q. v.).

"A bubo, in this case, ought to be drawn outward by cupping-glasses, and brought to suppuration."—*Wiseman*.

***cupping-house, s.** A tavern.

"A cupping-house, a vaulting-house, a gaming-house."—*Adams: Works*, I. 271.

cū-prē-līnē, s. [Lat. *cupre(us)*=of copper, and Eng., &c., suff. -ine.]

Min.: The same as COPPER-GLANCE (*Brit. Mus. Catal.*). The same as CHALCOCITE, of which copper-glance is made a synonym. (*Dana*.) Breithaupt considered it a distinct species, but his views have not been accepted.

cū-prē-ōūs, a. [Lat. *cupreus*=of copper, from *cuprum*=copper.] Containing more or less of copper, coppery. [CUPROUS.]

¶ (1) *Cupreous anglesite*:

Min.: The same as LINARITE (q. v.).

(2) *Cupreous idocrase*:

Min.: The same as CYPRINE.

(3) *Cupreous manganese*:

Min.: The same as LAMPADITE (q. v.).

cū-prēs-sō-crī-nī-tēs, s. pl. [Lat. *cupress(us)*, and fem. pl. adj. suff. -ae.]

Bot.: A sub-order of Pinaceæ. It is characterized by erect ovules and spheroidal pollen. It is sometimes called also Cupressinæ.

cū-prēs-sī-nēs, s. pl. [Lat. *cupress(us)*, and fem. pl. adj. suff. -inæ.] The same as CUPRESSÆ (q. v.).

cū-prēs-sī-nī-tēs, s. [Lat. *cupressin(a)* (q. v.), and Lat., &c., suff. -ites.]

Palæont.-botany: A genus of fossil plants from the London clay of Sheppey, which is of Eocene age. Bowerbank described thirteen species.

cū-prēs-sīte, s. [Lat. *cupress(us)* (q. v.), and Eng., &c., suff. -ite (*Palæont.*) (q. v.).]

Palæont.-botany: Plant remains from the Trias to the Wealden, resembling the genus *Cupressus*, but not proved to be of that actual genus.

cū-prēs-sō-crī-nī-dēs, s. pl. [Mod. Lat. *cupressocrin(us)*, and fem. pl. adj. suff. -idæ.]

Palæont.: A family of Crinoidea with a cup-shaped calyx, the center of its base being supported by the expanded uppermost joint of the column, surrounded by five basals, carrying five large radials and five smaller plates, these latter giving origin to the five arms. Known range in time, from the Devonian to the Carboniferous. Type, *Cupressocrinus* (q. v.).

***cū-prēs-sō-crī-nī-tēs, s. pl.** [Mod. Lat. *cupressocrin(us)*, and Lat., &c., suff. -ites.] The same as CUPRESSOCRINUS (q. v.).]

cū-prēs-sō-crī-nūs, s. [Lat. *cupress(us)*; o connective, and Lat. *crinon*; Gr. *krinon*=a lily, specially Orange Lily (q. v.).]

Zool.: A genus of Crinoidea, the typical one of the family Cupressocrinidae (q. v.). It occurs in the Devonian rocks.

cū-prēs-sūs, s. [Lat.=the cypress; Gr. *kyparissos*, of the same meaning.]

1. *Bot.*: A genus of Gymnogens, order Pinaceæ, sub-order Cupressæ, of which latter it is the type. The leaves are reduced to mere scales; the cones consist of peltate woody bracts; the seeds are small and angular, several in each bract; the fruit is like that of the juniper, but much larger. *Cupressus sempervirens* is the Common Cypress. [CYPRESS.] There are other species.

2. *Palæont.-botany*: The genus *Cupressus* is believed to have been found fossil in the Cretaceous rocks of this country.

cū-prīc, a. [Lat. *cupr(um)*=copper, and Eng. suff. -ic.] Having copper in its composition. Each molecule of the substance contains one atom of copper.

cupric acetate, s.

Chem.: ($\text{CH}_3\text{CO}_2\text{O}$)₂Cu. It is prepared by dissolving verdigris in hot acetic acid and allowing the filtered solution to cool. It forms dark-green crystals, which dissolve in fourteen parts of cold, and in five parts of boiling, water.

cupric carbonate, s.

Chem.: A green, basic carbonate, $\text{CuCO}_3\cdot\text{Cu}(\text{OH})_2$ is obtained when sodium carbonate is added to a hot solution of cupric sulphate. It is used as a pigment, called verditer.

cupric chloride, s.

Chem.: CuCl_2 . Obtained by burning copper filings in an excess of chlorine gas. It is a brown-colored, deliquescent, powder. When cupric oxide or cupric carbonate is dissolved in hydrochloric acid, and the solution evaporated, green needles, deliquescent crystals, $\text{CuCl}_2\cdot 2\text{H}_2\text{O}$, are found. It forms double salts. If the green needles are dried in a vacuum over sulphuric acid, they become pale blue. Cupric chloride is soluble in alcohol, the solution burning with a green flame.

cupric nitrate, s.

Chem.: Nitrate of copper, $\text{Cu}(\text{NO}_3)_2\cdot 6\text{H}_2\text{O}$. Obtained by dissolving copper in nitric acid; it is a blue, deliquescent salt, crystallizing in rhombic prisms, which are very soluble in water. If a few crystals of cupric nitrate be wrapped up in tinfoil, they convert it into stannic oxide, the metal taking fire.

cupric oxide, s.

Chem.: CuO . Monoxide of copper, black oxide of copper, is obtained by heating the metal to redness in the air, or in oxygen. Cupric salts, mixed with potassium hydrate give a pale blue precipitate of cupric hydrate, $\text{Cu}(\text{HO})_2$, which, on boiling in water, is converted into black cupric oxide. Cupric oxide forms salts. Cupric oxide is soluble in ammonia, also in oils and fats. Cupric oxide is used in organic ultimate analysis (q. v.); the substance is powdered and mixed with the oxide, which must first be carefully dried, as it is hygroscopic. The mixture is then burnt, carbonic acid and water are formed, and the copper oxide is reduced. Cupric oxide gives a green color to glass.

cupric sulphate, s.

1. *Chem.*: $\text{CuSO}_4\cdot 5\text{H}_2\text{O}$. Sulphate of copper, blue vitriol, *Cupri sulphas* of the Pharmacopœia. Sulphate of copper is obtained by boiling copper with sulphuric acid, or by heating copper with sulphur, which forms cuprous sulphide; this, when oxidized, yields cupric sulphate and oxide; this is thrown into dilute sulphuric acid and allowed to crystallize. Cupric sulphate crystallizes in large blue, triclinic prisms, soluble in four parts of cold, and in two parts of boiling, water. When heated to 100°, it loses four molecules of water, and the remaining molecule at about 200°. The anhydrous salt readily absorbs water, and is used to remove water from alcohol. It is insoluble in absolute alcohol. Cupric sulphate dissolves in hydrochloric acid, forming cupric chloride. The anhydrous salt absorbs the vapor of hydrochloric acid. Cupric sulphate, at high temperatures, gives off SO_2 and O_2 , and yields cupric oxide. Cupric sulphate forms double salts with sulphates of potassium and ammonium. Sulphate of copper is used in calico-printing.

2. *Phar.*: *Cupri sulphas* is given in small doses as an astringent or tonic, in large doses (five grains) as an emetic. It is used in cases of obstinate diarrhœa and dysentery, also in cases of chorea and epilepsy. Externally, it is used to dress ulcers,

&c. Sulphate of copper is used to prevent smut in corn, and has been employed to prevent dry-rot in timber.

cupric sulphide, s.

Chem.: Sulphide of copper. CuS occurs native. It is precipitated as a dark-brown powder when H_2S gas is passed through a solution of a cupric salt. Precipitated sulphide of copper is soluble in nitric acid, also in potassium cyanide; it is insoluble in KHS , and only slightly soluble in $(\text{NH}_4)_2\text{S}_2$, yellow ammonium sulphide.

cū-prīf-ēr-ōūs, a. [Lat. *cuprum*=copper; *fero*=to bear; and Eng. suff. -ous.] Copper-bearing; bearing copper.

"... the whole cupriferous district of North Wales."—*Sir H. Delabèche: Elements of Geology*.

***cūp-rite (1), s.** [Eng. *cup*, and *rite*.] A libation.

***cū-prite (2), s.** [Lat. *cupr(um)*=copper, and suff. -ite (*Min.*) (q. v.).]

Min.: An isometric mineral with octohedral cleavage. Hardness, 3.5-4; specific gravity, 5.3-5.6; luster adamantine to earthy; color red, streak shining brownish-red. It is subtransparent to subtranslucent, and in texture brittle. Composition: Oxide of copper, 11.2; copper, 88.8=100. There are three varieties:—(1) Ordinary Cuprite, crystallized or massive, (2) Chalcotrichite (q. v.), and (3) Earthy Cuprite, or Tile Ore. Found in Cornwall, in Devonshire, near Tavistock in England; near Lyons, in France; as well as in South Australia and South America. (*Dana*.)

cūp-rōid, a. & s. [Lat. *cuprum*=copper, and Gr. *eidos*=form, appearance.]

A. As adj.: Resembling copper.

B. As substantive:

Crystallog.: A crystal of the tetrahedral type, with twelve equal angles.

cū-prō-plūm-bite, s. [Lat. *cuprum*=copper; *plumbum*=lead, and suff. -ite (*Min.*) (q. v.).]

Min.: *Dana* considers this not a proper species, but only a mixture of galenite and chalcocite.

cū-prō-schēel-ite, s. [Lat. *cuprum*=copper, and Eng., &c., suff. -ite (q. v.).]

Min.: A crystalline granular mineral of vitreous luster, green color, and light greenish-gray streak; its hardness, 4.5-5. Composition: Tungstic acid, 78.43; oxide of copper, 8.95; lime, 12.62=100. Found in Lower California. (*Dana*.)

cū-prō-sō-vīn-īl, s. [Mod. Lat. *cuprosus*=full of copper; o connective; *vīnum*=wine; and Eng., &c., suff. -yl (*Chem.*) (q. v.).] Etymologically viewed, it signifies copper and wine, copper wine, or wine of copper.

cuprosvinyl oxide, s.

Chem.: $\text{C}_4(\text{Cu}_2)_2\cdot \text{H}_2\text{O}$. A red precipitate, obtained by passing ethine (acetylene) C_2H_2 into an ammoniacal solution of cuprous chloride. This compound yields ethene C_2H_4 when heated with zinc and dilute ammonia.

cū-prōūs, a. [Lat. *cupr(um)*=copper, and Eng. suff. -ous.] Having a considerable quantity of copper in its composition. Each molecule of the substance contains two atoms of copper which are united to each other by a pair of bonds ($\text{Cu}-\text{Cu}$).

cuprous chloride, s.

Chemistry: Subchloride of copper, Cu_2Cl_2 or $(\text{Cl}-\text{Cu}-\text{Cu}-\text{Cl})$. A white crystalline powder, insoluble in water, obtained by the action of reducing agents on cupric chloride; also by burning copper in chlorine gas, or by distilling copper with mercuric chloride. Its ammoniacal solution absorbs oxygen from the air, and turns blue.

cuprous iodide, s.

Chem.: Cu_2I_2 . Subiodide of copper is a white insoluble powder, obtained by heating copper with iodine, or by adding an iodide to a mixture of cupric sulphate and ferrous sulphate. $2\text{KI} + 2\text{CuSO}_4 + 2\text{FeSO}_4 = \text{Cu}_2\text{I}_2 + \text{K}_2\text{SO}_4 + \text{Fe}_2(\text{SO}_4)_3$. This reaction is used to detect iodine in the presence of chlorides and bromides.

cuprous oxide, s.

Chem.: Cu_2O or $\frac{\text{Cu}}{2}\text{O}$, red oxide of copper, suboxide of copper. Obtained by heating a cupric salt with sugar and excess of caustic potash. It is a bright red powder, soluble in ammonia, forming a colorless solution, which absorbs oxygen when exposed to the air, and turns blue. Cuprous oxide is soluble in hydrochloric acid, forming cuprous chloride. Nitric acid dissolves it, forming cupric nitrate, $\text{Cu}(\text{NO}_3)_2$. It is used to give a ruby red color to glass. Cuprous oxide dissolves in smelted copper rendering it brittle; it is then called dry copper.

cuprous sulphide, s.

Chem.: Cu_2S , or $\frac{\text{Cu}}{2}\text{S}$. A dark gray fusible powder, formed by heating three parts of sulphur and eight parts of copper, also by rubbing finely-divided copper with sulphur in a mortar, and by

ball, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn. -tīon, -gion = zhūn. -tious, -cleous, -sious = shūs. -ble, -dle, &c. = bel, del.

heating copper in sulphur vapor. When heated with cupric oxide it forms sulphur dioxide and metallic copper, $\text{Cu}_2\text{S} + 2\text{CuO} = \text{SO}_2 + 4\text{Cu}$. The fine metal obtained in copper smelting is chiefly cuprous sulphide.

cū-pu-lā, s. [Lat.=a little tub or cask, dimin. of *cupa*=a tub or cask.] The same as **CUPULE** (q. v.).

cupula-shaped, a.

Bot.: Slightly concave, with a nearly entire margin, as the calyx of citrus, or the cup of an acorn. The same as **CUPULIFORM**.

cū-pu-lar, a. [**CUPULA**.] Having as an inflorescence a cupula; tub-shaped, cask-shaped.

"It only differs from the true *Dacrydia* in wanting the cupular disk of the fruit."—*Gardeners' Chronicle*, No. 407 (1881), p. 503.

cū-pu-lāte, a. [Lat. *cupu(la)* (q. v.), and Eng., &c., suff. -ate.]

Bot.: The same as **CUPULAR** (q. v.).

cū-pule, cū-pu-lā, s. [**CUPULA**.]

Botany:

1. A kind of inflorescence consisting of a cup formed by bracts cohering by their bases. In the oak the cupule is woody, entire, and scaly, with undulated bracts; in the beech it forms a sort of coriaceous, valvular, spurious pericarp; in the hazelnut it is foliaceous and lacerated; and in the hornbeam it takes the form of a lobed bract.

2. A cup-like body existing in *Poziza* and some other Fungals.

cū-pu-lif-ēr-ēs, s. pl. [Lat. *cupula*, in the botanical sense, and *fero*=to bear.]

Bot.: The name given in A. D. 1808 by Richard, and subsequently by various other botanists, to the order of diclinous Exogens termed by Mirbel, Lindley, &c., *Corylaceae*. They are so called from possessing a cupule which takes the form of a bony or coriaceous one-celled nut, more or less inclosed in an involucre. [*CORYLACEAE*, *MASTWORTS*.]

cū-pu-lif-ēr-ōis, a. [Lat. *cupula*, i connective, *fero*=to bear, and Eng., &c., suff. -ous.]

Bot.: Bearing a cupule or cupules; pertaining to the botanical order Cupuliferae.

cū-pu-lif-ōm, a. [Lat. *cupula* in the botanical sense, and *forma*=form.]

Bot.: The same as **CUPULA-SHAPED** (q. v.).

cūr; s. [Sw. dial. *kurre* = a dog; Dut. *korre* = a watchdog.]

1. **Lit.**: A degenerate, worthless, or cowardly dog.

"Flies, as before some mountain lion's ire
The village *curs* and trembling swains retire."
Pope: *Homer's Iliad*, xvii. 69, 70.

2. **Fig.**: Used as a term of contempt and reproach to a man.

"You common cry of *curs*! whose breath I hate,"
Shakespeare: *Coriolanus*, iii. 3.

cūr-a-bīl-i-tŷ, a. [Fr. *curabilité*.] The quality of being curable; curableness.

cūr-a-ble, a. [Fr. *curable*.]

1. Capable of being cured; that may be healed or cured.

"... differs from all other curable diseases, ..."
—Harvey.

2. **Curative.**

"Retaining a curable virtue against all diseases."—*Sandys: Travels*, bk. iii., p. 174.

cūr-a-ble-nēs, s. [Eng. *curable*; -ness.] The quality of being curable; capability or possibility of being healed or cured.

cūr-a-çōa, s. [Named from Curaçoa, or Curaçao, an island in the Caribbean Sea, near the coast of Venezuela, where the liquor so called was first made.] A liquor made of brandy with orange-peel and sugar, and a little cinnamon.

"It pleased me to think at a house that you know
Were such good mutton cutlets and strong curaçoa."
Moore: *Twopenny Post-Bag*.

cūr-a-çŷ, s. [Eng. *curate*; -cy.]

1. The office or employment of a curate; curateship.

"They get into orders as soon as they can, and, if they be very fortunate, arrive in time to a curacy here in town."
—Swift.

2. **Guardianship, curateship.**

"By way of curacy and protectorship."—*North: Exam.*, p. 260.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

cūr-age, cūr-a-gle, cul-ra-ge (age as Ig), s. [**CURAGE**.] A plant, *Polygonum hydropiper*. (*Hollyband: Dictionary*, A. D. 1393.) (*Britten & Holland*.)

cūr-ā-nā, s. [A Guiana word (?)]

Timber traffic: The cedar wood of Guiana, *Iceia altissima*. [**CEDAR-WOOD**.]

cū-rār-I, cū-rā-rā, *ourari, curare, urari, woorara, woorali, *wourali, s. [A Guiana Indian word. In Fr. *curare*.]

Chem.: A resinous substance used by the Indians of South America for poisoning their arrows, said to be the aqueous extract of a climbing plant belonging to the genus *Strychnos*. It is a brown-black, shining, brittle, resinous mass, almost wholly soluble in water. It has a bitter taste, and burns with a yellowish-red flame, giving off disagreeable smelling vapors. It contains an alkaloid, curarine (q. v.). It is a deadly poison when introduced into the blood through a wound. It acts on the motor nerves, arresting their functions, while the sensorial nerves retain their activity. Death ensues from paralysis of the respiratory organs. Chlorine and bromine decompose curara and neutralize its poisonous action. Curara is said to contain no strychnine, and taken into the stomach, as it must be when game killed by the poisoned arrows is eaten, it produces no ill effects. (*Watts: Dict. Chem.*)

cū-ra-rine, s. [Fr. *curarine*, from *curari* (q. v.).]

Chem.: $\text{C}_{10}\text{H}_{15}\text{N}$. Curarine is obtained from curara resin. When pure it crystallizes in four-sided prisms. It is very soluble in water and alcohol, but is insoluble in anhydrous ether and in benzene. It forms crystalline salts. It is very poisonous, like curara. It gives a blue color with potassium dichromate and sulphuric acid. Curarine can be separated from strychnine by its insolubility in benzene.

cū-ras-sōw, s. [An American word (?)] The name given to a

large Gallinaceous Bird, *Craz alector*, more fully denominated in English the Crested Curassow. The upper parts are deep black, with a glow of green on various parts; the lower parts dull white, a color found also on the lower tail coverts. The Curassow is found in flocks in the forests of Mexico, Guiana, and Brazil. Its nest is composed of branches interlaced with the stalks of herbaceous plants, and lined with leaves; the eggs five, six, or eight.

"The sternum of *Columba coronata* resembles that of the curassow."—*Owen: Anat. of Vertebrates*, ch. xiii.

1. **Crested curassow**: [**CURASSOW**.]

(2) **Red curassow**: *Craz rubra*.

(3) **Red-knobbed curassow**: *Craz Yarellii*.

***curate** (1), ***curat** (1), ***curats**, ***curiet, s.** [**CURASS**.] A curass.

"His shield, his helmet, and his curats bare."
Spenser: *F. Q.*, VI. v. 8.

cūr-ate (2), ***cū-rat** (2), s. [Low Lat. *curatus* = one who is charged with the cura-i. e., with the cure or care of souls. In Ital. *curato*; Fr. *curé*.]

[**CURE**.]

Ecclesiol. & Ord. Lang.: The designation of an ecclesiastical functionary in the Church of England, whose position and functions have much varied in bygone times. The following have been the chief changes:

I. **Formerly**:

1. **Originally (in a general sense)**: Any one having cure of souls and of rank inferior to a bishop.

"Curate, a parson or vicar, one that serves a cure, or has the charge of souls in a parish."—*Phillips: The New World of Words*. (Trench.)

2. This meaning has left traces in the Liturgy, where prayer is made for "bishops, curates, and all congregations committed to their charge." When in Scotland during the period immediately preceding the revolution of 1688 episcopally ordained parochial incumbents existed, the people called them "curates," which was simply a survival of the original use of the word.

"About two hundred curates—so the episcopal parish priests were called—were expelled."—*Macaulay: Hist. Eng.*, ch. xiii.

2. **Next (in more special senses)**:

(1) An incumbent of a parochial church in which no arrangement was ever come to for the ordination of a vicar.

(2) The incumbent of a chapel founded after the parochial arrangement had been completed, and which consequently had not the privileges of a parish church.

3. The last two types of curates held perpetual curacies, and when a perpetual curacy is now held, the explanation of it is that given under 2 (1) or (2). [**PERPETUAL CURACY**.]

II. **Now**: The assistant to a rector or vicar; a minister temporarily officiating in the church instead of the proper incumbent.

1. **Perpetual curate**:

Ecclesiol. & Ord. Lang.: One holding a perpetual curacy; a curate not appointed by an incumbent as his assistant or removable at the pleasure of the former, but holding an unended or badly-endowed non-parochial charge. [**CURATE**, I. 2 (1), (2).]

cūr-a-tēl-lā, s. [From Gr. *kourenō*=to be a barber, *kourenus*=a barber, *keirō*=to shave, in allusion to the polishing effects of the leaves of one species. (See def.)]

Bot.: A genus of Dilleniaceae belonging to the tribe Delimeae. *Curatella Sanbaiba* is astringent. It is used in Brazil as a wash for wounds, and also for tanning purposes. The rough leaves of *C. americana* are used in Guiana for polishing.

***cūr-ate-ship, s.** [Eng. *curate*, and *ship*.] The office of a curate; curacy.

***cūr-at-ēs, s.** [Eng. *curat(e)*; -ess.] The wife of a curate.

"A curatess would be sure to get the better of me."—*Trollope: Barchester Towers*, ch. xxi.

***cūr-a-tion, *cūr-a-çion, s.** [Lat. *curatio*, from *curator*, pa. par. of *curo*=to take care of.] Cure, remedy, healing.

"... so vnskilful an opinion
That of thy wo nis no curacion."
Chaucer: *Troilus*, i. (Rich.)

cūr-a-tive, a. [Fr. *curatif*; Ital. *curativo*.] Relating to the curing or healing of diseases; tending to cure.

"There may be taken proper useful indications, both preservative and curative, from the qualities of the air."—*Arbuthnot*.

cūr-ā-tōr (Scotch), cūr-a-tōr, s. [Lat., from *curatus*, pa. par. of *curo*=to take care; Fr. *curateur*.]

I. **Ord. Lang.**: A person who has the care and superintendence of anything, as of a public library, a museum, a gallery of pictures, &c.

"... the society shall much stand in need of a curator of experiments."—*Boyle: Works*, vi. 147.

II. **Scots Law**:

1. A trustee for the carrying out of any purpose.

"The patronage ... was transferred to seven curators."—*Chambers: Encyclop.*

2. A guardian; a person duly appointed to manage the estate of any one who is not legally competent to manage it himself, as a minor, a lunatic.

"A minor cannot appear as a defendant in court, but by his guardian and curator."—*Ayliffe: Parergon*.

cūr-ā-tōr-ship, s. [Eng. *curator*; -ship.] The office of a curator. (*Ogilvie*.)

***cūr-ā-trix, s.** [Lat.]

1. A woman who cures or heals.

"That nature of Hippocrates, that is the curatrix of diseases."—*Cudworth: Intell. System*, p. 167.

2. A female curator.

cūrb, s. [**CURB**, v.]

A. **Ordinary Language**:

I. **Literally**:

1. In the same sense as B. 1.

"That trot became a gallop soon,
In spite of curb and rein."
Couper: *John Gilpin*.

2. In the same sense as B. 2.

II. **Fig.**: Anything which restrains or checks; a restraint, a check.

"... the curb of conscience snapped."
Couper: *Task*, ii. 571.

B. **Technically**:

1. **Harness**: A chain or strap behind the jaw of a horse, connected at its ends to the rings on the upper ends of the branches of a stiff-bit, and forming a fulcrum for the branches, which act as a lever. [**CURB-BIT**.]

2. **Paving**: The edge-stone of a sidewalk, or trot-toir; the kerb.

3. **Hydraulic Engineering**:

(1) A stoned or boarded structure around a well, to keep back the surrounding earth. Iron curbs are

constructed of boiler-iron or of cast-iron segments bolted together, rings being added at the top as the structure descends.

(2) A boarded structure to contain concrete, which hardens and acts as a pier or foundation.

(3) The outer casing-wheel of a turbine. It is a cylinder inserted into the floor of the forebay, inclosing the wheel which rotates within.

(4) A curved shrouding which confines the water against the floats or buckets of a Scoop-wheel or Breast-wheel (q. v.).

(5) The inclosure which leads water from a forebay to a water-wheel. Also called a Mantle.

4. Carpentry:

(1) The wall-plate at the springing of a dome.

(2) The circular plate at the top of a dome into which the ribs are framed.

(3) The wall-plate on the top of the permanent portion of a wind-mill, on which the cap rotates as the wind veers.

5. *Soap Manuf., &c.*: An inclined circular plate around the margin of a soap or salt kettle, to return what boils over.

6. *Civil Engin.*: A breast-wall or retaining wall to hold up a bank of earth.

7. *Farr.*: (For definition see extract.)

"There are often injuries to particular parts of the hock-joint. *Curb* is an affection of this kind. It is an enlargement at the back of the hock, three or four inches below its point. . . . It is either a strain of the ring-like ligament which binds the tendons in their place, or of the sheath of the tendons; oftener, however, of the ligament than of the sheath. Any sudden action of the limb of more than usual violence may produce it, and therefore horses are found to 'throw out curbs' after a hardly-contested race, an extraordinary leap, a severe gallop over heavy ground, or a sudden check in the gallop. . . . Curbs are generally accompanied by considerable lameness at their first appearance, but the swelling is not always great. They are best detected by observing the leg sideway."—*Youatt: The Horse*, p. 359.

curb-beam, *s.* A beam of a wooden bridge to confine the road material.

curb-bit, *s.*

Harness: A stiff-bit having branches by which a leverage is obtained upon the jaws of a horse. The lower end has rings or loops for the reins, and the upper end has loops for the curb-chain and the check-straps of the head-stall. The curb-chain has usually twisted links, is held fast by one end to the loop of the off branch, and is hooked to the loop of the near branch. It forms the fulcrum for the leverage of the branches. [*BIT.*] (*Knight.*)

curb-pins, *s. pl.*

Horol.: The pins on the lever of a watch-regulator which embrace the hair-spring of the balance and regulate its vibrations.

curb-plate, *s.*

Arch.: The wall-plate of a circular or elliptical dome or roof.

curb-roof, *s.*

Arch.: A roof with canted slopes; having two sets of rafters with different inclinations. Otherwise called a Mansard roof, after the French architect who frequently adopted it; or a gambrel-roof, from its crooked shape, like the hind leg of a horse.

curb-stone, *s.* A stone laid along the edge of a foot-path next the roadway, to keep up the material of the path, and to prevent vehicles from running on to it; a kerb-stone. [*CURB*, B. 2.]

Curb-roof.

cūrb, ***courb**, ***curbe**, *v. f. & i.* [*Fr. courber*=to bend, to bow; *Lat. curvo*, from *curvus*=curved, bent.]

A. Transitive:

I. Literally:

*1. To bend, to curve.

"Though the course of the sun be curbed between the tropics, . . ."—*Ray.*

2. To restrain or to keep in check with a curb.

"Part *curb* their fiery steeds, or shun the goal With rapid wheels, or fronted brigades form."—*Milton: P. L.*, ii. 531, 532.

3. To strengthen, confine, or maintain the shape of anything with a curb.

"The well at Southampton was curbed in this way."—*Knight: Pract. Dict. of Mechanics.*

II. Figuratively:

1. To restrain, guide, or keep in check; to keep back.

"Perhaps he had spurred his party till he could no longer curb it, and was really hurried on headlong by those whom he seemed to guide."—*Macaulay: Hist. Eng.*, ch. ii.

* It is sometimes followed by *from*.

"Yet you are curbed from that enlargement by The consequence of the crown."—*Shakesp.: Cymbeline*, ii. 3.

*2. To swindle, to rob.

"Though you can foyst, nip, hug, lift, curb."—*Greene: Thieves Falling Out* (1615).

*B. *Intrans.*: To bend, to give way, to keep back.

"Virtue itself of vice must pardon beg, Yea, curb and woo for leave to do him good."—*Shakesp.: Hamlet*, iii. 4.

* For the difference between *to curb* and *to check*, see *CHECK*.

cūr'-ba, *s.* [A native word.] An African measure, used for the sale of palm-oil, grain, &c. It varies from 7½ to 18 gallons.

***cūrb'-a-ble**, *a.* [*Eng. curb*; -able.] That may or can be curbed, restrained, or checked.

cūrbēd, *pa. par. or a.* [*CURB*, v.]

cūrb-ing, *pr. par., a. & s.* [*CURB*, v.]

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As substantive*:

I. Ordinary Language:

1. Literally:

(1) The act of restraining or keeping in check with a curb.

(2) In the same sense as II.

2. *Fig.*: The act of restraining or keeping in check; a restraint, a check.

" . . . the mind that is warping to vice, should not think much to be kept upright by the curbings and the strokes of adversity."—*Feltham*, pt. ii., *Resolve* 57.

II. Road-making: A curb, a curbstone.

***cūrb'-le**, *s.* [A dimin. from *curb*, *s.* (q. v.)] The mouth of a well.

" . . . pettecoats as big as a well's curb, . . ."—*Five Strange Wonders of the World*, (Nares.)

***cūrb'-less**, *a.* [*Eng. curb*; -less.] Without any curb, check, or restraint.

"That beck itself was then a torrent, turbid and curb-less."—*C. Brontë: Jane Eyre*, ch. ix.

***cūrb'-lēt**, *s.* [*Eng. curb*; dimin. suff. -let.] A little curb.

"I sprang from my horse and tied the steed With silver curblet to a tree."—*Sir J. Bowring: The Strawberries*.

cūr'-cas, *s.* [*Etym. doubtful.*]

Bot.: A genus of Euphorbiaceæ, tribe Crotonææ. It was formerly merged in *Jatropha*, but it has a bell-shaped corolla, while *Jatropha* has one with distinct petals. *Curcas purgans* is what was formerly called *Jatropha curcas*. It is a large bush or a small tree, a native of the hotter parts of, but cultivated elsewhere in, the tropics. The seeds are called Purging-nuts. An oil pressed from them is of use in itch and herpes, and when diluted it has been helpful in chronic rheumatism. The oil, boiled with oxide of iron, makes a good varnish, used by the Chinese for covering boxes. Similarly the milky juice of the plant dyes linen black, and makes good marking-ink. The leaves are rubefacient and discutient. *Curcas multifidus*, a South American plant, now by some removed from the genus, yields a purgative oil called Pinhoen. (*Lindley, &c.*)

curch, *s.* [*KERCHIEF.*] A covering for a woman's head; a kerchief.

"Her house sæc bien, her *curch* sæc clean, I wat she is a dainty chucky."—*Burns: Lady Onlie*.

***cur'-cheff**, *s.* [*KERCHIEF.*]

curch'-ie, *s.* [*CURTSY.*] A courtesy or curtsy.

"An' wi' a *curchie* low did stoop, As soon as e'er she saw me."—*Burns: Holy Fair*.

cūr-cūl'-i-cō, *s.* [From *Lat. curculio*=a weevil, a process upon the seeds of this genus resembling a weevil's projecting rostrum or snout.]

Bot.: A genus of Hypoxidacææ. The roots of *Curculigo orchioides* are somewhat bitter and aromatic, and are used in the East in gonorrhœa. The tubers of *C. stans* are eaten in the Marianne Islands.

cūr-cū'-il-ō, *s.* [*Lat.*=a corn-worm, a weevil.]

Entomology:

*1. A genus of insects founded by Linneus. It included all insects which had a prominent rostrum or beak, with the antennæ subclavate and inserted upon it. In the *Systema Naturæ* 95 species are enumerated. The genus is nearly identical with the modern family of Curculionidæ, which is a very large one. The beetles contained in it are popularly called Weevils. [*WEEVIL.*]

2. The genus, now much restricted, is the type of the family Curculionidæ. *Curculio imperialis* is the Diamond Beetle, so called from the splendor of its colors. It is brought from Brazil.

curculio trap, *s.* A tray, or a cincture of fiber, attached to the trunk of a plum, apricot, or other curculio-ravaged tree, to intercept the insects which climb up the bark.

cūr-cū'-il-ōl-dēs, *s.* [*Lat. curculio*=a beetle, an | *Gr. eidos*=form.]

Palæont.: A genus of fossil Beetles, doubtfully akin to Curculio. It is from the Carboniferous rocks.

cūr-cū'-il-ōn'-i-dæ, *s. pl.* [*Lat. curculio* (genit. *curculionis*), and suff. -idæ (q. v.).]

1. *Entom.*: A large family of insects, tribe Tetramera, sub-tribe Rhynchophora (Snout-bearing Insects). Or they may be called, as Stephens does, section and sub-section. The rostrum is thick, rounded, and frequently very long, the antennæ clavate, with from 9-12 joints, the basal one so much elongated as sometimes to be equal to all the rest united; these stand to it in certain cases at a right angle. The species are very numerous; some are beautifully colored. They are all vegetable feeders. Some are destructive to grain. The larvae are somewhat elongate, linear, with the extremities acute, the head scaly, and the body furnished with tubercular projections in place of legs. They are popularly called Weevils. (*Stephens, &c.*)

2. *Palæont.*: For doubtful remains of the family from the Carboniferous rocks, see CURCULIOIDES. Genuine Curculionidæ are believed to occur in the Lias. There are some also in rocks doubtfully regarded as of Eocene age at Taklee, near Nagpore, in Central India.

cūr-cū'-il-ōn'-i-dēs, *s. pl.* [*Lat. curculio* (genit. *curculionis*)=a beetle, and fem. pl. adj. suff. -ides.]

Entom.: The equivalent in the classification of Schoenherr of the family Curculionidæ. He makes it a much higher designation, and proposes numerous divisions and sub-divisions.

cūr-cū-ma, *s.* [From Arab. *curcum*, the name of the turmeric plant. (See def.)]

Bot.: A genus of Zingiberaceæ (Gingerworts). *Curcuma longa* is the turmeric plant. The corn is about as thick as the thumb, and is divided into several parts. The leaves, which are about a foot long, are lanceolate in form and sheathing. The flowers are in terminal spikes, bracteate, with a pale yellow flower in the axil of each bract. It is extensively cultivated in Bengal. The tuberos rhizomes furnish the substance called Turmeric (q. v.). The "root" or rhizome of *C. zedoaria* (*Alpinia racemosa*) and *C. zumbet* (*A. galanga*) are aromatic and stimulating. The starch of *C. rubescens*, *C. angustifolia*, and some other Asiatic species constitute East Indian arrowroot.

curcuma-paper, *s.* [*TURMERIC PAPER.*]

cūr-cū'-mīn, *s.* [*Low Lat. curcum(a)*, and *Eng. suff. -in* (*Chem.*) (q. v.).]

Chem.: $C_{14}H_{14}O_4$. The coloring matter of turmeric (q. v.). Curcumin is very soluble in alcohol and in ether. It is best extracted by boiling the rhizome with benzene. It forms orange-yellow crystals, which melt at 177°. It dissolves in alkalies, forming a brown-red solution. Boric acid solution gives an orange color with a solution of curcumin, which is not altered by dilute acids, but alkalies turn it blue, which soon changes into a dirty gray. Hot nitric acid oxidizes curcumin into oxalic acid; chromic acid mixture converts it into terephthalic acid.

cūrd, ***crod**, ***crodde**, ***crudde**, *s.* [*Ir. cruth*, *gruth*, or *groth*; *Gael. cruth.*]

I. Literally:

1. The coagulated or curdled part of milk, which is generally made into cheese, but is in some countries eaten as common food.

"A few *cruddes* and creme and an haver cake."—*P. Plowman*, 4, 365.

2. The coagulated part of any liquid.

*II. *Fig.*: Sourness.

"Their acrid temper turns, as soon as stirred, The milk of their good purpose all to curd."—*Cowper: Charity*, 603, 504.

curd-breaker, *s.* A frame of wires or slats which is worked to and fro in a vat of cheese-curds, to break the latter into small pieces and enable the whey to drain off. A curd-cutter. (*Knight.*)

***curd-cake**, *s.* A delicacy of the table in former times. (See example.)

"To make *curd-cakes*—Take a pint of curds, four eggs, leaving two of the whites; add sugar and grated nutmeg, with a little flower; mix them well, and drop them like fritters in a frying-pan, in which butter is hot."—*Closet of Rarities* (1706). (Nares.)

curd-cutter, *s.*

1. A spindle with revolving knives on an axle, for cutting the curd to expedite the separation of the whey.

2. A hoop with a diametric knife having an arched stem and wooden handle. It is used by an up-and-down motion, the curd being in a tub. (*Knight.*)

bōil, bōy; pōut, jōwl; cat, cell, chorus, ghin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph=f. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -die, &c. = bel, del.

*cûrd, *crudden, *cruddyn, v. r. & i. [CURD, s.]

A. Transitive:

1. Lit.: To form into curds; to curdle.

"As choose thou hast crudded me."—Wycliffe: Job x. 10.

2. Fig.: To cause to coagulate; to curdle; to congeal.

"Maiden, does it curd thy blood,
To say I am thy mother?"

Shakespeare: All's Well, i. 3.

B. Intrans.: To curdle; to become coagulated or congealed.

cûrd-êd, pa. par. or a. [CURD, v.]

*cûrd-i-nêss, s. [Eng. curdy; -ness.] The quality or state of being curdy or curdled.

cûrd-le, v. t. & i. [A frequent. from curd, v. (q. v.)]

A. Transitive:

1. Lit.: To curd, to form into curds; to coagulate, to thicken.

"There is in the spirit of wine some acidity, by which brandy curdles milk."—Floyer.

II. Figuratively:

1. To coagulate, to congeal, to cause to run slowly.

"But my chill blood is curdled in my veins,
And scarce the shadow of a man remains."

Dryden: Virgil's Æneid.

*2. To condense, to congeal.

"... in itself a thought,
A slumbering thought, is capable of years,
And curdles a long life into one hour."

Byron: The Dream, i.

B. Intransitive:

1. Lit.: To become curdled or curdled; to coagulate.

"Sip round the pail, or taste the curdling cheese."
Thomson: Summer, 263.

II. Figuratively:

1. To become congealed; to run slowly.

"Fancy shrinks,
And the blood thrills and curdles at the thought
Of such a gulf as he design'd his grave."

Cooper: Task, vi. 512-14.

*2. To creep slowly and coldly.

"An icy sickness curdling o'er
My heart, ..."—Byron: Mazeppa, xviii.

*cûrd-le, s. [CURDLE, v.] A curd, a coagulation.

"There is a kind of down or curdle on his wit."—Adams: Works, i. 601.

cûrd-lêd, pa. par. or a. [CURDLE, v.]

C. Assubst.: The act or process of curdling or coagulating; the state or condition of becoming curdled or congealed.

*cûr-dôo, v. i. [Icel. kyrra=to calm, soothe, and doo=a pigeon.] To make love.

"She frequently chided Watty for neglecting the dinner hour, and 'curdooning,' as she said, 'under cloud of night.'"—The Entail, i. 247.

cûrd-wôrt, s. [CRUDWORT.]

cûrd-ÿ, a. [Eng. curd; -y.] Full of curds; coagulated, curdled, congealed.

"... coagulating into a curdy mass with acids."—Arbuthnot: On Aliments.

*cûrd-ÿ, s. t. [CURDY, a.] To congeal.

"... chaste as the icicle
That's curdled by the frost from purest snow."

Shakespeare: Coriolanus, v. 3.

cûre (1), s. [Fr. cure; Sp., Port. & Ital. cura, from Lat. cura=care, cure. It is wholly unconnected with care (q. v.).]

1. Care, attention, concern, regard.

"If that he wol take of it no cure."
Chaucer: Troilus, ii. 283.

*2. Affection, regard.

"Thou woldest sette al thi cure and thi love in him."—Gesta Romanorum, p. 167.

*3. A charge, superintendence, or management.

"Tonatas toke in cure of the forest."—Gesta Romanorum, p. 148.

4. Spec.: A charge or care of the spiritual welfare of people; a care of souls.

"... had obtained a cure, and had died in the performance of the humble duties of a parish priest,"—Macaulay: Hist. Eng., ch. xvi.

5. The act of healing or curing.

"I do cures to-day, and to-morrow."—Luke xiii. 32.

6. A method or system of curing or treating disease.

7. A remedy, a restorative; a preparation or medicine intended or calculated to cure or heal.

"Of surgerie he knewe the cures."

Gower: Con. Amantia, bk. vi.

8. Anything which acts as a remedy or restorative.

"That Scripture is the only cure of woe."

Cooper: Truth, 452.

9. The state of being cured, healed, or restored to health.

Crabb thus discriminates between cure and remedy: "Cure denotes either the act of curing, or the thing that cures. Remedy is mostly employed for the thing that cures. In the former sense the remedy is to the cure as the means to the end; a cure is performed by the application of a remedy. That is incurable for which no remedy can be found; but a cure is sometimes performed without the application of any specified remedy. The cure is complete when the evil is entirely removed; the remedy is sure which by proper application never fails of effecting the cure. A cure is sometimes employed for the thing that cures, but only in the sense of what infallibly cures. Quacks always hold forth their nostrums as infallible cures, not for one, but for every sort of disorder; experience has, however, fatally proved that the remedy in most cases is worse than the disease." (Crabb: Eng. Synon.)

*cûre (2), *kîre, s. [A. S. cýre.]

1. Choice, pick.

"Ten thousand monnen . . . thet wes the beyste cure of al Brutlonde."—Layamon, i. 345.

2. A wish.

"Efter cure heo him yenen threo hundred yisles."—Layamon, i. 263.

3. A custom.

"Ebrisse fole adden an kîre."

Genesis and Exodus, 2,451.

cûre (3), s. [Fr. curé.] A clergyman, a curate, a parson.

cûre, *curen, v. t. & i. [Lat. curo=to take care for, to cure.]

A. Transitive:

*1. To take care of, to busy one's self about.

"Men dredeful curiden or biriden Stheue."—Wycliffe: Deeds, viii. 2.

*2. To heal, to restore to health, to free from disease.

"If Peter and John cured the lame man by the strength of imagination . . ."—Stillingfleet, vol. i, Ser. 9.

*3. To heal, to make sound or whole.

"... all contusions of bones, in hard weather, are more difficult to cure."—Bacon: Natural History.

*4. To remove by the application of remedies.

"He . . . gave them power to cure diseases."—Luke ix. 1.

*5. To remedy, to correct.

"... thinks to cure his evil nature, . . ."—Bp. Taylor, vol. i, Ser. 10.

*6. To prepare for preservation; to persevere, to pickle.

"The beef would be so ill chosen, or so ill cured, as to stink many times before it came so far as Holland."—Temple.

(1) To cure by verdict:

Law: After a cause has been sent down to trial, the trial had, and the verdict given, the Court overlooks defects in the statement of a title which would be fatal on a demurrer, or if taken at an earlier period: this is what is called to cure by a verdict. (New Law Dict.)

(2) To cure a person of a thing:

(a) Lit.: To heal or free from a disease.

(b) Fig.: To correct a habit or practice; to cause one no longer to have a taste for something.

*B. Intransitive:

1. To take care; to strive.

"Bisyll cure or hepe for to yvye thi self prounable."—Wycliffe: 2 Timothy ii. 15.

2. To effect a cure, to heal.

"... like to Achilles' spear,
Is able with the change to kill and cure."

Shakespeare: Henry VI., Pt. II., v. 1.

3. To be cured or healed; to heal.

"One desperate grief cures with another's anguish."

Shakespeare: Romeo and Juliet, i. 2.

Crabb thus discriminates between to cure, to heal, and to remedy: "To cure is employed for what is out of order; to heal for that which is broken; diseases are cured, wounds are healed; the former is a complex, the latter is a simple process. Whatever requires to be cured is wrong in the system; it requires many and various applications internally and externally; whatever requires to be healed is occasioned externally by violence, and

requires external applications. In a state of refinement men have the greatest number of disorders to be cured; in a savage state there is more occasion for the healing art. Cure is used as properly in the moral as the natural sense; heal in the moral sense is altogether figurative. The disorders of the mind are cured with greater difficulty than those of the body. The breaches which have been made in the affections of relatives toward each other can be healed by nothing but a Christian spirit of forbearance and forgiveness. Remedy is used only in the moral sense, in which it accords most with cure. Evils are either cured or remedied, but the former are of a much more serious nature than the latter. The evils in society require to be cured; an omission, a deficiency, or a mischief requires to be remedied." (Crabb: Eng. Synon.)

cure-all, s. A plant, Geum rivale.

cûred, pa. par. or a. [CURE, v.]

cûre-lêss, a. [Eng. cure; -less.] Without cure or remedy; that cannot be cured.

"To inflict a cureless wound."

Byron: Fare Thee Well.

cûr-êr (1), s. [Eng. cur(e); -er.] One who cures or heals; a healer.

*cûr-er (2), s. [COVERER.] A cover, a dish.

"With all cures of cost that eukis could kyth."—Houlate, iii. 6.

cu-rêtte, s. [Fr.]

Sing.: An instrument shaped like a scoop, used for removing any matter that may be accumulated in a tumor, wound or ulcer.

cûr-few (ew as û), *cor-fu, *cor-fur, *cur-phour, s. [Fr. couvre-feu=cover-fire, from couvrir=to cover, and feu=fire, from Lat. focus=a hearth.]

1. Ordinary Language:

1. In the same sense as II.

"This is the foul fiend Flibbertigibbet: he begins at curfew, and walks till the first cock."—Shakespeare: Lear, iii. 4.

2. A bell still rung in England and other countries in continuation of the ancient custom, but without retaining its meaning.

"Rang out the hour of nine the village curfew, and straightway
Rose the guests and departed; and silence reigned
In the household."

Longfellow: Evangeline, i. 3.

*3. A cover for a fire; a fire-plate.

"But now for pans, pots, curfews, counters, and the like, . . ."—Bacon.

II. Feudal Law: A bell rung every evening as a signal to the people to extinguish all fires and retire to rest. It was introduced into England by William the Conqueror, most probably as a safeguard against fire, but it was regarded by the English as a badge of servitude. The original time for ringing it was eight o'clock P. M., but in the Merry Devil of Edmonton it is represented as being rung an hour later:

"Well, 'tis nine o'clock, 'tis time to ring curfew."—O. Play, v. 292.

From the following passage in Romeo and Juliet (iv. 4), it seems that the bell which was commonly used to ring the curfew obtained in time the name of the curfew-bell, and was so called whenever it was rung on any occasion:

"Come, stir, stir, stir! the second cock hath crowed;
The curfew-bell hath rung, 'tis three o'clock."

In a few places in England the custom is still kept up of ringing a bell at nine o'clock P. M., and the old name is retained.

curfew-knoll, s. The sound of the curfew-bell.

"... the curfew-knoll

That spake the Norman conqueror's stern behest,"

Wordsworth: Excursion, bk. viii.

cûr-fûf-fle, s. [CURFUZZLE, v.] A ruffled, rumpled, disordered, or tumbled state; agitation, tremor.

"... an he puts himself into sic a curfuffle for any thing you could bring him, Edie."—Scott: Antiquary, ch. xix.

cûr-fûf-fle, v. t. [FUZZLE, v.] To put in a disordered, ruffled, or rumpled state; to agitate, to disturb.

"His ruffe curfuffled about his craig."

Legend Bp. St. Androis, Poems 16th Cent., 327.

cûr-i-a (pl. curiæ), s. [Lat.]

1. Roman Antiquities:

(1) One of the sub-divisions of the Roman people, as instituted by Romulus, there being three tribes, and each tribe being divided into ten sections or curiæ. The members of each curia were called in reference to each other curiales; each had its own chapel, its own place of meeting called curia, its own priest, called Curio or Flamen Curialis, who

"There hath been practiced also a *curiositas*, to set a tree upon the north side of a wall, and at a little height, to draw it through the wall, and spread it upon the south side."—*Bacon: Natural History*.

6. An object of curiosity; a rarity; something strange, rare, or curious; something deserving of being seen or preserved.

"He has, likewise, a complete service of Corinthian metal, which though he admire as a *curiositas*, is far from being his passion."—*Melmoth: Pliny*, iii. let. 1.

7. A strange or curious personage; a character. (Colloquial.)

**cūr-i-ō-gō*, *s.* [Ital.] A virtuoso; a collector of curiosities.

"Dr. J. Wilkins, warden of Wadham college, the great *curioso* of his time."—*Life of A. Wood*, p. 112.

**cūr-i-ōūs*, *v. i.* [CURIOUS, *a.*] To work curiously or elaborately.

"When some artist *curiously* upon it."

Sylvestre: Magnificence, p. 920.

**cūr-i-ōūs*, *a.* [O. Fr. *curios*, *curiosus*, *curius*; Fr. *curieux*; Sp., Port. & Ital. *curioso*, from Lat. *curiosus*=careful; *cura*=care.]

I. Of persons:

*1. Careful, anxious, concerned, eager.

"That ben ful busy and *curious*

For to dispresen that best deservyn love and name."

Romaunt of the Rose, 1,052, 1,053.

2. Inquisitive; strongly desirous to see or know something new, strange, or extraordinary; prying.

"... he must take care not to be too *curious*."—*B. Jonson: Discoveries*.

3. Given to research or investigation.

"... one of the *curiousest* and most observing makers of steel tools."—*Bayle: Works*, iii. 413.

"It is sometimes followed by *aff'r*, *in*, or *of* before the object of research or inquiry.

"... a gentleman so very *curious* after things that were elegant and beautiful."—*Woodward*.

*4. Accurate, exact, careful, precise, scrupulous.

"... men were not *curious* what syllables or particles of speech they used."—*Hooker*.

*5. Nice, fastidious, hard to please, anxious.

"A temperate person is not *curious* of fancies and deliciousness."—*Taylor*.

6. Extraordinary, remarkable, out of the common, strange.

II. Of things:

1. Inquisitive; searching.

"The *curious* search of Euryclen's eye."

Pope: Homer's Odyssey, xix. 469.

2. Disposed strongly to research or investigation.

"... a quarry, to the *curious* flight

Of knowledge, half so tempting or so fair,

As man to man."

Akenside: Pleasures of Imagination, iii.

*3. Exact, nice; made or done with care and skill; elegant.

"And the *curious* girdle of the ephod, which is upon it, shall be of the same, according to the work thereof; even of gold, of blue, and purple, and scarlet, and fine twined linen."—*Exod.* xxviii. 8.

*4. Over-nice, fastidious, or particular.

"By what strange parallax, or optic skill

Of vision, multiplied through air, or glass

Of telescope, were *curious* to inquire."

Milton: P. R., iv. 40-42

*5. Exact, particular, scrupulous.

"Each ornament about her seemly lies,

By *curious* chance, or careless art, compos'd."

Fairfax.

*6. Nice, subtle, refined.

"... a more *curious* discrimination."—*Holder*.

7. Strange, rare, remarkable, extraordinary, worthy of note.

"It is a *curious* fact."—*Macaulay: Hist. Eng.*, ch. xv.

"Crabb thus discriminates between *curious*, *inquisitive*, and *prying*: "The disposition to interest one's self in matters not of immediate concern is the idea common to all these terms. *Curiosity* is directed to all objects that can gratify the inclination, taste, or understanding; *inquisitiveness* to such things only as satisfy the understanding. The *curious* person interests himself in all the works of nature and art; he is *curious* to try effects and examine causes; the *inquisitive* person endeavors to add to his store of knowledge. *Curiosity* employs every means which falls in its way in order to procure gratification; the *curious* man uses his own powers or those of others to serve his purpose; *inquisitiveness* is indulged only by means of verbal inquiry; the *inquisitive* person collects all from others. A traveler is *curious* who examines everything for himself; he is *inquisitive* when he minutely questions others. *Inquisitiveness* is therefore to *curiosity* as a part to the whole; whoever is *curious* will naturally be *inquisitive*, and he who is *inquisitive* is so from a species of *curiosity*. *Curious* and *inquisitive* may be both used in a bad sense; *prying* is never used otherwise than in a bad sense. *Inquisitiveness*, as in the former case, is a mode of *curiosity*, and *prying* is a species of eager *curiosity*. A *curious* person takes unallowed means of learning that which he ought not to know; an *inquisitive* person puts many impertinent and troublesome questions; a *prying* temper is unceasing in its endeavors to get acquainted with the secrets of others. *Curiosity* is a fault common to women; *inquisitiveness* is most general among children; a *prying* temper belongs only to people of low character." (Crabb: *Eng. Synon.*)

cŭr-rant (pl. **currants**, *coraunce, *corouns), s. & a. [A corruption of *Corinthe*, in the French term *raisins de Corinthe*, i. e., of the city of Corinth; Lat. *Korinthos*; Gr. *Korinthos*. (Trench, *Skeat*, &c.)]

A. As substantive:

1. (Originally): The dried currants of the shops. These are not, like No. 2, derived from the genus *Ribes*, but are the fruit of a small grape cultivated in what was the ancient Ithaca (the island of Ulysses), at Patras in the Morea, in Zante, Cephalonia, &c. Currants in this sense were introduced into England in the sixteenth century, under the name of Corinthes.

1. Flower. 2. Petal. 3. Fruit.

2. The name given to a number of shrubs, placed in the genus *Ribes*, and by De Candolle in the sub-genus *Ribes*. About forty so-called species are known, many of them doubtless mere varieties of others. It is a remarkable fact that though the currant grows in Greece, and must have attracted notice, allusions to it in the Greek and Roman writers have not been found, and if existent must be few. [RIBES.]

B. As adj.: Pertaining to the currant; made of or resembling currants, &c.

(1) **Red Currant, Common Red Currant:** *Ribes rubrum*, a well-known garden shrub in various respects resembling its ally the Black Currant, but having red fruit. It is found apparently wild in mountainous districts in the northern parts of this country, in Scotland and the North of England, as well as in the North of Continental Europe, and in Siberia.

(2) **Red-flowered Currant, or Bloody Currant:** An ornamental species with large racemes of deep rose-colored flowers, and bluish-black berries. It is indigenous to the northwest coast of this country.

(3) **Hawthorn Currant-tree:** *Ribes oxycanthoides*, indigenous to Canada and the Northern States.

(4) **Golden-flowered Currant:** *Ribes aureum*, another American species.

(5) **Dark Purple-flowered Currant:** A species of currant wild on the Altai Mountains, and the mountainous regions near the Ural river.

(6) **Bloody Currant:** The same as Red-flowered Currant (q. v.).

(7) **Indian Currant:** *Symphoricarpos vulgaris*.

(8) **Black Currant:** *Ribes nigrum*. The leaves have a strong smell. Calyx of a rich brownish-red or pink color; corolla whitish or yellowish-green; stamens normally five; berries black; they are tonic and stimulating. The black currant is found at large, but probably not really wild, in Britain, besides which it is found in Sweden and the North of Russia, and in the South of Europe, though there more sparingly. It is found also in the Caucasus and in Siberia.

(9) **Australian Currant:** *Leucopogon richiei*. (Treas. of Bot.)

(10) **Tasmanian Currant:** A name given to various shrubs of the cinchonaceous genus *Coprosma*.

(11) **White Currant:** A variety of red currant.

*5. General esteem or estimation; the nominal value of a thing.

" . . . takes greatness of kingdoms according to their bulk and currency, and not after intrinsic value."—*Bacon*.

*6. A right or claim to circulation; value as a medium.

" . . . 'tis the receiving of them by others, their very passing, that gives them their authority and currency."—*Locke: Second Reply to the Bishop of Worcester*.

II. Technically:

1. **Comm.:** The current money or circulating medium of a country, whether in coin or in paper.

"If both gold and silver are used simultaneously as a currency, the proportionate amount of labor required to produce each cannot . . . be disturbed."—*Rogers: Polit. Econ.*, ch. iii.

¶ (1) **Metallic currency:** The gold, silver, nickel, and copper coin in circulation in any country. But for these three latter aids to circulation the metallic currency would fall far short of the necessities of the country. In the United States, England, and France bronze coin is used instead of copper. Nickel minor coins, 25 per cent. nickel and 75 per cent. copper, are used in Belgium, Switzerland, Germany, and the United States. Coins of platinum have been used in Russia. The relation between metallic and paper currency and various intricate questions thence arising have long occupied the attention of political economists. In the United States the dollar is the unit of value. It consists of either gold or silver. The gold dollar contains 23.22 grains of gold and 2.58 grains of alloy, having a total weight of 25.8 grains, nine-tenths fine. The silver dollar contains 371.25 grains of silver and 41.25 grains of alloy, having a total weight of 412.5 grains.

(2) **Paper currency:** Bank-notes, bills of exchange, or checks, which circulate as substitutes or representatives of coin.

cŭr-rant, *cŭr-rant, *cur-raunt, a. & s. [O. Fr. *curant*; Fr. *courant*, pr. par. of O. Fr. *curre*=to run; Fr. *courir*; Lat. *currrens*, pr. par. of *curro*.]

A. As adjective:

1. **Lit.:** Running, flowing.

"Current water is opposed to stagnant water, and commonly used to express the motion of water in rivers produced by the continuous but varying inclination of the bed of the streams."—*Pen. Cycl.*, vii. 235.

2. Figuratively:

(1) Passing at the present time; not yet past.

"The Lords continue the diet against the pannel till the twenty-ninth day of April current."—*Scintion: Trial of Will. Humphreys* (1839), p. 46.

(2) Done or written at the time; contemporary.

" . . . the current histories of those times."—*Swift*.

(3) In accord or agreement; running on all fours with.

" . . . in terms current with the forms of their state,"—*Sir W. Temple: To Arlington* (Sept. 1688).

(4) Flowing, moving easily.

"What shall I name these current traverses, That on a triple dactyl foot do run?"—*Davies: Orchestra*, lxi.

(5) Circulatory; in circulation.

" . . . four hundred shekels of silver, current money with the merchant."—*Gen.* xxi. 16.

(6) Generally received, acknowledged, or credited; authoritative.

" . . . whatsoever they utter passeth for good and current."—*Hooker*.

(7) In general circulation amongst the public; common, general; having currency.

" . . . we had a current report of the king of France's death."—*Addison*.

(8) In general or common estimation; nominal.

" . . . that is a man's intrinsic, this, his current value . . ."—*Grew: Cosmologia Sacra*.

(9) In general use or practice; popular, general.

"Oft leaving what is natural and fit, The current folly proves our ready wit."—*Pope: Essay on Criticism*, 448, 449.

* (10) Such as may be admitted or accepted; admissible.

"The ill we're His person had put on, transformed him so, That yet his stamp would hardly current go."—*Chapman: Homer's Odyssey* xxiii.

* (11) Authentic, genuine, sterling.

"O Buckingham, now do I play the touch, To try if thou be current gold indeed."—*Shakespeare: Richard III.*, iv. 2.

* (12) True; in force.

"It holds current that I told you yesternight."—*Shakespeare: Henry IV.*, Pt. I., ii. 1.

II. Comm.: Insured by authority and in general circulation.

" . . . the foresaid money to ronne and be curraunt through the cytie."—*Fabian: John* (an. 7).

B. As substantive:

I. Ordinary Language:

1. Literally:

(1) A flowing, running, or passing; a stream.

"Also if there cometh any whale within the current of the same, they make a pitiful crie."—*Hæckluyt: Voyages*, vol. i., p. 311.

(2) A stream or body of water, air, &c., moving in a certain direction.

"The current, that with gentle murmur glides."—*Shakespeare: Two Gentlemen of Verona*, ii. 7.

2. Figuratively:

(1) A course, movement, or progression; as, the current of time.

(2) A connected series or course; as, the current of events.

(3) The general or main course, direction, or inclination.

" . . . the same current of ideas respecting antiquity which causes Virgil to be regarded as a magician by the Lazaroni of Naples . . ."—*Scott: Thomas the Rhymer*, pt. ii. (Introductory Note).

* (4) A movement, direction, or carrying to a place.

" . . . drew on a resurprise of the castle, a recovery of the town, and a current of the war even into the walls of Sparta."—*Bacon*.

II. Technically:

1. Hydrol., Physical Geog., &c.:

(1) **River currents:** Rivers have currents varying in strength, chiefly according to the inclination of the bed down which they flow.

(2) **Sea currents:** There are currents in the sea vastly broader than any existing even in the largest rivers, while the length is indefinite, for each is so connected with all the rest that the whole surface waters of the ocean resemble a very much curved and contorted chain, which, notwithstanding the excessive irregularity of its figure, so moves as perpetually to return into itself. In the Atlantic the chief currents were long held to be, first, the Gulf-stream, from the Gulf of Mexico in a northeasterly direction, a branch ultimately reaching the Azores and another the British Islands. This current was counterbalanced by a Polar one moving southwestward and carrying escaped icebergs in the direction of America. The Gulf-stream was partly fed by the Equatorial current, running from the coast of Africa to the Caribbean Sea. But Dr. Carpenter has shown that not merely the Gulf-stream, but a great part of the surface of the Atlantic, is moving northward. [GULF-STREAM.] An Antarctic drift current originates a great Equatorial current in the Pacific Ocean, which flows north around the western shores of South America, and then west through the Pacific, filling the entire tropics. Strong land currents sweep from it round East Australia, through the China Seas, and by the coast of Japan.

The movement of currents from warmer or colder regions, or *vice versa*, modifies the temperature of the several regions through which they pass. Thus the Equatorial current, which crosses from Africa to Brazil and the Caribbean Sea, being 3° or 4° cooler than the ocean at the equator, diminishes the heat of the latter region. The Gulf-stream, on the contrary, brings with it heat, the temperature of the Mexican Sea being 7° above that of the Atlantic in the same latitude.

Among the causes of currents on a greater or less scale may be enumerated the winds, the tides, the evaporation produced by solar heat in certain places, and the expansion and contraction of water by heat and cold.

2. **Geol.:** The effects of currents in rivers and those in the ocean are the same. They waste away the land, and transport detritus to greater or less distances. They also deposit strata. They transport the seeds of plants from region to region, thus diffusing algae, it is believed, from the Antarctic to the Arctic ocean.

3. **Navig.:** A flow or stream of a body of water, more or less rapid, by which vessels are compelled to alter or modify their course or velocity, or both, according to the set or drift of the current.

bŏl, bŏy; pŏut, jŏw!; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shin; -tion -sion = zhŭn. -tious, -cious, -sious = shŭs. -ble, -dle, &c. = bel, del.

4. *Elect.*: The passage of electricity from one pole of a battery, pile, coil, &c., to the other. The investigation of the laws regulating the attraction and repulsion of electric currents by other currents of the same kind, or their operation upon magnets, constitutes the science of electrostatics, that of electricity in motion—as opposed to electrostatics, electricity at rest. The numerous phenomena connected with the former science can be explained by carrying out to their remote consequences the two following simple laws: (1) Two currents which are parallel and in the same direction attract one another; two currents parallel but in contrary directions repel one another. The word *current* is used also in connection with electrostatics. (See the example.)

"In electrostatics, the numerical value of a *current* (or the strength of a *current*) is the quantity of electricity that passes in unit time."—Everett: *The C. G. S. System of Units* (ed. 1875), ch. xi., p. 65.

5. *Build.*: The fall or slope of a platform or sheet-metal roof, to carry off the water. Gutters usually have a current of a quarter-inch to the foot.

¶ The technical language in which the flow of water and its channels are known and described is as follows: The bed is the water-course, having a bottom and two sides or shores. When the latter are described as right or left hand, going down stream is assumed. The transverse section is a vertical plane at right angles to the course of the current. The perimeter is the length of this section in the bed. The longitudinal section or profile is a vertical plane parallel to the course of the flowing water. The slope or declivity is the mean angle of inclination of the surface of the water to the horizon. The fall is the difference in the height at any two points of determinate distance apart, as, for instance, eight inches to the mile. The line of current is the direction of maximum velocity. The mid-channel is the deepest part of the bed. The velocity is greater at the surface than at the bed. The surface is higher in the current than at the shore when the river is rising, lower than at the shore when the river is falling. The direction is the set of the current; the rate is the drift of the current. (*Knight*.)

current-fender, s. A structure to ward off the current from a bank which it may otherwise undermine.

current-gauge, s. [*CURRENT-METER.*]

current-meter, s.

Civil Engin.: An instrument for measuring the velocity of currents.

(1) The Pilot tube, which acts by the ascension of water in a bent pipe whose lower orifice is presented squarely to the current, the indication being read by a float or graduation in or upon the vertical part of the tube.

(2) One which acts as a dynamometer, by opposing a resisting body to the action of the current, and indicating the force of the action by a dial or graduated bar. This is Boileau's.

(3) The dynamometer current-gauge of Woltmann, 1790, is a light water-wheel operated by the current, and having on its axis an endless screw, which operates toothed wheels and a register, the rate or force being deduced from the rotations in a given time.

current-mill, s. A mill driven by a current-wheel, and usually on board a moored vessel with steam-driven paddles. The first notice of current-mills is the account of the recourse had to them by Belisarius, A. D. 536, when the Romans were besieged by Vitiges the Ostrogoth, who had cut the fourteen aqueducts which brought water to the imperial city. The surplus water of the aqueducts drove the grain-mills of the city, and the recourse had by Belisarius to moored twin-vessels provided with paddles, and the mills, enabled the people to eat bread instead of parched wheat and frumenty.

current-regulator, s.

Telegraphy.: A device for determining the intensity of the current allowed to pass a given point. It usually consists of interposed coils of greater or less resistance.

current-wheel, s. The current-wheel is perhaps the first application of the force of water in motion to driving machinery. The noria has been in use for thousands of years in Egypt, Persia, Arabia, and Syria, and was introduced by the Romans or Saracens (probably the latter) into Spain. (*NORIA*, *TYMPANUM*.)

cūr-rēn-tē cāl-ām-ō, phrase. [*Lat.*, lit.=with a running pen.] Rapidly, fluently, without hesitation or stop.

cūr-rēn-t-ly, adv. [*Eng. current*; -ly.]

I. *Lit.*: With a constant flowing or motion.

II. *Figuratively*:

1. In accord or agreement.

"... they even see how the word of God runneth currently on your side, ..."—Hooker: *Ecol. Pol.* (Pref.)

2. Commonly, publicly, popularly, generally.

"... it is currently reported at Norwich that he is a Methodist."—Jones: *Life of Dr. Horne*.

cūr-rēn-t-ness, *cūr-rant-ness, *cūr-rēn-t-ness, s. [*Eng. current*; -ness.]

1. Circulation, currency.

"... on order for the valuation and currentness of monies."—Nomenclator. (*Nares*.)

2. Fluency, easiness of pronunciation.

"When substantialness combineth with delightfulness, and currentness with stayedness, how can the language sound other than most full of sweetness?"—Camden: *Remains*.

cūr-rī-cle, s. [*Lat. curriculum* = a course, a light car; a dimin. from *curro* = to run.]

*1. *Ord. Lang.*:

A small or short course.

"Upon a curricule in this world depends a long course of the next..."—Broune: *Christian Morals*, ii. 23.

2. *Vehicles*: A two-wheel chaise with a pole for a pair of horses.

***cūr-rī-cle, v. i.**

[*CURRICULE, s.*]

To drive in a curricule.

"Who is this that comes curriculing through the level yellow sunlight?"—Carlyle: *Miscell.*, No. 98.

cūr-rīc-ū-lūm, s. [*Lat.*]

1. A race-course.

2. A fixed or specified course of study at a university, school, &c.

"Strain'd with full force, and tugg'd from side to side, The brawny curriers stretch."

Pope: *Homer's Iliad*, xvii. 451, 452.

currier's knife, s. A large, two-handled knife, with a recurved edge, employed by curriers to shave or pare the flesh side of hides. The knife is about twelve inches long and five wide; one end has a plain handle and the other a cross-handle, in the direction of the plane of the blade. The edge of the knife is brought up by means of a whetstone, and a wire edge is constantly preserved by a steel wire which acts as a burnisher.

cūr-rī-ēr-ŷ, s. [*Eng. currier*; -ŷ.]

1. The trade or business of a currier.

2. A place where the trade of a currier is carried on.

cūr-rīsh, a. [*Eng. cur*; -ish.] Having the qualities or characteristics of a cur; cowardly, mean-spirited, churlish, snappish.

"Entreat some power to change this currish Jew."

Shakespeare: *Merchant of Venice*, iv. 1.

cūr-rīsh-ly, adv. [*Eng. currish*; -ly.] In a currish, churlish, or snappish manner; like a cur.

"Bonner being restored againe, —currishly, without all order of law or honesty, —wrested from them all the livings they had."—Fox: *Acts and Mon. Acc. of Ridley*.

cūr-rīsh-ness, s. [*Eng. currish*; -ness.] The quality of being currish; churlishness, snappishness.

"Diogenes, though he had wit, by his currishness got the name of dog."—Feltham: *Resolves*, ii. 69.

cūr-rū-ca, s. [*Lat. curruca* = a small bird, perhaps the Wagtail. (*Smith*.)]

Ornith.: A genus of Sylviæ or Sylviadæ. The best known species are—*Curruca atricapilla* (the Black-cap Warbler) [*BLACK-CAP*], *C. hortensis* (the Garden Warbler, q. v.), *C. cinerea* (the Common Whitethroat), and *C. sylvælla* (the Lesser Whitethroat).

cūr-rŷ (1), *coraye, *corry, *currayn, *currey, v. t. & i. [*O. Fr. conroier, conreier, couroier, coureier*; *Fr. corroyer*; *Ital. corradere*, from *O. Fr. conroi* = apparatus, equipage, gear, &c.; *O. Fr. con* = *Lat. con* = cum = with, together, and *O. Fr. roi* = array, order. (*Skeat*.)]

2. To bring a curse upon; to cause evil or harm to; to blast.

3. To injure, vex, or torment heavily; to cause great sorrow, trouble, or injury to.

"... no country could be secure which was *curst* with a standing army."—Macaulay: Hist. Eng., ch. xiii.

B. Intrans.: To utter imprecations, curses, or oaths; to swear, to blaspheme; to affirm or deny with curses.

"He stormed, *curst*, and swore in language which no wellbred man would have used at a race or a cock-fight."—Macaulay: Hist. Eng., ch. v.

curse, **cors*, **cors*, s. [A. S. *cors*, *cors*.]

1. An imprecation or invoking of evil upon; a malediction.

"... his name was never mentioned without a *curse*."—Macaulay: Hist. Eng., ch. xv.

2. A solemn invocation of divine vengeance upon. "The priest shall write all these *curse*s in a book."—Nehem. x. 29.

3. Condemnation; a sentence of divine vengeance.

"For as many as are of the works of the law are under the *curse*."—Gal. iii. 10.

4. Anything which causes evil, trouble, or great vexation; as, intemperance is the greatest *curse* of a country.

"'Tis the *curse* in love,

When women cannot love when they're beloved."

Shakesp.: Two Gent. of Ver., v. 4.

¶ The *Curse of Scotland*: The nine of diamonds. The epithet is variously accounted for; by some it is said to have originated from the tidings of the defeat of the Scots at Culloiden having been written on the back of this card. Others explain it as a corruption of *Cross of Scotland*, the pips being arranged somewhat like a St. Andrew's Cross. Others, again, refer the origin to the arms (a cross of lozenges, arranged like the nine of diamonds) of Col. Parker, who governed with great cruelty in Scotland after the death of Charles I.; others explain it by the resemblance of the arms of the Earl of Stair, who was concerned in the massacre of Glencoe. Grose, in his *Classical Dictionary*, gives the following explanation: "Diamonds, it is said, imply royalty, being ornaments to the imperial crown; and every ninth king of Scotland has been observed, for many ages, to be a tyrant and a curse to that country. Others say, it is from its similarity to the arms of Argyle; the Duke of Argyle having been greatly instrumental in bringing about the Union, which, by some Scotch patriots, has been considered as detrimental to their country."

¶ The vulgar phrase, *not to care a curse*, has really no connection whatever with the word *curse*; it is a corruption of a phrase not uncommon in Middle English, as in *P. Plowman* (C. xii. 14), "nat woth a *curse*," that is, not woth a *cross*. [CRESS.]

cûrs-êd, *çûrst*, pa. par. & a. [CURSE, v.]

A. As pa. par.: (See the verb.)

B. As adjective:

1. Deserving of a curse; execrable; accursed, abominable, damnable.

"Neither shalt thou bring an abomination into thine house, lest thou be a *curst* thing like it; but thou shalt utterly detest it, and thou shalt utterly abhor it; for it is a *curst* thing."—Deut. vii. 26.

2. Blasted by a curse; execrated, accursed, damned.

"How long on these *curs'd* confines will ye lie?"

Pope: Homer's Iliad, xv. 594.

3. Vexatious, troublesome.

"The *curst* quarrel be no more renew'd."

Dryden.

*4. Froward, shrewish, malicious.

"... shrewd touches of many *curst* boys, . . ."—

Ascham: Schoolmaster.

I. Ordinary Language:

1. A courier, a runner.

"For their office was this, by running a great ground to be *curstours* to and fro, . . ."—Holland: Ammianus Marcellinus (1606).

2. A vagrant, a vagabond.

"Callinge these vagabonds *curstours* in the intytlyng of my booke, as runnners or rangers aboute the country."

Harman: Caveat, To the Reader.

II. Eng. Law: An officer of the English Court of Chancery, whose office was to make out original writs.

cûr-slive, a. & s. [Low Lat. *cursius*; Ital. *cor-sivo*, from Lat. *curso*, freq. of *curro*=to run, to flow.]

A. As adj.: Running, flowing; written in a running hand.

"... all these *curstive* alphabets."—Beames: Comp. Gram. Aryan Lang. of India, vol. i. (1872), Introduct., p. 55.

B. As subst.: A manuscript written in a *curstive* or running hand.

"The later manuscripts from being written in smaller characters, in running hand, were called *curstives*."—Parochial Magazine.

cûr-sôr, s. [Lat.=a runner, from *cursus*, pa. par. of *curro*=to run.]

1. Eccles.: An inferior officer of the papal court.

2. Ornith.: [CURSORES.]

3. Instr.: A part of a mathematical instrument which slides on the main portion; as, The movable leg of a beam-compass; the joint of the proportional compasses; the hand of a barometer; the beam of the tammil; the slide of a Gunter rule; the adjustable plate of a vernier; the moving wire of a reading microscope. (Knight.)

**cûr*-sôr-a-ry, a. [Eng. *cursor*(y); -ary.] *Cur-sory*, hasty, careless.

"I have but with a *curstury* eye

O'er-glanced the articles."

Shakesp.: Henry V., v. 2.

cûr-sôr-êg, s. pl. [Lat. pl. of *cursor*=a runner.] [CURSOR.]

1. Ornith.: An order of birds characterized by wings ill-suited for flight, but, on the other hand, by feet admirably adapted for running. They fall under Professor Huxley's sub-class *Ratites*, in which the sternum has no prominent ridge or keel. The feathers approach in structure to hairs. The hind toe is wanting, except in the *Apteryx*, in which it is rudimentary. It is divided into two families—

(1) *Struthionidae*, containing the Ostrich, the Emu, the Cassowary, &c.; (2) *Apterygidae*, having for its typical genus *Apteryx*; and (3) *Diornithidae*. They belong to the Southern Hemisphere.

2. *Palæont.*: The oldest unequivocal representatives of this family are in the Eocene rocks. The most remarkable, however, are the *Diornis* and its allies, which are of Postpliocene age and from New Zealand. (Nicholson.)

cûr-sôr'-î-a, s. pl. [Neut. pl. of Lat. *cursorius*=pertaining to a racecourse.]

Entom.: A sub-order of Orthoptera containing those families which have the legs adapted for running, as contradistinguished from those which have them fitted for leaping. It has been made to include the Phasmina or Walking Sticks, Mantina or Mantises, Blattina or Cockroaches, and the Forficulina or Earwigs. The last-named tribe, however, is now generally elevated into the order Dermaptera (q. v.), and Dr. Leach thought that the Cockroaches also should form an order by themselves, to which he gave the name of Dictyoptera (q. v.).

cûr-sôr'-î-âl, a. [Lat. *cursor*; -ial.]

*1. Ord. Lang.: Adapted or fitted for running.

*2. Zool.: Of or belonging to the *Cursores* or *Cursoria*.

¶ (1) *Cursorial Isopoda*:

Zool.: In the system of Milne-Edwards, a sub-order or section of Crustaceans, order Isopoda. They have no fin-like expansion at the posterior extremity of the body. Their limbs are adapted for running. There are three families—(1) *Idotheidae*, (2) *Asellidae*, (3) *Oniscidae*. The "Woodlouse" is a typical example of the *Cursorial Isopods*.

(2) *Cursorial Orthoptera*:

Entom.: The same as *CURSORIA* (q. v.).

cûr-sôr'-î-ly, adv. [Eng. *cursor*; -ly.] In a *cur-sory*, hasty, or careless manner; hastily.

"I noticed these objects *cursorily* only."—Charlotte Brontë: Jane Eyre, ch. xxviii.

cûr-sôr'-î-næ, s. pl. [Lat. *cursorius* (q. v.), and fem. pl. adj. suff. -inæ.]

Ornith.: A sub-family of Charadriidae (Plovers). They have short, slender, depressed bills slightly arched at the extremity, long legs with the hind toe absent. Locality, the Eastern Hemisphere.

**cûr*-sôr'-î-nëss, s. [Eng. *cursor*; -ness.] The quality of being *cur-sory*; a *cur-sory* or superficial character.

cûr-sôr'-î-ûs, s. [Lat. adj.=pertaining to a racecourse.]

Ornith.: A genus of Charadriidae, the typical one of the family *Cursoriinae*. The bill is as long as the head, the mandibles arched, the base depressed, the extremities compressed, the tip sharp and entire, the nostrils basal, the first quill the longest, the legs long, three front toes without webs, the middle one the longest and with a serrated claw. *Cursorius Temminckii*, or *Isabellinus*, is the Black-bellied Courier, or Cream-colored Courier, called by Selby the Cream-colored Swift-foot. It is of a creamy brown, the top of the head and the breast ferruginous, a double collar—the upper white, the lower black—on the back of the head, middle of the body black, the sides white. Length, including the bill, 8 inches, legs, 3 inches. Its native country is Africa, especially Abyssinia.

cûr-sôr'-y, a. [Low Lat. *cursorius*; from Lat. *cursor*=a runner, from *cursus*, pa. par. of *curro*=to run.]

*1. Moving about, not stationary.

"... persons at Rome; besides their *cursorie* men, as Gerrard, &c."—Proceedings against Garnet, sign. F. (1606.)

2. Hasty, superficial, careless; without due care or attention; desultory.

"The coffee-house must not be dismissed with a *cur-sory* mention."—Macaulay: Hist. Eng., ch. iii.

¶ Crabb thus distinguishes between *cur-sory*, *hasty*, *desultory*, and *slight*: "*Cur-sory* includes both *hasty* and *slight*; it includes *hasty* inasmuch as it expresses a quick motion; it includes *slight* inasmuch as it conveys the idea of a partial action: a view may be either *cur-sory* or *hasty*, as the former is taken by design, the latter from carelessness: a view may be either *cur-sory* or *slight*; but the former is not so imperfect as the latter: an author will take a *cur-sory* view of those points which are not necessarily connected with his subject; an author who takes a *hasty* view of a subject will mislead by his errors; he who takes a *slight* view will disappoint with the shallowness of his information.

boil, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del.

Between *curtesy* and *desultory* there is the same difference as between running and leaping; we run in a line, but we leap from one part to another; so remarks that are *curt* have still more or less connection; but remarks that are *desultory* are without any coherence." (*Crabb: Eng. Synon.*)

cūst, *pa. par. or a.* [CURSED.]

***cūst-fūl**, *a.* [Eng. *curst*; *-ful*(*l*).] Froward, peevish, ill-natured.

***cūst-lŷ**, *adv.* [Eng. *curst*; *-ly*.] In a cursed manner; cursedly.

"So curstly and in such wise taunted, . . ."—*Wilson: Art of Logic*, fo. 8.

***cūst-nēss**, *s.* [Eng. *curst*; *-ness*.]

1. Cursedness.

2. Frowardness, peevishness, ill-nature.

"Then, noble partners,
Touch you the sourest points with sweetest terms,
Nor curstness grow to the matter."
Shakesp.: Ant. and Cleop., i. 2.

***cū-sūs**, *s.* [Lat.=a running . . . a course . . . progress, direction.] The name originally given to the Roman breviary. [BREVARY.]

cūrt (1), *a.* [Lat. *curtus*=clipped, docked, shortened.]

1. Short, concise; not diffuse.

" . . . a man may have a *curt* epitome of the whole course thereof in the days of his own life."—*Browne: Christian Morals*, ii. 22.

2. Short and sharp, dry.

" . . . a *curt*, gruffish voice."—*Disraeli: The Young Duke*, bk. v., ch. vii.

cūrt (2), *a.* [A contraction for *current*, *a.* (q. v.).] Current, instant; as, the 10th *curt*=the 10th of the *current* month, or the 10th instant.

***cūrt-tāl**, *s.* [CURTAIL, v.]

1. A curtail-dog.

2. A horse whose tail has been docked, or shortened.

cūrt-tāl, ***cūrt-tāl**, *v. t.* [O. Fr. *courtault*; *courtaut*=curtail (*Colgrave*); *Ital. cortaldo*=a curtail; a horse without tail; *cortare*=to shorten, to curtail; *corta*=short, brief, curtailed (*Florio*); from O. Fr. *court* (*Ital. corta*)=short; with suff. *-ault*, *-alt*=*Ital. aldo* (*Low Lat. -aldus*); from Lat. *curtus*=docked. (*Skaut.*)]

†I. Lit.: To cut the end or tail off.

†II. Figuratively:

1. To shorten, to dock, to cut off, to deprive.

"I that am curtail'd of all fair proportion,
Deform'd, unfinish'd, sent before my time
Into this breathing world."
Shakesp.: Richard III., i. 1.

2. To abridge, to lessen, to contract.

" . . . curtail and retrench the ordinary means of knowledge and erudition, . . ."—*Woodward*.

3. To reduce, to cut down.

"Our incomes have been curtailed: his salary has been doubled, . . ."—*Macaulay: Hist. Eng.*, ch. xviii.

† It is followed by *of* before that which is taken away or cut off.

"The count assured the court that Fact, his antagonist, had taken a wrong name, having curtailed it of three letters; for that his name was not Fact, but Faction."—*Addison*.

curtail-dog, *s.* Originally the dog of an unqualified person, which, by the forest laws, must have its tail cut short, partly as a mark, and partly from a notion that the tail of a dog is necessary to him in running. In later usage, *curtail-dog* means either a common dog, not meant for sport, or a dog that missed his game. (*Nares.*)

" . . . I think if my breast had not been made of faith, and my heart of steel,
She had transformed me to a curtail dog, . . ."
Shakesp.: Comedy of Errors, iii. 2.

curtail-step, *s.*

Join.: The bottom step of a flight of stairs, when finished with a scroll and similar to the hand-rail.

cūrt-tāld, ***cūrt-tāld**, *pa. par. or a.* [CURTAIL, v.]

A. As pa. par.: (See the verb.)

B. As adjective:

1. *Lit.*: Having the tail docked.

"Cur-tailed dogs in strings."—*Fletcher: Faithful Shep.*; *Addison to Reader*.

2. *Fig.*: Abridged, cut short, cut down, reduced.

***cūrt-tāl-ēd-lŷ**, *adv.* [Eng. *curtailed*; *-ly*.] In a curtailed, abridged, reduced, or shortened form.

"The name thereof, perhaps it was written curtail'dly."—*Barton: Antoninus*, 169.

cūrt-tāl-ēr, *s.* [Eng. *curtail*; *-er*.] One who curtails, abridges, lessens or reduces.

" . . . the Greeks had been curtailers."—*Waterland: On the Athan. Creed*, x. § 21.

cūrt-tāl-lŷg, *pr. par., a. & s.* [CURTAIL, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of abridging, shortening, lessening, or reducing; curtailment, abridgment.

"Scribblers send us over their trash in prose and verse, with abominable curtailings, and quaint modernisms."—*Swift*.

cūrt-tāl-mēnt, *s.* [Eng. *curtail*; *-ment*.] The act of curtailng, abridging, reducing, or lessening.

cūrt-tāin, ***cūrt-teyn**, ***cūrt-tyñ**, ***cūrt-tyne**, ***cūrt-teyn**, ***cūrt-tyñ**, *s. & a.* [O. Fr. *cortine*, *curtine*; Fr. *courtine*, from Low Lat. *cortina*=a small court or inclosure; Sp., Port., and Ital. *cortina*.]

A. As substantive:

I. Ordinary Language:

1. *Literally*:

(1) A screen of cloth hanging beside a window or round a bed, which can be expanded or contracted at pleasure, so as to admit or exclude the light, or to conceal or disclose anything.

"Ther beddyng watz noble of cortynes of clene sylk."
Sir Gawaine, 853.

(2) A strip of leather which overlaps the parting of a trunk.

†2. Figuratively:

(1) A tent, a habitation.

"I saw the tents of Cushan in affliction: and the curtains of the land of Midian did tremble."—*Habak.* iii. 7.

(2) A screen, a cover.

"Now, Truth, perform thine office; waft aside
The curtain drawn by Prejudice and Pride."
Cowper: Hope, 570, 571.

(3) A screen or protection.

"The curtaine made of shields did well off keep
Both darts and shot, and scorned all their wrath."
Fairfax: Godfrey of Bouillon, xi. 37.

II. Technically:

1. *Fort.*: That portion of a rampart which extends between and joins the flanks of two bastions. [BASTION.]

" . . . raised up
a curtain twelve
feet high, at the
back of his sol-
diers."—*Knolles*.

2. *Locksmithing*:

A shifting-plate, which, when the key is withdrawn, interposes so as to screen the inner works from being seen or reached by tools.

3. *Theater*: The screen in a theater or similar place, which can be lowered or raised at pleasure, so as to conceal or discover the stage.

"The curtain rises—may our stage unfold
Scenes not unworthy Drury's days of old."
Byron: Address at Opening of Drury Lane Theater.

B. As adj.: (See the compounds.)

† (1) To draw the curtain:

(a) To admit the light; to discover, disclose, or expose anything.

"Let them sleep, let them sleep on,
Till this stormy night be gone,
An th' eternal morrow dawn;
Then the curtain will be drawn."—*Crashaw*.

(b) To exclude the light; to conceal anything.

"I must draw a curtain before the work for a while,
 . . ."—*Burnet: Theory of the Earth*.

(2) To drop the curtain: To end the scene; to end.

(3) To raise the curtain: To begin the scene; to discover or disclose anything.

(4) The curtain rises: The scene or the action begins.

(5) The curtain falls: The scene of the action ends.

curtain-lecture, *s.* A lecture or reproof given by a wife to her husband after they have retired.

"I still prevailed, and would be in the right,
Or curtain-lectures made a restless night."
Pope: Wife of Bath, 164, 165.

***cūrt-tāin**, ***cūrt-tenē**, *v. t.* [CURTAIN, s.]

I. Literally:

1. To furnish with curtains.

" . . . another trauerse siled, and cortened all of white satten."—*Hall: Henry VIII.* (an. 24).

2. To inclose or shut in with curtains.

"Now o'er the one half-world abuse
Nature seems dead, and wicked dreams abuse
The curtain'd sleep."—*Shakesp.: Macbeth*, ii. 1.

II. Fig.: To surround, to shut in, to inclose.

"So, when the sun in bed,
Curtailed with cloudy red,
Pillows his chin upon an orient wave."
Milton: Ode on the Nativity.

***cūrt-tāined**, ***cortened**, *pa. par. or a.* [CURTAIN, v.]

cūrt-tāin-lŷg, *pr. par., a. & s.* [CURTAIN, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. The act of inclosing with curtains; shutting in, inclosing, or concealing.

2. A mass or body forming a curtain or screen.

"Span round in sable curtaining of clouds."
Keats: Hyperion, i. 271.

cūrt-tāin-lēss, *a.* [Eng. *curtain*; *-less*.] Without curtains.

"I rose up on my curtainless bed."—*C. Brontë: Jane Eyre*, ch. xxxii.

***cūrt-tāl**, ***cūrt-tāl**, *s. & a.* [CURTAIL, s.]

A. As substantive:

1. A horse with a docked tail.

2. (See extract.)

"A *curtail* is much like to the Vp-right man, but hys authority is not fully so great. He weeth commonly to go with a short cloke, like to Grey Friars."—*Ardeley: The Fraternity of Vocabondes* (1575) (ed. Furnivall), p. 4.

3. Any person cropped of his ears.

"I am made a *curtail*; for the pillory hath eaten off both my eares."—*Greene: Quip, &c.*, in *Harl. Misc.*, v. 410.

B. As adjective:

1. *Curt*, brief, concise.

" . . . essays and curtail aphorisms, . . ."—*Milton: Eiconoclastes*.

2. Cut down, diminished, niggardly.

"We had some soure cherries, three soure plummets
 . . . but in that minced and curtail manner that . . ."
Mabbe: The Rogue (ed. 1623), pt. ii., p. 274.

***curtail-axe**, *s.* [CURTAIL-AXE.]

***cūrt-tāld**, *s.* [O. Fr. *courtault*=a kind of short piece of ordnance used at sea (*Philips*); Fr. *court*=short.] A kind of cannon.

" . . . the provision of ordnance, the which is bot letill that is to say it great curtaildis, that war send out of France, . . ."—*Pink: Hist. Soot*; *Lett. Ramsay of Balmaine to Henry VII.*, ii. 440.

***cūrt-tāl-lŷe**, *v. t.* [Eng. *curtail*; *-ize*.] To curtail or crop.

***curtail-dog**, *s.* [CURTAIL-DOG.]

cūrt-tāte, *a.* [Lat. *curtatus*, *pa. par.* of *curto*=to dock, to shorten.]

Geom. & Astron.: Shortened, lessened, reduced. (Used of a line projected orthographically upon a plane.)

† *Curate distance of a planet*:

Astron.: The distance of a planet from the sun, reduced to the plane of the ecliptic, equal to the true distance multiplied by the cosine of the planet's heliocentric latitude. (*Craig.*)

***cūrt-ā-tion**, *s.* [Lat. *curtatus*, *pa. par.* of *curto*.]

Astron.: The interval between a planet's distance from the sun and the curtate distance.

***cūrt-ēd**, *a.* [Eng. *curt*; *-ed*.] Curt, laconic.

"Do you curtail Spartans imitate?"—*Sidney: Astrophel*, 92.

***cūrt-tēin**, ***cūrt-tā-nŷ**, *s.* [Etym. doubtful.] The sword carried before the kings of England at their coronation; called also the sword of Edward the Confessor. It has the edge blunted, and wants the point, as an emblem of mercy.

† *Cortine*, *Corteyne*, or *Cortayn* was the name given to the sword of Ogier, one of the celebrated Douzeperes of Charlemagne.

***curte-ly**, *adv.* [COURTLY.] Courteously, kind.

"For which delightful joys yet thank I curteily Jove,
By whose almighty power, such sweet delights I prove."
Paradise of Dayntie Devices (1576).

***cūrt-tl-cōne**, *s.* [Lat. *curtus*=docked, and Eng. *cone* (q. v.).] The lower frustum of a cone; a cone with the top cut off. (*Ash.*)

cūrt-tl-lŷg (age as *lŷg*), *s.* [O. Fr. *courtillage*; Low Lat. *curtilagium*, from O. Fr. *cortil*; Low Lat. & Ital. *cortile*=a courtyard; Lat. *cors* (genit. *cortis*)=a court.]

Law: A piece of ground lying near and belonging to a dwelling-house, and included within the same fence: a court.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, here, camel, hēr, there; pine, pīt, sire, sīr, marine; gō, pōt, ore, wōre, wolf, wōrk, whō, sōn; mūte, cūt, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, æ = ē; ey = ā. qu = kw.

cūr-tis'-i-a, *s.* [Named after Mr. William Curtis, founder of the *Botanical Magazine*.]

Bot.: A genus of Cornaceæ (Cornels). Calyx four-parted; petals, four blunt; stamens, four alternate; the hind part of the stone-fruit four to five-celled. *Curtisia faginea* is a large tree from the Cape of Good Hope, called the Assegai Tree, because the natives form their assegais from its wood.

***cūrtle-axe**, ***cūrtal-axe**, *s.* [A corruption of *cūrtass* (q. v.).]

cūrt'-ly, *adv.* [Eng. *curt*; *-ly*.]

1. In a concise or brief manner; concisely, briefly.
2. In a curt, short, or sharp manner; with curt-ness.

"... so curtly, succinctly, and concisely epitomiz'd the long story of the captive."—*Gayton: Notes on D. Quixote*, iv. 15.

cūrt'-ness, *s.* [Eng. *curt*; *-ness*.]

*1. Conciseness, brevity.

"The sense must be curtailed and broken into parts to make it square with the curtness of the melody."—*Lord Kames: Elem. of Criticism*, ii. 130.

2. Shortness or sharpness of language or tone.

***cūr-tōide**, *a.* [CURTAL.] Apparently the same word as *cūrtal*; when applied to a slipper, short, abridged of its long peak, and other ornaments.

"A slender slop close-couched to your docke,
A curtolde slipper, and a short silke hose."

Gascoigne: Steele Glosse, sig. N. 8. (Nares.)

cūrt'-sy, ***cūrt'-seŷ**, *s.* [Originally the same word as COURTESY (q. v.).] A bow, a gesture of respect or civility performed by women.

"Among three thousand people at a ball,
To make her curtsy thought it right and fitting."

Byron: Beppo, lxxxv.

cūrt'-sy, ***cūrt'-sie**, *v. i. & t.* [CURTESY, *s.*; COURTESY, *v.*]

A. Intrans.: To make a curtsy or bow.

"The Bird of Paradise curtsied . . . and crossed her breast with arms . . ."—*Disraeli: The Young Duke*, bk. ii., ch. iii.

***B. Trans.**: To make a curtsy or bow to; to salute.

"They cap me and curtsie me and worship me."—*H. Smith: Sermons*, i. 206.

*† The word is now confined to women, but formerly it was applied to either sex.

"What's worse,
Must curtsie at the censure."

Shakesp.: Cymbeline, iii. 3.

curtsy-capping, **curtsie-capping**, *s.* A low salutation or act of reverence.

"Great Sapia sated with fain'd curtsie-capping."

Sylvester: Du Bartas: Day 3, Week i. 1, 060.

curucui, *s.* [Brazilian.] A South American bird, Trogon *Curucui*.

cūr-āle, *a.* [Lat. *curulis*, from *currus* = a chariot.]

1. Of or pertaining to a chariot.

2. Having the right or privilege of a curule chair.

"Those who had raised themselves to a curule office."—*Ramsay: Rom. Antig.*, p. 67.

curule-chair, *s.*

Rom. Antig.: An ivory chair of peculiar form, somewhat like a modern camp-stool. The right of using it was confined to certain officers, as dictators, consuls, prætors, censors, and ædiles, who were thence called curule magistrates.

"... the lictors with the fasces, the ivory curule chair, . . ."—*Lewis: Cred. Early Roman Hist.*, (1855), ch. iv., § 3, vol. i., p. 103.

cūr'-ant, **cūr'-al**,

a. [Lat. *curvans* pr. par. of *curvo*=to curve, to bend.]

Her.: Curved, bowed.

***cūr'-āt-ēd**, *a.* [Lat. *curvatus*, pr. par. of *curvo*.] Curved, bent.

***cūr'-ā-tion**, *s.*

[Lat. *curvatio*, from *curvatus*, pr. par. of *curvo*.] The act of curving, bending, or crooking; the state of being curved or bent; curvature.

"... the curvation of our limb."—*Pearson: On the Creed*, Art. 6.

cūr'-ā-tive, *a.* [Mod. Lat. *curvativus*, from Lat. *curvatus*, and suff. *-ivus*.]

Bot.: Having the margins slightly curved either backward or forward without any sensible twisting. (*De Candolle*, in *Lindley*.)

bōl, **bōy**, **pōut**, **jōwī**; **cat**, **çell**, **chorus**, **çhin**, **bench**; **go**, **gem**; **thin**, **this**; **sin**, **aç**; **expect**, **Xenophon**, **exist**. **ph = f**.
-cian, -tian = **shān**. -tion, -sion = **shūn**; -tion, -sion = **zhūn**. -tious, -cious, -sious = **shūs**. -ble, -dle, &c. = **bej**, **del**

cūr'-ā-tūre, *s.* [Lat. *curvatura*, from *curvo*=to curve, to bend.]

I. Ordinary Language:

1. The act of curving or bending.

2. The state of being curved or bent.

"... the tree ferns, though not large, were, from their bright green foliage, and the elegant curvature of their fronds, most worthy of admiration."—*Darwin: Voyage round the World* (1870), ch. ii., p. 24.

3. A curve, a bend, a sweep.

"... whose well-roll'd walks,
With curvature of slow and easy sweep—
Deception innocent—give ample space
To narrow bounds." *Cowper: Task*, i. 351-54.

II. Geom.: The comparative degree of flexion or bending which takes place near the different points of a curve.

*† When the radius of a circle is doubled, the curvature is diminished one half. In most other cases, the increase in the size of a curved body diminishes its curvature.

*† (1) **Circle of curvature** or **circle of the same curvature**: A circle touching a curve in a certain point, so that no other circle, touching it in the same point, can pass between it and the curve.

(2) **Double curvature**: A term applied to the curvature of a line which twists so that all the parts of it do not lie in the same plane, as the rhomb line or the loxodromic curve. (*Ogilvie*.)

(3) **Radius of curvature**: The radius of the circle of curvature.

(4) **The curvature of a curve**: The angle turned by the tangent per unit distance traveled along the curve. If four stands for length, then it is = $\frac{1}{4}$. (*Everett: The C. G. S. System of Units* (ed. 1875), ch. i., p. 7.)

cūrve, *a. & s.* [Lat. *curvus*=curved, bent; *curvo*=to curve or bend.]

A. As adj.: Bending; bent or crooked in a regular manner and without angles.

"... describe a curve line about the attracting body."—*Bentley*.

B. As substantive:

I. Ordinary Language:

1. In the same sense as II. 1.

2. In the same sense as II. 2.

II. Technically:

I. Geom.: A line no three consecutive points in which are in the same plane; a line which may be cut by a right line in more than one point.

"... like a bow long forced into a curve."

Cowper: Table Talk, 622.

*† If a point move with a perfectly gradual change of direction, it describes a curve. Curves are of the same species when the motion of the describing point is regulated by the same mathematical law—viz., by the one characterizing the species. All circles, for instance, are of the same species; they vary greatly in the length of their radii, but the motion of the describing point in all cases is regulated by the same law. There are two kinds of curve lines—(1) algebraical or geometrical curves, and (2) transcendental or mechanical curves. By means of coördinates every algebraical function can be connected with a curve. Among the curves which have received names are the circle, the ellipse, the parabola, and the hyperbola; these are the curves specially treated of under conic sections. Rarer ones are the cissoid, the conchoid, the cycloid, various spirals, &c. In the higher algebra the word curve is used in so extended a meaning that it includes even a straight line, which looks like a contradiction in terms.

2. **Engin.**: A bend in road, canal, or railway; especially in the track of the latter.

3. **Draughtsmanship**: A draughtsman's instrument having one or a variety of curves of various characters other than arcs, which may be struck by a compass. Some are constructed for specific purposes, such as shipwright's curves, radii-curves, &c.

4. **Geol.**: A flexure or bending of strata. It is of two kinds, an anticlinal and a synclinal curve. [† (2), (4).] When strata appear vertical, they often constitute part of a great curve. These curves may have arisen, as an old experiment by Sir James Hales showed, by lateral compression applied horizontally at the two ends of the strata at the time when they were horizontal.

*† (1) **Algebraic curves**:

Geom. & Alg.: Curves in which the relation between the abscissa and the ordinate is expressed by an algebraic equation called the equation of the curve. They are of various orders. In those of the first order the equation rises only to the second degree or dimension, in those of the second order it rises to the third degree or dimension, and so on in an ascending series.

(2) **Anticlinal curve**:

Geol.: A curve in which the strata tilted up do not meet in an angle, but are arched over so as to constitute a curve, saddle, or arch. Vertical strata are generally parts of such curves.

(3) **Mechanical curves**:

Math.: Curves which cannot be expressed analytically, and have no known equation.

(4) **Synclinal curve**:

Geol.: A curve in which the strata dipping downward toward each other have not an angle at the point, but a curve, so as to make a trough or basin-like hollow.

(5) **Transcendental curve**:

Geom. & Calculus: A curve in which the relation between the abscissa and the ordinate is expressed by a differential instead of an algebraic equation.

curve-ribbed, *a.*

Bot. (of leaves, &c.): A term applied when the ribs describe a curve and meet at the point. Example, those of the *Plantago lanceolata*.

curve-veined, *a.*

Bot. (of leaves): A term applied when the primary veins, though resembling those in straight-veined leaves in being parallel, simple, and connected by unbranched proper veinlets, yet differ from them in diverging from the midrib along its whole length, and losing themselves in its margin, in place of passing from near the base of the leaf to its apex.

curve, v. t. & i. [Lat. *curvo*=to curve, to bend.]

A. Trans.: To bend, to crook, to inflect.

"And the tongue is drawn back and curved."—*Holder*.

B. Intrans.: To bend, to be bent or curved.

"In the third it curves backward in the same degree."—*Owen: Trans. Brit. Assoc.* (1846).

curved, pa. par. or a. [CURVE, *v.*]

1. **Ord Lang.**: (See the verb.)

2. **Bot.**: Bent so as to constitute the arc of a circle, as the fruit of *Astragalus hamosus*, *Medicago falcata*, &c. (*Lindley*.)

curved-pump, *s.* One in which the piston reciprocates in an arc.

***cūr'-ēd-ness**, *s.* [Eng. *curved*; *-ness*.] The quality or state of being curved; curvature.

"There is also a curvedness, which may be reduced to a fracture."—*Wiseman: Surgery*, bk. vii., ch. i.

cūr'-ēm-brŷ-ē-s, *s. pl.* [Lat. *curvus*=curved, and Mod. Lat. *embryo*; Gr. *embrūon*.] [EMBRŷO.]

Bot.: The second of two sub-orders of Solanaceæ, in the classification of that order proposed by Mr. Miers. The first is the Rectembryæ, in which the embryo is straight; in the second, Curvembryæ, as the name imports, it is curved. These sub-orders are not adopted by Lindley, who simply divides the Solanaceæ into thirteen tribes.

cūr'-vēt, ***cor-vet**, *s.* [Ital. *corvetta*=a curvet, a leap; *corvettare*=to curvet, or leap; O. Ital. *covare*=to bow, bend, curve; Lat. *curvo*.]

I. Ordinary Language:

1. **Lit.**: In the same sense as II.

2. **Fig.**: A frolic, a prank.

II. Manège: A particular leap of a horse, when he raises both his fore legs at once, equally advanced; and, as his fore legs are falling, he raises his hind legs, so that all four legs are off the ground at once.

"Which should sustain the bound and high curvet
Of Mars' fiery steed." *Shakesp.: All's Well*, ii. 3.

cūr'-vēt, *v. i. & t.* [CURVET, *s.*]

A. Intransitive:

I. Ordinary Language:

1. **Literally**:

(1) In the same sense as II.

(2) To leap, to bound.

"Yet scarce he on his back could get,
So oft and high he did curvet."

Drayton: Court of Fairy.

2. **Fig.**: To frolic, to frisk, to prank.

"Cry holla! to thy tongue, I prithee, it curvets unseasonably."—*Shakesp.: As You Like It*, iii. 2.

II. Manège: To perform a curvet.

"But would you sell or slay your horse
For bounding and curvetting in his course?"

Cowper: Table Talk, 304, 305.

***B. Trans.**: To cause to perform a curvet; to make to spring or leap up.

"The upright leaden spout curvetting its liquid filament into it."—*Landor*.

cūr'-vēt-tīng, *pr. par., a. & s.* [CURVET, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of performing a curvet; frisking, frolicking, prancing.

cūr-vī-cā-u-dāte*, *a.* [Lat. *curvus*=bent, and *cauda*=the tail.] **Zoöl.: Having the tail curved; curve-tailed.

cūr-vī-cos-tāte*, *a.* [Lat. *curvus*=bent, and *costatus*=having ribs; from *costa*=a rib.] **Bot.: Having bent ribs.

cūr-vī-dēn-tāte*, *a.* [Lat. *curvus*=bent, and *dentatus*=toothed.] [DENTATE.] **Bot.: Having curved teeth.

cūr-vī-fō-ll-āte*, *a.* [Lat. *curvus*=bent, and *foliatus*=leaved.] [FOLIATE.] **Bot.: Having leaves curved or bent backward; having revolute leaves.

**cūr-vī-l-form*, *a.* [Lat. *curvus*=curved, bent, and *forma*=form, shape.] Having a curved or bent form.

cūr-vī-l-fy*, **cūr-vī-l-fie*, *v. t.* [Eng. *curve*; -fy.] **To curl.

"Irons to *curvifle* your flaxen locks."
Jordan: *Death Dissected* (1649).

**cūr-vī-līn-ē-ād*, *s.* [Lat. *curv(us)*=curved, bent, and *linea*=a line.] A drafting instrument used in describing irregular curves. The various shapes of its marginal outline enable it to be fitted into position, so as to project or transcribe the curve required. M. Desalier, of Paris, invented a machine for generating the curves and marking out the patterns. It is capable of making 1,200 varieties of curves.

**cūr-vī-līn-ē-āl*, *a.* [Lat. *curv(us)*=bent, and *linealis*=consisting of lines; lineal.] The same as CURVILINEAR (q. v.).

**cūr-vī-līn-ē-ār*, *a.* [Lat. *curv(us)*=bent, and *linearis*=linear.] Consisting of curved as distinguished from straight lines: curvilinear.

**cūr-vī-nēr-vāte*, *a.* [Lat. *curv(us)*=bent, and *nervus*=sinew, a tendon, a nerve.] The same as CURVINEURED (q. v.).

cūr-vī-nēr-vēd*, *a.* [Lat. *curv(us)*=bent, and Eng. *nerved*.] **Bot.: Curve-nerved (q. v.). The same also as CONVERGATE-NERVOSE (q. v.).

cūr-vī-lūg*, *pr. par., a. & s.* [CURVE, v.] **A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As substantive*:
1. The act of bending or crooking; curvature.
2. The state of being curved or bent; curvature.
3. A curve, a bend, a winding.

cūr-vī-rōs-tral*, *a.* [Lat. *curvus*=bent, and *rostralis*=pertaining to the rostrum, but here used for pertaining to the beak.] **Entom., Bot., &c.: Having a curved beak, snout, or proboscis.

cūr-vī-sēr-l-āl*, *a.* [Lat. *curvus*=curved, and Eng. *serial* (q. v.).] **Bot.: An epithet applied by Bravais to cases in which the leaves, instead of being placed directly over others in a straight series, are disposed in an infinite curve.

**cūr-vī-ty*, *s.* [Fr. *curvité*, from Lat. *curvitas*; *curvus*=curved, crooked.] A curving, a bending, an inflection; curvature.

"... give a greater *curvity* to the posture of the osicles."—Holder: *On Speech*.

**cūr-vī-graph*, *s.* [Lat. *curvus*=curved, bent; Gr. *graphein*=to write, to describe.] An instrument for drawing a curve without reference to the center. It is usually an elastic strip, which is adjustable to a given curve, and serves to transfer the latter to another plat or another place on the plat. [ARCOGRAPH, CYCLOGRAPH.]

**cūs-cō*, *s.* [From Cuzco in Lower Peru, whence the bark is obtained.]

cusco-bark, *s.* A kind of Cinchona bark, exported from Arequipa. It is of use in the cold stage of intermittent fevers and in low typhoid states of the system.

cusco-china, *s.* The same as CUSCO-BARK (q. v.).

cūs-cōn-l-dine*, *s.* [Eng. &c., *cuscon(ine)*.] Gr. *eidōs*=appearance, and suff. *-ine* (Chem.) (q. v.). **Chem.: An amorphous alkaloid accompanying cusconine.

cūs-cō-nine*, *s.* [Eng. &c., *cusco*; -ine.] **Chem.: An alkaloid, C₂₃H₂₆N₂O₄, obtained from Cusco cinchona bark. It occurs along with aricine. Barks containing these alkaloids give off brown vapors when heated, while those containing quinine give off red vapors. [CINCHONA BARK.] An alcoholic solution of comminuted cusco-bark is supersaturated with soda and shaken with ether, and the ethereal liquid is agitated with acetic acid, which takes up the greater part of the alkaloids. The acetic solution is partly neutralized with ammonia, which throws down aricine acetate, and the filtrate is mixed with a saturated solution of ammonium sulphate, which precipitates cusconine as sulphate, from which cusconine can be obtained as

an amorphous precipitate, which can be recrystallized from alcohol in large white laminae. It is a weak base, forming salts. Cusconine gives, when added to a warm solution of ammonium molybdate, a dark blue color, changing to olive-green when heated, and again turning blue as the liquid cools.

cūs-cūs, cōus-sous*, *s.* [A Molucca island word.] **Zoöl.: The name given in the Moluccas to a Marsupial mammal, *Phalangista cavirostris*. It has a prehensile tail and large eyes. Its progression is slow. (Dallas.)

**cūs-cū-tā*, *s.* [Sp. *cuscute*; Fr. *cuscute*; Ital. *cuscuta*, *cuscula*; Dan. *kaskute*; all generally believed to be from Arab. *coohūt*, *keshut*=dodder, or rather one of the names of dodder, the common one in that language being *afitūm*.] Hooker & Arnott suggest as an alternative etymology Heb. *chhuts*=to bend, to surround.]

Bot.: The typical genus of Cuscutaceae. The calyx is four to five-cleft; the corolla campanulate, four to five-lobed, the tube sometimes, though rarely, with internal scales; styles two; ovary two-celled, with two ovules in each; capsule two-celled, bursting all round. The species are plants, with long filiform twining stems. The common species is *Cuscuta europaea*, with red stems and yellowish-rose flowers. It is found on nettles, thistles, &c. *C. epithymum* (Lesser Dodder), which has white flowers, is found on furze, heath, and thyme. *C. racemosa* is used in Brazilian pharmacy.

**cūs-cū-tā-cē-s*, *s. pl.* [Mod. Lat. *cuscut(a)*, and fem. pl. *adj. suff. -aceae*.]

Bot.: An order of Perigynous Exogens, alliance Solanales. It consists of leafless climbing colorless parasites, with the flowers in dense clusters; calyx inferior, persistent, four to five-parted, imbricated in aestivation; limb of the corolla four to five-cleft, having scales alternating with the segments; stamens five, free; ovary two-celled, each with two ovules; styles two or none; stigmas two; placentae basal; fruit capsular or baccate, two-celled; cells one to two-seeded; embryo spiral. Found in the temperate parts of both hemispheres as twining parasites. Lindley enumerated two genera, and estimated the known species at fifty.

cūsh, *s.* A dish made of boiled crackers or biscuits.

**cūsh-at*, **cūsch-ette*, *s.* [A. S. *cusceote*, *cus-cote*, *cuscute*.] The Ringdove, *Columba palumbus*.

cushat-dove, *s.* The ringdove, or queseet (*Columba palumbus*). Yarrell gives the name wood-pigeon to that species, but the "English Cyclopædia" makes this another name for the Stock-dove (*Columba oenas*).

cūsh-ew* (ew as ū), *s.* [Etym. doubtful.] **Ornith.: A large bird, *Ourax pauci*, of the family Craciidae or Curassows, and itself sometimes called the Galeated Curassow. The bill is bright red, surmounted by a protuberance of a livid slate color; the feathers of the head and neck are of a rich black color and velvety texture; the greater part of the body brilliant black, with green reflections; the abdomen and under tail coverts white; legs red, claws yellow. The bird, which is about the size of a hen turkey, is a native of Mexico. It is gregarious, and builds its nest on the ground.

cushew bird, *s.* The same as CUSHEW (q. v.).

**cūsh-īōn*, **cūschūn*, **cūsheon*, **cūshin*, **cūyshen*, **coyschin*, **quyshen*, *s.* [O. Fr. *coissin*; Fr. *coussin*; Ital. *cuscino*; Sp. *covín*; Port. *coim*; Ger. *küssen*, from Low Lat. **cuscitum*, dimin. of Lat. *culcita*=cushion, a pillow. The modes of spelling this word in Mid. Eng. are exceedingly numerous; over five hundred have been counted.]

A. Ordinary Language:
I. Lit.: A pillow or soft padded seat for a chair, &c.; a bag or case stuffed with feathers, wool, or other soft material, and used as a seat.

"So saying, he led Æneas by the hand,
And placed him on a cushion stuffed with leaves."
Copeper: *Virgil's Æneid*, viii. 411, 412.

***II. Figuratively**:
1. Ease, peace.
2. The seat of justice.

B. Technically:
1. **Billiards**: The side or edge of a billiard-table, which causes the balls to rebound. The cushion of billiard-tables were for merly padded, but are now formed of solid india-rubber.

2. **Engraving**: A flat leathern bag filled with pounce and supporting the plate.

3. **Gild.**: The pad on which the gilder spreads his gold-leaf, and from which he takes it by a camel's-hair tool called a tip.

4. **Lace Manuf.**: The pillow of a bone-lace maker. [LACE.]

5. **Elect.**: The rubber smeared with amalgam, the friction of which against the glass cylinder or disc causes the electrical excitation.

6. Architecture:

(1) The impost-stone on a pier; a coussinet.
(2) A capital of a column so sculptured as to resemble a cushion pressed down by the weight of its entablature.

(3) The Norman capital, consisting of a cube with the lower extremities rounded off.

7. **Steam-engine**: A body of steam at the end of a cylinder to receive the impact of the piston. This is accomplished by closing the eduction-port a little before the end of the stroke, or by opening the induction-port on the same side of the piston, a little before the end of the stroke. (Knight.)

8. **Customs**: A kind of dance formerly very common at weddings. [CUSHION-DANCE.]

9. **Archery**: The mark at which archers shot. [C. I.]

C. Special phrases and compounds:
***I. Phrases**:

1. **To hit or miss the cushion**: To hit or miss the point. [B. 9.]

2. **To be beside the cushion**: To be mistaken, to be deceived. [B. 9.]

"... To be beside the cushion. Scopum on attingere; à scopo aberrare."—Coles: *Latin Dict.*

"... I tell thee, Ned, thou art quite beside the cushion."—The Woman Turn'd Bully (1675).

3. **To set, place, or put beside the cushion**: To lay or set aside; to pass over; to lay or put on the shelf.

"Thus is he set beside the cushion, for his sincerity and forwardness in the good cause."—Spalding, i. 291.

II. Compounds:
1. **Lady's cushion**, **Ladies' cushion**, **Our Ladies' cushion**.

(1) **Gen.**: *Armeria maritima*.

(2) **Locally**: (a) *Saxifraga hypnoides*; (2) *Chrysanthemum oppositifolium*; (3) *Lotus corniculatus*. (Britten & Holland.)

2. **Sea cushion**: *Armeria maritima*.

Arch.: The same as CUSHION, s., B. 6 (3).

cushion-dance, *s.* An old-fashioned dance of a rather free character, used chiefly, it would appear, at weddings. In it each woman selected her partner by placing a cushion before him. But by some it is considered to be a corruption of *cussing-dance*=kissing dance.

"I have, ere now, deserved a cushion: call for the cushion-dance."—Heywood: *Woman Killed with Passion* (1600). (Nares.)

***cushion-lord**, *s.*
1. A lord made by favor, and not for good service.
2. An effeminate person.

cushion-rafter, *s.*
Carp.: An auxiliary rafter beneath a principal one, to sustain a great strain. (Knight.)

cushion-stitch, *s.*
Embroid.: A flat em'roidery stitch largely employed to fill in backgrounds in old needlework, especially in Church embroidery. It is a variety of *satin-stitch* (q. v.). (Dict. of Needlework.)

**cūsh-īōn*, *v. t.* [CUSHION, s.]
A. Ordinary Language:

***I. Literally**:
1. To furnish or fit with cushions.
2. To seat or place on cushions.

"Many, who are cushioned upon thrones, would have remained in obscurity."—Bottingbroke: *On Parties*.

3. **To cover or conceal, as with a cushion**.

***II. Fig.**: To put aside, to suppress.
"Desiring to cushion his son's oratory."—Savage: *R. Medico*, bk. ii., ch. x.

B. Billiards: To place or leave a ball close up to the cushion.

**cūsh-īōned*, *pa. par. or a.* [CUSHION, v.]
1. **Ord. Lang.**: (See the verb.)

**cūsh-īōn-ēft*, **cōshionet*, **cushonnet*, *s.* [Eng. *cushion*; dimin. suff. -et.]
1. A little cushion.

"Upon these pretty cushionets did lie
Ten thousand beauties."—Beaumont: *Psyche*, vi. 200.

2. A casket.
"... she had afterward put the latter letter in her boxome, and the first in her cushionet, . . ."—Howell: *Familiar Letters* (1650).

**cūsh-īōn-līng*, *pr. par., a. & s.* [CUSHION, v.]
A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. As substantive:
Of steam: The gradual stoppage of the piston in a steam-engine by the resistance of a small quantity of steam left in the cylinder.

fāte, fāt, fāre, amidat, whāt, fāl, father; **wē, wēt, hēre, camel, hēr, thēre**; **pine, pīt, sīre, sīr, marine**; **gō, pōt, or, wōre, wolf, wōrk, whō, sōn**; **mute, cūb, cūre, unite, cūr, rāle, fūll**; **trŷ, Sŷrian. æ, æ = ē; ey = ā. qu = kw.**

**cūsh-iōn-ŷ*, a. [Eng. *cushion*; -y.] Flat and bulging.

"A bow-legged character with a flat and cushiony nose."
—*Dickens: Uncom. Traveler*, ch. x.

**cūs-īng*, **cūs-ŷng*, s. [A shortened form of *accusing* (q. v.).] An accusing, an accusation.

"Him self began a sair cusing to mak."

Wallace, vi. 397.

**cūs-kin*, s. [Etym. doubtful.] A drinking-cup.

cūsp, **cūspe*, s. [Lat. *cuspis*=a point.]

I. *Ord. Lang.*: A point.

II. Technically:

1. *Arch.*: An ornament in stonework of the Gothic order. It consists of projecting points, formed by the meeting of curves, and is the foundation of the peculiar foliation, feathering, tracery, archery, and panels of the order. The term was first applied by Sir James Hall in his Essay on the "Origin of Gothic Architecture."

"*Cusp* [is] a point formed by two parts of a curve meeting; hence applied to the projecting points formed by the meeting of the small arches or foils, in foil-arches on tracery. . . . In the Romanesque and Norman styles the cusp is often ornamented with a small cylinder."—*Glossary of Architecture*.

*2. *Astrol.*: "The entrance of any house, or first beginning, which is the line whereon the figure and degree of the zodiac is placed, as you find it in the table of houses." (*Philips*.)

"I'll find the cuspe, and Alfridaria."

Albunazar (*Dodsley*), O. P., vii. 171.

*3. *Astron.*: A term used to express the points or horns of the moon or other luminary. (*Harris*.)

*4. *Math.*: A term used where two branches of the same or of different curves appear to end in a point.

5. *Comp. Anat.*: The prominence in the molar teeth.

"It occupies half the length of the crown in the larger molars, and is preceded by an elevated conic cusp."—*Trans. Amer. Philos. Soc.* (1873), vol. xiii, p. 201.

cūs-pār-ī-æ, s. [Lat. *cusp(is)*=a point, a spike, and fem. adj. suff. -*aria*.]

Bot.: An old genus of plants, now made a synonym of *Galipea* (q. v.). [*CUSPARIÆ*.]

cusparia-bark, s.

Pharm.: *Cusparia cortex*. The bark of *Galipea cusparia*, order Rutaceæ, Angustura-bark tree growing in tropical South America. It is imported in straight pieces, more or less incurved at the sides, from half a line to a line in thickness, pared away at the edges, epidermis mottled-brown or yellowish-gray, inner surface yellowish-brown, flaky, breaks with a short fracture; the taste is bitter and slightly aromatic. The cut surface examined with a lens usually exhibits numerous white points or minute lines. The inner surface touched with nitric acid does not become blood-red, which distinguishes it from *Strychnos nux vomica*, or false Angustura-bark. *Cusparia-bark* is used to prepare *Infusum cusparie*. It is an aromatic stomachic, given in cases of atonic dyspepsia, diarrhoea, and dysentery, also in convalescence from acute diseases.

cūs-pār-ī-æ, s. pl. [Mod. Lat. *cuspari(a)*, and fem. pl. adj. suff. -*æe*.]

Bot.: A tribe of Rutaceæ, the type *Cusparia* (q. v.).

cūs-par-ī-ne, s. [Mod. Lat. *cuspari(a)*; Eng. suff. -*ine*.]

Chem.: A crystalline substance contained in *cusparia-bark*. It is soluble in alcohol.

cūs-pā-tēd, a. [Lat. *cusp(is)*=a point, and Eng. suff. -*ated*.]

Bot.: The same as *CUSPIDATED* (q. v.).

cūsped, a. [Eng. *cusp*; -*ed*.] Furnished with a cusp; cuspidal.

cūs-pīd-āl, a. [Lat. *cuspidatus*=made pointed, pa. par. suff. -*ātus* to make pointed.]

1. *Zool.*: Furnished with small pointed eminences or cusps. [*CUSPIDATE TEETH*.]

2. *Botany*:

(1) Tapering gradually into a rigid point.

"The medium vein . . . at times ends in a free point or *cuspid*, and then becomes *cuspidate*."—*Balfour: Botany*, § 372.

(2) Abruptly acuminate, as the leaf of many Rubi.

Window with Cusped Moldings.

cuspidate teeth, s. pl.

Anat.: A name applied to the canine teeth in the human jaw, of which there are four, one on each side of the two incisors above and below. There is a single central point or cusp on the crown of these canines, whence the term *cuspidate* has been derived. The cusp is invariably worn away by use. (*Quain*.)

cūs-pī-dōr, s. [Sp. *escupidera*=a spitting box; *escupidor*=a great spitter.] An earthenware waste-basket, or a vessel for the reception of sputa or ejected saliva.

cūs-pīs, s. [Lat.] A point, a tip.

"The multiplied cusps of the cone . . ."—*More: Notes on Psych.*, p. 425.

cūs-sō, s. [An Abyssinian word.] The same as *CABOTZ* (q. v.). [*BRAYERA*.]

**cust*, **custe*, s. [A. S. *cyst*; O. S. *kust*; O. H. Ger. *chust*.] A custom, a habit.

"Swulche weoren his *custes*."—*Layamon*, ii. 414.

cūs-tard, **crus-tade*, **cus-tade*, s. [According to Skeat a corruption of Mid. Eng. *crustade*, a general name for pies made with crust; from O. Fr. *croustade*=a pasty, crust. Cf. Ital. *crostata*=a kind of pie or tart with a crust; also the paste, crust, or coffin of a pie" (*Florio*): from Lat. *crustatus*, pa. par. of *crustare* to encrust.]

*1. A pie, a pastry.

"*Custarde*, cheke them inche square."—*W. de Worde: Booke of Keruynge*, in *Babees Book*, p. 159.

2. A sweetmeat made of eggs boiled with flour and sugar till the whole thickens into a mass.

"With cawdle, custard, and plumb-cake."

Butler: *Hudibras*.

custard-apple, s. [So called because the pulp of the fruit in the typical species is about the consistence of custard.]

1. A species of *Anona*, *A. reticulata*. It is a native of the West Indies, but is cultivated in India and the adjacent countries. It has yellow pulp. It is eaten, but is not so much prized as some other species of the genus. It is large, dark-brown in color, and netted all over.

2. The genus *Anona* (q. v.).

**custard-coffin*, **custard-coffen*, s. The raised crust of a pastry or pie. [*COFFIN*.]

"Why, thou say'st true; it is a paltry cap,

A *custard-coffin*, a bangle, a silken pie."

Shakespeare: *Taming of the Shrew*, iv. 3.

**cus-tī*, a. [A. S. *cystig*=good, liberal, excellent; O. H. Ger. *chustig*; M. H. Ger. *kustig*.] Excellent, preeminent, liberal.

"Cniht he was swithe strong, kene and *custi*."—*Layamon*, i. 271.

**cūs-tīl*, s. [O. Fr. *coustel*, *coutil*; Lat. *cultellus*.] A knife, a dagger.

"Daggers, *custilis*, and other basylardes."—*English Gilds*, p. 421.

**cūs-tī-nēsse*, s. [A. S. *cystignes*.] Liberality.

"*Largitas*, that is *custinesse* on Engliſe."—*O. E. Homilies*, p. 105.

cūs-tōc, *cus-tock*, s. [*CASTACK*, *CASTOCK*.] A cabbage-stalk.

"An' gif the *custoc's* sweet or sour,

Wi' jotelegs they taste them."

Burns: *Halloween*.

**cus-tode*, **cūs-tō-dēe*, s. [Lat. *custos* (genit. *custodis*)=a guard, a guardian.]

Law: One to whom the custody or guardianship of anything has been committed; a custodian, a guardian.

"The religious earnestness of the young *custode*."—*Cornhill Mag.*, Oct. 1881, p. 446.

cūs-tō-dī-ā, s. [Lat. =a guard-house; from *custos* (genit. *custodis*)=a guard.]

Ecclesiastical:

1. The shrine in which the host is carried in solemn processions; a custodial.

2. The shrine in which the relics of any saint are carried in a procession.

**cūs-tō-dī-āl*, a. & s. [Fr., from Lat. *custodia*; from *custos* (genit. *custodis*)=a guard.]

A. *As adj.*: Pertaining to custody or guardianship.

cūs-tōm, **cos-tom*, **cos-tome*, **cos-toum*, **cos-tume*, **cus-tume*, **kus-tume*, s. [O. Fr. *costume*, *coutume*; Fr. *coutume*; Ital. *costume*, *costuma*; Port. *costume*; Low Lat. *costuma*, from a neut. pl. form, *consuetumina*, from *consuetum*=a custom, from *consueo*, pa. par. of *consueo*=to accustom; inchoative form of *consueo*=to be accustomed: *con*=cum=with, together, fully, and *sueo*=to be accustomed. *Custom* is thus a doublet of *costume* (q. v.).]

I. *Ordinary Language*:

1. An habitual or common use or practice; a regular habit.

"And the priest's *custom* with the people was, that when any man offered sacrifice, the priest's servant came, while the flesh was in seething, with a flesh-hook of three teeth in his hands."—*1 Sam.* ii. 13.

*2. Frequent occurrence.

"They complain that it is made penal in an officer of the *customs* to open a box of books from abroad, except in the presence of one of the censors of the press."—*Macaulay: Hist. Eng.*, ch. xxi.

2. *Law*: The common or unwritten law (*lex non scripta*) of the country; a law or right not written but established by use from time immemorial, and daily practiced.

"*Custom* is either *general* or *particular*; *general*, that which is current through the entire country; *particular* or *local* is that which belongs to this or that state. *Custom* differs from *prescription*; for *custom* is common to more, and *prescription* is particular to this or that man; *prescription* may be for a far shorter time than *custom*."

bōil, *bōy*; *pōut*, *jōwl*; *cat*, *gell*, *chorus*, *chīn*, *bench*; *go*, *gem*; *thin*, *this*; *sin*, *as*; *expect*, *Xenophon*, *exist*. *ph* = *f*.
-*clan*, -*tian* = *shān*. -*tion*, -*sion* = *shūn*; -*tion*, -*sion* = *zhūn*. -*tious*, -*clous*, -*sious* = *shūs*. -*ble*, -*dle*, &c. = *bēl*, *dēl*.

"Blair thus distinguishes *custom* from *habit*: "*Custom* respects the action; *habit* the actor. By *custom* we mean the frequent repetition of the same act; by *habit* the effect which that repetition produces on the mind or body. By the *custom* of walking often in the streets one acquires the *habit* of idleness."

"(1) Crabb thus discriminates between *custom* and *habit*: "*Custom* is a frequent repetition of the same act; *habit* the effect of such repetition; the *custom* of rising early in the morning is conducive to the health, and may in a short time become such a *habit* as to render it no less agreeable than it is useful. *Custom* supposes an act of the will; *habit* implies an involuntary movement: a *custom* is followed; a *habit* is acquired: whoever follows the *custom* of imitating the look, tone, or gesture of another is liable to get the *habit* of doing the same himself: as *habit* is said to be second nature, it is of importance to guard against all *customs* to which we do not wish to become *habituated*: the drunkard is formed by the *custom* of drinking intemperately, until he becomes *habituated* to the use of spirituous liquors; the profane swearer who *accustoms* himself in early life to utter the oaths which he hears will find it difficult in advanced years to break himself of the *habit* of swearing; the love of imitation is so powerful in the human breast, that it leads the major part of mankind to follow *custom* even in ridiculous things; Solomon refers to the power of *habit* when he says 'Train up a child in the way in which he should go; and when he is old he will not depart from it:' a power which cannot be employed too early in the aid of virtue and religion. *Custom* is applicable to many; *habit* is confined to the individual: every nation has *customs* peculiar to itself, and every individual has *habits* peculiar to his own station and circumstances."

"*Customary* and *habitual*, the epithets derived from these words, admit of a similar distinction: the *customary* action is that which is repeated after the manner of a *custom*; the *habitual* action is that which is done by the force of *habit*." (Crabb: Eng. Synon.)

"(2) He thus discriminates between *custom*, *fashion*, *manner*, and *practice*: "*Custom* is authoritative; it stands in the place of law, and regulates the conduct of men in the most important concerns of life: *fashion* is arbitrary and capricious, it decides in matters of trifling import; *manners* are rational: they are the expression of moral feelings. *Customs* are most prevalent in a barbarous state of society; *fashions* rule most where luxury has made the greatest progress; *manners* are most distinguishable in a civilized state of society. *Customs* are in their nature as unchangeable as *fashions* are variable; *manners* depend on cultivation and collateral circumstances: *customs* die away or are abolished; *fashions* pass away, and new ones take their place; *manners* are altered either for the better or worse. . . . Both *practice* and *custom* are general or particular, but the former is absolute, the latter relative; the *practice* may be adopted by a number of persons without reference to each other; but a *custom* is always followed either by imitation or prescription. . . . it may be the *practice* of a person to do acts of charity, as the occasion requires; but when he uniformly does a particular act of charity at any given period of the year, it is properly denominated his *custom*." (Crabb: Eng. Synon.)

"(3) For the difference between *custom* and *tax*, see *Tax*; for that between *custom* and *usage*, see *Usage*.

"*Custom of Merchants*: The *Lex mercatoria*, a particular system of customs used only among merchants, and relating to bills of exchange, mercantile contracts, freight, insurance of merchandise, &c., which, although they differ from the general rules of the common law, are yet engrafted into it, and made a part of it."

"Away, you cut-purse rascal!"—*Shakesp.: Henry IV.*, Pt. II., ii. 4.

cūt-tā-ble, *a.* [Eng. *cut*; -able.] Capable of, or fit for being cut.

" . . . consume all the cuttable grass of the nearest field, . . ."—*Maxwell: Sel. Trans.*, p. 204.

*cūt-tēd, *cut-tit, *a.* [Eng. *cut*; -ed.]

I. *Lit.*: Cut, slashed.

"His wiif walked hym with, with a long gode
In a cuttede cote cutted ful heyghe."

Piers Plowman; Crede.

II. Figuratively:

1. Abrupt.

"A pathetic and cutted kind of speech, signifying that his heart was so boldened, that his tongue wold not serue him to express the mater."—*Bruce: Eleven Serm.*

2. Laconic, sharp.

*cūt-tēd-lŷ, *cūt-tēd-lie, *cut-tet-lie, *adv.* [Eng. *cutted*; -ly.]

1. With rapid but jerking motion.

"The fiery dragon flew on hie,
Out throw the skies, richt cuttette."

Burel: Watson's Coll., ii. 24.

2. Abruptly.

3. Laconically, sharply.

"The moderator cuttedly . . . answered, . . ."—*Baillie: Letters*, i. 104.

4. Briefly, shortly, concisely.

" . . . certes vnder the persones & names of the apostles, they cannot be reported, but both coldly and cuttedly."—*Edall: Pref. of Erasmus*.

cūt-tee, *s.* [Etym. doubtful.]

Weaving: The box to hold the quills in a weaver's loom.

bōil, bōy; pōut, jōwl; cat, cēll, chorus, chīn, bench; go, gem; thin, thīs; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

cūt'-tēr, *s. & a.* [Eng. cut; -er.]

A. As substantive:

I. Ordinary Language:

1. One who or that which cuts.

*2. *Spec.*: A sculptor.

*3. A bravo, a cut-throat.

II. Technically:

1. Agriculture:

(1) An implement or machine for cutting feed, such as a straw-cutter, a root-cutter, &c. (*Knight*.)

(2) That portion of a mower or reaper which actually severs the stalk. The varieties are numerous, but the general verdict of approval has been given to what may be called the saw—a term which describes generally a device consisting of projecting teeth or sections affixed to a bar and reciprocated longitudinally of the latter. (*Knight*.)

2. *Anat.*: A fore-tooth, an incisor.

"The molars, or grinders, are behind, . . . and the cutters before, that they may be ready to cut off a morsel from any solid food, to be transmitted to the grinders."—*Ray: On the Creation*.

3. *Build.*: A soft brick adapted to be rubbed down to the required shape for ornamental brick-work or arches.

4. *Engraving*: A burin, an engraver's tool; as a tint-cutter.

5. Mechanics:

(1) A revolving cutting-tool of a gear-cutter, a planing-machine, &c. [**CUTTER-HEAD**.]

(2) An upright chisel on an anvil; a hack-iron.

(3) The router or scrapper portion of the center-bit, which removes the portion circumscribed by the nicker.

(4) A file-chisel. (*Knight*.)

6. Nautical:

(1) A vessel with one mast, having fore and aft sails. The spars are a mast, boom, gaff and bowsprit. Cutters are usually small, but the fancy has sometimes been to make them as large as 400 tons and 28 guns. They are either clinker or carvel build; have no jib-stay, the jib hoisting and hanging by the halyards alone. A cutter carries a fore and aft mainsail, gaff-top-sail, stay, foresail, and jib.

Cutter.

(2) A boat smaller than a barge, and pulling from four to eight oars. It is from 22 to 30 feet long, and has a beam equal to "29 to 25 of its length. A number are required for the miscellaneous purposes of a large ship, and are known as first, second, &c., cutters. (*Knight*.)

*7. *O. Eng. Law*: An officer in the Exchequer that provides wood for the tallies, and cuts the sum paid upon them; and then casts the same into the court to be written upon. (*Cowel*.)

8. *Shooting*: A wad-punch.

9. *Vehicles*: A one-horse sleigh.

10. *Mining*: A crack or fissure cutting across or intersecting the strata.

11. *Mineral*: A crack in a crystal or precious stone; a flaw.

12. *Shoe-making*: A peg-cutter, or float.

13. *Tailoring*: A person who cuts out the cloth for garments according to measurement taken.

14. *Lapid.*: One who cuts and polishes gems.

" . . . a skillful cutter of diamonds and polisher of gems, . . ."—*Boyle: Works*, v. 36.

¶ *Cutter of the tallies*: [**II. 7.**]

B. As adjective: (See compounds *infra*.)

cutter-bar, *s.*

1. *Boring-machinery*: A bar supported between lathe-centers or otherwise in the axis of the cylinder to be bored, and carrying the cutting-tool. By various modifications having the same object in view, the tool-stock, cutter-bar, or cylinder may be moved, so as to cause the tool to pass around inside the cylinder or conversely, and also cause it to traverse from end to end. [**BORING-MACHINE**.]

Cutter-bar.

2. *Harvester*: A bar, usually reciprocating longitudinally, and having attached to it the triangular knives or sickles, which slip to and fro in the slots of the fingers, and cut the grain or grass as the machine progresses. The bar carrying the fingers is the finger-bar. (*Knight*.)

cutter-grinder, *s.* A grindstone or emery-wheel specially constructed for grinding the sections of the cutter-bars of reaping and mowing machines. (*Knight*.)

cutter-head, *s.* A rotating head, either dressed and ground to form a cutter, or having means for the attaching of bits or blades thereto.

***cutter-off**, *s.* One who destroys or exterminates.

"The cutter-off of Nature's wit."

Shakesp.: As You Like It, i. 2.

cutter-stock, *s.* A head or holder in which a cutting blade is fastened for use. (*Knight*.)

cūt'-tīe, *s.* [*Etym. doubtful*.] The Black Guillemot.

" . . . I observed several Black Guillemots, Columbus Grylle, which the boatman called cutties."—*Fleming: Tour in Arran*.

cūt'-tīng, *cūt'-tīng, *kit'-tīng, *pr. par., a. & s.* [**CUT, v.**]

A. As pr. par.: (See the verb.)

B. As adjective:

I. Lit.: Penetrating or dividing by means of a sharp or edged instrument; serving to cut; sharp-edged.

II. Figuratively:

1. Wounding the feelings deeply; bitter, acrimonious, sarcastic, biting.

" . . . reprimanded by the court of King's Bench in the most cutting terms."—*Macaulay: Hist. Eng.*, ch. vi.

2. Underselling; selling at a very small profit in order to cut out competition.

*3. Thieving, cheating.

"Wherefore have I such a companie of cutting knaves to wait upon me?"—*Greene: Friar Bacon*, v.

C. As substantive:

I. Ordinary Language:

1. Literally:

(1) The act of dividing or separating with a sharp-edged instrument; the act of wounding or incising; the act of mowing, reaping, or trimming.

"This kitting awel is clepid circumcisioun."—*Wycliffe: Select Works*, i. 335.

(2) A wound, an incision, a cut.

"Ye shall not make any cuttings in your flesh for the dead, . . ."—*Leviticus* xix. 28.

(3) A piece or portion cut off. [**II. 1.**]

2. Figuratively:

(1) A caper, a prank.

(2) The act of passing a person by without an acknowledgment.

* (3) A fashioning, contriving, or adapting.

"To prove at last my main intent

Needs no expense of argument,

No cutting and contriving."—*Cooper: Friendship*.

(4) A wounding deeply in the feelings.

(5) A sudden moving away or departure.

II. Technically:

1. *Gardening*: A slip or portion of a plant from which a new individual is propagated when placed in the earth.

"Many are propagated above ground by slips or cuttings."—*Ray*.

2. *Manège*: The action of a horse when he strikes the inner and lower part of the fetlock joint with his hoof while traveling.

3. *Civil Engin.*: An excavation for the purpose of a road, railroad, or canal. When the earth is not required for a fill or embankment, it is called waste. When the sides are not secure, sufficient slope must be allowed or retaining-walls constructed. These walls batter toward the bank in order to withstand the thrust. [**BATTER, BREAST-WALL, RETAINING-WALL**.]

4. *Mining*: A poor quality of ore mixed with that which is better.

5. *Games*:

(1) *Cards*: The act of making a cut of a pack of cards.

(2) *Cricket*: The act of making a cut.

6. *Metal*. (*Pl.*): The larger and lighter refuse which is detained by the sieve in the hotching-tub, or hutch. (*Knight*.)

7. *Paint*: The laying one strong, lively color on another without any shade or softening.

cutting-board, *s.* A board for the bench or lap, in cutting out leather or cloth for clothing.

cutting-box, *s.*

Agric.: A machine for cutting hay, straw, or corn-stalk into short feed. [**STRAW-CUTTER**.]

cutting-compass, *s.* A compass, one of whose legs is a cutter, to make washers, wads, and circular disks of paper for other uses.

cutting-down, *pr. par. & s.*

A. As pr. par.: (See the verb.)

B. As substantive:

1. *Lit.*: The act of cutting away from the main body.

2. *Fig.*: The act of reducing, retrenching, or compressing.

(1) *Cutting-down line*:

Shipbuilding: A curved line on the sheer-plan, which touches the lowest part of the inner surface of each of the frames. It determines the depth of the floor-timbers and the height of the dead-wood fore and aft.

(2) *Cutting-down staff*:

Shipbuilding: A rod having marked upon it the height of the cutting-down line above the keel at the several frames.

cutting-engine, *s.*

Silk-machinery: A machine in which refuse or floss silk—the fibers having been previously disentangled, straightened, and laid parallel by the Hackle, Filing-engine, and Drawing-frame (q. v.)—are cut into lengths of about one and a quarter inches, so as to enable them to be treated as a staple by the carding-machine and the machines which follow in the cotton process, bringing the fiber to a sliver, a roving, and a thread, suitable for weaving. The cutting-engine has feed-rollers and an intermittently acting knife, somewhat similar to a chaff or tobacco cutter.

cutting-file, *s.* The toothed cutter of a gear-cutting engine.

cutting-gauge, *s.* A tool having a lancet-shaped knife (one or two) and a movable fence by which the distance of the knife from the edge of the board is adjusted. It is used for cutting veneers and thin wood.

cutting-line, *s.*

Printing: A line made by printers on a sheet to mark the off-cut; that which is cut off the printed sheet, folded separately, and set into the other folded portion.

cutting-machine, *s.*

1. A machine for reducing the length of staple of flax. [**BREAKING-MACHINE**.]

2. A machine for cutting out garments. A reciprocating vertical knife works in a slot of the table which supports the pile of cloth to be cut. The cloth is fed by the attendant so as to bring the line marked on the upper layer in line with the knife.

cutting-nippers, *s.* A pair of pliers the jaws of which are sharp and come in exact apposition. The cutters are sometimes on the face of the jaws and sometimes on the side. (*Knight*.)

cutting-out, *pr. par., a. & s.*

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. *Ord. Lang.*: The act of separating from the main body by cutting.

2. *Tech.*: The act of fashioning or shaping by cutting.

3. *Naut.*: The act of capturing a ship in harbor. [**CUT, v. C. 5** (iv.) (2).] Also as adj. in such a phrase as a *cutting-out expedition*.

¶ *Cutting-out machine*: A machine by which planchets for coins, or blanks for other purposes, are cut from ribbons of metal. [**CUTTING-PRESS**.]

cutting-plane, *s.* A carpenter's smoothing-plane.

cutting-press, *s.*

1. A screw-press for cutting planchets of metal from strips. It has a cast-iron frame fixed on a stone basement.

2. A bookbinder's press for holding a pack of folded sheets while the book is sewed previous to sewing, or for holding the sewed book for edge-cutting. The screws pass through the side-pieces, which are steadied by sliding-guides. The pack may now be plowed or saw-cut on the back for the twines to which the sheets are sewed.

cutting-shoe, *s.* A horseshoe with nails on only one side, for horses that cut or interfere. A feather-edge shoe.

cutting-thrust, *s.* A tool like a cutting-gauge, employed in grooving the sides of boxes, &c. It has a routing-cutter in a stock, and an adjustable sliding-head which forms a gauge for distance from the guide-edge of the board.

cūt'-tīng-lȳ, *adv.* [Eng. cutting; -ly.] In a cutting manner.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, there; pine, plit, sire, sir, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāl; trȳ, sȳrian. æ, œ = ē; ey = ā. qu = kw.

cūt-tle (1), *s. & a.* [A. S. *cudele*=a cuttle-fish; Ger. *kuttel* (fisch), Dut. *kuttel* (visch).]

A. As substantive:

1. *Lit.*: A cuttle-fish (q. v.).

"It is somewhat strange that the blood of all birds, and beasts, and fishes should be of a red color, and only the blood of the cuttle should be as black as ink."—Bacon.

"2. *Fig.*: One who blackens the character of others; a slanderer. (Referring to the inky fluid which the cuttle-fish throws out.)

"I'll thrust my knife into your moldy chaps, if you play the saucy cuttle with me."—Shakesp.: *Henry IV.*, Pt. II., ii. 4.

B. As adj.: Pertaining to the animal alluded to under A. (See the first compound.)

cuttle-bone, s.

1. *Zool.*: The calcareous shell which constitutes the external and only skeleton in the cuttle-fish or cuttle-fishes. It consists of a broad laminated plate, terminated behind in a hollow imperfectly chambered apex called the mucro. Another name for it is the sepistaire.

2. *Manuf.*: The cuttle-bone was formerly employed as an antacid by apothecaries; it is now in use only as pounce, or in casting counterfeits. (S. P. Woodward.)

cuttle-fish, s.

1. *Singular*:

(1) A cephalopod mollusk, *Sepia officinalis*. It has an oblong body, with lateral fins as long as itself, and ten arms, each with four rows of suckers. For its internal shell see CUTTLE-BONE.

"He that uses many words for the explaining any subject doth, like the cuttle-fish, hide himself for the most part in his own ink."—Ray: *On the Creation*.

(2) As the singular corresponding to any of the series given under 2 Pl.

2. *Plural*:

(1) The cephalopods of the genus *Sepia*.

(2) The family Sepiidae.

(3) The cephalopoda in general.

***cūt-tle** (2), *s.* [Lat. *cuttellus*=a knife.] A knife, a dagger.

"...dismembering himself with a sharp cuttle in her presence."—Bale: *English Votaries*, pt. ii.

cūt-tōe, cūt-tōo, *s.* [Fr. *couteau*=a knife.] A large knife.

cuttoo-plate, s. A hood above the nave or hub of a vehicle, to prevent the street mud from falling upon the axle and becoming ground in between the axle-box and spindle. Otherwise called a dirt-board, or round robbin. It is attached to the axle or bolster.

cūt-tŷ, cūt-tle, a. & s. [Gael. *cutach*=short, bob-tailed; *cutach*=to shorten, dock.] [CUT, v.]

A. As adjective:

1. *Lit.*: Short.

"He gaes to me a cuttle knife,

And bade me keep it as my life."

Remains of Nithdale Song, p. 208.

2. *Fig.*: Testy, hasty, hot-tempered.

B. As substantive:

1. A popgun.

2. A short spoon. [Gael. *cutag*=a short spoon.]

[CUTTY-SPOON.]

"It is better to sup with a cutty than want a spoon."—Ramsay: *S. Prov.*, p. 44.

3. A short tobacco-pipe.

"I'm no sae scant of clean pipes, as to blow with a brunt cutty."—Ramsay: *S. Prov.*, p. 40.

4. A short stump of a girl.

5. A hare.

"Lepus timidus, Common Hare.—S. Maukin, *Cuttie*,"—*Edinburgh Magazine*, July, 1819, p. 507.

cutty-brown, s. Apparently a designation applied to a brown horse that is crop-eared, or perhaps docked in the tail. (Jamieson.)

"I scoured awa to Edinborow-town,

And my cutty-brown together."

Herd: Coll., ii. 220.

cutty-free, a. Able to take one's food; free to handle the spoon. A person is said to be cutty-free, who, although he pretends to be ailing, yet retains his stomach. (Jamieson.)

cutty-gun, s. A short tobacco-pipe.

"But wha cam in to heese our hope,

But Andro wi' his cutty-gun?"

Old Song, Andro, &c.

cutty-pipe, s. A short pipe.

"...they overtook a sharp-looking lad, with a short bit of a pipe in his mouth. He at once slipped the cutty-pipe into a side pocket."—Rev. J. W. Warton: *The Sea-board and the Down* (1860), vol. ii., p. 14.

cutty-quean, s.

1. A worthless woman.

2. Ludicrously applied to a wren.

"Then Robin turn'd him round about,

Even like a little king;

Go, pack ye out at my chamber door,

Ye little cutty-quean."—*Herd: Coll.*, ii. 167.

cutty-rung, s. A crupper used for a horse that bears a pack-saddle, formed by a short piece of wood fixed to the saddle at each end by a cord. (Jamieson.)

cutty-spoon, s. A horn spoon with a short handle.

"If ye dinna eat instantly, and put some saul in ye, by the bread and the salt, I'll put it down your throat wi' the cutty-spoon."—Scott: *Guy Mannering*, ch. xli.

cutty-stool, s.

1. A low stool.

2. The stool of repentance, on which offenders were seated in church, now disused.

"The cutty-stool is a kind of a pillory in a church, erected for the punishment of those who have transgressed in the article of chastity, and, on that account, are liable to the censures of the church."—Sir J. Sinclair, p. 228.

cutty-stoup, cuttle-stoup, s. A pewter vessel holding the eighth part of a chopin or quart.

"The cuttle-stoup bid hands a soup,

Gae fetch the Hawick gill O."—Burns.

cūt-wal, s. [Hind., Mahratta, &c.] The chief officer of police in an Indian town. (Anglo-Indian.)

cūt-wid-dle, cūt-wūd-dle, s. [Eng. *cut*, and *wuddle*, a dim. of wood.]

1. The piece of wood by which a harrow is fastened to the yoke.

2. (Pl.): The links which join the swingle-trees to the beam in a plow.

cūt-wōrm, s. [Eng. *cut*, and *worm*.] A small white grub, which destroys coleworts and other vegetables of this kind, by cutting through the stem near the roots.

cū-vētte, *s.* [Fr., dim. of *cuve*=a vat.]

1. *Glass-making*: A basin for receiving the melted glass after it is refined, and decanting it on to the table to be rolled into a plate. The cuvettes stand in openings in the sides of the furnace, and are filled with melted glass from the pots by means of iron ladles. The material remains sixteen hours in the pots and sixteen in the cuvettes. In casting, the cuvette is lifted by means of gripping-tongs, chains, and a crane, and the contents are poured upon the casting-table.

"The glass is transferred from the melting-pot to a large vessel called the cuvette, and allowed to remain some hours in the furnace."—Timbs: *Glass-making*, in Cassell's *Technical Educator*, pt. ii., p. 539.

2. *Fort.*: A ditch in the main ditch. (Knight.)

cū-vi-ēr-a, s. [From Georges Cuvier, ultimately Baron Cuvier, born August 23, 1799, in France, but of a Swiss father. He himself was of the Protestant faith. At the age of twenty-six he, in 1795, became assistant in the Jardin des Plantes, in Paris, in the same year lectured on comparative anatomy, became in 1796 one of the first members of the French Institute formed that year, in 1798 published his first work on animals, and in 1800 became Professor of Natural Philosophy at the Collège de France. The same year he published the first two volumes of his *Comparative Anatomy*, the three following ones in 1805. After receiving many honors and offices, and rendering science good service, he in 1817 published the second edition of his *Ossements Fossiles*, his first publication on the subject having appeared in 1798. In 1817 he published his *Règne Animal* (Animal Kingdom), which revolutionized zoological classification, and has even yet been superseded only in details. He died in 1830.]

Zool.: A genus of Pteropoda with a cylindrical transparent shell, the animals with simple narrow fins. Four recent species are known, from the Atlantic, India, and Australia, and four fossil, the latter from the Miocene.

cw.

¶ For words beginning with *cw* see *qu*.

cwt., s. [See def.] An abbreviation of *hundred-weight*, *c.* being the symbol for Lat. *centum*=a hundred; wt. a contraction of Eng. *weight*.

-cy, an affix forming abstract nouns of state, an Eng. adaptation of Lat. -tia (really a compound affix formed by adding the abstract noun ending -ia, to adj. and particip. stems in -t, -nt, as *infa-*, *infa-nt-*, *infa-nt-ia*, *infa-n-cy*; *lega-*, *lega-tus*, *lega-t-ia*, *lega-cy*).

Cy.

Chem.: A symbol sometimes used instead of (CN) for the monad radical of cyanogen (CN)₂.

cŷ-ām-ē-lide, s. [Eng. *cy(anic)*, and *am(m)elide* (q. v.).]

Chem.: (CNHO)_x. A white porcelain-like mass formed in the preparation of cyanic acid, CNHO. It is polymeric of cyanic acid, and is also formed when equivalents of phosphoric anhydride and urea are distilled at 40°. Also formed when cyanic acid is cooled to 0°.

cŷ-ām-ēl-ūr-āte, s. [Eng. *cyamelur(ic)*; -*qte*.]

Chem.: A salt of cyameluric acid.

cŷ-ām-ēl-ūr-īc, a. [Eng. *cy(anic)*, *mel(tonic)* and *uric* (q. v.).] A word occurring only in the subjoined compound.

cyameluric acid, s.

Chemistry: C₆H₃N₃O₃, or $\begin{matrix} (CN)_6 \\ H_3 \end{matrix} \begin{matrix} N''' \\ O_3 \end{matrix}$, a tribasic acid prepared by boiling mellone with caustic potash. The free acid is obtained from an aqueous solution of potassium cyamelurate by adding hydrochloric acid. Cyameluric acid is a white crystalline powder, which when heated gives off vapors of cyanic acid, and leaves a yellow residue of mellone.

cŷ-ām-ī-dæ, s. pl. [Mod. Lat. *cyam(us)*, and fem. pl. adj. suff. -*idæ*.]

Zool.: A family of Crustaceans, order Læmmodipoda. The species are called Whale-lice. The head is small, the body broad, the first pair of legs very small, the second, fifth, sixth, and seventh legs very powerful, the third and fourth converted into branchial vesicles. [CYAMUS.]

cŷ-ām-ī-ūm, s. [Latin *cyam(us)* [CYAMUS], -*i* connective, and neut. sing. adj. suff. -*um*.]

Bot.: A kind of foliicle resembling a legume. (Treas. of Bot.)

cŷ-a-mūs, s. [Lat. *cyamos*; Gr. *kyamos*=(1) a bean, (2) the Egyptian bean (*Nelumbium speciosum*).]

1. *Bot.*: A genus of Nelumbiaceæ, now made simply a synonym of *Nelumbium*.

2. *Zool.*: The typical genus of the family Cyamidae (q. v.). *Cyamus balænarum*, or *C. cetti*, is the common Whale-lice.

cŷ-ān, cŷ-ān-o, pref

Chem.: Denotes that the compound contains the radical CN.

cŷ-a-næ-a, s. [CYANEA.]

cŷ-ān-a-mide, s. [Eng. *cyan(ogen)*; -*amide*.]

Chemistry: Carbo-diimide, CN₂NH₂, or C $\begin{matrix} NH \\ NH \end{matrix}$. Obtained by passing gaseous chloride of cyanogen into a solution of ammonia gas in anhydrous ether, ammonium chloride separating out, and the ethereal solution, evaporating in a water bath, yields pure cyanamide; also by the action of dry CO₂ on sodamide, NH₂Na, or by adding mercuric oxide, HgO, to a cold solution of thio-carbamide, CS(NH₂)₂. It forms colorless deliquescent crystals, melting at 40°, easily soluble in water, alcohol, and ether. By the action of nascent hydrogen it is converted slowly into ammonia and methylamine, NH₂CH₃, by sulphuric acid partly into ammeline, and also into urea CO(NH₂)₂. When H₂S is passed into a solution of cyanamide in anhydrous ether, thio-carbamide is precipitated. By heating cyanamide with ammonium chloride in an alcoholic solution, guanidine hydrochlorate is formed. When cyanamide is heated with water or dilute alkalies, or when heated alone to 150°, it yields dicyan-diamide. Cyanamide gives a yellow precipitate, CN₂Ag₂, with silver nitrate, and dark brown precipitate, CN₂Cu, with cupric salts.

cŷ-ān-āte, s. [Eng. *cyan(ogen)*; -*ate*.]

Chem.: A salt of cyanic acid. Metallic cyanates can occur in two modifications: Normal cyanates, as potassium normal cyanate, N—C—O—K, and isocyanates, as potassium isocyanate, O=C—N—K. Nearly all the cyanates at present known are probably isocyanates.

¶ (1) *Cyanate of ammonium*:

Chem.: CNO·NH₃ is formed when the vapor of cyanic acid is mixed with dry ammonia gas. It is a white crystalline substance soluble in water, the solution giving off CO₂ when an acid is added, and NH₃ on the addition of caustic potash. If the aqueous solution of cyanate of potassium is boiled, it is converted into urea CO·NH₂.

¶ This was the first synthesis of an organic substance.

(2) *Cyanate of potassium*:

Chem.: CONK, the ordinary potassium cyanate is an isocyanate, CON·K. It is prepared by fusing potassium cyanide, KCN, in a crucible and adding plumbic oxide, PbO, till it is no longer reduced; the fused cyanate of potassium is then decanted off, and purified by crystallization from boiling alcohol, from which it separates on cooling in deliquescent colorless plates. Cyanate of potassium is decomposed by sulphuric acid, thus, 2CONK + 2H₂O + 2H₂SO₄ = (NH₄)₂SO₄ + K₂SO₄ + 2CO₂, a very small quantity of cyanic acid escaping. Cyanate of potassium exposed to moist air gives off ammonia, and is gradually converted into potassium bicarbonate. Heated in a closed crucible with charcoal it is reduced to potassium cyanide.

cy-a-nē-a, cy-a-nē-a, s. [Lat. *cyaneus*; Gr. *kyaneos*=dark blue.]

Zool.: A genus of Coelenterata (Radiata), sub-class Lucernaria, order Pelagidae. *Cyanea capitata* is common on the British coasts; it is about a foot across. It sometimes comes in contact with bathers, and swimming away, leaves its arms, which have stinging qualities, fixed in their bodies. The umbrella of *C. arctica* has in one case been found seven feet in diameter.

Cyanea.

***cy-ān-ē-an, a.** [Gr. *kyanos*=dark blue.] Of an azure color.

cy-ān-ē-ōis, a. [Lat. *cyaneus*; Gr. *kyaneos*=dark blue, glossy blue.]

Nat. Science. Of a clear bright blue color.

cy-ān-ēth-ine, s. [Eng. *cyan(ogen)*; *eth(yl)*; *-ine*.]

Chem.: $C_9H_{15}N_3$. Prepared by the action of metallic sodium on ethyl-cyanide, C_2H_5CN . It crystallizes in white plates, which melt at 189° , and boils at 280° .

cy-ān-īc, a. [Gr. *kyanos*=a dark blue substance, and Eng., &c., suff. *-ic*.] Dark blue; pertaining to that color.

cyanic acid, s.

Chem.: $CONH$, probably $O=C=NH$, or NCO , isocyanic acid, carbimide. Obtained by heating in a sealed bent tube cyanuric acid, $C_3H_3N_3O_3$, the other limb of the tube being kept cool by ice. Cyanic acid condenses as a colorless volatile liquid having a pungent irritating odor; it attacks the skin; when kept it changes into the polymeric porcelain-like substance, cyanamel. An aqueous solution of cyanic acid decomposes, forming carbonic dioxide and ammonia; also by a secondary re-action urea is formed, the result being thus expressed, $CO-NH_2 + H_2O = CO_2 + NH_3$ and $CO-NH_2 + NH_3 = CO-NH_2 + H_2O$. Cyanic acid is monobasic; cyanates of lead, mercury and silver are insoluble in cold water; cyanate of barium is soluble.

cyanic ethers, s. pl.

Chem.: Two isomeric modifications. (1) *Normal*, as methyl cyanate, $(N-C)-O-CH_3$. Obtained by the action of gaseous cyanogen chloride on sodium alcohols. They are colorless oily liquids, decomposed by dilute alkalis into cyanate and the corresponding alcohol. (2) *Isomeric*, as carbimides, $O=C=N-CH_3$, methyl isocyanate. Obtained by distilling a dry mixture of potassium isocyanate and methyl sulphate; it boils at 60° . Heated with a strong solution of potash it is decomposed, yielding CO_2 and methylamine, NH_2CH_3 . Corresponding ethyl compounds are known.

cyanic series, s.

Bot.: The name given by De Candoile to the series of colors of which the typical one is blue. In 1825, Messrs. Schübbler and Funk published a memoir at Tübingen upon the color of flowers, dividing them into two great series: (1) Those which have yellow for their type, and which are capable of passing into red or white but never into blue; and (2) those of which blue is the type, which can pass into red or white but never into yellow. They called the first series *oxidized*, and the second *deoxidized*, and were of opinion that greenness was a state of equilibrium between the two series. To the first of these series De Candoile gave the name of the *zanthic* series, and on the second, as stated above, he bestowed the name of the *cyanic* series. The latter includes the following colors: red, violet-red, violet, violet-blue, blue, and greenish-blue. (Lindley.)

cy-ān-ide, s. [Eng. *cyan(ic)*, and suff. *-ide* (Chem.) (q. v.).]

Chem.: Cyanides are chemical compounds which contain the monad radical (CN), combined with a metallic element, as $K(CN)$, potassium cyanide, or with a hydrocarbon radical, as $CH_3(CN)$, methyl cyanide. Cyanides can be obtained synthetically by heating a mixture of potassium carbonate and charcoal to redness in a porcelain tube, and passing nitrogen gas through the tube, $K_2CO_3 + 4C + N_2 = 2KCN + 3CO$. Also formed when an organic body containing nitrogen is heated in a tube with metallic sodium. If cyanides are dissolved in water rendered alkaline by potash or soda, then a mixture of ferrous and ferric sulphates is added,

and the mixture is rendered acid with dilute hydrochloric acid, a blue color of ferrocyanide of iron being formed. If the liquid containing a cyanide be made acid with a few drops of hydrochloric acid, and then a little yellow ammonium sulphide be added, and the liquid gently evaporated till the excess of sulphide is volatilized, the residue will give a red color when a few drops of tincture iron are added. Cyanides give a curdy white precipitate with silver nitrate, which is insoluble in cold nitric acid, the dry precipitate, $Ag(CN)$, when heated in a small glass tube, giving off cyanogen. Cyanides may be formed by dissolving metallic oxides or hydroxides in a solution of hydrocyanic acid, HCN , also by double decomposition of metallic salts, with potassium cyanide if the resulting cyanide is insoluble.

(1) *Cyanide of ammonium*:

Chem.: Ammonium cyanide, NH_4CN . Obtained by mixing the vapor of hydrocyanic acid with ammonia gas, by passing ammonia over red-hot charcoal; by heating a mixture of dry ferrocyanide of potassium with ammonium chloride; by passing a mixture of carbon monoxide, CO , and ammonia through a red-hot tube. It forms colorless very volatile crystals, which are very soluble in water and in alcohol. It sublimes at 40° .

(2) *Cyanide of allyl*:

Chem.: C_3H_5CN . Crotonitril.

(3) *Cyanide of amyl*:

Chem.: $C_5H_{11}CN$. Capronitril. Boiling point,

146°.

(4) *Cyanide of barium*:

Chem.: $Ba(CN)_2$. Obtained by passing air over an ignited mixture of barium carbonate and finely divided carbon. It is soluble in water. Heated to $300^\circ C$. in a stream of aqueous vapor it gives off its nitrogen in the form of ammonia.

(5) *Cyanide of benzyl*: [CRESS OIL.]

(6) *Cyanide of butyl*:

Chem.: C_4H_7CN . Valeronitril. Boiling point,

125°.

(7) *Cyanide of cacodyl*: [CACODYL.]

(8) *Cyanide of cobalt*: [COBALTI-CYANIDE, CO-

BALTO-CYANIDE (q. v.).]

(9) *Cyanide of ethyl*:

Chem.: C_2H_5CN . [PROPIONITRIL.]

(10) *Cyanide of gold*:

Chem.: Aurous cyanide, $Au(CN)$. Obtained by adding a solution of potassium cyanide to auric chloride, when it is precipitated as a lemon-yellow crystalline powder; it is soluble in excess of potassium cyanide. A solution of gold in excess of potassium is used for gilding silver or copper.

(11) *Cyanide of hydrogen*:

Chem.: HCN . Hydrogen cyanide, hydrocyanic acid (q. v.).

(12) *Cyanide of iron*: [FERRICYANIDE, FERRO-CYANIDE (q. v.).]

(13) *Cyanide of mercury*:

Chem.: Mercuric cyanide, $Hg(CN)_2$. Obtained by dissolving mercuric oxide, HgO , in a solution of hydrocyanic acid, and by boiling two parts of mercuric sulphate, $HgSO_4$, with one part of potassium ferrocyanide, $K_4Fe(CN)_6$, in eight parts of water. Mercuric cyanide crystallizes in anhydrous colorless prisms; soluble in eight parts of cold water, insoluble in absolute alcohol. It is very poisonous. Heated it gives off cyanogen and metallic mercury, a little paracyanogen being also formed; if moist, it yields carbonic anhydride, ammonia, hydrocyanic acid, and mercury. Cyanide of mercury is not decomposed by potash.

(14) *Cyanide of methyl*:

Chem.: CH_3CN . Acetonitrile (q. v.).

(15) *Cyanide of nickel*:

Chem.: $Ni(CN)_2$. When potassium cyanide is added to solutions of nickel salts they give a light apple-green precipitate of nickel cyanide, which is soluble in excess, forming a double salt; dilute acids reprecipitate the $Ni(CN)_2$.

(16) *Cyanide of phenyl*:

Chem.: C_6H_5CN . Benzonitrile, Cyanobenzene (q. v.).

(17) *Cyanide of platinum*: [PLATINO-CYANIDE, PLATIN-CYANIDE (q. v.).]

(18) *Cyanide of potassium*:

Chem.: KCN . Cyanide of potassium can be obtained pure by passing hydrocyanic gas into a solution of caustic potash in 90 per cent. of alcohol. Impure cyanide of potassium is formed by fusing in a covered crucible organic matter containing nitrogen, as horn, woolen rags, carcasses of animals, leather, &c., with carbonate of potassium, but it is better to add iron filings, and form ferrocyanide of potassium; the fused mass is treated with water, and the crude salt is recrystallized. Eight parts of anhydrous ferrocyanide of potassium when fused with three parts of dry carbonate of potassium yield cyanide and isocyanate of potassium, thus, $K_4Fe(CN)_6 + K_2CO_3 = 5KCN + K(CNO) + Fe + CO_2$; the addition of a little charcoal prevents the formation of isocyanates. Cyanide of potassium exposed crystallizes in colorless cubes; when exposed moist to the air, it absorbs carbonic dioxide and

gives off hydrocyanic acid. Cyanide of potassium is very poisonous; it is used in photography and in electrotying; it is insoluble in absolute alcohol. It reduces metallic oxides when fused with them, and is used in blowpipe analysis. An aqueous solution when boiled is decomposed into ammonia and formate of potassium. Cyanide of potassium explodes when heated with chlorate of potassium; when fused with sulphur it is converted into sulphocyanate of potassium, $KCNS$. (Cyanide of potassium removes the stains produced by silver nitrate, but it is dangerous if absorbed into a cut or wound of the skin.)

(19) *Cyanide of propyl*:

Chem.: C_3H_7CN . Butyronitrile. Boiling point,

115°.

(20) *Cyanide of silver*:

Chem.: Argenticyanide, $AgCN$. Obtained as a white precipitate when argentic nitrate is added to potassium cyanide. It is insoluble in water and cold nitric acid, but soluble in ammonia and in excess of potassium cyanide. Heated it gives off cyanogen, leaving a mixture of metallic silver and paracyanogen. It forms a double salt with potassium cyanide, which is soluble in water and in boiling alcohol; it is used to electroplate metals with silver.

cy-ān-ī-line, s. [Eng. *cy(anic)*; *aniline*.]

Chem.: $C_{14}H_{11}N_3$. A crystalline substance formed by the action of cyanogen on aniline.

cy-ān-ī-ne, s. [Gr. *kyanos*=a dark blue substance; as adj. dark blue, and suff. *-ine* (Chem.) (q. v.).]

Chem.: Chinoline blue, $C_{12}H_{11}N_2$. Used as a blue dye. Prepared by the action of potash on amyl-chinoline iodide, $C_5H_7(C_2H_5)NI$. It occurs as green or yellow crystalline powder, according to the amount of water contained in it. It dissolves in hot alcohol, forming a dark-blue solution; it is only slightly soluble in cold water.

cy-ān-ī-te, s. [Gr. *kyanos*=blue, and suff. *-ite* (Min.) (q. v.).]

1. *Min.*: A translucent or transparent trichlinic mineral in flattened prisms. Its hardness is 5-7-25; its specific gravity 3.45-3.7; its luster from vitreous to pearly, crystals blue with white margins, or gray, green, or black; streak colorless. Composition: Silica, 36.8; alumina, 63.2=100. It is found chiefly in gneiss and mica-schist. It is found in this country, in Scotland, and on the Continent of Europe. There are blue and white varieties of it. It is sometimes altered to tale and steatite. (Dana.)

2. *Chem.*: Chemically viewed, the mineral described under 1 is a basic aluminum silicate, $Al_2O_3SiO_2$.

cy-ān-mēth-ine, s. [Eng. *cyan(ogen)*; *meth(yl)*; *-ine*.]

Chem.: $C_6H_5N_3$. Obtained by the action of sodium on methyl-cyanide, CH_3CN . A crystalline substance, melting at 180° , and forming salts with acids.

cy-ā-nō, in compos. [Gr. *kyanos*.] [CYANIC.] **Bot., &c.**: Blue; a clear, bright blue; Prussian blue.

cy-ān-ō-bēn-zēne, s. [Eng. *cyan(ogen)*, and *benzene*.]

Chem.: Phenyl cyanide, or benzonitril, C_6H_5CN . Prepared by distilling potassium benzene-sulphonate with potassium cyanide; by distilling benzanilide, $C_6H_5CO-NH_2$, with phosphoric anhydride, P_2O_5 ; by heating formamidine, C_6H_5NHCOH , with concentrated hydrochloric acid. Cyanobenzene is a colorless liquid, smelling like oil of almonds, boiling at 191° . By heating with acids or alkalis it is converted into benzoic acid.

cy-ā-nō-chrō-īte, s. [Gr. *kyanochroos*=dark-colored, dark-looking; *kyanos*=dark blue, *chroa*=color, and suff. *-ite* (Min.) (q. v.).]

Min.: A monoclinic mineral of a clear blue color, believed by Scacchi to be a hydrous sulphate of potash and copper. (Dana.)

cy-ā-nō-chrō-ūs, a. [Gr. *kyanochroos*, and Eng., &c., suff. *-ous*.] [CYANOCHROITE.]

Bot.: Having a blue skin.

cy-ān-ō-form, s. [Eng., &c., *cyan(ide)*, and (chlor)form.]

Chem.: Tricyanomethane, $CH(CN)_3$. Said to have been formed by heating trichloromethane (chloroform), $CHCl_3$, with potassium cyanide, $K(CN)$.

cy-ān-ō-gēn, s. [Gr. *kyanos*=blue, and *gennaō*=to produce.]

Chem.: Dicyanogen, $(CN)_2$, or $(N-C)-(C-N)$, or Cy_2 . Obtained by heating silver or mercuric cyanide; also by dry distillation of ammonium oxalate. Cyanogen is a colorless poisonous gas, which liquefies at -25° , or under a pressure of four atmospheres at 20° , and at -34° becomes crystalline. It burns with a peach-blossom-colored flame, forming CO_2 and nitrogen; water dissolves four volumes,

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, plt, sire, slr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; try, sŷrian. æ, œ = ē; ey = ā. qu = kw.

and alcohol twenty-three volumes of the gas. (Cyanogen is very poisonous, and smells like prussic acid. Cyanogen gas passed into strong aqueous hydrochloric acid is converted into oxamide. Nascent hydrogen from tin and hydrochloric acid converts cyanogen into ethylene-diamine, $N_2(C_2H_4)_2$. A solution of cyanogen in water turns dark and deposits azulmic acid, $C_4H_3N_5O$, and the solution contains hydrocyanic acid, urea, and oxalate and formate of ammonium. Cyanogen dissolves in an aqueous solution of potash, forming cyanide and isocyanate of potassium. Cyanogen can be regarded as the nitril of oxalic acid. Dry ammonia gas and cyanogen combine, forming hydrazulmin, $C_4N_6H_6$. Small quantities of cyanogen are formed during the distillation of coal. Potassium burns in cyanogen gas, forming potassium cyanide.

*Cyanogen was discovered by Gay-Lussac in A. D. 1815.

cyanogen chloride, s.

Chem.: Also called gaseous cyanogen chloride, (CN)Cl. Obtained by the action of chlorine and aqueous solution of hydrocyanic acid, cooled by a mixture of salt and ice, the excess of chlorine and hydrocyanic acid are removed by the addition of small quantities of mercuric oxide. Cyanogen chloride is a liquid nearly insoluble in water, soluble in alcohol and ether. It boils at 15°, and gives off an irritating vapor which attacks the eyes; it is very poisonous.

cyanogen iodide, s.

Chem.: (CN)I. Obtained by subliming a mixture of one molecule of mercuric cyanide, $Hg(CN)_2$, with two molecules of iodide; or by adding iodine to a concentrated aqueous solution of potassium cyanide, and shaking out the (CN)I with ether. It is soluble in water, alcohol, and ether; its vapor has a very irritating smell. It sublimes in colorless needles at 45°. With ammonia it forms cyanamide and ammonium iodide. Cyanogen bromide, (CN)Br, is also a crystalline irritating substance.

cy-ân-ô-lîte, s. [Gr. *kyanos* [CYANIC], and *lithos*=a stone.]

Min.: An amorphous mineral of a bluish-gray color, believed by Dana to be an impure form of centallassite with more than the normal amount of silica, or chalcedony impure with centallassite.

cy-ân-ôm-êt-êr, s. [Gr. *kyanos*=dark blue, and *metron*=a measure.] An apparatus invented by Saussure, for determining the depth of the tint of the atmosphere. A circular band of thick paper is divided into fifty-one parts, each of which is painted with a different shade of blue; the extremities of the scale being respectively deep blue and nearly white. The colored band is held in the hand of the observer, who distinguishes the particular tint corresponding to the color of the sky. The number of this tint, reckoning from the light end, indicates the intensity of the blue. (*Knight*.)

cy-ân-ôp'-a-thÿ, s. [Gr. *kyanos*=dark blue, and *pathê*=a passive state, suffering, or *pathos*=that which befalls one, . . . suffering.]

Med.: The same as CYANOSIS (q. v.).

***cy-ân-ô-phÿll, s.** [Gr. *kyanos*=dark blue, and *phÿllon*=a leaf.]

Bot. & Chem.: A blue coloring matter, alleged to commingle with a yellow one called xanthophyll to produce the green characteristic of leaves. Micheli and Stokes deny its existence.

cy-ân-ô-sis, s. [Gr. *kyanosis*=a dark-blue color.]

Med.: What the ancients called Blue Jaundice, a disease in which the complexion becomes blue or leaden in hue, the cause being the mixture of the venous and arterial blood. The affection is very often noticed in new-born infants, especially where the second stage of the labor has been unduly protracted, and the infant subjected to great muscular compression in birth.

cy-ân-ô-site, cy-ân-ôse, s. [Gr. *kyanosis* [CYANOSIS], and suff. -ite (Min.) (q. v.).]

Min.: The same as CHALCANTHITE (q. v.).

cy-ân-ô-tis, s. [Gr. *kyanos*=dark blue, and *ous, genit ôtos*=the ear.]

Bot.: A genus of Commelynaceæ (Spiderworts). It consists of hairy or woolly plants from the hotter parts of Asia. A decoction of *Cyanotis axillaris* is drunk in the East as a remedy for tympanis.

cy-ân-ôt-rich-ite, s. [Ger. *cyanotrichit*; Gr. *kyanos*=dark blue, and *trich, genit. trichos*=hair.]

Min.: A blue mineral occurring in short capillary crystals of velvety aspect. Composition: Sulphuric acid, 14.1-15.4; alumina, 11.0; sesquioxide of iron, 1.18; oxide of copper, 43.2-46.6; water, 23. It occurs in the Banat. Dana prefers the name *Cyanotrichite*, the *British Museum Catalogue* calls it Lettsonite, after an English mineralogist, W. G. Lettson. (*Dana, &c.*)

cy-ân-ô-type, s. [Gr. *kyanos*=dark blue, and Eng. *type* (q. v.).]

Phot.: A process by Sir John Herschel in which cyanogen is employed. One form of the process is as follows: A paper is washed with ferrocyanide of potassium and dried; placed under a frame, the parts exposed to light are changed from yellow to blue (Prussian blue). The picture is washed, then fixed by carbonate of soda, and dried. The picture before washing is lavender on a yellow ground, but washes out to a blue on a white ground. It is rather curious than really useful. The process has several variations. (*Knight*.)

cy-ân-ûr-âte, s. [Eng. *cyanuric* (ic); -ate.]

Chem.: A chemical compound formed from cyanuric acid, by replacing hydrogen atoms by an equivalent quantity of some other metal. Cyanurate of silver is insoluble in water.

cy-ân-ûr'-ic, a. [Eng. *cyanogen*], and *uric* (q. v.).]

Chem.: Derived from cyanogen and urea. A word occurring chiefly or exclusively in the following compounds.

cyanuric acid, s.

Inorganic Chem.: $C_3H_3O_3N_3$ can have two isomeric formulæ—normal cyanuric acid,

and isocyanuric acid, $\text{OC}-\text{N} < \text{H} \text{CO}$

$\text{HN}-\text{CO}-\text{NH}$. The common cyanuric acid is probably the isocyanuric acid, or tricarbidimide. It can be formed by boiling cyanuric chloride, $C_3N_3Cl_3$, with dilute alkalis; also by passing a current of dry chlorine gas over fused urea, the ammonium chloride, which is formed at the same time, being removed by cold water, and the cyanuric acid crystallized out of boiling water. It forms colorless efflorescent rhombic prisms containing two molecules of water of crystallization. It dissolves without decomposition in hot nitric acid, and also in sulphuric acid. When boiled with concentrated acids for a long time it is decomposed into CO_2 and N_2H_4 . Three atoms of hydrogen can be replaced by metals, forming cyanurates. Cyanuric acid, when distilled, splits up into three molecules of cyanic acid, and can be recognized by its characteristic odor.

cyanuric chloride, s.

Chem.: $C_3N_3Cl_3$. Tricyanic chloride, solid chloride of cyanogen. Obtained by distilling cyanuric acid with phosphorus pentachloride; also by exposing anhydrous hydrocyanic acid mixed with chlorine to the rays of the sun. It forms colorless needles, which melt at 140°. It has a powerful offensive odor, is sparingly soluble in water, soluble in alcohol and ether.

cyanuric ethers, s. pl.

Chem.: Ethers existing in two modifications corresponding to those of the acids. They are always found in the preparations of both the normal and iso cyanic ethers (q. v.). They are crystalline solids, and can be easily separated from the cyanic ethers by their higher boiling point.

cy-ân-ûr'-ûs, s. [Gr. *kyanos*=dark blue, and *oura*=tail.]

Ornith.: A genus of birds, family Corvidæ (Crows), and sub-family Garruline (Jays). *Cyanurus cristatus* is the Blue Jay of the United States. (*Dallas*.)

cy-âph-ên-ine, s. [Eng. *cya(n)*, and *phen(ol)*; -ine.]

Chem.: $(C_7H_5N)_x$. Obtained by gently heating cyanobenzene with sodium. Also by the action of benzoyl chloride, C_6H_5COCl , on potassium cyanate. It is only slightly soluble in alcohol or ether, but crystallizes from carbon bisulphide in small needles, which melt at 224°.

cy-âr, s. [Gr. *kyar*=a hole, especially of a needle.]

Anat.: The orifice of the internal ear.

cy-â-thâx-ô-ni-a, s. [Lat. *cyathus*; Gr. *kyathos*=a cup, a drinking-cup, and *axôn*=an axle, an axis.]

Zool.: A genus of rugose Corals, the typical one of the family Cyathaxonidæ. It has a styliform columella. Its range is from the Silurian to the Carboniferous period. (*Nicholson*.)

cy-â-thâx-ô-ni-dæ, s. pl. [Mod. Lat. *cyathaxonia* (q. v.), and fem. pl. adj. suff. -idæ.]

Zool. & Palæont.: A family of rugose Corals. The corallum is simple, the septa are well developed, and the interseptal loculi are open. (*Nicholson*.) Range from the deposition of the Palæozoic rocks till now.

cy-â-thê'-a, s. [So named from their cup-like indusium.]

Botany:

1. *Sing.* (*Cyathea*): A genus of Polypodiaceæ Ferns, the typical one of the tribe Cyatheæ. They have globose sori situated on a vein or veinlet, or in the axil of the fork of a vein, the involucre at first entire and covering the whole sorus, then bursting from the top with a nearly circular opening, becoming cup-shaped. The genus is extensive and widely spread, having representatives in South America, in Mexico, South Africa, India, China, and the eastern islands and those of the Pacific. They are Tree-ferns. *Cyathea arborea*, the Common Tree-fern, is the typical species. It is found in the West Indies and in the warmer parts of the American continent. The rhizome of *C. medullaris* is occasionally eaten.

2. *Pl.* (*Cyathea*): A tribe of Polypodiaceæ. The spore cases have a vertical ring, usually sessile, on a more or less elevated receptacle; spores three-cornered or three-lobed. (*Kaulf*, also *Lindley*.)

cy-â-thê-â'-cê-ôis, a. [Mod. Lat. *cyathe(a)*; Eng. adj. suff. -aceous.]

Bot.: Of or belonging to the Cyatheæ.

cy-âth'-i-form, a. [Mod. Lat. *cyathiformis*, from Lat. *cyathus*=a cup, and *forma*=form, shape.]

Bot.: Cup-shaped, resembling a drinking cup. It differs from pitcher-shaped, in not being contracted at the margin. Example, the limb of the corolla of *Symphytum*.

cy-â-thô-cri'-ni-dæ, s. pl. [Mod. Lat. *cyathocrin(us)* (q. v.), and fem. pl. adj. suff. -idæ.]

Zool.: A family of Crinoidea. Type, *Cyathocrinus* (q. v.).

cy-â-thô-cri'-nûs, s. [Lat. *cyathus*=cup, and Gr. *krinon*=a lily.]

Zool.: The type of the family Cyathocrinidæ (q. v.). Calyx subglobose, five basals, five parabasals or subradials, radials generally three to each arm, no inter-radials. Range, from the Silurian to the Permian, especially the Carboniferous and the Permian. (*Nicholson*.)

cy-â-thô-phÿl'-li-dæ, s. pl. [Mod. Lat. *cyathophyll(um)* (q. v.), and fem. pl. adj. suff. -idæ.]

Palæont.: Cup-corals, the largest and most important family of the rugose corals. Corallum simple or compound, septa not generally quadripartite; tabula present, interseptal loculi with dissepiments. It is divided into two sub-families, Zaphrentinæ and Cyathophyllinæ. Only Palæozoic.

cy-â-thô-phÿl'-li-næ, s. pl. [Mod. Lat. *cyathophyll(um)*, and fem. pl. adj. suff. -inæ.]

Palæont.: A sub-family of Cyathophyllidæ (q. v.). Septa more or less regularly radiate.

cy-â-thô-phÿl'-lûm, s. [Lat. *cyathus*; Gr. *kyathos*=a cup, and *phÿllon*=a leaf. So named because the corallum or polypidom has a more or less cup-like form; the polype being in a cell at the upper end.]

Palæont.: The typical genus of the sub-family Cyathophyllinæ, and of the family Cyathophyllidæ. Corallum simple or compound, septa well-developed, some of them forming a spurious columella. Range, from the Silurian to the Carboniferous period.

cy-âth-ûs, s. [Lat.=a cup.]

Botany:

1. A genus of Fungals, one of two generally called Bird's-nest Pezizæ. Two species occur in England, *Cyathus striatus* and *C. vernicosus*.

2. The cup-like body containing the reproductive organs of Marchantia. (*Treas. of Bot.*)

cyb'-ê-lê, s. [Lat. *Cybele*; Gr. *Kybelê*. See def. 1.]

1. *Class. Myth.*: A Phrygian goddess, first worshipped at Pessinus, then throughout all Asia Minor, next in Greece, and finally, from A. U. C. 547, at Rome, where she was called the Idæan mother. Her rites in Greece coalesced with those of Rhea. (*Liddell & Scott*.)

2. *Astron.*: An asteroid, the sixty-fifth found, discovered by Tempel on March 1, 1861.

3. *Zool.*: A genus of Trilobites, family Ercinuridae.

4. *Bot.*: An old genus of Proteads, now called *Stenocarpus*.

cy-bis'-tâx, s. [Gr. *kybistaō*=to tumble head foremost (?).]

Bot.: A genus of Bignoniaceæ. *Cybtstax antiphiitica*, the only known species, is a native of Peru, and is cultivated there and in Brazil. It is prescribed in syphilis.

cyb'-i-ûm, s. [Gr. *kybion*=a species of tunny.]

1. *Ichthy.*: A genus of fishes, natives of the seas about the East Indies.

2. *Palæont.*: Agassiz gives the name of Cybium to a genus of fossil fishes from the London clay of Sheppey.

cyc-cad, s. [Lat. *cycas* (genit. *cycados*); Gr. *kykas* (genit. *kykados*)=a small Ethiopian palm. (London, Paxton, &c.).]

Bot.: A plant belonging to the order Cycadaceæ.

cyc-ca-dā-cē-æ, s. pl. [Lat. *cycas* (genit. *cycados*) [CYCAD], and fem. pl. adj. suff. -aceæ.]

1. Bot.: An order of Gymnosperms, first separated by Richard, who considered them as plants intermediate between ferns and palms. In 1827 Robert Brown established their affinity with the Coniferae. The order contains nearly 100 species, grouped in nine genera. The genus *Cycas* is confined to tropical Asia and Australasia, and to the Mascarene Islands. It is distinguished by the seeds being borne on the margins of altered open leaves. The stems are simple, cylindrical, and covered with the permanent bases of the leaves. In all the other genera the seeds are borne in pairs on scales which form a cone. The staminal flowers are arranged in cones in the whole order. Besides the species of *Cycas* found in Australia, there are two endemic genera, *Macrozamia* with imbricating scales to the fertile cone, and the anomalous genus *Bowenia* with peltate scales and bipinnatisect leaves. Africa has also two endemic genera, *Encephalartos* with cylindrical stems covered with the permanent bases of the leaves, and *Stangeria* with a short somewhat spherical naked stem, and leaves with forked veins. The American Cycadaceæ have been referred to four genera; the greater number of the species belong to *Zamia*, with peltate scales arranged in vertical series, and usually short repeatedly-branched stems. One species in Cuba with a slender cylindrical stem and velvety cones, is separated from *Zamia* and named *Microcycas*, while several species with taller stems, found in tropical America, are at once distinguished by their two horned cone scales, from which the generic name *Ceratozamia* has been given to them. *Dion* is an anomalous Mexican genus containing two species. The large seed-bearing cone is composed of woolly, thin, ovate-acute scales, with slender pedicels.

2. Palaeobotany: The Cycadaceæ form an important element in the Floras of Secondary age, wherever these have been investigated. Some fossils from the paleozoic rocks have been erroneously referred to this order. Besides species referable to the modern types, the Secondary rocks contain two extinct forms. One of these, *Williamsonia*, is an obscure plant from the Oolites of Yorkshire, England, and of India, with uncertain affinities; and the other, *Bennettites*, has a compound fleshy fruit borne in the axils of the leaves, which has the same relation to the cone-bearing Cycads that the fruit of the Yew has to the cone-bearing Coniferae. The species of this tribe constitute the "crow's nests" of the Portland quarries, and are found in the oolitic and cretaceous rocks of the South of England and the North of Scotland. The tertiary strata have hitherto yielded only some doubtful fragments.

cyc-ca-dā-cē-ous, a. [Lat. *cycadaceæ* (x); Eng. adj. suff. -ous.]

Bot.: Belonging to the natural order Cycadaceæ.

cyc-cād-i-form, a. [Eng. *cycad*; *i* connective; Lat. *forma*=form, appearance.] Resembling a cycad in form or appearance.

cyc-ca-dite, s. [Mod. Lat. *cycas*, and suff. -ite (Palaeont.) (q. v.).] A fossil cycad.

"Our fossil cycadites are closely allied . . . to existing Cycadeæ."—Buckland.

cyc-cās, s. [CYCAD.]

Bot.: The typical genus of the order Cycadaceæ (q. v.). A kind of sago is procured in Japan from *Cycas revoluta* and *C. circinalis*. Their nuts are eatable, and a bad kind of flour is made from them, while a grain-like tragacanth which they produce is applied to malignant ulcers, causing them to suppurate very quickly.

cych-rūs, s. [From Gr. *Kycheus*, a mythological name. (Agassiz.)]

Entom.: A genus of predatory Beetles, family Carabidae. Mandibles projecting, labial appendages consisting of slender processes, denticulated externally at the base; head and thorax attenuated; elytra broad, expanded, and reflected over the sides of the abdomen. *Cychrus rostratus* is a long narrow beetle, black in color, and rugosely punctate.

cyc-lā-dēs, s. [Gr. *kyklades* (nēsoi)=the encircling [islands]; *kyklas*, genit. *kyklados*=encircling; *kyklos*=a circle.] A group or cluster of islands in the Ægean Sea, lying round Delos. At first they were only twelve in number, but were afterward increased to fifteen. These were Andros, Ceos, Cimolos, Cythinos, Gyaros, Melos, Myconos, Naxos, Olearos, Paros, Prepesinthos, Seriphos, Siphonos, Syros, and Tenos. After the battle of Mycale, B. C. 479, they became subject to Athens.

cyc-clād-i-dæ, s. pl. [Lat. *cyclas* (genit. *cycladis*) (q. v.), and fem. pl. adj. suff. -idæ.]

Zoöl.: A family of Conchifera, section Siphonida, and that portion of it in which the pallial line is simple. The shell is suborbicular and closed, the ligament external, the epidermis thick and horny, the hinge with cardinal and lateral teeth. Genera: *Cyclas*, *Cyrene*, &c. Both occur in fresh water.

cyc-la-mēn, s. [Greek *kyklaminos*. It is so named from its spiral peduncle.]

Bot.: Sowbread. A genus of Primulaceæ, family Primulidæ. Rootstock solid, tuberous; calyx campanulate, half five-cleft, corolla rotate, with reflexed segments; stamens five, not protruded; capsule globose, one-celled, opening with five teeth. According to Sibthorp, the modern Greeks used the bruised root of *Cyclamen persicum* to draw the *Sepia octopodia* (now called *Octopus vulgaris*) out of its holes. The root of the same species is said to be innoxious and even eatable when dried or roasted.

"Thirdly, a kind of cyclamen, or sowbread."—Sprat; Hist. R. S., p. 211.

cyc-la-min, s. [Mod. Lat. *cyclam(en)*; Eng. suff. -in (Chem.).]

Chem.: Primulin, $C_{20}H_{34}O_{10}$. A glucoside extracted by alcohol from the tubers of *Cyclamen europæum*. It is a white crystalline powder which melts at 238°. It has an acrid and bitter taste, and is soluble in water and dilute alcohol, insoluble in ether. By heating its aqueous solution to 95° with a little hydrochloric acid, it is decomposed into sugar and cyclamiretin. It is also contained in the roots of cowslips. Strong sulphuric acid dissolves cyclamin, forming a red solution; on diluting the solution the color disappears, and cyclamiretin is precipitated.

cyc-la-mīr-ē-tin, s. [Eng. *cyclam(tn)*; second element not obvious.]

Chem.: $C_{15}H_{22}O_2$ is a white amorphous, inodorous, tasteless powder, soluble in alcohol and in ether, insoluble in water. It melts at 198°, and is colored violet by sulphuric acid.

cyc-lān-thā-cē-æ, s. pl. [Mod. Lat. *cyclanth(us)*, and fem. pl. adj. suff. -aceæ.]

Bot.: A synonym for Pandanaceæ (q. v.).

cyc-clān-thē-æ, s. pl. [Mod. Lat. *cyclanth(us)* (q. v.), and fem. pl. adj. suff. -eæ.]

Bot.: One of two tribes into which the Pandanaceæ are divided. The leaves are flabellate or pinnate, the flowers usually furnished with a calyx.

Type, Cyclanthus.

cyc-lān-thūs, s. [Gr. *kyklos*=a ring, a circle, and *anthos*=a blossom, a flower, in allusion to the arrangement of the flowers.]

Bot.: A genus of Pandanaceæ, the typical one of the tribe Cyclanthæ (q. v.). The species are from tropical America.

cyc-las, s. [Lat. *cyclas*; Gr. *kyklas* (esthēs)=a woman's dress with a border all round it.]

1. Fabrics: A rich stuff, manufactured in the Cyclades; also called Ciclatun or Ciclatoun (q. v.). Also a garment made of this stuff.

2. Zoöl.: A genus of Mollusks, the typical one of the family Cycladidae (q. v.). The shell is thin, ventricose, and nearly equilateral, the cardinal teeth 2-1 minute, the lateral ones 1-1 to 2-2, elongated and compressed. Sixty species are known from Europe, Asia, and America. The fossil species are thirty-eight, from the Wealden onward. *Cyclas cornea* is common in this country; *C. rivicola* is in the Thames, England, &c.; *C. calcutata* in the North of England.

3. A sub-genus Pisidium, with inequilateral shells, is also represented in America. [PISIDRUM.]

cycle (pr. sikl), s. [Gr. *kyklos*=a circle.]

***A. Ordinary Language:**

I. Lit.: A circle.

II. Figuratively:

1. A long period of time.

"I said, 'When first the world began,
Young Nature thro' five cycles ran,
And in the sixth she molded man.'"
Tennyson: The Two Voices.

2. A round or course, a calendar.

"... a complete cycle of what is requisite to be done throughout every month of the year."—Evelyn: Calendar.

B. Technically:

1. Astron.: An imaginary orb or circle in the heavens; an orbit.

"Cycle and epicycle, orb in orb."
Milton: P. L., viii. 84.

2. Chronol.: A round of years or period of time, in which certain revolutions or successions of events or phenomena take place, and at the end of the cycle begin again and go through the same course.

"... changes which require eleven years or thereabout to run through their cycle."—London Times; Transit of Venus.

3. Literature: An accumulation or collection of legendary or traditional matter round some mythical or heroic character or event, and embodied in verse or prose: such cycles are gathered round the Siege of Troy, the Knights of the Round Table, the Niebelungen, &c.

"Amadis de Gaul and other heroes of the later cycles of romance."—Hallam: Literature of Middle Ages, pt. i., ch. ii., § 57.

4. Bot.: A complete turn of the spire assumed to exist where leaves are spirally arranged.

¶ (1) Cycle of the Moon: A period of nineteen years, after the lapse of which the new and full moon recur on the same days of the month. Also called the Golden Number and the Metonic Cycle, after its discoverer Meton.

(2) Cycle of the Sun: A period of twenty-eight years, after the lapse of which the dominical or Sunday letters in the calendar return to their former place; that is, the days of the month return to the same days of the week.

(3) Cycle of Indiction: Roman Antiq. A period of fifteen years, in use among the ancient Romans, beginning from B. C. 3. At the end of each of these cycles an extraordinary tax was levied for the pay of the soldiers, whose period of service then came to an end.

(4) Metonic Cycle: [METONIC.]

†cyc-cle, v. i. [CYCLE, s.] To move in a circular or nearly circular orbit.

"... this planet has gone cycling on according to the fixed law of gravity."—Darwin: Origin of Species (ed. 1859), ch. xiv., p. 490.

***cyc-il-lan, a.** [Gr. *kyklos*=a circle; Eng. adj. suff. -ian.] Cyclic, cyclical. (Bentley.)

cyc-il-lc, a. [Lat. *cyclicus*=a cyclic poet; Gr. *kyklikos*=in a cycle, from *kyklos*.] [CYCLE.]

I. Ord. Lang.: Pertaining to or moving in a cycle; cyclical.

II. Technically:

1. Hist.: Pertaining to a Roman year of ten months existing in early times.

"... the old cyclic year of ten months."—Arnold: Hist. Rome, vol. i., ch. xiv., p. 282.

2. Literature: Pertaining to the cyclic poets, or to the cycle of events which they recorded.

¶ (1) Cyclic chorus: [So called because the performers danced round the altar of Bacchus in a circle.]

Greek worship: The chorus which performed the songs and dances of the dithyrambic odes at Athens. It was opposed to similar dances in which the arrangement was in a square.

(2) Cyclic poets: Certain poets whose compositions taken collectively formed a cycle or series of mythic and heroic story, down to the death of Ulysses; hence a cycle or series of poets on any subject.

"The Homer of this race of cyclic poets was to be an Italian."—Mitman: Hist. Latin Christianity, bk. xiv., ch. vi.

cyc-il-ca, s. pl. [Neut. pl. of Gr. *kyklikos*.] [CYCLIC.]

Entom.: A sub-section of Tetramera in the system of Latreille. The penultimate joint of the tarsi is bilobed; the antennæ are of moderate length, generally filiform; the body rounded or oval; the thorax as broad as the elytra. Stephens divides it into three families, Galerucideæ, Cassidiadeæ, and Chrysomelideæ. They are beetles often short and thick in body, and of brilliant hues, the prevailing color being green. The larvae are soft, have six legs, and feed upon the leaves of plants. The Turnip-fly, Turnip-flea, or Black Flea, the larva of which is so destructive to turnips, belongs to the Cyclica.

cyc-il-cal, a. [Eng., &c., *cyclic*, and suff. -al.] The same as CYCLIC (q. v.).

cyc-ilf-ēr-a, s. pl. [Gr. *kyklos*=a circle, and Lat. *fero*=to bear.]

Zoöl.: A group of Ganoid Fishes, sub-order Holostea. Body covered with rounded overlying scales, fins destitute of fulcra. In both these characters the Cyclofira approach the ordinary bony fishes. Only family, Amidae. (Dallas.)

cyc-clist, s. [Gr. *kyklos*=a circle, a wheel; Eng. suff. -ist.] A rider of a bicycle or tricycle. Used originally as an abbreviation of bicyclist.

"Cyclists, it would seem, are excluded from all the parks."—London Daily Telegraph.

cyc-clō-brān-chi-ans, s. pl. [CYCLOBRANCHIATA.] The same as CYCLOBRANCHIATA (q. v.).

cyc-clō-brān-chi-ā-ta, s. pl. [Gr. *kyklos*=a circle, and *branchia*=gills.] [BRANCHIÆ.]

Zoöl.: The name given by M. De Blainville to what he considered an order of Gasteropodous Mollusks characterized by the circular arrangement of the branchiæ. It contains two families,

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mātē, cīb, cīre, unite, cūr, rāle, fūll; trȳ, sȳrian. æ, œ=ē; ey=ā. qu=kw.

the Chitonidae and the Patellidae. The order Cyclobranchiata is not universally adopted. Mr. S. P. Woodward, F. G. S., &c., arranged the Chitonidae (Chitons) and Patellidae (Limpets), as the thirteenth and fifteenth families of the class Gasteropoda, Mr. Milne-Edwards' order Prosobranchiata and the section B Holostomata (Sea Snails). The fourteenth family—that standing between the two already mentioned—is the Dentaliadae (Tooth-shells).

cy-clō-gēn, s. [Gr. *kyklos*=a circle, and *gennao*=to produce, to generate.]
Bot.: An exogen.

"Exogenous plants have sometimes received the name of *cyclogens*, in consequence of exhibiting concentric circles in their stems."—*Batfour: Botany*, § 71.

cy-clō-grāph, s. [Gr. *kyklos*=a circle, and *grapho*=to write, to draw.] An arcograph or curvograph.

cy-clōid, a. & s. [Fr. *cycloïde*, from Gr. *kyklos*=circular, *kyklos*=a circle, and *eidos*=form.]

A. As adjective:

1. *Ord. Lang.*: Of the form of a circle.

2. *Zool. & Palæont.*: Pertaining to a cycloid scale or to the fishes which have this dermal covering. [CYCLOID SCALE, CYCLOIDEI.]

B. As substantive:

Geom.: The curve which is produced when a circle rolls forward on a straight line. A familiar example of it is a carriage-wheel moving along a smooth road. If a mark be made at any point on the circumference of a wheel, it will describe a series of cycloids. The curved figure thus produced is not, as the etymology suggests, "of the form of a circle," were it so, then the point of the circumference commencing its revolution at a given spot on the road would, when that revolution was completed, return to that spot again. It does not so return, but when, having completed its revolution, it afresh touches the road, it is at an advanced point in it compared with the spot at which it came into contact with it before. Let ABE be a circle—say a carriage-wheel—revolving around its center, and at the same time moving forward along the straight line or road CD, from C to D. Let B, the highest point in the circumference of the circle, be also the point the movements of which it is desired to trace, then, during the time that B takes to move from B to E, a portion of the wheel exactly equal to the same BE will have measured its length upon the ground, and the wheel will have moved that distance horizontally forward. If EF be drawn parallel to CD, then the straight line EF will be the arc BE. The whole arc CAD is four times the diameter of the circle by which it was generated. The area contained by the chord CAD and the straight line CD is three times the area of the circle ABE. If the cycloid be supposed to be reversed, and be now not a mathematical abstraction but a real material curve, then a weight placed at any point of it will take the same time to descend from any part of it to the lowest point. Moreover, it will descend more swiftly than it will in any other curve. The cycloid is a transcendental curve, since its equation cannot be expressed in common algebraic terms.

Cycloids are of different kinds. That now described is the common cycloid. Others are the prolate or inflected cycloid, and the curtate cycloid. There is also a curve called the Epicycloid, and another the Hypocycloid (q. v.).

"A man may form to himself the notion of a parabola or a cycloid from the mathematical definition of those figures."—*Reid: Inquiry into the Human Mind*.

¶ (1) *Curtate cycloid*:

Geom.: A cycloid in which the point whose motion generates the figure falls without the circle.
(2) *Inflected cycloid*: The same as *Prolate cycloid* (q. v.).

(3) *Prolate cycloid*:

Geom.: A cycloid in which the point whose motion generates the figure falls within the circle. It is called also an *Inflected cycloid* (q. v.).

(4) *Cycloid fishes*:

Zool. & Palæont.: Fishes with cycloid scales. [CYCLOIDEI.]

(5) *Cycloid scale*:

Zool. & Palæont.: A scale with concentric striations upon it. The substance is thin and flexible, though horny; it is not bony or enameled. The outline is smooth, the shape generally circular or elliptical. It is the kind of scale found on most of the fishes with which the public are familiar.

cy-clōi-dal, a. [Eng., &c., *cycloid*; -al.] The same as *CYCLOID*, a. (q. v.)

¶ (1) *Cycloidal engine*:

Engraving: An instrument employed by engravers in making what is called machine-work upon the plates for bank-notes, checks, &c. The lines have a general cycloidal form, being generated by a point revolving around a moving center, or, what amounts to the same, are cut by a graver-point to which a revolution is imparted, the plate traversing below in a straight line, a waved line, a circle, ellipse, or other figure. The line is thus compounded of two movements, and a wavy or compound interlacing figure of absolute regularity is produced as a guard against counterfeiting; it being impossible to produce such work by any means other than such a tool. Counterfeiting, being an underhand proceeding and seeking secrecy, is followed by skillful men, but without the expensive and complicated mechanical adjuncts. (*Knight*.)

(2) *Cycloidal paddle*: The name is a misnomer, but is applied to a paddle-wheel in which the board is divided longitudinally into several strips in a slightly retreating order, *en échelon*. The object of the division of the float is to bring the sections in succession into the water, lessening the concussion; and by a more complete distribution of floats around the circumference of the wheel to make the resistance more uniform. (*Knight*.)

(3) *Cycloidal pendulum*:

Horology, &c.: A pendulum moving in a cycloid. It is perfectly isochronous in its beats; that is, the time taken by each beat is the same.

"Hence, despite the beauty of Huyghens' invention, we have been obliged to abandon his flexible *cycloidal pendulum*, and now exclusively make use of a rigid pendulum, restrained to describing only small arcs."—*Smyth & Grant: Arago's Pop. Astron.*, bk. ii., ch. x.

(4) *Cycloidal space*:

Geom.: The space contained between the cycloid and its substance. (*Chambers*.)

cy-clōi-dē-l, s. pl. [Masc. pl. of Mod. Lat. *cycloideus*, from Gr. *kyklos*=a circle.]

Ichthy. & Palæont.:

1. The name given by Agassiz to one of the four orders into which, for paleontological purposes, he divided the great class of Fishes. It consisted of those which have cycloid scales. The carp, the salmon, the herring, &c., possess this dermal covering. [CYCLOID SCALE.]
2. In Prof. Owen's classification the second sub-order of the Acanthoptera or Acanthopterygious Fishes.

cy-clōi-dī-an, a. & s. [Eng., &c., *cycloid*; i connective, and suff. -an.]

Zoology:

A. As adj.: Pertaining to cycloid scales; having cycloid scales.

B. As substantive:

1. *Sing.*: A fish having cycloid scales.

2. *Pl.* (Cycloidiæ): The English name of the artificial order of Fishes, called by Agassiz Cycloidei (q. v.).

cy-clō-lāb-rī-dæ, s. pl. [Gr. *kyklos*=a circle, *labrum*=a lip, and fem. pl. adj. suff. -idæ.]
Ichthy.: A family of spiny-finned fishes, tribe Pharyngognathi. It contains the genus *Wrasse*. [WRASSE.]

cy-clō-lī-tēs, s. [Gr. *kyklos*=a circle, and *lithos*=a stone.]

Palæont.: A genus of Actinozoa, family Fungidae. It ranges from the Cretaceous to the Miocene strata.

cy-clō-lith, s. [CYCLOLITHES.]

Archæol.: A circle of stones, such as those at Stonehenge in Wiltshire, England, Stennis in Orkney, Scotland, &c. Popularly they are regarded as Druidic, but modern antiquarians consider this view untenable. According to Joseph Anderson, LL.D., who specially refers to Scottish stone-circles, they are connected with the interment of

Cyclolith.

the dead. In the stone age places of burial were marked by chambered cairns of two types. One of these, which was circular in form, passed into the bronze age. In some of the later cairns of the stone age there had been a circle of stones surrounding the cairn. In the early part of the bronze

age the stone circle became the principal object, while the cairn was degraded into a mere structureless mass of boulders. Then in the rest of the bronze period the cairn disappeared, and only the encircling stones remained. In this view many at least of the so-called Druidical stones, or temples, were simply the inclosures of bronze burying places. It should be added that in other areas than the Celtic region stone-circles occur. For instance, at Takulghaut, twenty miles from Nagpore, in Central India, about ninety stone-circles exist, with one stone outside the inclosure. The archaic remains dug from them were, however, of iron. [STONE CIRCLE.]

cy-clō-mē-tō-pa, **cy-clō-mē-tō-pl-ta**, s. pl. [Gr. *kyklos*=a circle, and *metopon*=the forehead, the front.]

Zool.: One of four families into which Prof. Milne-Edwards divided the crustaceous sub-order Brachyura. It is the equivalent of the family Cancridæ (q. v.).

cy-clōm'-ē-trŷ, s. [Gr. *kyklos*=a circle, and *metron*=a measure.] The art, operation, or process of measuring circles.

"... Sir H. Savile had confuted Joseph Scaliger's *cyclometry*."—*Wallis: Correct. of Hobbs* (1656), p. 116.

cy-clōn'-al, a. [Eng. *cyclon*(e); -al.] The same as *CYCLONIC* (q. v.).

"Dr. Ashe reviewed the known laws of *cyclonal progress*."—*Brit. Assoc. Report* (1874), ii. 35.

cy-clōne, s. [Gr. *kyklōn*, pr. par. of *kyklōō*=to whirl round; *kyklos*=a ring, a circle.]

1. *Meteor. & Ord. Lang.*: The term proposed in 1848, by Mr. Piddington, of Calcutta, in his "Sailors' Hornbook," more appropriately to designate the violent rotatory storms popularly known as hurricanes. [HURRICANE.] The word was so felicitous that it was at once adopted by scientific men, and, passing from them to the general public, soon firmly rooted itself in the language. The erroneous belief was formerly entertained that, as a rule, hurricanes blew in a straight line. Between the years 1835 and 1840, however, Mr. Redfield, a naval architect of New York, Lieutenant-Colonel (afterward Sir) William Reid of the Royal Engineers, Mr. Piddington of Calcutta, and Prof. Dove of Berlin, showed that the wind in a hurricane has really two motions: it revolves with great rapidity (80 or 100 miles an hour), while at the same time the whole rotating mass is slowly moving forward. A spinning top slowly altering its position on a pavement has similar motions. The cause of cyclones is believed to be as follows: The fierce rays of the sun falling within the tropics so heat the air that it rapidly ascends, colder air rushing in beneath it to take its place. The rotation of the earth produces the revolving motion. There are no cyclones on the equator. Those south of it whirl in the same direction as that in which the hands of a watch move, those north of the line in exactly the opposite direction. There are various cyclone-regions of the world, such as the Western States of the Union, West Indies, the seas round the Mauritius, and the China Seas. In the last named region cyclones are known as typhoons. The West India cyclones mostly originate in the Caribbean Sea. In the Western States of America cyclones have become more frequent, and terrible in results, devastating whole regions in their erratic and resistless course. Some claim that the cutting down of the forests of the West has had some influence in this direction.

2. *Navigation*: When a sailing-ship encounters a cyclone, the responsible navigators now try to ascertain how it is moving, and in what part of it they are at the moment. They sail out of it if they can; if they fail to do this, and pass through its center or vortex, in which there is little wind, but a rough sea, they adjust the sails to meet a blast from the opposite direction to that at which it struck them first, and in due time the other half of the cyclone comes up with a deafening roar. Before this was understood, many an old navigator hoisted sail when in the vortex, had his ship struck from an unexpected quarter when the other part of the cyclone came up, lost his ship, and, with his comrades, perished. [HURRICANE, TYPHOON.]

cy-clōn'-ic, a. [Eng. *cyclon*(e); -ic.] Pertaining to or of the nature of a cyclone.

"... *cyclonic* and anti-cyclonic storms, . . ."—*Trans. Amer. Philos. Soc.* (1873), vol. xiii., p. 249.

cy-clōn'-ism, s. [Eng. *cyclon*(e); -ism.] A state of being subject to cyclones.

"... Redfield's centers of *cyclonism*, . . ."—*Trans. Amer. Philos. Soc.* (1873), vol. xiii., p. 248.

cy-clō-pæ-dī-a, ***cy-clō-pæ-dŷ**, **cy-clō-pē-dī-a**, ***cy-clō-pē-de**, s. [Gr. *kyklopaidia*, *kyklos*=a circle, *paideia*=discipline, instruction.]

1. A book or work containing information on all branches of science or knowledge; an encyclopædia. "... tedious and unedifying commentaries on Peter Lombard's scholastic *cyclopede* of divinity, . . ."—*Warton: Hist. of Eng. Poetry*, ii. 450.

bōil, bōy; pōut, jōwī; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist. ph = f.
-clan, -tlan = shan. -tion, -sion = shūn; -tīon, -gion = zhūn. -tious, -cious, -slous = shūs. -ble, -dle, &c. = bēl, dēl.

*2. A circle of learning.

"If regard be taken of the cyclopædy of the learning resulting from those several sciences."—Fuller; *Ch. Hist.*, II., ii. 55.

cý-clō-pæ'-díc, cý-clō-pæ'-díc-ál, cý-clō-pé'-díc, cý-clō-pé'-díc-ál, a. [Eng. *cyclopædia*]; adj. suff. -*ic, -ical*.] Pertaining to or of the nature of a cyclopædia.

cý-clō'-pé-án, a. [Gr. *kyklōpeios*=pertaining to the Cyclopes.] CYCLOPS.

1. Ordinary Language:

1. *Lit.*: Of or pertaining to the Cyclopes.

2. *Fig.*: Immense, vast, gigantic, fierce.

"... the cyclopean furnace of all wicked fashions, the heart."—*Ep. Hall: The Fashions of the World*.

II. *Arch.*: An epithet applied to a very primitive style of architecture fabled to be the work of the Cyclopes. The only remains existing are fragments of circular walls around towns and palaces, found in Greece itself, and in many of the Greek colonies in Italy and Sardinia. The best known remains are at Mycenæ in Greece. Such walls consist of gigantic polygonal blocks of stone, the corners of which fit accurately into one another. Other structures of this kind consist of regular blocks of equal height. Both kinds are constructed entirely without mortar. The oldest of these monuments are formed of enormous unhewn boulders in their natural shape laid one on another, and the interstices filled up with smaller stones.

cý-clō'-pé-ite, s. [Named from the Cyclopean Islands (?), and suff. -*ite* (*Mtn.*) (q. v.).]

Min.: A mineral called also Breislakite, a variety of Augite (*Brit. Mus. Cat.*), a variety of Pyroxene (*Dana*). It occurs in wool-like forms at Vesuvius and Capo di Bove. [BREISLAKITE.]

cý-clōph'-ōr-ūs, s. [Gr. *kyklos*=a circle, and *phoros*=bearing, carrying.]

Zool.: A genus of Gasteropodous Mollusks, family Cyclostomidae. The shell is depressed, and has a circular aperture with a horny many-whorled operculum. The animal has long pointed tentacles. About 150 species are known, from India, the Philippine Islands, New Zealand, the Pacific islands, and tropical America. There are various sub-genera. [CYCLOTUS.]

cý-clōph'-thāl'-mūs, s. [Gr. *kyklos*=a circle, and *ophthalmos*=an eye.]

Palæont.: A genus of fossil Scorpions. *Cyclophthalmus senior* is from the Bohemian Coal-measures.

cý-clō'-pl-a, s. [Gr. *kyklos*=a circle, and *pous*=a foot, in allusion to the shape of the base of the pods. (*Parson*).]

Bot.: A genus of Papilionaceæ. *Cyclopia genista* is from the Cape of Good Hope, where it is called Bush-tea, from the tea-like smell and the astringent taste of its leaves. A decoction of it is given to produce expectoration in catarrh and consumption.

cý-clōp'-ic (1), a. [Mod. Lat. *cyclopia* (q. v.), and Eng. suff. -*ic*.] Pertaining to the plant *Cyclopia genista*, or derived from it.

cyclopic acid, s.

Chem.: $C_4H_4O_8$. An organic acid obtained as a yellow powder from the leaves of *Cyclopia vogelii*, a plant used in Africa for the preparation of tea. Its alkaline solution gives a greenish-yellow fluorescence. (*Watts: Dict. Chem.*)

cý-clōp'-ic (2), *cý-clōp'-ick, a. [Gr. *kyklōpikos*=of or pertaining to the Cyclopes.] Of or pertaining to the Cyclops; Cyclopean.

"... so many bold giants, or cyclopic monsters."—*Bp. Taylor: Artif. Hands*, p. 53.

cý-clōp'-i-dæ, s. pl. [Lat., &c., *Cyclops* (q. v.), and fem. pl. adj. suff. -*idæ*.]

Zool.: A family of Entomostracans, order Copepoda. They have but a single eye.

cý-clō'-píte, s. [So called from being found in the Cyclopean islands, near Catania, where it coats geodes in the dolerite.]

Min.: A little-known mineral found in white, transparent, glossy crystals. Hardness, 6. Composition: Silica, 41.45; alumina, 29.83; sesquioxide of iron, 2.20; lime, 20.83; magnesia, 0.66; soda, 2.32; potassa, 1.72; water, 1.91.

cý-clōps, ícý-clōp, s. [Lat. *Cyclops*; Gr. *kyklops*, as adj.=round-eyed, as subst.=a round-eyed being.] [II. 1.]

1. Ordinary Language:

1. *Lit.*: In the same sense as II. 1.

2. *Fig.*: Anything one-eyed, or that by imagination may be represented as being so. Wordsworth uses it of the daisy.

"A little Cyclops with one eye."

Wordsworth: *To the Daisy*.

II. Technically:

1. *Class. Mythol. (of the two forms)*: One of the people called Cyclopes, alleged to be a savage race of one-eyed giants, resident in Sicily. They owned no social ties and were ignorant of cultivation. The caverns of Ætna were their smithy, and blacksmiths were looked upon as their descendants. (*Liddell & Scott*.)

"The land of Cyclops first, a savage kind,

Nor tam'd by manners, nor by laws confin'd."

Pope: *Homer's Odyssey*, ix. 119, 120.

2. *Zool. (of the form Cyclops, only)*: A genus of Entomostraca, the typical one of the family Cyclopidae. The foot-jaws are large, strong, and branched; eye single, frontal; the inferior antennæ simple; the ovaries two. The only known species is *Cyclops quadricornis*. It lives in fresh water. It is popularly called a Water-flea, some other entomostracans being designated by the same appellation.

cý-clōp'-tēr-is, s. [Gr. *kyklos*=a circle, and *ptēris*=a kind of fern.]

Palæo-botany: A genus of ferns in which the frond is somewhat circular in form. It ranges from the Devonian to the Oolitic rocks. Example, *Cyclopteris hybernicus*, from the Old Red Sandstone rocks.

cý-clōp'-tēr-ūs, s. [Gr. *kyklos*=a circle, and *pteron*=a feather, wing, a fin.]

Ichthy.: A genus of fishes, family Gobiidae. The ventral fins constitute a sucker. *Cyclopterus lumpus* is the Lump-fish, so called because there is a row of tubercles along the back. It can adhere firmly to any object by its sucker. It is marine, and is preyed on by the seal. It inhabits the Northern seas of Europe and America. The Scotch call it Cock-paddle.

cý-clō'-sēr-is, s. [Gr. *kyklos*=a circle.]

Palæont.: A genus of reef-building corals belonging to the group *Zoantharia sclerodermata*.

cý-clō'-gīs, s. [Gr. *kyklōsis*=an inclosing, a surrounding.]

Bot.: A motion of a fluid called latex, usually more or less milky, but often transparent, conveying granular matter in all directions through a plexus of reticulated vessels in the stems of plants. Professor Schultz first announced, in September, 1829, that such a circulatory motion existed in plants. Its existence has since been denied; each of the two antagonistic views still having advocates.

cý-clōs-tō'-ma, s. [Gr. *kyklos*=a circle, and *stoma*=the mouth.]

Zool.: A genus of Gasteropodous Mollusks, the typical one of the family Cyclostomidae. The shell is turbinate and thin, and the axis perforated; the epidermis is very thin; the operculum shelly; the animal with club-shaped tentacles. About 160 species are known recent, and 40 fossil, the latter from the Eocene onward. The majority of the recent species are from the South of Europe, Africa, and Madagascar. (*Woodward: Mollusca*, ed. Tate.)

cý-clōs-tōm'-a-ta, cý-clōs'-tōm-I, s. pl. [CYCLOSTOMATA.]

1. *Ichthy.*: An order of fishes, called by Müller and Owen, Marsipobranchii. The gills are fixed, bursiform, inoperculate, receiving the respiratory streams by apertures usually numerous and lateral, distinct from the mouth; a heart present. There are two families: (1) Myxinoidei or Myxiniæ, the Myxines or Hags, and (2) the Petromyzontideæ, or Lampreys. (*Owen: Compar. Anat.; Fishes* (ed. 1846), p. 48.)

2. *Zool.*: A sub-order of Polyzoa, order Gymnolamæta. They have tubular cells with terminal orifices, and have no apparatus for closure. All are marine. The sub-order is divided into the following families: (1) Crisiadæ, (2) Idmonideæ, (3) Tubuliporidæ, (4) Diastoporidæ, (5) Cериoporida, (6) Theonoidæ. (*Nicholson, &c.*)

cý-clōs-tōm'-a-tōūs, a. [Mod. Lat. *cyclostomat(a)* (q. v.), and Eng., &c., suff. -*ous*.]

Zool.: Having a circular mouth or mouths.

"Passing on next to the series of the *cyclostomatous* polyzoa."—*Nicholson: Palæont.* (2d ed.), i. 430.

cý-clōs-tōme, s. [From Mod. Lat. *cyclostomata* (q. v.).]

Zool.: A member of the order of fishes called Cyclostomata (q. v.).

"The primitive spermatid cells, which are persistent in the cyclostomes, have collected into tubes in osseous fishes."—*Owen: Anatomy of Vertebrates*.

cý-clōs-tōm'-i-dæ, s. pl. [Mod. Lat. *cyclostom(a)* (q. v.), and fem. pl. adj. suff. -*idæ*.]

Zool.: A family of Gasteropodous Mollusks, order Pulmonifera, section Operculata. The shell is spiral, rarely elongated, often depressed, spirally striated, the aperture nearly circular, operculum spiral. The animal is unisexual. It has the eyes on slight prominences at the outer bases of the tentacles; the foot is somewhat elongated. The genera are Cyclostoma, Cyclophorus, Helecinæ, &c. They are terrestrial shells, which is the reason why so few of them have been found fossil.

cý-clōs-tōm-ōūs, a. [Mod. Lat. *cyclostom(a)* (q. v.), and Eng. suff. -*ous*.]

Zool.: The same as CYCLOSTOMATOUS (q. v.).

cý-clōs-tyl'-ar, a. [Gr. *kyklos*=a circle, and *stylos*=a pillar.]

Arch.: Consisting of a circular row of columns outside an interior building.

cý-clō-tēl'-la, s. [Gr. *kyklos*=a circle; Lat. dim. suff. -*ella*.]

Zool.: A genus of Diatomaceæ, in which the valves are circular, flat, depressed, or undulated, striated, and marked with dots or depressions arranged in radiating rows. Kützing enumerates twenty species, marine and fossil. (*Griffith & Henfrey*.)

cý-clō'-tūs, s. [Gr. *kyklos*=a circle, and *ous* (genit. *ōtos*)=the ear.]

Zool.: A sub-genus of Cyclophorus (q. v.). Known recent species, 44, from tropical America, Southern Asia, &c. There is a fossil representative of the genus from the Eocene.

***cy-con-ye, s.** [Lat. *ciconia*.] A stork.

"The somer foul that is clepid cyconye."—*Wycliffe: Jeremiah* viii. 7.

cý-dēr, s. [CIDEA.]

cý-dēr-ach, s. [Etym. doubtful.]

Bot.: A plant, *Polygonum hydropiper*. (*Prior, in Britten & Holland*.)

cý-dip'-pē, s. [From a beautiful young lady of that name who figures in the classical mythology.] *Zool.*: A genus of (tenophora, family Callianiridae. It is sometimes called Pleurobranchia. It has a transparent, colorless, gelatinous, melon-shaped body, divided into eight more or less distinct sections by as many double longitudinal rows of vibratile cilia. *Cydippe pileus* is common on the Atlantic coasts.

cý-dō-ni-a, s. [Named, it is believed, from a place called Kydon, in the island of Crete, of which it is a native.]

Bot.: A genus of fruit trees, order Pomaceæ (Appleworts). It resembles Pyrus, but has leafy calyx lobes, and many-seeded cells in its fruit. *Cydonia vulgaris* is the Quince; *C. japonica* is an ornamental shrub.

cý-ēs-i-ōl'-ō-gý, s. [Gr. *kyēsis*=conception, pregnancy, and *logos*=a discourse.]

Physiol.: The science which concerns itself with gestation.

cýg'-nēt, *cýg'-nēt, s. [A dimin. from O. Fr. *cigne*; Fr. *cygne*=a swan; Ital. *cigni*, from Lat. *cygnus*; Gr. *kyknos*=a swan, and suff. -*et*, implying little.] A young swan.

"So doth the swan her downy cygnets save,
Keeping them prisoner underneath her wings."—*Shakespeare: Henry VI., Pt. I., v. 3*.

cygnet-royal, s.

Her.: A swan gorged with a ducal coronet, having a chain attached thereto, and reflexed over the back.

cýg-ni'-næ, s. pl. [Latin *cygn(us)*=a swan, and fem. pl. adj. suff. -*inæ*.]

Ornith.: Swans. A sub-family of Anatidae, the Duck family. They have stouter feet proportionally than the true ducks; their bills are similar, but their necks are longer. They have long, powerful wings, and are migratory. They are elegant and majestic birds.

cýg'-nūs, s. [Lat.=a swan.] [CYGNET.]

1. *Ornith.*: A genus of birds, the typical one of the sub-family Cygninæ (q. v.). The base of the bill is tumid, fleshy, and naked; the neck remarkably long; the feet short, the hinder toe simple. The birds which it contains are called Swans, and are of large size. One European species, the Mute Swan (*Cygnus olor*), is well known. It builds its nest, which is bulky, among sedges, composing it of grass, rushes and coarse herbage. It is the domesticated species. Three other species are not so familiar, viz., *Cygnus ferus*, the Hooper or Whistling Swan, so called from its note resembling the word "hoop" frequently repeated; *C. Bewickii*, Bewick's Swan; and *C. immutabilis*, the Polish Swan.

Cygnet-Royal.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêre, câmel, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôt, or, wôre, wôlf, wôrkr, whô, sôn; mûte, cûb, cûre, ûnite, cûr, râle, fûll; trý, sýrian. æ, œ=ê; ey=â. qu=kw.

2. *Astron.*: One of the twenty ancient northern constellations. It contains two bright stars, Deneb, called also Alpha Cygni, and Albiero. Deneb comes to the meridian at 8 p. m. on October 1. The bright stars of Cygnus form, with those in the constellations Aquila and Lyra, a remarkable triangle. The double star 61 Cygni possesses no slight interest. It has a proper motion of nearly 3" in a year. It has, moreover, a parallax of one-third of a second, which would give a distance from the earth of 600,000 times the distance of the sun from us. (*Prof. Airy: Pop. Astron.* (6th ed.), pp. 197, 198, 214-216, &c.)

***cylerye**, *s.* [*Etym.* doubtful.] (*For def. see extract.*)

"Diaperye werke or cylerye, a kynde of carvyngs for payntynge so called. *Volute.*"—*Huloet.*

cy-lich'-nā, *s.* [*Gr.* *kylichnē*=(1) a small cup, (2) a dish for food.]

Zoöl.: A genus of Gasteropodous Mollusks, family Bullidae. They have a strong cylindrical, smooth, or punctate-striate shell, with the spire minute or truncated, and the aperture narrow, rounded in front. Forty species are known from the United States, Greenland, Britain, Red Sea, and Australia. The genus is also represented in Tertiary strata.

çyl'-in-dër, *s. & a.* [*Sw.*, *Dan.*, & *Ger.* *cylinder*; *Dut.* *cilinder*; *Fr.* *cylindre*; *Sp.* & *Ital.* *cilindro*; *Port.* *cilindro*, *cylindro*, all from *Lat.* *cylindrus*; *Gr.* *kyliindros*, from *kyliindroō*=to roll level with a roller, *kyliindō*=to roll.]

A. As substantive:

1. *Geom.*: A solid figure described by the revolution of a right-angled parallelogram about one of its sides which remains fixed. The axis of a cylinder is the fixed straight line about which the parallelogram revolves. The bases of a cylinder are the circles described by the two revolving opposite sides of the parallelogram. (*Simpson: Euclid*, bk. xi., def. 21-24.)

"The square will make you ready for all manner of compartments, bases, pedestals, plots, and buildings; your cylinder, for vaulted turrets, and round buildings."—*Peacham.*

¶ The solid contents of a cylinder are ascertained by multiplying the number of square units in the base by the linear units in the elevation.

2. *Steam-engine*: That chamber of a steam-engine in which the force of steam is utilized upon the piston.

3. *Pneum.*: The barrel of a pump, such as used by Heron of Alexandria in his fountain, and that of Otto Guericke of Magdeburg in his air-pump. [*AIR-PUMP.*] Perhaps the earliest use of the cylinder and piston is found in the blowing-machines of native metallurgists in portions of Asia and Africa. (*Knight.*)

4. *Weaving*:

(1) The cylinder of the Jacquard loom is really a square prism revolving on a horizontal axis and receiving the cards.

(2) A clothed barrel in a carding-machine. Urchins and doffers are clothed cylinders of smaller size.

5. *Elect.*: The glass barrel of an electrifying-machine. (*Knight.*)

6. *Printing*:

(1) The cylinder of a printing-machine is the circular surface which rolls over a flat form of type, carrying with it a sheet of paper held by a proper mechanism, thus producing an impression of the type; or, it is

(2) The surface around which a stereotype mold made to fit it is curved, and which rotating against another cylinder equipped as described in (1), thereby produces a printed sheet; or

(3) The ink-distributing surface of a printing-machine; or further,

(4) In the old-fashioned type revolving machine the type was rotated on a cylinder, being held in place in turtles and impinging in turn upon several impression cylinders grouped around it.

7. *Ordnance*:

(1) The bore of a gun. The charge cylinder is that occupied by the charge; the vacant cylinder is the remaining portion.

(2) A wooden bucket in which a cartridge is carried from the magazine to the gun.

8. *Mech.*: The body of a pump.

9. *Gard.*: A garden or field roller.

10. *Assyrian Antiq.*: A cylindrical stone or brick covered with inscriptions.

"The inscriptions being mostly incised on cylinders of clay."—*W. K. Cooper: Resurrection of Assyria* (1875), p. 30.

*11. *Surg.*: A kind of roll or plaster. (*Ash.*)

B. As adj.: Pertaining to or containing the geometric solid described under A, as *cylinder-tape*, *cylinder-engine* (q. v.).

cylinder-blower, *s.* A blowing-machine for blast and cupola furnaces, which consists of a piston working in a cylinder. [*BLOWER.*]

cylinder boring-machine.

Metal-working: A machine having face-plates on which the cylinder is dogged concentrically with

the axial boring-bar on which a tool-holder has longitudinal feed, to move from end to end of the cylinders. The bar draws entirely out, to allow the work to be shifted, and independent slide-rests face off the ends of the cylinder.

cylinder-cock, *s.*

Steam-engine: A faucet in the end of a cylinder to allow water of condensation to escape when the piston approaches the said end of the cylinder. Owing to the incompressibility of water, the end of the cylinder may be driven out, if the water be allowed no means of escape. It is also used to allow the passage of steam blowing through the cylinder, &c., in warming up. It is then, functionally, a blow-through cock. When the cylinder-cock is made automatic, it has a spring to keep it closed against the normal pressure of steam, but which yields to the excessive pressure in the cylinder incident to the striking of the piston against a body of water, the result of the condensation of steam in the cylinder.

cylinder-cover, *s.*

Steam-engine: The lid bolted to a flange round the top of a cylinder, so as to be perfectly steam-tight. The piston-rod passes through a stuffing-box in the center. The term is also applied to the jacket, lagging, or cleading, which prevents to some extent the radiation of heat.

cylinder-engine, *s.* A paper-machine in which the pulp is taken up on a cylinder and delivered in a continuous sheet to the dryers.

cylinder-escapement, *s.*

Horol.: Another name for the horizontal escapement invented by Graham. [*HORIZONTAL ESCAPEMENT.*]

cylinder escape-valve. A valve in the end of a cylinder to let off water of condensation.

cylinder-faces, *s. pl.*

Steam-engine: The port-faces of the steam-engine, i. e., the smooth surface against which the faces of the slide-valve work. (*Ogilvie.*)

cylinder-glass, *s.*

Glass-making: A mode of making window-glass, in which the material is brought, by a succession of operations, to the shape of an open-ended cylinder, which is split by a diamond and flattened in a furnace. While crown-glass is blown into a globe, then whirled and blown into an oblate spheroid, pierced and eventually expanded into a disk, cylinder-glass or broad-glass, as it is often called, is made into a hollow bulb, which is made gradually to assume the cylindrical form; the ends are then opened, and finally the cylinder is split and flattened. (*Knight.*)

cylinder grinding-machine. A machine for making true and polishing the insides of cylinders.

cylinder-mill, *s.* One form of mill for pulverizing the ingredients of gunpowder, having a cylindrical runner traversing on a bedstone.

cylinder-powder, *s.* That of which the charcoal is made in iron cylinders.

cylinder-press, *s.*

Printing:

1. A form of press in which the type is secured on a cylinder which revolves and presents the form successively to the inking-rollers and to the paper. The type-revolving printing-machine of Hoe is of this class. These machines are made with two, four, six, or ten printing-cylinders arranged in planetary form around the periphery of the larger type-carrying cylinder. The type is secured in turtles, or the stereotype is bent to the curve of the cylinder. The circumference of the latter has a series of binary systems, the elements of which are an inking apparatus and an impression apparatus, the paper being fed to the latter, and the printed sheet carried away therefrom by tapes to a flyer, which delivers it on to the table.

2. A press in which the form is placed upon a bed and the impression taken by a cylinder, which takes a sheet and receives an impression from the form while it is passing under it. These are known as double, single, small, large, stop, cylinder-presses. In the double cylinder-press two cylinders are used, which take sheets alternately. The single has but one, and needs but one attendant feeder; the printed sheets are thrown down by a fly-frame. The stop-cylinder press is one in which, after a sheet is printed, the cylinder remains stationary while the bed is running back, during which time a fresh sheet is placed in position. In this press, designed for woodcut printing, special arrangements are made for inking—by a vibrating cylinder or inking-table, as may be desired—and the number of form-rollers may be proportioned to the character and size of the work, being usually adapted to the size of the bed. The impression cylinder is stationary during the return of the bed, and the fingers close on the sheet before the register-points are withdrawn; the cylinder then revolves, and it gears

directly into the bed, and perfect register is obtained. The bed is arranged to run once, twice, or thrice beneath the inking-rollers to each impression, so as to secure a more perfect distribution of the ink.

cylinder-printing, *s.*

1. *Print.*: A mode of printing in which the type is secured to the cylinder, or the paper on a cylinder which acts in connection with a rolling-bed. [*CYLINDER-PRESS.*]

2. *Calico-printing*: A system of printing calicoes by engraved copper cylinders. These are engraved on the Perkins principle, by which a small roller with the design in cameo is impressed against the surface of the revolving cylinder, delivering upon the latter the design in intaglio as many times repeated as the circumference of the small steel cylinder (the mill) is contained in the circumference of the copper cylinder.

cylinder-tape, *s.*

Print.: A tape running on the impression-cylinder beneath the edge of the paper, to remove the sheet from the cylinder after printing.

cylinder-wheel, *s.*

Horol.: A form of scape-wheel, used in the horizontal or cylinder escapement.

cylinder-wrench, *s.* A form of wrench adapted to grasp round rods or tubes. [*PIPE-WRENCH.*]

çyl'-in-drā'-gë-öüs, *a.* [*Mod. Lat.* *cylindraceus*.] Cylindrical.

çyl'-in-dröl'-lā, *s.* [*Dimin. of Lat.* *cylindrus*.] [*CYLINDER.*]

Zoöl.: A genus of Pulmoniferous Gasteropods, called in English Cylinder Snails. The shell is cylindrical or pupiform, sometimes sinistral, many whorled, with the aperture round. One hundred and forty-three recent species are known from the hotter parts of this country. None have yet been found fossil; land shells are much more rarely preserved than those which are freshwater or marine.

çyl'-in-drën-chy'-mā, *s.* [*Greek* *kyliindros* = a roller, a cylinder, and *engchyma*=an infusion.]

Bot.: In the nomenclature of tissue first proposed by Professor Morren, a division of parenchyma, characterized by the cylindrical character of its cells. It occurs in the Coniferæ and in the hairs of various plants.

çyl'-in'-dric, **çyl'-in'-dric'-al**, *a.* [*Gr.* *kyliindrikos*=pertaining to a cylinder, cylindrical; *kyliindros*=a cylinder.]

1. *Ord. Lang.*: Having the form, nature, or properties of a cylinder.

2. *Bot.*: Having nearly a true cylindrical figure, as the stems of grasses and of various other monocotyledonous plants, the leaves of the Stonecrop (*Sedum acre*), &c.

"... those are glands, which are the extremities of arteries formed into cylindrical canals."—*Arbuthnot: On Aliments.*

(1) *Cylindrical arch*:

Arch.: An arch which is a prolongation of the same curve throughout its length; a vault without groins, resting upon two parallel walls.

(2) *Cylindrical boiler*: A boiler of a cylindrical shape, in contradistinction to the other and earlier forms. The cylindrical boiler was introduced in consequence of the use of a higher pressure of steam, which rendered the haystack, hemispherical, and wagon boilers unsafe. Smeaton introduced the flue into the boiler. The cylindrical return-flue boiler was patented in England, by Wilkinson, in 1799. (*Knight.*)

(3) *Cylindrical bones*:

Anat.: Long bones, such as the chief bones of the limbs. They have a body or shaft, which is the part that is cylindrical or prismatic in form, while the extremities are usually thick. (*Quain.*)

(4) *Cylindrical lens*: A reading-glass whose back and front faces are formed by cylindrical surfaces, the diameters of which are at right angles to each other: the form being that of two segments of cylinders united at their bases. A lens having a cylindrical body and convex ends; a Stanhope lens. The term may also include a lens consisting of a true cylinder which gives a line of light; or of cylindrical segments parallel to each other, which combination also gives a line of light.

(5) *Cylindrical saw*: A saw having a cylindrical form and sharpened at one end. Used in sawing staves from the block, giving them a transversely rounded form; for sawing felloes, chair-backs, &c. It is on the principle of the crown-saw, and is variously called a Tub-saw, Drum-saw, Barrel-saw, &c.

(6) *Cylindrical valve*:

Steam-engine: A valve in a trunnion or elsewhere, having a cylindrical shape and oscillating on its axis, to open and close ports in the cylindrical case which forms its seat.

bôil, bôy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f
-cian, -tian = shan. -tion, -sion = shün. -tion, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del

(7) *Cylindrical walling*: Arch.: That erected upon a circular plan, forming a cylinder, or a part less than a cylinder, according as the plan is an entire circumference or a less portion. (Weale.)

cyl-in-dric-al-ly, *adv.* [Eng. *cylindrical*; -ly.] In the manner or shape of a cylinder.

icyl-in-dric-al-ness, *s.* [Eng. *cylindrical*; -ness.] The same as **CYLINDRICITY** (q. v.).

***cyl-in-dric-i-ty**, *s.* [Eng. *cylindric*; -ity.] The quality or state of being cylindrical.

***cyl-in-dri-cule**, *s.* [Eng. *cylinder*, and dimin. suff. -cule.] A little cylinder.

"Each twin-corpuscle is surrounded by a circle of *cylindricules*."—Owen: *Anatomy of Vertebrates*.

cyl-in-dri-form, *a.* [Eng. *cylinder*, and Lat. *forma*=form, shape.] Having the form or appearance of a cylinder.

cyl-in-drō, *a.* [Lat. *cylindrus*=a cylinder.] In compos.: Cylindrical.

cylindro-conical, *a.* Ordinance: A term applied to a shot having a cylindrical body and a conical head.

cylindro-conoidal, *a.* Ordinance: A term applied to a shot having a cylindrical body and a conoidal head.

cylindro-cylindrical, *a.* Arch.: A term applied to an arch formed by the intersection of a cylindrical vault with another cylindrical vault, of greater span and height, springing from the same level.

cylindro-ogival, *a.* Ordinance: A term applied to a shot having a cylindrical body and an ogival head.

cyl-in-drōid, *s.* [Gr. *kylin-dros*=a cylinder, and *eidos*=appearance.] A solid body approaching to the figure of a cylinder, but differing in some respects; as, having the bases elliptical, but parallel and equal.

cyl-in-drō-mēt-ric, *a.* [Gr. *kylin-dros*=a cylinder, and *metrikos*=belonging to measure; *metron*=a measure.] Pertaining to a scale used in measuring cylinders.

cyl-in-drōm-ēt-rý, *s.* [Gr. *kylin-dros*=a cylinder, and *metron*=a measure.] The art or act of measuring cylinders.

cy'-ma, *s.* [Gr. *kyma*=a wave.] 1. Arch.: The same as **CYMATIUM** (q. v.). 2. The same as **CYME** (q. v.).

¶ (1) *Cyma recta*: A form of waved or ogee molding, hollow in its upper part and swelling below. The member below the abacus or corona. (2) *Cyma reversa*: An ogee in which the hollow member of the molding is below.

cy'-ma-phēn, *s.* [Gr. *kyma*=a wave, and *phainō*=to show.] An apparatus in a telephone for receiving transmitted electric waves.

***cy-mar**, *s.* [CHIMERE.] A slight covering; a scarf.

"The maids in soft cymars of linen dressed." Pope: *Homer's Iliad*, xviii. 685.

cý-mā-ti-ūm (ti as shí), *s.* [Lat.; Gr. *kymation*, dimin. of *kyma*=a wave.]

1. Arch.: A molding whose section or profile is one half convex and the other concave. [CYMA.] An ogee molding.

"In a cornice, the gola, or *cymation* of the corona, the coping, the modillions, or dentelli, make a noble show by their graceful projections."—Spectator.

2. *Sculp.*: Carved work resembling rolling waves.

cý-māt-ō-lite, **icū-māt-ō-lite**, *s.* [Gr. *kyma*, genit. *kymatos*=a wave, and *lithos*=a stone.]

Min.: A mineral which Dana considers nearly or quite the same as Pihlith; while the Brit. Mus. Cat. separates them into two quite distinct species. [PIHLITE.]

cým-bā, *s.* [Lat. *cymba*; Gr. *kymbē*=a boat, a skiff.]

Zool.: Boatshell, a genus of Gasteropodous Mollusks, family Volutidae. The shell, which is like that of Voluta, has a large and globular nucleus, with a few angular whorls. Animal with a very large foot. Ten species are known, all recent, from West Africa and Portugal.

cým-bal, ***cým-ball**, ***sym-bale**, *s.* [O. Fr. *cimbale*; Fr. *cymbale*, from Lat. *cymbalum*, from Gr. *kymbalon*=a cymbal, from *kymbos*, *kymbē*=a cup, a basin.]

Music (Pl.): Discs of bronze, more or less basin-shaped, clashed together or lightly touched in accord with the music. They are very ancient,

being represented in different forms upon the sepulchral monuments. They were used by the Levites in the Temple ordinances, and the sons of Asaph excelled in their use. They are mentioned among other instruments, 1043 B. C., when David brought the ark home—"harps, psalteries, timbrels, cornets, cymbals" (2 Sam. vi. 5). The loud-sounding and high-sounding cymbals mentioned in Ps. cl. 5, were probably the clashing cymbals and rattling castanets. The Arabians have two sorts at the present time; the larger used in religious ceremonies, the smaller only in accompaniments to a dance. Cymbals were the special instruments of the Corybantes, the priests of the goddess Cybele. [CORYBANT.] The metal used in their manufacture now is an alloy of 80 parts of copper to 20 of tin. They should not be struck together so as to coincide, but should rather be rubbed against each other with a single sliding motion.

"The flourish of trumpets, the clash of cymbals, and the rolling of drums . . ."—Macaulay: *Hist. Eng.*, ch. ix.

"Away with slothful loitering. Together arise, advance To Cybele's Phrygian forest, to the goddess' Phrygian home, Where ring the clanging cymbals, where echoes the bellowing drum." Grant Allen: *Trans. of Catullus*, Carm. lxiii.

***cymbal-doctor**, *s.* A teacher giving forth an empty sound (1 Cor. xiii. 1).

"He was a disciple of those cymbal-doctors."—Milton: *Eikonoklastes*, ch. viii.

cým-bal-ist, *s.* [Lat. *cymbalista*.] One who plays the cymbals.

cým-bēl-lā, *s.* [A dimin. of Lat. *cymbalum*=a cymbal.]

Botany: 1. A reproductive locomotive body of an elliptical shape, found in some algae.

2. A genus of Diatomaceæ, the typical one of the sub-order Cymbellæ. It is so called from its cymbiform valves. It is found recent as an aquatic production and also fossil.

cým-bēl-lē-æ, *s. pl.* [Lat. *cymbell(a)*, and fem. pl. adj. suff. -æ.]

Bot.: A sub-order of Algae, order Diatomaceæ. The individuals are quite free. They are angular and siliceous.

cým-bid-i-ūm, *s.* [Latinized dimin., from Gr. *kymbē*=a boat. So named in allusion to the form of the labellum.]

Bot.: A large genus of Orchids, mostly from India, China, &c. All live on the ground.

cým-bl-form, *a.* [Lat. *cymba*; Gr. *kymbē*=a boat, and *forma*=form, appearance.]

Bot. Anat., &c.: Shaped like a boat; hollowed. [BOAT-SHAPED.] It is closely akin also to keeled (q. v.).

"According as the veins proceed in a straight or curved direction, so may the limb of the petal be flat or concave, or hollowed like a boat, *cymbiform* or navicular."—Baifour: *Botany*, § 373.

cýme, **icý-mā**, *s.* [Lat. *cyma*=a young sprout of a cabbage; Gr. *kyma*=anything swollen, a wave, a young sprout of a plant.]

Bot.: A kind of depressed centrifugal inflorescence—that is, one in which the first flowers which

come to perfection are those in the center of the compound inflorescence, and the last these at the circumference. It has a solitary terminal flower, from beneath which secondary pedicels develop. If the leaves are opposite, and a peduncle is produced in the axil of each one of them, pedicels following in a similar arrangement, the cyme is a dichotomous one. If, instead of opposite leaves, there is a vertical of three, each sending a pedicel from the axil, then a trifurcation occurs instead of bifurcation, and a trichotomous cyme is the result. There are various types of cyme, such as a helicoid cyme, a scorpioid one, &c. [See these words.] Examples of the cyme may be seen in the Guelder rose, in which it is globular, and the Laurustinus, in which it is flat-headed or corymbose. The verticillaster is a modified cyme.

cýme (2), *s.* [CEMENT.] Cement.

"Cement or cyme, wherewith stones be joynted together in a lump."—Lithocalla."—Huiet.

cý-mēne, *s.* [Cym(inum), the same as *cuminum*=cumin, and Eng., &c., suff. -ene (Chem.) (q. v.).]

Inorganic Chem.: Cymol, methyl-propyl-benzene, $C_{10}H_{14}$, or $O_6H_4<C_3H_7$.

(1) *Ortho*- (1-2), obtained by the action of sodium on ortho-bromtoluene (1-2) $C_6H_4<Br$ and propyl iodide, C_3H_7I . It boils at 182°. (2) *Meta*- (1-3), obtained by the action of sodium on meta-bromtoluene (1-3) and propyl iodide, boiling at 177°. (3) *Para*- (1-4), obtained by the action of sodium on a mixture of para-bromtoluene (1-4) and normal propyl bromide dissolved in anhydrous ether. It is also obtained by heating camphor, $C_{10}H_{16}O$, with phosphoric anhydride, P_2O_5 ; from thymol by the action of phosphorus pentasulphide, P_5S_8 ; also from cumin oil by separating the cuminaldehyde by combining it with acid sodium sulphite, and then distilling off the cymene. Cymene occurs in cumin oil, in the seed of the Water Hemlock, *Cicuta virosa*. Also obtained in the distillation of coal-tar. Cymene is an agreeable smelling liquid, boiling at 175°. It dissolves in concentrated sulphuric acid, forming sulphonic acid. By the action of chromic acid mixture it is oxidized into terephthalic acid, $C_6H_4<COOH$ (1-4). By the action of nitric acid it yields also paratoluic acid, $C_6H_4<COOH$.

cý-míc, *a.* [Lat. *cym(inum)*, and Eng., &c., suff. -ic.] Derived from *cuminum* (q. v.).

cymic acid, *s.* Chem.: $C_{11}H_{14}O_2$. A monatomic aromatic acid, prepared by the action of caustic alkalies on cymyl cyanide.

cý-mí-díne, *s.* [Lat. *cym(inum)*; Gr. *eidos*=appearance, and Eng., &c., suff. -ine (Chem.) (q. v.).]

Chem.: $C_{10}H_{15}N$. An aromatic base, boiling at 250°, obtained by the reduction of the nitro-derivative.

icý-míf-ēr-ōus, *a.* [Lat. *cyma* [CYME]; fero=to bear, and Eng. suff. -ous.]

Bot.: Bearing a cyme or cymes.

cým-íllāg, *s.* [Etym. doubtful.] A kind of squash (q. v.).

cý-mí-nūm, *s.* [CUMINUM.] The same as **CUMINUM** (q. v.).

cý-mōid, *a.* [Lat. *cyma* [CYME], and Gr. *eidos*=form, appearance.]

Bot.: Having the form of a cyme; resembling a cyme.

cý-mō-phāne, *s.* [Gr. *kyma*=wave; o connective, and *phainō*=to appear. In allusion to a peculiar opalescence sometimes seen in the crystal.] Min.: A variety of Chrysoberyl. Chemically viewed, it is an aluminate of glucinum.

cý-mōph-an-ōus, *a.* [CYMOPHANTITE.] Having a wavy floating light; opalescent, chatoyant.

cý-mōs-ā, *s. pl.* [Fem. pl. Lat. *cymosus*=full of shoots.] [CYME.]

Bot.: An order in the Natural System of Linnaeus, published in 1751, in his *Philosophia Botanica*. He included under it *Loniceria*, *Loranthus*, *Ixora*, and doubtfully *Cinchona*.

cý-mōse, *a.* [Lat. *cymosus*=full of shoots, from *cyma*.] [CYME.]

Bot. (of aggregate flowers): Containing a cyme, or approaching the arrangement of flowers characteristic of a cyme.

cý-mō-thō-ā, **cý-mōth-ō-ē**, *s.* [Gr. *kymothōē*, from *kyma*=a wave (see def. 1), and *thōs*=quick, nimble, active, swift.]

1. Greek Mythology (of the form *Cymothoe*): The name of a Nereid.

"Cymothoe and Cymodoce were nigh." Pope: *Homer's Iliad*, xviii. 49.

2. Zool. (of the form *Cymothoa*): A genus of Isopod. Crustaceans, the typical one of the family Cymothoidæ (q. v.).

cý-mō-thō-i-dæ, **cý-mō-thō-ā-dæ**, *s. pl.* [Lat. *cymothoa*, and fem. pl. adj. suff. -idæ.]

Zool.: A family of Crustaceans, order Isopoda. The antennæ are short, the head small, the legs short, with hooks which enable them to cling to the tails and other parts of fishes, on which they are parasitic.

cý-mūle, *s.* [Dimin. of Eng. *cyme*.]

Botany:

1. A diminutive cyme.

2. A branch or cluster of a compound cyme.

Cým-ric, **Cwm-ric** (pr. kŭm-ric), *a. & s.* [CYMRY.]

A. As adj.: Of or pertaining to the Cymry;

Welsh.

B. As subst.: The language spoken by the Cymry;

Welsh.

Cyme.

fāte, fāt, fāre, fāmidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, plt, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mātē, cūb, cūre, unite, cūr, rūle, fūll; trý, Sýrian. æ, œ = ē; ey = ā. qu = kw.

Cym-rŷ, Cwm-rŷ (pr. kŭm-rŷ, kŭm-rŷ), *s.* [Wel. *Cymro* (pl. *Cymry*)=a Welshman.] The name applied to themselves by the Welsh. More widely it is applied to that branch of the Celtic race which originally inhabited Britain before they were driven into Cornwall, Wales and the Highlands by the Saxons and others.

cŷ-mŷl, s. [Lat. *cym(inum)*, and suff. *-yl* (Chem.) (q. v.).]

Chem.: A monad aromatic hydrocarbon radical, $C_{10}H_{13}$, of which cymene, $C_{10}H_{14}$, is the hydride.

cymyl alcohol, s.

Chem.: $C_{10}H_{14}O=C_{10}H_{13}(OH)$. Cumyl alcohol. It is a colorless liquid, boiling at 243°, insoluble in water, soluble in alcohol and ether. Obtained by the action of alcoholic potash on cuminic aldehyde.

cymyl chloride, s.

Chem.: $C_{10}H_{13}Cl$, obtained by the action of chlorine on cymene, in the presence of iodine. It boils at 210°.

cŷ-mŷl-a-mine, s. [Eng., &c., *cymyl; amine*.]

Chem.: $NH_2(C_{10}H_{13})$. An oily liquid, boiling at 280°. Obtained by heating cymyl chloride with alcoholic ammonia in sealed tubes.

cŷn-æ-lŷr-ŷs, s. [Gr. *kyōn*=a dog, and *ailouros*=a cat.]

Zool.: A genus of Felidae. *Cynelurus jubatus* is the Cheetah, or Hunting Leopard, generally called *Felis jubata*. [CHEETAH.]

***cŷn-a-mōne, *cŷn-o-mum, s.** [CINNAMON.]

cŷ-nānch-ē, s. [Gr. *kynaghe*=dog-quinsy, from *kyōn*=a dog, and *angchō*=to press tight, to strangle.]

Med.: Malignant sore-throat. It is of various kinds.

(1) *Cynanche maligna*: [SCARLATINA, PHARYNGITIS.]

(2) *Cynanche parotidea*: [PAROTITIS.]

(3) *Cynanche pharyngea*: [PHARYNGITIS.]

(4) *Cynanche tonsillaris*: [TONSILLITIS.]

(5) *Cynanche trachealis*: [CROUP.] (Cycl. Pract. Med.)

cŷn-ānch-ōi, s. [Mod. Lat. *cynanch(um)*; and Lat. *ol(eum)*.]

Chem.: A substance crystallizing in needles and plates, obtained from the sap of *Cynanchum acutum*. Cynanchol is said to be a mixture of echicerin $C_{30}H_{45}O_2$ and echitin, $C_{32}H_{52}O_3$, which occurs also in Dita-bark. (Watts: Dict. Chem.)

cŷ-nānch-ūm, s. [Gr. *kyōn*=a dog, and *angchō*=to press tight, to strangle. So named from its poisonous properties.]

Bot.: A genus of plants, order Asclepiadaceae, tribe Asclepiadeae. The corolla is somewhat rotate and five-parted, with a coronet of five to twenty lobed appendages; pollen masses ventricose, follicles smooth. A widely diffused genus, extending from 50° N. to 32° S. latitude. What was formerly called *Cynanchum vincetoxicum*, now *Vincetoxicum officinale*, a native of the continent of Europe, is emetic and purgative. It was once valued as an antidote to poisons. *C. acutum* is also a drastic purgative. *C. monspeliense*, a native of Southern Europe, furnishes Montpellier Scammony. *C. argel*, which grows in Upper Egypt, generally comes to this country mixed with the genuine senna leaves, not, however, it is believed, as an intentional adulterant. *C. ovalifolium*, which grows in Penang, yields caoutchouc.

cŷn-ān-thrōp-ŷ, s. [Gr. *kyōn*, genit. *kynos*=a dog, and *anthrōpos*=a man.]

Pathol.: A species of madness in which a man imagines himself to be transformed into a dog, and imitates its bark and habits.

cŷn-ap-lne, s. [Mod. Lat. *cynap(ium)*; Eng. suff. *-ine* (Chem.).]

Chem.: A poisonous alkaloid, said to occur in Fool's Parsley, *Aethusa cynapium*.

cŷn-a-rŷ, s. [Lat. *cynara*; Gr. *kinara*=an artichoke. Cf. also Gr. *kinara* either also=the artichoke, or possibly=the dog-rose.]

Bot.: A genus of Composite plants, the typical one of the tribe Cynareae. It is, however, placed under the sub-tribe Cardueinae, of which the genus *Carduus* is the type. The involucre consists of thick, fleshy, spiny scales; the receptacle is thick, fleshy, and covered with bristles. *Cynara scolymus* is the Artichoke, and *C. cardunculus* is the Cardoon. The eatable part of the former consists of the succulent receptacles. The Arabs consider the roots and the gum derived from them aperient. Cardoons are the blanched leaf-stalks and stems of *C. cardunculus*.

cŷn-ar-ā-cē-ōs, s. pl. [Mod. Lat. *cynara*; Class. Lat. *cinar(a)*, and fem. pl. adj. suff. *-aceae*.]

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist. ph = f. -clan, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -die, &c. = bel. del.

Bot.: The name proposed by Lindley, in his *Natural System of Botany*, for one of four orders into which he believed the Compositae should be divided. It was identical with the Cynarocephalae of Jussieu. The characters given were that the albumen was described as absent, the seed erect, the involucre rigid or spiny, conical, the flowers of the ray tubular, inflated, regular. In Lindley's *Vegetable Kingdom* another classification has been adopted, the order Cynaraceae no longer appears, and the tribe Cynareae takes its place.

cŷn-ar-ā-cē-ōs, a. [Mod. Lat. *cynar(a)*, and Eng. adj. suff. *-aceous*.] Of or belonging to the Cynaraceae.

***cŷn-arc-tōm-ach-ŷ, s.** [Gr. *kyōn*, genit. *kynos*=a dog; *arktos*=a bear; *machē*=a fight, a battle.] A battle of a dog and bear.

"That some occult design doth lie
In bloody cynarotomy."
Butler: Hudibras, i. 2.

cŷn-ār-ē-ōs, s. pl. [Mod. Lat. *cynar(a)*, and fem. pl. adj. suff. *-eae*.]

Bot.: A tribe of Composite plants, sub-order Tubuliflorae. [CYNARAE.]

cŷn-ār-ē-ōs, a. [Mod. Lat. *cynareus*.]

Bot.: Pertaining to the tribe Cynareae (q. v.).

"In general the *cynareous* genera are characterized by intense bitterness."—Lindley: *Vegetable Kingdom* (1853), p. 707.

cŷn-ār-ō-cēph-a-læ, s. pl. [Mod. Lat. *cynar(a)*; o connective, and Gr. *kephalē*=the head.]

Bot.: The name given by Jussieu to that great section of the Compositae characterized by having all the florets tubular; the others being Corymbiferae, in which only those of the disk are tubular, the remainder being ligulate, and Cichoraceae, in which all the florets are ligulate.

cŷn-ar-rhō-dūm, cŷn-ar-rhō-dōn, s. [Mod. Lat. *cynara* (q. v.), and *rhodon*=a rose.]

Bot.: An aggregated fruit, in which the ovaries are distinct, the pericarps hard, indehiscent, inclosed within the fleshy tube of a calyx. (Lindley.) Example, the "hips" of the rose. They are not true fruits, the true fruits being achenes.

***cŷn-ē-gēt-ics, s.** [Gr. *kynēgetēs*=a hunter, *kynēgetikos*=pertaining to hunting, *hē kynēgetikē technē*=the art of hunting, *kyōn*=a dog, *hēgeomai*=to lead.] The art or science of hunting, training dogs, &c.

"There are extant, in Greek, four books of *cynēgetics* or venation."—Browne: *Vulgar Errors*.

cŷn-ic, *cŷn-ick, a. & s. [Lat. *cynicus*=a cynic, from Gr. *kynikos*=dog-like, cynical, *kyōn*, genit. *kynos*=a dog.]

A. As adjective:

I. Ordinary Language:

1. Having the qualities or habits of a dog; curish, snarling, snappish, misanthropical.

2. In the same sense as II. 2.

II. Technically:

1. *Astron.:* Pertaining to the Dog-star.

2. *Greek Phil.:* Belonging to the sect of philosophers known as Cynics.

B. As substantive:

1. *Ord. Lang.:* A sneering, sarcastic, or surly person; a misanthrope.

"Without these precautions the man degenerates into a cynic, the woman into a coquette."—Addison.

2. *Greek Philosophy:* One of a sect of philosophers, founded by Antisthenes. They were formed for the purpose of providing a remedy for the moral disorders of luxury, ambition, and avarice; the great aim of its adherents being to inculcate a love of virtue, and to produce simplicity of manners. The rigorous discipline of the first Cynics degenerated afterward into the most absurd severity. Of this sect the most distinguished member was Diogenes.

cŷn-ic-al, a. [Eng. *cynic*; -al.] The same as CYNIC (q. v.).

"... one of those bitter and cynical smiles . . ."
—Macaulay: *Hist. Eng.*, ch. ix.

cŷn-ic-al-ly, adv. [Eng. *cynical*; -ly.] In a cynical, sneering, or sarcastic manner.

"Rather in a satire and cynically, than seriously and wisely."—Bacon: *Works*, I. 176.

cŷn-ic-al-nēss, s. [Eng. *cynical*; -ness.] The quality of being cynical; moroseness, bitterness, sarcasm; contempt for riches and pleasure.

cŷn-ic-ism, s. [Eng. *cynic*; -ism.] The conduct or philosophy of a cynic.

(1) *In a good sense:* Contempt for riches and pleasure.

(2) *In a bad sense:* Contempt for everything that other people value, and for the good opinion of mankind.

cŷn-ics, s. pl. [CYNIC, s.]

cŷn-ic-tis, s. [Gr. *kyōn*, genit. *kynos*=a dog, and *iktis*=a kind of weasel or ferret.]

Zool.: A genus of mammals whose proper place is perhaps among the Viverridae (Civets), though it has affinities also to the dogs and the hyenas, in the family Canidae. The incisors are 3, the canines 1-1, the molars 6-6 = 38. *Cynictis Steedmanii* or *Ogilbyi* is found at the Cape of Good Hope, where it is called the Meerkat.

cŷn-ip-ī-dæ, s. pl. [Mod. Lat. *cynip(s)*, and fem. pl. adj. suff. *-idae*.]

Entom.: A family of hymenopterous insects, sub-order Petiolata, tribe Terebrantia, and sub-tribe Gallicola (Gall-inhabiting Insects). The antennae, which are straight, have generally 13 to 15 joints, the palpi are short, and the wings have but few nervures, the ovipositor, shaped like the letter S, is nearly all concealed within the abdomen. The larvae are destitute of feet. [CYNIPS.]

cŷn-ips, s. [Gr. *kyōn*, genit. *kynos*=a dog, and *ips*=a worm which eats horn and wood, one which injures vine-buds; it is a kind of cynips.]

Entom.: A genus of hymenopterous insects, the typical one of the family Cynipidae. The species are minute animals which puncture the leaves or other parts of various trees or plants, producing the excrescences known as galls. *Cynips gallæ tinctoriæ* thus punctures an oak, *Quercus infectoria*, producing the galls of commerce. They come from Asia Minor, Syria, and the adjacent parts. *C. confusus*, in our own country, produces round excrescences on the leaves of the common red oak, which are commonly known as Oak Apples. The puncture of *C. insana* produces the Dead Sea Apples. [SCINIPH.]

cŷn-ō-cēph-al-ūs, s. [Lat. *cynocephalus*; Gr. *kynocephalos*=(as subst.) the dog-headed baboon [def.], (as adj.)=dog-headed; *kyōn*, genit. *kynos*=a dog, and *kephalē*=the head.]

Zool.: A genus of Old World Monkeys or Baboons, family Simiidae or Simiade. As the etymology implies, the head, which is very large is like that of a dog. The resemblance is specially in the prolongation forward of the jaws and the low facial angle (about 30°), making the animal diverge more widely from the human type than the tailless apes. The natesal callosities are of great size, and often bright colored. The disposition of this baboon is violent. Its native country is South Africa. It is the species described in the following verse by Pringle, the Cape poet:

"And the grim satyr-faced baboon
Sits railing to the rising moon,
Or chiding with hoarse angry cry
The herdman as he wanders by."

"The lid of one vase consisted of a carved human head; another was a jackal's head, and the third that of a cynocephalus."—Blackwood's Magazine, Nov. 1881, p. 581.

cŷn-ō-dōn, s. [Gr. *kynodōn*, the same as *kynodous*=the canine tooth.]

1. *Bot.:* A genus of grasses, tribe Chlorideae. The spikelets are one-flowered with a superior rudiment, the glumes nearly equal, the styles long and distinct with feathery stigmas. *Cynodon dactylon* (the Creeping Dog's-tooth Grass) has three to five digitate spikes. It is found in Europe, on the coasts of Devonshire and Cornwall, England. It occurs also in Asia, and is an East Indian fodder grass. A cooling drink is made in that country from its roots. It has been considered as a good substitute for sarsaparilla. So has another Indian species, *C. linearis*, or *lineare*, which is called Durva-grass.

2. *Palæont.:* A genus of fossil mammals, belonging probably to the family Canidae, though with affinities to the Viverridae.

cŷn-ō-drā-cō, s. [Gr. *kyōn*, genit. *kynos*=a dog, and Lat. *draco*; Gr. *drakōn*=a dragon.]

Palæont.: A genus of reptiles, order Theriodontia. Teeth of three sorts, as in the carnivorous mammals; the canines are large. Found in Triassic(?) strata in South Africa.

cŷn-ōg-a-lē, s. [Gr. *kyōn*, genit. *kynos*=a dog, and *gale*, contraction of *galeē*=a weasel.]

Zool.: A genus of mammals, family Viverridae or Civets. *Cynogale Bennettii* is found in Borneo. It feeds partly on fish, which its webbed feet enable it to pursue in their native element.

cŷn-ō-glōs-ē-ōs, s. pl. [Modern Lat. *cynogloss(um)*, and fem. pl. adj. suff. *-eae*.]

Bot.: A tribe of Boraginaceae, type Cynoglossum (q. v.).

cŷn-ō-glōs-sūm, s. [Lat. *cynoglossus*; Gr. *kynoglosson*; *kyōn*, genit. *kynos*=a dog, and *glōssa*=a tongue.]

Bot.: Hound's-tongue. A genus of plants, order Boraginaceae. Calyx five-cleft, corolla funnel-shaped, with the mouth closed, prominent blunt scales, filaments of the stamens very short, nuts mucronate. More than fifty species are known. Two—viz., *Cynoglossum officinale*, the Common Hound's-tongue, and *C. montanum*, the Green-leaved Hound's-tongue—are common. Their flowers are purple-red. The former species has an unpleasant, mouse-like smell, and is considered by some to be narcotic. Its leaves are bitterish, and produce a strong-scented oil.

Cynoglossum.

1. Section of Corolla. 2. Seed-vessel.

***cyn-ōg-rāph-ŷ, s.** [Gr. *kyōn* (genit. *kynos*)=a dog; *graphō*=to write, to describe.] A treatise on, or history of, the dog.

cyn-ō-mē-tra, s. [Gr. *kyōn* (genit. *kynos*)=a dog, and *mētra*=the matrix or womb, from *mētēr*=a mother.]

Bot.: A genus of leguminous plants, the typical one of the tribe Cynometreæ (q. v.).

cyn-ō-mē-trē-ō, s. pl. [Mod. Lat. *cynometra* (a), and fem. pl. adj. suff. -eæ.]

Bot.: A genus of leguminous plants, sub-order Cæsalpinea.

cyn-ō-mōr-i-ā-čē-ō, s. pl. [Mod. Lat. *cynomori* (um), and fem. pl. adj. suff. -aceæ.]

Bot.: In some classifications a distinct order of Rhizogens, constituted by what Lindley and others consider entitled to rank only as a tribe or family of Balanophoraceæ. [*CYNOMORIDÆ*.] When made an order it is said to be distinguished from Balanophoraceæ by the distinct stamens and the imperfect perianth of the male flowers.

cyn-ō-mōr-i-dæ, s. pl. [Mod. Lat. *cynomoridi* (um), and fem. pl. adj. suff. -idæ.]

Bot.: A tribe or family of Balanophoraceæ.

cyn-ō-mōr-i-ūm, s. [Lat. *cynomorium*; Gr. *kynomorion*=a plant, the orobanche or broomrape. This is not the modern *cynomorium*, but resembles it in being parasitical.]

Botany:

1. *Sing.*: A genus of Rhizogens (the same as Rhizanthus), the typical one of the tribe or family Cynomoridæ. It is of the order Balanophoraceæ, for which Lindley gives the English equivalent of Cynomoriums. The only known species is *Cynomorium coccineum*, formerly called *Fungus meletensis*. It is of much higher organization than a fungus, having actual flowers, which are generally unisexual, but sometimes even hermaphrodite. The stem is herbaceous, and is covered with scales. It is found in the Levant, in Malta, the north of Africa, and the Canary Islands. It was formerly valued as a styptic.

2. *Pl.*: The English name given by Lindley to the order Balanophoraceæ (q. v.).

cyn-ō-mŷs, s. [Gr. *kyōn* (genit. *kynos*)=a dog, and *mŷs*=a mouse.]

Zool.: A genus of Mammals, family Scuidridæ. *Cynomys ludovicianus* is the Prairie Dog of North America.

cyn-ō-pith-ē-cūs, s. [Gr. *kyōn* (genit. *kynos*)=a dog, and *pithēkos*=an ape, a monkey.]

Zool.: A genus of apes. The tail is entirely absent. *Cynopithecus niger* is found in the Celebes and Philippine Islands. It is an animal in some respects resembling a baboon.

cyn-ō-rēx-i-ā, s. [Fr. *cynorexie*. From Gr. *kyōn*=a dog, and *orexia*=a longing for. . . appetite.]

Med.: A canine appetite, i. e., a voracious one.

cyn-ō-sūre, *cyn-ō-sūr-ā, s. [Lat. *cynosura*, the Lesser Bear; Gr. *kynosoura*; *kyōn* (genit. *kynos*)=a dog; *oura*=a tail.]

I. Lit.: The constellation of the Lesser Bear, containing the north star.

"Having the *Cynosure* and *Ursa Minor* for their best directors."—Sir W. Herbert: *Travels*, p. 377.

II. Figuratively:

*1. Anything which serves to guide or point the way.

"The Countess of Buckingham was the *Cynosura* that all the Papists steered by."—Hacket: *Life of Abp. Williams*, i. 171.

2. A center of attraction.

cyn-ō-sūr-ūs, s. [Lat. *cynosura* (q. v.).]

Bot.: Dog's-tail Grass. A genus of grasses, tribe Festuceæ, family Graminæ. The flowers are in a spiked unilateral panicle, the spikelets with two to five perfect florets, with a pectinate bract at their base; glumes, two equal, membranaceous, shortly awned; glumellas two. *Cynosurus cristatus*, the Crested Dog's-tail Grass, or Gold-seed, is highly valued as a fodder grass. It is from twelve to eighteen inches high, with narrow linear leaves and second racemes. *C. echinatus* is found in the Channel Islands.

CYN-thi-a, s. [From *Cynthus*, now *Monte Cinto*, a mountain of Delos, where Apollo and Diana were born.]

1. *Ancient Myth.:* One of the names of Diana; the moon.

2. *Zoology:*

(1) A genus of Lepidoptera, family Nymphalidæ, and sub-family Vanessidæ of Stainton. It contains the Painted Lady, *Cynthia cardui*.

(2) A genus of Crustaceans.

(3) A genus of Ascidian Mollusks. Body sessile, external envelope coriaceous, branchial and anal orifices opening in four rays or lobes.

cŷ-ō-phōr-i-ā, s. [Gr. *kyos*=a foetus, and *phorēō*=to carry, to bear.]

Med.: The period of gestation.

cŷ-pēr-ā-čē-ō, s. pl. [Mod. Lat. *cyper(us)* (q. v.), and fem. pl. adj. suff. -aceæ.]

Bot.: Sedges. A large order of endogenous plants, alliance Glumales. It consists of herbaceous plants, somewhat resembling grasses, but the latter have cylindrical stems with many joints, while the Cyperaceæ, as rule, have triangular stems with only one joint.

When the leaves form a sheath, that sheath is not slit. Flowers consisting of imbricated solitary bracts, of which the lower ones are generally empty; calyx none; corolla none; stamens one to twelve; ovary one-celled, often surrounded by setæ; ovule one, erect; nut crustaceous or bony.

The order is divided into the ten following tribes: (1) Caricæ, (2) Elyneæ, (3) Scleræ, (4) Rhynchosporæ, (5) Cladæ, (6) Chrysitricheæ, (7) Hypolytræ, (8) Fuireneæ, (9) Scripæ, and (10) Cyperæ.

They are found more or less in every country, growing in marshes, ditches, streams, meadows, heaths, forests, on the sands of the seashore, and on mountains. There is in them a great absence of fecula and sugar, so that cattle do not care to use them as fodder. There are 120 known genera, and more than 2,000 species.

cŷ-pēr-ē-ō, s. pl. [Mod. Lat. *cyper(us)*, and fem. pl. adj. suff. -eæ.]

Bot.: A tribe of plants, order Cyperaceæ.

cŷ-pēr-i-tēs, s. [Mod. Lat. *cyper(us)*, and -ites (Min.)=stone.]

Palæobotany: A genus of fossil plants, supposed, when the name was first given them, to be akin to Cyperus. Now, however, they are believed to be the leaves of Sigillaria, or some similar plant. They occur in the Carboniferous rocks.

cŷ-pēr-ūs, s. [Mod. Lat. *cyperus*; Class. Lat. *cyperos*, *cyperum*; Gr. *kypeiros*=the species of the modern genus Cyperus, called by Linnaeus *Cyperus longus*, or *C. comosus* of Sibthorp.]

Bot.: A large genus of Endogens, the typical one of the tribe Cyperæ and the order Cyperaceæ. The spikelets are many-flowered; the glumes of one valve, keeled, nearly all fertile, equal; bristles none; style deciduous. Altogether 370 species are enumerated by Kunth. It is essentially a southern genus, *Carex* taking its place in the north. The roots are given successfully by Hindoo practitioners in cases of cholera. They call it *Mootha*. Those of *C. perennis*, or *Nagur Mootha*, dried and pulverized, are used by Hindoo ladies for scouring and perfuming their hair. *C. Iria* is administered in India in suppression of the menses and in colic.

The tubers or corms of *C. esculentus* are used in the south of Europe for food, as well as for the preparation of orgeat; in India they have been roasted and used as a substitute for coffee or cocoa. Those of *C. bulbosus* (*C. jemenicus*, Linnaeus), if not so small, would be similarly used in India. *C. textilis* is used in the same country

for covering rooms and for making ropes. *C. inundatus*, by binding the bank of the Ganges, protects it from the action of the water. Finally, *C. hydra* is the Nutgrass of the West Indies, which overruns sugar-cane plantations and renders them barren. (Lindley, etc.)

cŷ-phēl, s. [Etym. doubtful.]

*1. The Common Houseleek, *Sempervivum tectorum*.

2. *Cherleria sedoides*.

cŷ-phēl-lā, s. [Gr. *kyphella*=the hollows of the ear-].

Botany:

1. A genus of Hymenomycetous Fungi, forming somewhat membranous minute cups, sessile or stalked upon branches of trees or upon mosses.

2. A pale tubercle-like spot on the under surface of the thallus of lichens.

cŷ-phēr, s. [CIPHER.]

cŷ-phēr, v. [CIPHER, v.]

cypher-tunnel, s. A dummy or mock chimney.

"The device of *cypher-tunnels* or mock-chimneys, merely for uniformity of building, being unknown in those parts."—Fuller: *Ch. Hist.*, v., iii. 46.

cŷ-phī-ā, s. [Gr. *kyphos*=bent, bent forward, stooping; used with reference to the gibbous stigma.]

Bot.: A genus of plants, order Campanulaceæ, tribe Campanuleæ. Its appropriate locality is South Africa. It is said that the Hottentots eat the tuberous root of *Cyphia digitata*.

cŷ-phōn, s. [Gr. *kyphōn*=a crooked piece of wood.]

Entom.: A genus of Beetles, family Dascillidæ. Sharp enumerates several species.

cŷ-phōn-i-dæ, s. pl. [Mod. Lat. *cyphon*, and fem. pl. adj. suff. -idæ.]

Entom.: In some classifications a family of Beetles, type Cyphon, which is more commonly placed under the Dascillidæ. [CYPHON.]

***cŷ-phōn-ism, s.** [Gr. *kyphōnismos*=punishment in the pillory; *kyphōn*=a pillory.] An ancient mode of punishment or torture inflicted on criminals. It consisted in rubbing the offender with honey, and afterward exposing him in a cage, or fastening him to a stake, to be a prey to swarms of insects. Another view is that it was the placing of a wooden collar around the neck of the malefactor, pressing it down, as is still done in China.

cŷ-præ-ā, s. [From Lat. *Cypris*; Gr. *kypris*=a name of Venus or Aphrodite, from the island of Cyprus, in which she was first adored, and where her worship flourished most.]

Zool.: Cowry. A genus of Gasteropodous Mollusks, the typical one of the family Cypridæ. The shell is ventricose, convolute, enameled; the spire concealed, the aperture long and narrow, with a short canal at each end, the inner lip crenulated, the outer one inflected and crenulated. The young shell differs greatly from the mature one; it has a sharp outer lip and a prominent spire. One hundred and fifty recent species are known from the warmer parts of both hemispheres, especially from the Eastern one; fossil, eighty species, from the Chalk period till now. *Cypræa moneta* is the Money Cowry, used as a circulating medium in Africa, India, and the East generally. *C. annulus* is used by the Asiatic Islanders as an ornament to their dress, a weight for their fishing nets, and for barter. Layard found specimens of it among the ruins of Nineveh. The species of Cowry so frequently seen on mantelpieces is *Cypræa tigris*.

cŷ-præ-i-dæ, s. pl. [Mod. Lat. *cypræa* (a) (q. v.), and fem. pl. adj. suff. -idæ.]

Zool.: A family of Gasteropodous Mollusks. The shell is convolute, enameled, the spire concealed, the aperture narrow, channeled at each end, the outer lip thickened and inflected; no operculum. The animal has a broad foot and a mantle expanded on each side into lobes. The Cypridæ live in shallow water near the shore of the ocean, and feed on zoophytes. Chief genera, *Cypræa* and *Ovulum*.

cy-pres (pron. cŷ-prā), s [Norm. Fr.=as near as can be. (Kelham).]

Law: Approximation. It is specially used in connection with wills and with charitable bequests. A person, by his will, bequeaths property to a certain descendant, but through unacquaintance with the law he proposes an illegal arrangement for carrying it out; the Chancery Division of the Supreme Court can do as the Courts of Chancery have done continually, substitute a legal for the illegal method of carrying out the testator's intentions, and allow the essential part of the expressed intention to stand. A similar improvement of procedure is often made in connection with badly-drawn charitable bequests.

Cyperus Longus.

1. Spikelet. 2. Floret.

cý-press (1), *ci-pre, *ci-presso, *cy-pur, *cy-pyr, *cy-pres, *cy-parisse, *cu-presso, s. & a. [In Sw. *cypress*; Dan. *cypres*(træ); Dut. & Sp. *ciprés*, Ger. *cypresse*; Fr. *cyprés*; Prov. *cypres*; Port. *cipreste*; Ital. *cipresso*; Lat. *cypressus*, from Gr. *kyparissos*=the cypress-tree. Cf. also Heb. *gopher* (Gen. vi. 14).] [GOPHER.]

A. As substantive:

1. Ordinary Language:

I. A tree, *Cupressus sempervirens*, a tall evergreen conifer, indigenous to Persia and the Levant, but planted all over the adjacent regions, though not to any extent in India. The Greek word *kyparissos* has by some been derived from *Kypros*, the island of Cyprus, where it is abundant. It is planted, in the regions where it grows, in burial-grounds, especially in those of the Mohammedans and of the Armenians. The modern Romans admit it, as did their ancient predecessors, into their private gardens. The Greeks made their coffins of its wood, and some Egyptian mummy chests are of the same material. It is used in Candia, Malta, and other places for building purposes, being very durable. The doors of St. Peter's at Rome are formed of it, and have lasted 1,100 years. The gates of Constantinople, also built of it, continued the same length of time. Cabinet-makers and turners find it suitable for their respective crafts. Formerly the cypress was considered to be febrifugal and its oil as anthelmintic.

"Bind you my brows with mourning cyparisse."

Bp. Hall: *Elegy on Dr. Whitaker.*

2. Any species of *Cupressus*. Thus, there is the Spreading Cypress (*Cupressus horizontalis*.)

II. The Cypress of Scripture: Heb. *tirzah* is derived from *taraz*=to be strong. It is, therefore, some strong tree which there are no means of identifying. It is probably not the cypress, which has another word to express it, namely, *berosh*, in most places translated cedar or fir.

B. As adj.: Made of cypress, or in any way pertaining to it.

"Let Nymphs and Sylvans cypress garlands bring."

Pope: *Winter*, 22.

cýp-ri-ân, a. & s. [From the proper name Cyprus.]

A. As adjective:

1. **Lit.:** Belonging or pertaining to the island of Cyprus.

2. **Fig.:** Lewd, abandoned.

B. As substantive:

1. **Lit.:** A native of Cyprus; a Cypriot.

2. **Fig.:** A lewd woman; a prostitute; a courtisan.

cý-pri-car'-dî-a, s. [Gr. *kypria*=a name of Aphrodite or Venus, and *kardia*=the heart.]

Zool.: A genus of Conchiferous Mollusks, family Cyprinidae. The shell is oblong, with 2-2 cardinal teeth, and 1-lateral ones in each valve. Thirteen recent species are known, from the Red Sea, India, and Australia, and sixty fossil, the latter from the Silurian rocks onward (S. P. Woodward.)

cý-pri-dæ, **cý-prîd'-î-dæ**, s. pl. [Mod. Lat. *cypridæ* (q. v.), genit. *cypridis*, and fem. pl. adj. suff. -idæ.]

1. **Zool.:** A family of Entomostracous Mollusks, order Ostracoda. They move the antennæ with great rapidity, thus converting them into swimming organs. They reside entirely within a bivalve shell, which, unlike the Conchiferous Mollusks, they cast annually. Type, *Cypris* (q. v.).

2. **Palæont.:** The family extends from the Carboniferous period till now, its maximum development seeming to be at the present time. Individuals belonging to single species abound in the freshwater limestone of Burdie House (Lower Carboniferous), in the insect limestone (Lias), in the Wealden strata, and in the marls of Auvergne, the last-named of Eocene age.

cý-pri-dî-næ, s. [Gr. *kypri-dios*=belonging to Aphrodite, and fem. sing. suff. -ina.]

1. **Zool.:** A genus of minute Entomostracous Crustaceans, the typical one of the family Cyprinidae (q. v.). Eyes two stalked; antennæ two pairs, both pediform, one pair always inclosed within the shell; a beak-like projection in front of the carapace; abdomen terminated by a lamellar plate, armed with strong claws and hooked spines. They have a distinct heart, though this is wanting in the allied *Cypris* and *Cythere*. They are exclusively marine.

2. **Palæont.:** It has existed from the Carboniferous period till now.

cý-pri-dîn'-î-dæ, **cý-pri-dîn'-æ-dæ**, s. plur. [Mod. Lat. *cypridinæ*(a), and fem. pl. adj. suff. -idæ.]

1. **Zool.:** A family of minute Entomostracous Crustaceans, order Ostracoda. Type *Cypridina* (q. v.). Other known genera, *Entomis* and *Entomoconchus*. The two last are extinct.

2. **Palæont.:** They range from the Silurian till now. [1.]

cý-pri-næ, s. [Gr. *Kypria*=a name of Aphrodite or Venus, from the island of Cyprus, whence her worship is said to have come, and where it flourished.]

Zool.: A genus of Conchiferous Mollusks, the typical one of the family Cyprinidae. The cardinal teeth are 2-2; the laterals 0-1, 1-0. *Cyprina Islandica* is a large bivalve, often seen on the shores after storms, especially in Scotland. It is a northern shell, though fossil in Sicily and Piedmont. It is the only recent species, but there are ninety fossil, ranging from the Muschelkalk onward till now.

cý-prîne (1), ***cý-prîn**, a. & s. [Gr. *kypros*=pertaining to Cyprus or to copper, and Eng. suff. -ine.]

A. As adj.: Of or pertaining to the cypress.

B. As substantive:

Min.: A variety of Idocrase. (Brit. Mus. Cat.) For the latter mineral Dana prefers the name Vesuvianite. Cyprine is of a pale sky-blue color, produced by a trace of copper. It is found in Norway. (Dana.)

cý-prîne (2), a. [CYPRINUS.] Of or pertaining to a fish of the genus Cyprinus.

cý-prîn'-î-dæ (1), s. pl. [Lat. *cyprin(us)* (q. v.), and fem. pl. adj. suff. -idæ.]

1. **Zool.:** A family of fishes, order Malacoptera, sub-order Abdominalia. The mouth, which is small, is formed by the intermaxillary bones, and is generally destitute of teeth. The Pharyngeans, on the contrary, have strong teeth. The branchiostegous rays are few, the scales generally large.

2. **Palæont.:** It is not known before the Tertiary period.

cý-prîn'-î-dæ (2), s. pl. [Mod. Lat. *Cyprin(a)* (q. v.), and fem. pl. adj. suff. -idæ.]

Zool.: A family of bivalve Mollusks, belonging to the class Conchifera, the section Siphonida, and that portion of it in which the pallial line is simple in place of being sinuated. They have regular equivalent oval or elongated shells, with solid close valves, an external conspicuous ligament with 1-3 cardinal teeth in each valve, and usually a posterior lateral tooth. The leading genera are *Cyprina*, *Circe*, *Astarte*, *Crassatella*, *Isocardia*, *Cypricardia*, *Opia*, *Cardinia*, and *Cardita*.

cý-prîn-ô-dôn'-tî-dæ, s. pl. [Gr. *kypri-nos*=a kind of carp, and *odontos*=a tooth.]

Ichthy.: A family of fishes, order Malacoptera, sub-order Abdominalia. As the name imports, in dentition they resemble the Cyprinidae (Carp), with which they are still sometimes associated, but the jaws are more retractile and toothed. Genera *Anableps*, &c.

cý-prî-nûs, s. [Lat. *cyprinus*; Gr. *kypri-nos*=a species of carp.]

Zool.: A genus of fishes, the typical one of the family Cyprinidae [CYPRINIDÆ (1)]. There is one

large dorsal fin, the mouth small and without teeth, the scales large, the branchiostegous rays three, the second rays of the dorsal and anal fins large, bony, and more or less serrated.

cýp-ri-ôt, s. [Gr. *Kyprios*=Cyprian.] A native or inhabitant of Cyprus.

cý-pri-péd'-ê-æ, s. pl. [Mod. Lat. *cyripedium* (q. v.), and fem. pl. adj. suff. -eæ.]

Bot.: A tribe of Orchids, type *Cyripedium*.

cý-pri-péd'-î-ûm, s. [Gr. *Kypria*=Aphrodite or Venus, and *pêd* to be from *podion*=dimin. of *pous*=a foot, used in the sense of a slipper; but more probably from *pedion*=a plain, &c.]

Bot.: Lady's Slipper. A genus of Orchids, tribe *Cyripedaceæ*. The lip is large and inflated, the column with a large terminal dilated lobe or stamen separating the two anthers; the two lateral sepals often combined. *Cyripedium calceolus*, the Common Lady's Slipper, is very beautiful. *C. guttatum* is prescribed in Siberia as a palliative in epilepsy, and *C. pubescens* in North America as a substitute for Valerian.

Cyripedium.

1. Column, back view. 2. Column, front view.

cý'-prîs, s. 1. Column, back view. 2. Column, front view.

[Lat. *Cypria*; Gr. *Kypria*=a name of Aphrodite, from the island of Cyprus, which was the earliest seat of her worship, and its chief metropolis.]

1. **Zool.:** A genus of minute Entomostracous Crustaceans, the typical one of the family Cyripidae (q. v.). The eye is single, the inferior antennæ with a tuft or pencil of long filaments arising from the last joint but one. There is a bivalve carapace which the animal can open or shut at will, and from which it can protrude its feet. The swimming apparatus consists of appendages at the tail. The Cyripides are minute in size. They may be seen in great numbers swimming swiftly in ditches, stagnant fresh-water pools, and similar places. Among these are *Cypris unifasciata*, *C. vidua*, &c.

2. **Palæont.:** The cast-off shells are so abundant in various fresh-water strata of different ages, that they impart to them a divisional structure like that so frequently produced by mica.

cý-prîte, s. [Gr. *kypros*=copper, and suff. -ite (Min.). (q. v.).]

Min.: The same as COPPER GLANCE or CHALCITE.

cý-prûs (1), s. & a. [Lat. *Cyprus*; Gr. *Kypros*.]

A. As substantive:

Geog.: An island in the Levant. There were anciently celebrated copper mines in it. It was the great seat of the worship of Aphrodite or Venus. Now it is under British rule, though still a part of the Turkish empire.

B. As adj.: Pertaining to the island described under A.

Cyprus bird, s. The Blackcap (*Currucula atricapilla*), said to be abundant in Cyprus.

Cyprus wine, s. A kind of winemad in Cyprus.

"The rich Cyprus wine, which is so much esteemed in all parts, is very dear."—Pococke: *Observations on Cyprus*, vol. ii., pl. i.

***cý-prûs** (2), *ci-pres, *cy-press, *sy-pres, s. [See def.] [CRAPE.] A stuff supposed to have been originally introduced from Cyprus, whence its name. It is difficult to say exactly what kind of fabric it was: probably, a sort of linen crape.

"Lawn as white as driven snow,

Cyprus black as e'er was crow."

Shakesp.: *Winter's Tale*, iv. 4.

***cyprus hat**, s. A hat with a crape hat-band on it.

***cyprus lawn**, s. The same as CYPRUS (2) (q. v.).

"And sable stole of Cyprus awn,

Over thy decent shoulders drawn."

Milton: *Il Penseroso*.

cýp-sêl'-æ, s. [Gr. *kypselê*=any hollow vessel.]

Bot.: A kind of fruit placed by Lindley under his class Syncarpi or Compound Fruit. It is one-seeded, one-celled, indehiscent, with the integuments of the seed not covering with the endocarp. In the ovarian state it evinces its compound nature

bôil, bôy; pôut, jôwl; cat, cell, chorus, ghin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shûn; -tîon, -gîon = zhûn. -tious, -cious, -sious = shûs. -ble, -dle, &c. = bəl, dəl.

by the presence of two or more stigmas, but at last it is unioocular, with only one ovule. It is generally called an achene, but as that term has been used in different senses, Lindley prefers cypselia. Example, the fruits of the Composite.

cyp-sel'-i-dæ, s. pl. [Lat. *cypsel(us)*, and fem. pl. adj. suff. *-idæ*.]

Ornith.: A family of birds, tribe Fissirostres. It consists of birds, the affinity of which, in general characters, to the Swallows all must recognize. They differ, however, in having all the four toes pointed forward, in having longer and narrower wings, in the structure of the trachea, &c. [Cypselus.]

cyp-sel'-ūs, s. [Lat. *cypsellus*, the spelling of which it will be observed has been altered in the modern genus; Gr. *kypselos*=the Sand-martin.]

Ornith.: A genus of Birds, the typical one of the family Cypselidæ (q. v.). *Cypselus apus* is the Common European Swift. It has a forked tail, is blackish-brown in color, with a grayish-white throat. It flies with amazing rapidity, and with a loud screaming voice; sometimes careering in small parties round steeples or other elevated objects. It is migratory, like the Swallows, going off earlier in the autumn than they. *C. pelagica* is the Common American Swift, or *Chimney Swallow*.

cyp-rē-næ, s. [From the nymph Cyrene.] [CYRENE.]

Zool.: A genus of Conchiferous Mollusks, family Cycladidæ. They have strong oval shells, with a thick epidermis, the hinge teeth 3-3, the laterals 1-1 in each valve. Those which have orbicular concentrically furrowed shells, with the lateral teeth elongated and striated across, belong to the section Corbicula. One hundred and thirty recent, and one hundred and five fossil, species are known, the latter from the Wealden upward. *Cyrena consobrina* is found recent from Egypt to China, and fossil in the Pliocene of England, Belgium, and Sicily.

cyp-rē-nā'-ic, a. [Gr. *kyrēnaikos*=pertaining to Cyrene.]

1. Of or pertaining to Cyrene, a Greek colony on the north coast of Africa, named after the nymph Cyrene.

2. Pertaining or relating to the Epicurean school of philosophers founded by Aristippus, a disciple of Socrates, at Cyrene.

cyp-rē-nē, s. [Lat. *Cyrene*; Gr. *kyrēnē*.]

1. **Class. Mythol.**: A nymph carried into Africa by Apollo. The city Cyrene in Africa was said to be called after her.

2. **Astron.**: An asteroid, the 133d found. It was discovered by Watson, on August 16, 1873.

cyp-rē-ni-an, s. [Gr. *kyrēnaios*.] A native or inhabitant of Cyrene.

"And they compel one Simon a Cyrenian . . . to bear his cross."—Mark xv. 21.

cyp-ril'-læ, s. [Named after Dominico Cyrillo, M. D., Professor of Botany at Naples.]

Bot.: A genus of plants, the typical one of the order Cyrtallacæ (q. v.).

cyp-ril-lā'-cē-æ, s. pl. [Mod. Latin *cyrill(a)* (q. v.), and fem. pl. adj. suff. *-acēæ*.]

Bot.: Cyrtallacæ. An order of Hypogynous Exogens, alliance Berberales. It consists of shrubs with evergreen simple exstipulate leaves, flowers usually in racemes, calyx four to five parted, petals five distinct, hypogynous, imbricated in aestivation; stamens five to ten, ovary two, three, or four-celled, fruit a succulent capsule or drupe, seeds inverted, with much albumen. It is native in this country. Lindley enumerated three genera, and estimated the known species at five.

cyp-ril-lads, s. pl. [Mod. Lat. *cyrill(a)*, and pl. adj. suff. *-ads*.]

Bot.: The name given by Lindley to the order Cyrtallacæ (q. v.).

cyp-ril'-læ, a. [Eng. *Cyril*; *-ic*.] A term applied to the alphabet used by all the Slavonic nations who belong to the Eastern Church. It was brought into use by Clement, first bishop of Bulgaria, a disciple of St. Cyril. It is a modification of the Glagolitic, with some signs adapted from the Greek. [GLAGOLITIC.]

***cyp-ril'-lōg'-ic**, a. [Gr. *kyriologikos*=speaking or describing literally; *kyrios*=chief, and *logos*=a word.] Pertaining or relating to capital letters.

cyp-rān'-dræ, s. [Gr. *kyrtos*=curved, arched, and *andr* (genit. *andros*)=a man, . . . (Bot.) a stamen.]

Bot.: A genus of plants, the typical one of the order Gesneraceæ, the tribe Cyrtandree, and the family Cyrtandridæ. It consists of a number of various shrubs or herbaceous plants with opposite leaves, tubular corollas, and from four to five stamens, only two of them fertile. They are natives of the Moluccas.

cyp-rān'-dræ'-cē-æ, s. pl. [Mod. Lat. *cyrtandr(a)*, and fem. pl. adj. suff. *-acēæ*.]

Bot.: An order of plants, alliance Bignoniaceæ. Lindley makes them only a tribe of Gesneriaceæ.

cyp-rān'-drē-æ, s. pl. [Mod. Lat. *cyrtandra*, and fem. pl. adj. suff. *-ææ*.]

Bot.: A tribe of plants, order Gesneriaceæ. They are herbaceous plants, sometimes stemless. They are not twiners, but are sometimes parasites. Calyx, corolla, and stamens as in Bignoniaceæ. Fruit a long, slender, two-celled pod, with many seeds. The tribe consists of beautiful flowers from the East Indies. The Cyrtandree differ from the Gesneriaceæ in having the seeds with no albumen and the fruit wholly free.

cyp-rān'-dri-dæ, s. pl. [Mod. Lat. *cyrtandr(a)*, and fem. pl. adj. suff. *-idææ*.]

Bot.: A family of plants belonging to the order Gesneriaceæ and the tribe Cyrtandree. The fruit is baccate.

cyp-rōc'-ēr-as, s. [Gr. *kyrtos*=curved, arched, and *keras*=a horn.]

Palæont.: A genus of Cephalopoda, family Orthoceratidæ. The shell is curved, the siphuncle small, internal or subcentral. Eighty-four species are known, from the Lower Silurian to the Carboniferous rocks. (Woodward: *Mollusca*, ed. Tate.)

cyp-rō-līte, s. [Gr. *kyrtos*=bent, and *lithos*=a stone.]

Min.: A brownish-red mineral with somewhat adamantine luster. Hardness, 5.5; specific gravity, 3.85-4.04. It has been considered to be altered Zircon. Found at Rockport in Massachusetts. (Dana.)

cyp-rō-stylē, s. [Gr. *kyrtos*=curved, arched, and *stylos*=a pillar, a column.]

Arch.: A circular projecting portico.

cyst, **cys'-tis**, s. [Gr. *kystis*=a bag, a pouch.]

1. **Path.**: A bag or sac containing some morbid matter.

" . . . the vomica is contained in a cyst or bag."—*Arbuthnot: On Diet*.

2. **Phys.**: A hollow organ with thin walls, as the urinary bladder.

3. **Antiq.**: A cist (q. v.).

4. **Botany**:

(1) A reproductive cell in certain fungi.

(2) The receptacle of essential oil in the rind of the orange, &c.

cyst'-ēd, adj. [Eng. *cyst*; *-ed*.] Contained or inclosed in a cyst.

***cys'-tērne**, s. [CISTERN.]

cys'-tic, ***cys'-tick**, a. [Eng. *cyst*; *-ic*.]

1. Contained or inclosed in a cyst.

2. **Spec.**: Pertaining to or contained in the urinary or gall bladders.

"The bile is of two sorts; the *cystic*, or that contained in the gall-bladder, a sort of repository for the gall; or the hepatic, or what flows immediately from the liver."—*Arbuthnot*.

3. **Cystose**.

4. Formed in or shaped like a cyst.

"The transition from the *cystic* to the tænioid Entozoa, . . ."—*Owen: Comparative Anatomy*, lect. vi.

cystic artery, s. A branch of the hepatic (q. v.).

cystic duct, s. The canal serving to conduct the bile from the hepatic duct to the gall-bladder.

cystic plexus, s.

Anat.: A plexus of the gall-bladder.

cystic oxide, s. [CYSTINE.]

cystic worms, s. pl.

Zool.: Worms which were formerly supposed to be mature species, but are now known to be only tapeworms in certain stages of development. Four such stages are recognized—(1) the ovum, or egg; (2) the proscœlex, or minute embryo liberated from the egg; the scolex, or half-developed animal encysted within a cavity in the tissues of the animal on which it is parasitic; (4) the strobila, or mature tapeworm. (Nicholson.) Cystic worms are thus tapeworms in the third of the above-mentioned stages of growth. A curious fact about them is, as a rule, that they do not inhabit the same animal during their early life that they will prey upon when they reach maturity. In their mature state they are called cestoid instead of cystic worms.

***cys'-ti-cæ**, s. pl. [Mod. Lat. from Class. Lat.; Gr. *kystis*=a bladder, and neut. pl. adj. suff. *-icæ*.] Cystic worms. What was once supposed to be an order of mature Intestinal Worms, but the species arranged under it are now known to be only immature forms of the tapeworms. [CYSTIC WORMS.]

***cys'-ti-cēr'-cūs** s. [Gr. *kystis*=a bladder, and *kerkos*=a tail.]

Zool.: "The wandered scolex of *Tænia solium* in its hydatid form." (Huxley.) An old genus of Intestinal Worms, order Tæniidæ (Tapeworms).

The genus is abolished because it was founded on the immature state of animals classified already in another part of the system. [CYSTIC WORMS.] *Cysticercus celluloseus* produces "measles" in the pig; *C. cerebralis* what are called the staggers in the sheep. A species, *C. celluloseus*, already mentioned, is the only one which at that stage infests the human subject, being occasionally found in the eye, the brain, the heart, and in the voluntary muscles.

cyst'-i-cle, s. [Eng. *cyst*, dimin. suff. *-icle*.] A little cyst.

cys-tid'-ē-æ, s. pl. [Gr. *kystis*=a bladder, *eidos*=form, and Lat. fem. pl. suff. *-ææ*.]

Zool.: The same as CYSTOIDEA (q. v.).

cys-tid'-ē-ans, s. pl. [Lat. *cystide(æ)* (q. v.), and Eng. pl. suff. *-ans*.]

Zool.: The English name of the Cystidea or the Cystoidea (q. v.).

"Lower Silurian Cystideans."—Murchison: *Siluria*, ch. viii.

cys-tid'-i-ūm (plur. *cystidia*), s. [Latinized dimin. of Gr. *kystis*=a bladder.]

Botany:

1. The name given by Link to what Gärtner, Lindley, and others call utricle.

2. (Pl. *cystidia*). The projecting cells accompanying the basidia or asci of fungi, and supposed to be the antherids or male organs of the plants.

cys-ti-form, a. [Gr. *kystis*=a bladder, and Lat. *forma*=form, shape.]

Zool.: Bladder-shaped.

† *Cystiform Helminthozoa*:

Zool.: The same as HYDATIS (q. v.).

cys'-tine, s. [Gr. *kystis*=a bladder, and suff. *-ine* (Chem.)(q. v.).]

Inorganic Chem.: Cystic oxide, $C_3H_7NSO_2$, or $CH_3(NH_2) \cdot CO \cdot CO(SH)$. Cystine occurs in a rare urinary calculus. It can be extracted by potash and precipitated by acetic acid. It crystallizes from a solution in hot potash in six-sided laminae.

cys-ti-phyll'-i-læ, s. pl. [Mod. Lat. *cystiphyllum*, and fem. pl. adj. suff. *-idææ*.]

Palæont.: A family of Rugosa (Rugose Corals). The corallum generally simple, the wall complete, the visceral chamber with small convex vesicles of tabulae and dissepiments, both combined; an operculum sometimes present. Range in time from the Silurian to the Devonian period.

cys-ti-phyll'-i-ūm, s. [Gr. *kystis*=a bladder, and *phyllon*=a leaf.]

Zool.: The typical genus of the family Cystiphyllidæ (q. v.).

cys-tir-rhœ'-æ, s. [Gr. *kystis*=a bladder, and *rhœo*=to flow.]

Med.: Catarrh of the bladder.

***cys'-tis**, s. [Mod. Lat. *cystis*, from Gr. *kystis*=a bladder.] The same as CYST (q. v.).

"In taking it out the cystis broke, . . ."—*Wiseman: Surgery*.

cys-ti'-tis, s. [Gr. *kystis*=the bladder, and suff. *-itis*=denoting inflammation.]

Med.: Inflammation of the bladder.

cys'-ti-tōme, s. [CYSTOTOME.]

cys'-tō-carp, ***cys'-tō-car'-pi-ūm**, s. [Gr. *kystis*=a bladder, and *karpos*=fruit.]

Bot. (of Algae): A spore-case with many spores. It exists in many Floridææ.

cys'-tō-cēle, s. [Gr. *kystis*=a bladder, and *kēlē*=(1) a tumor, (2) hernia.]

Med.: A hernia or rupture formed by the protrusion of the urinary bladder.

cys-tō-crī'-nī-dæ, s. pl. [Mod. Lat. *cystocrin(um)* (q. v.), and fem. pl. adj. suff. *-idææ*.]

Zool.: A family of Crinoidea. The body is round or oval, and formed of numerous calcareous plates. The Cystocrinidæ were attached by short stalks.

cys-tō-crī'-nūs, s. [Gr. *kystis*=a bladder, and *krinon*=a lily.]

Zool.: A genus of Crinoidea, the typical one of the family Cystocrinidæ (q. v.).

cys-tōi'-dē-æ, s. pl. [Gr. *kystis*=a bladder, and *eidos*=form.]

Palæont.: An order of extinct Echinoderms. They are spheroidal animals, pedunculate or sessile, inclosed by polygonal calcareous plates. They have a mouth above; the arms are rudimentary. Von Buch first elucidated their structure and affinities in an essay published at Berlin, in A. D. 1845, and gave them the name of Cystidæ in place of Sphæronites, which was their original appellation. Now Cystidæ has become Cystoidea. They range from the Upper Cambrian to the Silurian, being especially prominent in the Bala Limestone.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāl; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

cys-tō-lith'-ic, *a.* [Eng. *cystolith*; *-ic*.]

Med.: Relating to stone in the bladder.

cys-tō-liths, **cys-tō-lithes**, *s.* [Gr. *kystis*=a bladder, and *lithos*=a stone.]

Bot. & Chem.: The name given by Weddell to certain crystalline bodies clustered in the superficial cells of nettles and some other Urticaceæ.

cys-tōph-ēr-a, *s.* [Gr. *kystis*=a bladder, and *phora*, neut. pl. of *phoros*=bearing, carrying.]

Zool.: A genus of Phocidæ, having in the male a proboscis-like appendage to the nose. *C. proboscidea* is the Bottle-nosed Seal, or Sea Elephant. It inhabits the Arctic Ocean, while a similar species, *C. cristata*, the Hooded Seal, finds its home in the Antarctic seas.

cys-tōp-tēr-i-dē-a, *s. pl.* [Mod. Lat. *cystopter*(is), and fem. pl. adj. suff. *-idē-a*.]

Bot.: A sub-tribe of Ferns, tribe Polypodæ. The sori are globose, the indusium sub-acuminate, fixed by a sublateral basal point, the veins scarcely anastomosing. (Griffith & Henfrey.) [CYSTOPTERIS.]

cys-tōp-tēr-is, *s.* [Gr. *kystis*=a bladder, and *ptēris*=a kind of fern.]

Bot.: Bladder-fern. A genus of Ferns, the typical one of the sub-tribe Cystopteridæ (q. v.). *Cystopteris fragilis*, the Brittle Bladder-fern, is found occasionally on rocks and walls. *C. alpina*, the Lacinate Bladder-fern, and *C. montana*, the Mountain Bladder-fern, are rare.

Cystopteris Fragilis.

1. Pinnae. 2. Portion of Pinnae. 3. Spores of Involucre.

cys-tō-pūs, *s.* [Gr. *kystis*=a bladder, and *pous*=a foot (?).]

Botany:
1. A genus of Cœcomacei (Coniomycetous Fungi), one species of which, *Cystopus candidus*, produces the "white rust," so commonly seen on cabbages and other cruciferous plants. (Griffith & Henfrey.)
2. A genus of Orchids from Java.

cys-tō-scōp-ŷ, *s.* [Gr. *kystis*=a bladder, and *skopein*=to view.] Examination of the human bladder by the introduction of a special incandescent electric lamp.

cys-tō-se, *a.* [Gr. *kystis*=a bladder, and Eng. suff. *-ose*, from Lat. suff. *-osus*=full of.] Full of bladders, containing bladders, bladdery.

cys-tō-seir-a, *s.* [Gr. *kystis*=a bladder, and *seira*=a cord, rope, string, or band.]

Bot.: A genus of Fucaceæ, the typical one of the family Cystoseiridæ. It consists of much branched seaweeds, common on rocks, in tide-pools, or between tide-marks.

cys-tō-seir-i-dē-a, *s. pl.* [Mod. Lat. *cystoseir*(a) (q. v.), and fem. pl. adj. suff. *-idē-a*.]

Bot.: A tribe and family of Fucoid Algae, sub-order Fucæ. The conceptacles or receptacles are distinct from the frond.

cys-tō-tōme, *s.* [Gr. *kystis*=a cyst, and *tomē*=a cutting; *temnō*=to cut.]

Surg.: An instrument for cutting into a cyst, natural or morbid, such as opening the bladder for the extraction of urinary calculi, opening the capsule of the crystalline lens, &c.; a cystitome. (Knight.)

cys-tōt-ōm-ŷ, *s.* [CYSTOME.]

Surg.: The act or operation of opening encysted tumors, or cutting the bag in which any morbid matter is contained; the cutting into the bladder for the extraction of urinary calculi.

cys-tu-lā (pl. *cystulæ*), *s.* [Fem. dimin. of Mod. Lat. *cystis*; Gr. *kystis*=a bladder.]

Botany:

1. A round closed apothecium, filled with spores, adhering to filaments, arranged like rays around a common center in lichens. They are called also Cistellæ.

2. Pl. (*Cystulæ*): Little open cups, sessile on the upper surface of the fronds of Marchantia, and containing the organs of reproduction.

cŷ-thēr-ē, *s.* [Lat. *Cythere*; Gr. *Kytherē*=the island of Cythere (Cerigo), and Aphrodītē, who was connected with it.]

1. *Zool.*: A genus of Entomostraca, order Ostracoda, family Cytheridæ (q. v.). The eye is single, the inferior antennæ setigerous, but without a tuft or pencil of tiny filaments; three pairs of feet inclosed within the shell. No heart present.

2. *Palæont.*: The genus has existed from the Palæozoic period till now. From the Chalk alone Prof. T. Rupert Jones describes nine fossil species.

cŷth-ēr-ē-a, *s.* [From *Cytherea*, a name for Venus, so called because she is said to have sprung from the foam of the sea near Cythera, now Cerigo, an island on the S. E. of the Morea.]

Zool.: A genus of Conchiferous Mollusks belonging to the family Veneridæ. The shell is like that of the genus Venus. There are three cardinal teeth and an anterior one beneath the tunicle. The Cythereas are in all seas; 176 recent species are known, and 200 fossil, the latter ranging from the Oolite till now. (S. P. Woodward: *Mollusca*, ed. Tate.)

cŷ-thēr-i-dē-a, *s. pl.* [Lat. *Cyther*(e) (q. v.), and fem. pl. adj. suff. *-idē-a*.]

Zool.: A family of Entomostracous Crustaceans, of which Cythere is the type. The carapace is hard, calcareous, and generally uneven.

cŷt-i-nā-cē-a, *s. pl.* [Mod. Lat. *cytin*(us), and fem. pl. adj. suff. *-acē-a*.]

Bot.: An order belonging to the Cistis rapes, class Rhizogens. They are polygamous; the perianth tubular, four-lobed; the anthers sessile, on a central column, attached to the tube of the perianth; the ovary is inferior, one-celled, with many ovules, attached to the parietal placenta. The fruit is baccate, leathery, and divisible into eight many-seeded lobes. The order has the habit of Fungi, and yet possesses certain affinities to Bromeliaceæ and other endogenous plants. Griffith, however, believes the approximation to be to Exogens, of which he thinks the Cytinaceæ a reduced or degenerate form. Lindley in 1845 enumerated three genera and estimated the known species at seven. Habitat Europe and the Cape of Good Hope. They contain gallic acid, and have in consequence been used as astringents and styptics.

cŷt-i-nūs, *s.* [Lat. *cytinus*; Gr. *kytinus*=the calyx of the pomegranate.]

Bot.: A genus of Rhizogens, the typical one of the order Cytinaceæ (q. v.). It is parasitical upon Cistus in the south of Europe, whence an English name of the order Cistus rapes.

cŷt-is-ē-a, *s. pl.* [Lat. *cytis*(us), and fem. pl. adj. suff. *-ē-a*.]

Bot.: A section or family of the papilionaceous sub-tribe Genistææ.

cŷt-is-ine, *s.* [Lat. *cytis*(us); Eng. suff. *-ine* (Chem.).]

Chem.: $C_{20}H_{27}N_3O$. An alkaloid occurring in the ripe seeds of the Laburnum. *Cytisus laburnum*. It forms white crystals, which melt at 155°. It is soluble in water and in alcohol, but nearly insoluble in ether. It is a very strong base; the nitrate crystallizes out of alcohol in thick transparent prisms. Cytisine is very poisonous. Bromine water gives an orange-yellow precipitate in dilute solutions. Strong sulphuric acid dissolves cytisine, forming a colorless solution, which, on adding a fragment of potassium dichromate, turns yellow, then brown, and then green. (Watts: *Dict. Chem.*)

cŷt-is-ūs, *s.* [Lat. *cytissus*; Gr. *kytissos*=a shrubby kind of clover, *Medicago arborea*. The Lat. *cytissus* and the Greek word meant also the Laburnum.]

Bot.: A genus of papilionaceous plants, belonging to the sub-tribe Genistææ and the section or family Cytisææ. The species consist of trees and shrubs. *Cytisus laburnum* is the well-known and beautiful Laburnum of our gardens. [LABURNUM.] *C. purpureus* is an elegant shrub about a foot high from Carniola; and there is a beautiful hybrid called *C. purpurascens* between it and the Laburnum. The ordinary broom once called *C. scoparius* is now termed *Sarothamnus scoparius*. For the properties of the Laburnums, see LABURNUM. *C. weldenii*, a native of Dalmatia, is said to poison the milk of the goats which browse on its foliage. [BROOM, LABURNUM, SAROTHAMNUS.]

"There tamarisks with thick-leaved box are found;
And cytissus and garden-pines abound."—Congreve.

cŷt-ō-blāst, *s.* [Gr. *kytos*=a hollow in a vessel, jar, or urn, and *blastos*=a sprout, shoot, or sucker.]

Bot.: The name given by Schleiden to what is generally called the nucleus in the center of the bladders composing the cellular tissue in many plants.

cŷt-ō-blāst-tē-mā, *s.* [Gr. *kytos*=a vessel, a jar, an urn, and *blastēma*=increase, growth.]

1. *Zool.* (that of animals): The same as BLASTEMA (q. v.).

2. *Bot.* (that of plants): The same as PROTOPLASM. (Griffith & Henfrey.)

cŷt-ō-gēn-ē-sis, *s.* [Gr. *kytos*=a vessel, a jar, an urn, and *genesis*=origin.]

Bot.: The origin and development of cellular tissue in a plant.

cŷt-ō-gē-nēt'-ic, *a.* [Gr. *kytos*=a vessel, and *genētes* (as. adj.)=belonging to one's birth.]

Physiol.: Pertaining or relating to cell formation.

cŷt-ō-g-ēn-ōūs, *a.* [Gr. *kytos*=a hollow, a vessel, and *gennao*=to engender, to produce.]

Anat.: For definition see the compound.

cytogenous tissue, *s.*

Anat.: The name given by Kolliker to what is otherwise called retiform or reticular connective tissue. (Quain.)

cŷt-ō-g-ēn-ŷ, *s.* [Gr. *kytos*=a vessel, a jar, an urn, and *gennao*=to engender, to produce.] The same as CYTOGENESIS (q. v.).

cŷt-tār-i-a, *s.* [Gr. *kyttarion*, dimin. from *kyttaros*=(1) any cavity, (2) the cell of a honeycomb, (3) any cell.]

Bot.: A genus of Fungals, order Ascomycetes. They are parasitical upon beeches in South America. *Cyttaria Darwinii* forms a great part of the food used by the natives of Tierra del Fuego during some months of the year.

***cyttēnere**, *s.* [CITT.] A citizen.

"Hic civis, a cyttēnere?"—Wright: *Vol. of Vocab.*, p. 211.

***cytyr**, *s.* [Lat. *citrus*.] A citron.

"Cytyr-tree. Citrus."—Prompt. Parv.

***cyule**, ***ciule**, *s.* [Cf. Wel. *cenbal*=a ferryboat.] A sort of boat. (Davies.)

"Who being embarked in forty cyules or pinnaces."—Holland: *Camden*, p. 128.

Czar, *s.* [Russ. *tsare*=a king.] A king; the title of the Emperor of Russia. It was first assumed by Ivan II. in 1579.

"... or where the Russian Czar
In Moscow, or the Sultan in Biazance."
Milton: *P. L.*, xi., 894, 895.

† A few years ago it was stated that the Emperor of Russia had requested the foreign newspapers not to continue to use the term Czar, but it appears to be employed in Russia itself.

"Most gracious Czar—Thou hast summoned us to the fight."—Address of the Moscow Burgomaster; *Times*.

Czar-ŷv'-nā, *s.* [Russ. *tsarevna*.] The title of the wife of the Czarowitz.

Czar-i'-nā, *s.* [In Russ. *tsaritsa*.] The wife of the Emperor of Russia.

"... the Czarina was satisfied with introducing them."—Goldsmith: *Essays*, vii.

czar-in-i-an, *a.* [Eng. *czar*, *czarina*; *-ian*.] Of or pertaining to the Czar or Czarina of Russia.

***czar-ish**, *a.* [Eng. *czar*; *-ish*.] Pertaining to the Czar of Russia.

"His czarish majesty dispatched an express."—Tatler, No. 55.

Czar-ō-witz, **Czar-e-vitch**, **Czar-e-witch**, *s.* [Russ. *tsarevitch*.] The title of the eldest son of the Emperor of Russia.

THE fourth letter and the third consonant in the English alphabet. It represents a dental sound formed by placing the tip of the tongue against the roots of the upper teeth, and then passing up vocalized breath into the mouth. It is always sounded in English words, though frequently slurred over in rapid speech in such words as *handkerchief*. After a non-vocal or surd consonant it takes a sharper sound, nearly approaching that of *t*, especially in the past tenses and past participles of verbs in *-ed*. D sometimes represents an older *t*, as in *card*=Fr. *carte*, Lat. *charta*; *proud*=O. Eng. *pruð*. Sometimes the older *d* has become *t* as in *abbot*=O. Eng. *abbad*, *abbod*; *partridge*=O. Fr. & Lat. *perdrix*. Again it sometimes is represented by *th*, as *hither*=O. Eng. *hider*. It has been lost from some words, as *gospel*=O. Eng. *godspel*; *gossip*=O. Eng. *god-sib*. On the other hand, for phonetic reasons it has been intercalated in many words, as *thunder*=O. Eng. *thunor*; *sound*=O. Eng. *soun*, Lat. *sonus*; *gender*=Fr. *genre* Lat. *genus*; *jaundice*=Fr. *jauvisse*, &c.

D. As an initial is used:

1. In Chronology:

(1) For *Domini*, genit. sing. of Lat. *Dominus*=Lord, as A. D.=*Anno Domini*=in the year of our Lord.

(2) For *did*.

2. In Music: As an abbreviation for *Discantus*, *Dessus*, *Destra*, &c.

bōl, bōy; pōut, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, thīs; sin, aș; expect, Xenophon, exist. ph=f. -cian, -tian=shan. -tion, -sion=shūn; -tīon, -sīon=zhūn. -tious, -cious, -sious=shūs. -ble, -dle, &c.=bēl, dēl.

3. In *University degrees*, &c.: For Doctor, as M. D. = Doctor of Medicine; D. C. L. = Doctor of Civil Law; D. D. = Doctor of Divinity; D. Sc. = Doctor of Science, &c.

4. In *English Titles*: For Duke.

D. As a symbol is used:

1. In *Numer.*: For 500. Thus DC = 600; DL = 550. When a dash or stroke is written over the letter its value is increased tenfold, i. e., to 5,000.

2. In *Chem.*: For the element Didymium.

3. In *Music*:

(1) For the first note of the Phrygian, afterward called the Dorian, mode.

(2) For the second note of the normal scale of C, corresponding to the Italian *re*.

(3) For the major scale having two sharps and for the minor scale having one flat in its signature.

(4) For a string tuned to D, e. g., the third string of the violin, the second of the viola and violoncello.

(5) For a clef in old mensurable music, *D excellens*. (Stainer & Barrett.)

(6) *d* is used for *duk* in the tonic sol-fa system.

(7) In *Biblical Criticism*: For the Beza manuscript of the Greek New Testament.

5. In *Comm.*: For English penny or pence, as £ s. d. = pounds, shillings, and pence.

da, prep. [Ital.] From, according to, as befits. *Music*:

(1) *Da capo*: From the beginning. An expression signifying that the performer must recommence the piece, and conclude at the double bar marked *Fine*.

(2) *Da capo al fine*: From the beginning to the sign *Fine*.

(3) *Da capo al segno*: From the beginning to the sign (*♯*).

dāb, dāub, v. t. & i. [Cognate with O. Dut. *dappen* = to pinch, to knead, to dabble; Ger. *tappen* = to grope, to fumble. It is a doublet of *tap* (q. v.). (Skeat.)]

A. Transitive:

1. Ordinary Language:

*1. To strike gently, to tap, to prick.

"St. Paul himself confesseth that for a medicine preservative against pride there was given to him . . . the prick of the flesh to *dab* him in the neck."—*Sir T. More*.

2. To rub or pat gently.

"A sore should never be wiped by drawing a piece of tow or rag over it, but only by *dabbing* it with fine lint."—*Sharp*.

3. To daub, to besmear.

4. To daub, to rub on or apply so as to smear.

II. Building: To perform the process of dabbing (q. v.).

B. Intransitive:

1. To prick, to tap.

"The thorn that *dabs* I'll cut it down."

Jamieson: *Popular Ball.*, i. 87

2. To peck, as birds.

"Weel *daubit*, Robin! there's some mair,
Beath groats and barley, dinna spare!"

Rev. J. Nicol: *Poems*, i. 43.

*3. To fall with a noise, to patter down.
"Encomioid in my clothes that *dabbing* down from me
diā droppe."—*Phaer*: *Virgil's Æneid*, bk. vi.

4. To fish in a particular manner. (See example.)

"And this way of fishing we call *daping*, *dabbing*, or *dibbing*, wherein you are always to have your line flying before you—up, or down the river, as the wind serves—and to angle as near as you can to the bank of the same side whereon you stand."—*Walton*: *Angler*, pt. ii., ch. v.

¶ To *dab* *nebs*: To kiss.

"*Dab* *nebs* with her now and then."—*Coal-man's Courtship* to the *Creel-wife's Daughter*, p. 6.

dāb (1), *dabbe, s. [DAB, v.]

I. Ordinary Language:

1. A stroke, a blow.

"Philot him gof anothir *dabbe*."

Alisaander, 2,306.

*2. A peck or stroke from a bird's beak.

*3. A smart push with a broken sword or pointless weapon.

"As he was recovering himself, I gave him a *dab* in the mouth with my broken sword, which very much hurt him . . ."

—*Memoirs of Capt. Creighton*, p. 82.

4. A blow with any moist or soft substance

5. Anything moist or slimy.

*6. A trifle, a little bit.

"Some dirty *dab* of a negotiation."—*Walpole*: *To Mann*, ii. 63.

7. A pinafore.

II. Technically:

1. *Die-sinking*: An impression in type-metal of a die in course of sinking.

2. *Ichthy.*: A name commonly applied to any species of fish belonging to the genus *Pleuronectes* (q. v.). Specially applied to *Pleuronectes limanda*, a small flat fish common on sandy coasts.

dāb (2), s. & a. [Prob. a corruption of adept (q. v.).]

A. As subst.: An adept, a skillful person, an expert. (Colloquial.)

" . . . a third is a *dab* at an index."—*Goldsmith*: *The Bee*, No. 1.

B. As adj.: Expert, adept, skillful, clever.

dābbed, daubed, pa. par. or a. [DAB, v.]

dāb-bēr, daub-er, s. [Eng. dab; -er.]

*1. Ord. Lang.: One who dabs.

II. Technically:

1. *Printing*: The original inking-apparatus for a form of type. It consisted of a ball of cloth or skin stuffed with an elastic material. Two of them were used, one in each hand. One of them being dabbed upon the inking-table to gather a quantity of ink, the balls were then rubbed together so as to spread it uniformly. This was done while the pull was being made, and when the bed was withdrawn from below the platen, and the printed sheet removed, the assistant, working actively with both hands, inked the surface of the form. Another form of dabber is a roll of cloth, the end of which is used for inking an engraved copperplate.

2. *Engraving*: A silk or leather ball, stuffed with wool, used in the first process of engraving, for spreading the ground upon the hot plates.

dāb-bīng, daub-īng, pr. par., a. & s. [DAB, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. Ord. Lang.: The act of striking, pecking, or smearing.

2. *Building*: Working the face of a stone after it has been broached and draughted with a pick-shaped tool, or the patent axe, so as to form a series of minute holes. (Gwilt.)

3. *Stereotyping*: In the paper process, the insinuation of the damp paper into the interstices of the letters by dabbing the back of the paper with a hair brush. The term has also been applied to the cliché process, in which the form is dabbed down into a shallow cistern of type-metal which is just setting.

dabbing-machine, s.

Type-founding: The machine employed in casting large metal type.

dāb'-ble, v. t. & i. [A freq. form of *dab* (q. v.). Cognate with Dut. *dabbelen*.]

A. Trans.: To smear or daub over, to bespatter, to besprinkle.

"I scarified and *dabbled* the wound with oil of turpentine."—*Wise*: *Surgery*.

B. Intransitive:

1. *Lit.*: To play or splash about in water or mud.

"We twa ha' *dabbled* i' the burn."—*Auld Lang Syne*.

"Where the duck *dabbles* 'mid the rustling sedge."—*Wordsworth*: *Evening Walk*.

2. *Fig.*: To do or practice anything in a superficial or amateur-like manner; to take up any pursuit or subject superficially or slightly; to dip into anything without following it up thoroughly; to trifle.

" . . . written by the painter himself, who, we have seen, *dabbled* in poetry too."—*Walpole*: *Anecdotes of Painting*, vol. i., ch. vii.

dāb'-blēr, s. [Eng. *dabbl(e)*; -er.]

Dā-gō, s. [Derivation doubtful; said to be a corruption of the Spanish name *Diego*.] A term of opprobrium applied in the United States to low-class Italians, Sicilians and Portuguese. The term is said to have originated in Louisiana, and at first to have been limited in its application to persons of Spanish descent.

Dago-dive, s. A low grocery or resort, conducted by a Dago.

da-gō-ba, *deh-gop, s. [Pali.] The eastern topos, or tumuli, mostly contained relics, the worship of these objects being one of the principal characteristics of Buddhism. These were termed *dagobas*, of which the word *pagoda* appears to be a corruption. In a Buddhist temple, the *dagoba* is a structure which occupies the place of an altar in a Christian church. It consists of a low circular basement or drum surmounted by a hemispherical or elliptical dome, that supports a square block covered by a roof called a tee. [TOPE.]

Dā-gōn (1), s. [Heb. *dagōn*; Sept. *Dagōn*.] A national god of the Philistines worshipped at Gaza (Judges xvi. 21-30), Ashdod (1 Sam. v. 5, 7, and 1 Chron. x. 10), and elsewhere. The word has by some been derived from *dagān*=corn, but the general opinion is that it comes from *dag*=a fish, and that *Dagon* was the fish-god. On at the end of the word may be a diminutive designed as a term of endearment; or, as Gesenius thinks, it may be an augmentative meaning a large fish. Probably he had the head and hands of a man with the body and tail of a fish. The temple of *Dagon* at Ashdod continued beyond the period of the Old Testament, but it was destroyed by Judas Macabæus about the year B. C. 148.

"Dagon his name, sea-monster, upward man
And downward fish; yet had his temple high."
Milton: P. L., l. 462, 463.

***dag-on (2), s.** [A dimin. from *dag* (2), s. (q. v.).] A little slip or piece, a strip.

"Gift us . . . a dagon of your blanket, leave dame."
Chaucer: Parson's Tale, p. 296.

***Dā-gōn-al, s.** [Eng. *Dagon* (1), s.; -al.] A feast or orgie in honor of *Dagon*.

"A banquet worse than Job's children, or the *Dagonals* of the Philistines."—Adams: Works, i. 160.

Da-guēr-rei-an, a. [From the proper name *Daguerre*, and Eng. adj. suff. -ian.] Relating to *Daguerre*, or his process of photography. [DAGUERRETYPE.]

da-guēr-rē-ō-type, s. [Named after M. *Daguerre*, of Paris, the inventor of the process, and Gr. *typos*=a blow, a stamp, a model.]

Photography:

1. The photographic process invented by *Daguerre* during the years 1824-39, resulting in the use of the camera for the exposure of a silver or silvered plate, sensitized by exposure to fumes of iodine in a dark chamber. The latent image was developed by fumes of mercury and fixed by hyposulphite of soda. In 1829, *Daguerre* was joined in his experiments by *Niepcé*, who had been experimenting for fifteen years with an allied process in which a plate coated with asphaltum was exposed in a camera, the image developed by dissolving away the unalloyed portions by oil of lavender. The French government granted a pension of 6,000 francs (\$1,200) to *Daguerre*, one-half of which was to revert to his widow; and 4,000 francs (\$800) to *Niepcé's* son, also with reversion of one-half to his widow. *Niepcé* died in 1823, and *Daguerre* in 1851. [PHOTOGRAPHY.]

2. A photographic picture produced by the process described in 1.

daguerreotype etching. A mode of etching by means of the influence of light on a prepared plate. The plate becomes exposed where the dark lines of the image fall, and the plate is corroded at those places by a subsequent operation.

daguerreotype process. The process of photography on the method introduced by *Daguerre*.

Dahl-grēn, s. [A proper name.] [DAHLGREN GUN.]

Dahlgren gun, s. [Named from the late Rear-Admiral John A. Dahlgren, of the United States Navy.] A gun in which the front portion is materially lightened and the metal transferred to the rear, giving the "bullet-shape," which caused some surprise on its first appearance in Europe. Colonel Bormford, Chief of Ordnance of the United States army, commenced making this experiment previous to the war of 1812, and gave the name of "Columbiad" to the piece. [COLUMBIAD.]

Section of Dahlgren Gun.

dahl-i-a, s. [So called after Andrew Dahl, a Swedish botanist, and a pupil of Linneus, by whom this beautiful garden plant was first brought into cultivation.]

1. *Bot.*: A genus of Composite plants, tribe Asteroidæ, sub-tribe Eclipteæ. The receptacle is chaffy, the pappus none, involucre double, the outer one multifoliate, the inner one with a leaf divided into eight segments. Two species are cultivated in gardens, *Dahlia superflua*, which has the outer involucre reflexed, and *D. frutescens*, in which it is spreading. *D. variabilis* is a cross between the two. Both are from Mexico. A species named *D. imperialis*, the Tree Dahlia, has of recent years been imported from Mexico. It attains a height of twelve to fourteen feet. The genus was first carried over into Spain about 1787. A beautiful carmine is obtained from the corolla of the dahlia.

2. *Chem.*: The tubers of *Dahlia pinnata* contain 10 per cent of inuline; also citric and malic acids, chiefly as calcium salts, a fixed oil and a volatile oil which quickly resinizes when exposed to the air.

däl-mät-ic, ***däl-mat-yk**, *s.* [From Lat. *Dalmatica* (vestis)=the Dalmatian dress, it having been originally worn in Dalmatia as a royal robe.]

Eccles.: An ecclesiastical vestment formerly worn by the Roman pontiffs when celebrating mass, the use of which was afterward conceded, as an especial favor, to certain prelates of the church. For many centuries, however, every bishop has been entitled to assume this, with his other vestments, when celebrating mass. It is not worn by priests. St. Sylvester conceded to the deacons at Rome the use of the dalmatic in particular solemnities, a privilege which was extended to other churches by succeeding popes. It is now universally worn, in the Latin and Greek churches, by deacons when ministering at High Mass. It is a long robe, open on each side, and differs from the chasuble in having a species of short sleeve. It was formerly white, but is now made in all five colors which the Roman Church employs. It succeeded the ancient Roman Colobium, which it closely imitates, whence it has been confounded with that vestment. It was sometimes embroidered with opifreys round the bottom of the robe and on the edges of the sleeves, and with pearls and jewels. (*Staunton*, &c.)

däl-tö-nÿ-an, *s.* [From the proper name *Dalton*, and Eng. adj. suff. *-ian*.] One suffering from daltonism (q. v.).

däl-tön-ism, *s.* [From the proper name *Dalton*, and Eng. suff. *-ism*.] Color-blindness (q. v.).

[Daltonism, or inability to distinguish between different colors, especially between green and red, is so called from John Dalton, the celebrated physicist and founder of the atomic theory of chemistry. In a paper which he read before the Manchester Literary and Philosophical Society, in October, 1794, he gives the earliest account of that ocular peculiarity known as dyschromatopsis, chromatopseudopsis, daltonism, parachromatism, all=color-blindness, and sums up its characteristics as observed in himself and others. When a boy, being present at a review of troops, and hearing those around him expatiating on the brilliant effect of a military costume, he asked in what the color of a soldier's coat differed from that of the grass on which he trod, and the derisive laugh of his companions first made him aware of the defectiveness of his eyesight. He stated in the paper above referred to "that part of the image which others call red appears to me little more than a shade or defect of light; after that the orange, yellow, and green seem one color, which descends pretty uniformly from an intense to a rare yellow, making what I should call different shades of yellow." The subject is fully treated in Dr. G. Wilson's *Researches on Color-Blindness* (1855).]

***dām-as-çēne**, *v. t.* [DAMASCENE, *a.*] To damask, to damascen.

Dā-mās'-cūs, *s.* [See def.] A celebrated city of Syria, often mentioned in the Holy Scriptures. It is a city of the greatest antiquity, having existed in the time of Abraham; and it is even asserted by some ancient writers that this patriarch reigned there. It is still one of the most distinguished cities in Syria, and is beautifully situated in a fertile plain of the same name, bounded on the north and west by the mountains of Anti-Libanus. It is distant northeast from Jerusalem about 140 miles.

Damascus-blade, *s.* A sword originally manufactured chiefly at Damascus. The surface was variegated with white, silvery, or black streaks or veins. The swords of Damascus were celebrated for the excellence of the quality of their steel. [DAMASK, *s.*, 2.]

Damascus-iron, *s.* Damascus-iron is produced by the following method: Unite by welding twenty-five bars of iron and mild steel alternately, each about 2 feet long, 2 inches wide, and $\frac{1}{4}$ inch thick, and having drawn the *fagot* into a bar $\frac{3}{4}$ inch square, cut it into lengths of 5 or 6 feet. One of these pieces is heated to redness, and one end is held firmly in a vice, while the other is twisted by a wrench or tongs, which shortens the rod to half its length and makes it cylindrical. If two of these twisted pieces are to be welded together, they are turned in diverse directions, one to the right and the other to the left; these are laid parallel to each other, welded and flattened. If three rods be used, the outside ones turn in a direction the opposite of the middle one, and this produces the handsomest figure. By these operations the alternations of iron and steel change places at each half-revolution of the square rod, composed of twenty-five laminæ, the external layers winding round the interior ones; thus forming, when flattened into a ribbon, irregular concentric ovals or circles. The fineness of the Damascus depends upon the number and thickness of the alternations.

Damascus-steel, *s.* A kind of steel brought from the Levant, greatly esteemed for the manufacture of cutting instruments. (*Weale*.) [DAMASK-STEEL.]

Damascus-twist, *s.* A kind of gun-barrel made of a ribbon of Damascus-iron coiled around a mandrel and welded. (*Knight*.)

dām'-ask, *s. & a.* [From *Damascus*, where it was originally manufactured.]

A. *As substantive*:

1. *Literally*:

1. *Fabric*:

(1) A rich silk stuff originally made at Damascus, and thence deriving its name. It had raised figures in various patterns, and flowers in their natural colors embossed upon a white or colored ground. The work was probably of the nature of embroidery in the first place, but the figures were afterward exhibited on the surface by a peculiar arrangement of the loom, which brought up certain of the colors and depressed others, according to the requirements of the pattern.

(2) A woven fabric of linen, extensively used for table-cloths, fine toweling, napkins, etc. By a particular management of the warp-threads in the loom, figures, fruits, and flowers are exhibited on the surface, as in the ancient damask. It is known

as *washing damask*, or, when unbleached, as *brown damask*. A small-patterned toweling, known as *diaper*, has a figure produced in the same manner.

"He looked at the table-cloth, and praised the figure of the damask ..."—*Goldsmith: The Bee*, No. II.: *On the Use of Language*.

(3) Stuff with a wary or watered appearance. [MOIRE.]

2. *Metallurgy*: A wavy pattern shown in articles forged from a combined iron and steel blank. The two metals are mechanically associated, and the bar is then twisted, d-cubed, welded, or otherwise treated, so as to convolve the fibers of the respective metals. When the forging and grinding (and tempering, if a sword) are completed, the article is dipped in acidulated water, which corrodes the steel and does not affect the iron. The steel waves thus appear black, and the iron remains white. The damask is produced by the unequal tendency to oxidation of the two metals.

*II. *Fig.*: Used for a red color, as that of the damask-rose.

"And for some deale perplexed was her spirit,
Her damask late, now chang'd to purest white."
Fairfax.

B. *As adjective*:

1. Of or pertaining to Damascus.

2. Of a red color, rosy.

"But let concealment, like a worm i' the bud,
Feed on her damask cheek."
Shakesp.: Twelfth Night, ii. 4.

*3. Variegated, diversified with flowers.

"The damask meadows, and the crawling streamers,
Sweeten, and make soft thy dreams."
Corbet: The Country Life.

damask-carpet, *s.* Also known as a damask Venetian. A variety of carpet resembling the Kidderminster in the mode of weaving, but exposing the warp instead of the weft.

damask-loom, *s.* A loom for weaving figured fabrics. [JACQUARD.]

damask-plum, *s.*

Bot.: The Damson (q. v.).

damask-rose, *s.*

1. *Bot.*: A red variety of rose, *Rosa damascena*, originally brought from Damascus.

"Damask-roses have not been known in England above one hundred years, and now are so common."—*Bacon*.

2. *Pharm.*: As *Aqua rosæ*, ten pounds of the fresh petals to two gallons of water, and distill. Rose water is only given as an agreeable medium for medicines, and in coloring lotions.

damask-steel, *s.* The steel of Damascus originally; the process traveled into Khorassan and Persia, where it prospered long, but decayed as the hordes swept over the country. It is a laminated metal of pure iron and steel, of peculiar quality, produced by careful heating, laborious forging, doubling, and twisting. [DAMASCUS-IRON.]

damask-stitch, *s.*

Needlework: A name given to Satin-stitch when worked upon a linen foundation. [SATIN-STITCH.]

damask-violet, *s.* *Hesperis matronales*. It is called also *Dame's-violet* (q. v.).

damask-work, *s.* The art or process of inlaying one metal upon another in the manner described under A. 1. 2.

dām'-ask, *v. t.* [DAMASK, *s.*]

1. *Literally*:

1. To ornament steel-work with figures, streaks, or stripes.

"The cushions, which his brawny thighs infold,
Are mingled metal, damask'd o'er with gold."
Dryden: Virgil's Æneid, xi. 735, 736.

2. To imprint the figures of flowers upon.

*II. *Figuratively*:

1. To paint or color, to stain.

"The last reason of such their going naked sometimes was out of an opinion that no clothing so adorned them as their painting and damasking of their bodies."—*Speed: Ancient Brittaines*, bk. v., ch. vii., § 7.

2. To variegate, to diversify.

"Around him dance the rosy hours,
And damasking the ground with flow'rs."
Fenton.

¶ To damask wine: To warm it a little. (*Kersey*.)

dām'-asked, *pa. par.* or *a.* [DAMASK, *v.*]

A. *As pa. par.*: (See the verb.)

B. *As adjective*:

I. *Ordinary Language*:

1. *Lit.*: Variegated or ornamented with figures like watering.

2. *Fig.*: Variegated, diversified.

"... the damask'd meads
Unforc'd, display ten thousand painted flowers."
J. Phillips: Cider, ii.

II. *Her.*: An epithet applied to a field or charge when it is covered over with small squares fretted all over. Also called *diapered* (q. v.).

dām-as-kēen, dām-as-kēn, v. t. [Fr. *damasquiner*.] To ornament one metal by another by inlaying or incrustation: as, for instance, a sword-blade of steel by figures of gold. The metal to be ornamented is carved or etched, and the hollows or lines filled in with the gold or silver, and united by hammering or by solder. It was practiced as early as 617 B. C. by Glaucus of Chios. This mode of decoration of metal is principally applied to the ornamentation of swords and other weapons, and has three forms among the Persians, where the art is principally practiced: (a) The design is drawn by a brush, engraved, wires laid in so as to project, and fastened at points by golden nails. The surface of the gold inlay is then engraved. (b) The engraved blade is filled even to the surface with gold, which is pressed in and polished by a burnisher of nephrite. (c) The design consists of a great number of minute holes, which are filled with gold-wire burnished in.

dām-as-kēened', pa. par. or a. [DAMASKEEN.]

***dām-as-kēen-ēr-y, s.** [Eng. *damaskeen*; -ery.] The art of damaskeening; steel-work damaskeened.

dām-as-kēen-līng, pr. par., a. & s. [DAMASKEEN.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The art or process of ornamenting one metal by another, by inlaying or incrustation. It is used principally in enriching the blades of swords, the locks of pistols, &c.

***dām-as-kīn, s.** [Lat. *Damascenus*=of or pertaining to Damascus.] A Damascus-blade.

"No old Toledo blades, or damaskins;

No pistols, or some rare spring carabines."

Howell's Lett.: Poem to K. Ch. I., 1641.

dām-ask-līng, pr. par., a. & s. [DAMASK, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The art or process of damaskeening.

dām-a-sō-ni-ūm, s. [Mod. Lat., from Class. Lat. *damasoneon*; Greek *damasonion*=the plant described in the definition.]

Bot.: A genus of Alismaceæ, founded for the reception of the common Star-fruit, of which the more common scientific name is *Actinocarpus damasonium*. [ACTINOCARPUS, STAR-FRUIT.]

dā-mās'se, s. [Fr.]

Fabric: A Flanders linen woven with flowers and figures, and resembling damask.

dām'-as-sin, s. [Lat. *damascenus*.]

Fabric: A silk damask containing gold or silver flowers in the fabric.

***dām-bōard, *dām-brōd, s.** [Eng. *dam*, and *board*.] A chess or draught-board.

dambrod pattern, s. A large check pattern.

***dām-bōard-ēd, *dām-bōrd-ēd, a.** [Eng. *dambord*; -ed.] Having square divisions, checkered, diced.

dām-bōn-lte, s. [From the native name; Eng. suff. -ite.]

Chem.: $C_6H_{10}(CH_2)_2O_6$. A saccharine substance extracted by alcohol from a variety of caoutchouc exported from Gaboon on the west coast of Africa. It crystallizes in white needles, melts at 190°, and sublimes at about 200°. By acting upon it with hydriodic acid it yields dambose and methyl iodide. It is readily soluble in water.

dām-bōse, s. [From the native name; Eng. suff. -ose. (Chem.)]

Chem.: Obtained by the action of hydriodic acid on dambonite. Dambrose, $C_6H_{12}O_6$, is a crystalline sugar. It forms six-sided thick anhydrous prisms, which melt at 212°. It is soluble in water, and insoluble in absolute alcohol.

dāme, s. [Fr. *dame*; Sp., Port. & Ital. *dama*; from Lat. *domina*, fem. of *dominus*=a lord.]

1. A lady, a title of honor or respect to women (now specially applied to the widow of a knight or baronet).

"How would the sons of Troy, in arms renown'd,
And Troy's proud dames, whose garments sweep the ground."
Pope: *Homer's Iliad*, vi. 562, 563.

2. A mistress.

"Bothe beon obedient to hore dame."—*Ancren Riwle*, p. 424.

3. A woman in general, especially one advanced in years.

4. A mistress of an elementary school.

"He . . . received his first regular instruction at a dame's school."—D. O. Gregory.

*5. A mother, a dam.

"As eny kyde or calf folwing his dame."

Chaucer: C. T., 3, 259.

dame's violet, s.

Bot.: The common name of *Hesperis matronalis*, a perennial flower belonging to the order Cruciferae. The flowers are pale-purple and sweet-scented, especially in the evening. Prior suggests that the name is a mistaken translation of the French name, *Violette de damas*=the Violet of Damascus, misunderstood for *Violette des dames*.

dame-wort, s.

Bot.: The same as DAME'S VIOLET (q. v.).

dā-mēr, s. [Fr. *damer*=to ram (?).] A long needle, with a considerably elongated eye, somewhat like the long eye in a bodkin, intended to receive the coarse, loosely-twisted strands of darning yarn, either of wool or cotton.

Dā-mī-ān, Dā-mī-ēn, s. [Name of a mediæval saint.]

† *Hermits of St. Damian or Damien:*

Ch. Hist.: A name given to the Celestines (q. v.). The French called them Damianes.

dām-l-ān-a, s. A drug much used in this country in cases of sexual atony. It was first introduced to the medical faculty in 1875 by a number of articles by Dr. Caldwell in the *Virginia Medical Monthly*. Dose of the fluid extract 1 to 3 teaspoonfuls.

Dā-mī-ān-lsta, s. pl. [From the name of their founder, and Eng. suff. -ist.]

Eccles.: A religious sect, disciples of Damian, Bishop of Alexandria, in the sixth century. They disowned any distinction of persons in the Godhead, and professed one single nature incapable of any change, yet they called God the Father, Son, and Holy Ghost.

dām-mar, dam-mā-rā, s. [Javan and Malay *dāmār*.]

1. **Bot.:** A genus of trees belonging to the Coniferae. Six species are known, widely distributed throughout the Malayan and other islands of the southern tropic; one extending to New Zealand. *Dammara australis*, is also called the Kauri or Cowrie Pine (q. v.). *D. orientalis*, a native of the Moluccas, &c., furnishes the resin called Dammar (q. v.). It grows to a great height; the wood is, like cedar, light and unfit for exposure to the weather. *D. vitiensis* is a native of Fiji, attaining a height of 80 to 100 feet. The wood is largely used for masts, booms, spars, &c.

2. **Chem.:** [DAMMARIN.]

† *Piney Dammar* [PINEY.]

dammar-gum, s. [DAMMAR-RESIN.]

dammar-pine, dammer-pine, s.

Bot.: A tree, formerly called *Agathis loranthifolia*. Now, however, *Agathis* has been reduced to a synonym of *Dammara*, and the pine formerly placed under it, originally the *Pinus Dammara* of Linneus, has become in turn *Agathis Dammara*, *Abies Dammara*, *Dammara alba*, and *D. orientalis*. It is a tree 100 feet high, growing on mountain tops in Amboyna, Ternate, and the Molucca islands. The timber is light and of inferior quality. It furnishes the dammar-resin (q. v.).

dammar-resin, s. [DAMMARIN.]

Commerce:

1. **From Australia:** Also called Cowrie-gum, Kauri-gum. The produce of a large coniferous tree, *Dammara australis*, which grows in New Zealand. It occurs in hard white-yellow masses, having a shining fracture and an odor of turpentine. It contains an acid resin, Dammaric acid, and a neutral resin, Dammarin. The former is soluble in dilute alcohol. The resin distilled yields a volatile oil, called Dammarol, boiling at 156°, and having the formula $C_{10}H_{20}O_7$. When distilled with quicklime it yields a yellow oil, called Dammarone.

2. **East Indian:** *Dammar Puti* (Cat's-eye resin), said to be obtained from *Dammara alba*. The resin exudes from excrescences on the stem near the root, in the form of yellowish transparent lumps, having a conchoidal fracture. It is partly soluble in alcohol. The part which dissolves in alcohol is called Dammarylic acid. Afterward a part can be dissolved in ether, forming a hydrocarbon called Dammaryl. (Watts: *Dict. Chem.*)

dām-mar-an, s. [Eng. *dammar*; suff. -an.] [DAMMAR-RESIN, 1.]

dām-mar-lc, a. [Eng. *dammar*; -ic.]

Chem.: Pertaining to or derived from dammar.

dammaric acid, s. [DAMMAR-RESIN, 1.]

dām-mar-ln, s. [Eng. *dammar*; suff. -in. (Chem.)]

Chem.: A resin found in various species of *Dammara*. *Dammara orientalis* furnishes one kind, which, mixed with chalk and pulverized bamboo-bark, is used for caulking ships. Another kind, obtained from the *Dammara australis*, or Cowrie-pine of New Zealand, is dissolved in turpentine and used as a colorless varnish. It is also used for mounting purposes instead of Canada-balsam. The

best form of varnish is to dissolve one ounce of dammar-gum in a fluid ounce of turpentine; to dissolve one ounce of mastic in two fluid ounces of chloroform, and mix.

dām-mar-ōl, s. [Eng. *dammar*; -ol.] [DAMMAR-RESIN, 1.]

dām-mar-ōne, s. [Eng. *dammar*; -one.] [DAMMAR-RESIN, 1.]

dām-mar-yl, s. [DAMMAR-RESIN, 2.]

dām-mar-yl-ic, a. [Eng. *dammaryl*; -ic.] Of or pertaining to dammaryl. [DAMMAR-RESIN, 2.]

dāmmēd, pa. par. or a. [DAM, v.]

dām-mēr (1), s. [Eng. *dam*; -er.] One who dams up water; the constructor of a dam.

dām-mēr (2), s. [DAMMAR.]

dammer-pine, s. [DAMMAR-PINE.]

dammer-pitch, s. The resin of *Vateria indica*, the White Dammer-tree.

dammer-tree, s.

Bot.: The two trees which follow. [DAMMAR.]

† (1) *Black dammer-tree:* *Canarium strictum*.

(2) *White dammer-tree:* *Vateria indica*.

***dammes, s.** [DAMASK.]

dām-mīng, pr. par., a. & s. [DAM, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act or process of confining or restraining the flow of water by a dam.

dām (n silent), *dāmpnyn, *dāmpne, v. t. & i. [O. Fr. *damner*; Sp. & Port. *damnar*; Ital. *damnare*, from Lat. *damno*=to condemn, *dammum*=a loss, a fine.]

A. Transitive:

1. **Ordinary Language:**

1. **Literally:**

(1) To condemn.

(a) **Absolutely:**

"'Tis no maistrise for a lorde

To dampne a man, without answer of worde."

Chaucer: *Legend of Good Women*, Prolog., 400.

(b) **With the penalty expressed:**

"Wherefor Adam was dāmpnyd to helle."

Towneley Myst., p. 49.

(2) To condemn to eternal punishment. [II.]

(3) To cause to be eternally condemned.

"That which he continues ignorant of, having done the utmost lying in his power that he might not be ignorant of it, shall not damn him."—South: *Serm.*

(4) To curse; to call down the curse of God on.

"Infected be the air whereon they ride;

And damn'd all those that trust them!"

Shakespeare: *Macbeth*, iv. 1.

† Frequently used interjectionally as a curse.

2. **Figuratively:**

(1) To condemn, to cry down, to ruin by expressing disapprobation.

" . . . you are not so arrant a critic as to damn them, like the rest, without hearing."—Pope.

(2) To ruin, to blast.

† **II. Scripture and Theology:**

1. **Gen.:** To condemn as sinful; to pronounce blameworthy; to doom to punishment without indicating what is its character or amount. [DAMNATION, 1.]

"And he that doubteth is damned if he eat, because he eateth not of faith; for whatsoever is not of faith is sin."—Rom. xiv. 23.

2. **Spec.:** To sentence or condemn to eternal punishment, or to the penalty designed as the appropriate punishment of the unbeliever and impenitent sinner.

"He that believeth and is baptized shall be saved; but he that believeth not shall be damned."—Mark xvi. 16.

† In the R. V. it is altered to *condemned* in each of the passages cited.

B. Intrans.: To curse, to swear profanely, to blaspheme.

dām (n silent), s. [DAMN, v.] A curse, a profane oath.

dām-na-bil'-ī-tŷ, *dām-na-bil'-ī-tle, s. [Eng. *damnable*; -ity.] The quality or state of being damnable; damnableness.

A. As adjective:

1. Deserving of or liable to damnation or condemnation.

2. Odious, vile, execrable, pernicious.

***B. As adv.:** Damnably.

"That did but show thee, of a fool, inconstant

And damnable ingrateful . . ."

Shakespeare: *Winter's Tale*, iii. 2.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tian = şan. -tion, -sion = şhūn; -tīon, -şion = zhūn. -tious, -cious, -sious = şhūs. -ble, -dle, &c. = beł, del.

dām'-nā-ble-nēss, *s.* [Eng. *damnable*; -ness.]

1. The quality or state of being damnable or deserving of damnation.

"The question being of the damnableness of error."—*Chillingworth: Religion of Protestants*.

2. Vileness, execrableness, odiousness.

dām'-nā-blī, *adv.* [Eng. *damnable*(ly); -ly.]

1. In a damnable manner; in a manner calling for damnation; cursedly.

"They do cursedly and damnably against Christ."—*Chaucer: Persones Tale*.

2. Odiously, vilely, execrably.

"The more sweets they bestowed upon them, the more damnably their consives stunk."—*Dennis*.

dām-nā-tion, ***dāmnacion**, ***dāmpnacōn**, ***dāmpnacōn**, ***dāmpnacōne**, *s.* [Lat. *damnatio*, from *damno*=to condemn.]

A. Ordinary Language:

I. Literally:

1. The act of sentencing or condemning to eternal punishment. [B.]

"... whose judgment now of a long time lingereth not, and their damnation slumbereth not."—*2 Pet. ii. 3*.

2. The state of being condemned to eternal punishment.

"... and they that have done evil, unto the resurrection of damnation."—*John v. 29*.

II. Figuratively:

*1. A crime so execrable as to call for eternal punishment.

"'Twere damnation

To think so base a thought

Shakesp.: *Merchant of Venice*, ii. 7.

*2. The condemnation or damning of a play, book, &c., by openly expressed disapprobation.

"Don't lay the damnation of your play to my account."—*Fielding*.

B. Theology:

1. *Gen.*: Judgment without indicating its character; a penalty inflicted on account of some sin for which one has been Divinely judged.

"For he that eateth and drinketh unworthily, eateth and drinketh damnation to himself."—*1 Cor. xi. 29* (O. V.).

¶ In the revised version this is very properly altered to judgment. The "damnation" spoken of seems to have been that some were weak and sickly, and some slept, i. e., the "judgment" sent was temporal; in less aggravated cases, "sickness;" in those more aggravated, death; temporal as distinguished from eternal death. (*1 Cor. xi. 30-32*)

2. *Spec.*: The act of God in condemning unbelieving and impenitent sinners; the state of being so condemned; the penalty inflicted. [CONDEMNATION, II.]

dām-nā-tōr-ŷ, *a.* [Latin *damnatorius*, from *damno*.] Containing a sentence of condemnation; condemnatory.

"... the Commissioners were equally unwilling to give up the doctrinal clauses and to retain the damnatory clauses."—*Macaulay: Hist. Eng.*, ch. xiv.

dan-çêr, ***daun-cer**, ***dawn-cere**, *s.* [English *danc(e)*; -*er*.]

1. *Ord. Lang. (Sing.)*: One who practices or engages in dancing.

2. *Ch. Hist. (pl.)*: A religious sect which arose in A. D. 1373, at Aix-la-Chapelle, and spread through Liège, Hainault, and other parts of Belgium. Persons of both sexes, holding each other by the hand, danced, in public or in private, with great energy till they became quite exhausted. They maintained that while so engaged they were favored with wonderful visions. They made a livelihood by religious mendicancy. They had little respect for ordinary church worship or for the ecclesiastical hierarchy. The priests at Liège attributed the frenzy of the dancers to demoniacal possession, and believed that they succeeded in casting out the evil spirit by means of hymns and incense. (*Mosheim: Ch. Hist. (cent. xiv.), pt. ii., ch. v., § 8.*)

***Merry dancers**: A popular name given to streamers in connection with the Aurora Borealis or to the Aurora itself. The name is most appropriate to streamers which appear to revolve, as they occasionally do.

dâne'-ball, s. [Eng. *Dane*, and *ball*.]

Bot.: A book-name for *Sambucus ebulus*, the Dwarf Elder, also called Danes'-blood, Dane-weed, and Danewort (q. v.). According to Camden it received its name from its having sprung up from the blood of the Danes killed in the battle of Swanfield. (Britten & Holland.)

dâne'-gêlt, danegeld, s. [A. S. *danegeld*; Low Lat. *danigeldum*, *danegeldum*.]

Eng. Hist.: Originally a tax or tribute on every hide of land in England for the purpose of raising and maintaining forces to protect the coasts from the plundering attacks of the Danes. At first it was 1s. for every hide, but in time it rose as high as 7s. The tax enforced by Ethelred and his successors for the purpose of buying off the Danes was similarly called Danegelt. His payments for this purpose, at first only £10,000, at last reached the sum of £48,000. The Danegelt proper was abolished by Edward the Confessor, but a tax under the same name continued to be levied by the Danish kings on every hide of land owned by the conquered nation. It was finally abolished by Stephen.

"He [Edward the Confessor] remitted the heavy imposition called *Danegeld*, amounting to £40,000 a year, which had been constantly collected after the occasion ceased."—*Burke: Abridg. of Eng. Hist.*, ii. 5.

Dâne'-lâgh, Dane lage, s. [A. S. *Dena lagu*=the law of the Danes.]

1. (*Of the form Dane lage*): Certain customs or legal arrangements introduced by the Danes and retained when the expulsion of those invaders left the Saxons free, if they pleased, to return in all respects to their ancient institutions. (Blackstone: *Comment.* (Introd.), § 3, bk. iv., ch. xxxiii.)

2. (*Of the form Danelagh*): The portion of England allotted to the Danes by the Treaty of Wedmore in 878 A. D. It extended from the east coast to a line which ran from the Thames a little below London to Chester on the Dee.

dâne'-wört, s. [Eng. *Dane*, and *wort* (q. v.).]

Bot.: The Dwarf Elder, *Sambucus ebulus*. [DANE-BALL.]

däng, düng, pret. & pa. par. [DING, v.] Struck; subdued; knocked over.

"... whomling a chield on the tap o' me, that *däng* the very wind out of my body."—*Scott: Bride of Lammermoor*, ch. xxiv.

dân'-gêr, *dangere, *daunger, *dawnger, s. & a. [O. Fr. *danger*, *dangier*; Fr. *danger*; Low Lat. *dominarius*, from *dominus*=a lord. (Skeat.)]

A. As substantive:

1. Originally a feudal word, implying that the suzerain possessed strict rights with regard to the fief held by his vassal, the violation of which on the part of the latter would be followed by the confiscation of the fief. Such a fief was called a *fief de danger*, a fief in danger of being forfeited, "juri stricto atque adeo confiscationi obnoxium." (*Du Cange*.)

2. Servitude.

"We ourselves were in times past unwise, disobedient, deceived, in *danger* to lusts (Gr. *douleutes epithymiais*)."—*Tyndale: Titus* iii. 3.

3. Power, jurisdiction, authority.

"Come not within his *danger* by thy will."—*Shakesp.: Venus and Adonis*, 639.

*B. As adj.: Dangerous.

"We ar our ner, sic purpos for to tak, A *danger* chace that mycht vpon us mak."

Wallace, viii. 202.

¶ Crabb thus discriminates between *danger*, *peril*, and *hazard*: "The idea of chance or uncertainty is common to all these terms; the two former may sometimes be foreseen and calculated upon; but the latter is purely contingent. The *danger* and *peril* are applied to a positive evil; the *hazard* may simply respect the loss of a good; risks are voluntarily run from the hope of good: there may be many *daungers* included in a *hazard*; and there cannot be a *hazard* without some *danger*. A general *hazard* a battle, in order to disengage himself from a difficulty; he may by this step involve himself in imminent *danger* of losing his honor or his life; but it is likewise possible that by his superior skill he may set both out of all *danger*: we are hourly exposed to *daungers* which no human foresight can guard against, and are frequently induced to engage in enterprises at the *hazard* of our lives and of all that we hold dear. *Dangers* are far and near, ordinary and extraordinary; they meet us if we do not go in search of them: *perils* are always distant and extraordinary; we must go out of our course to expose ourselves to them: in the quiet walk of life, as in the most busy and tumultuous, it is the lot of man to be surrounded by *danger*; he has nothing which he is not in *danger* of losing; and knows of nothing which he is not in *danger* of suffering: the mariner and the traveler who go in search of unknown countries put themselves in the way of undergoing *perils* both by sea and land." (*Crabb: Eng. Synon.*)

danger-signal, s.

1. *Ord. Lang.*: A signal made by one person to another to warn him of danger close at hand.

"Wild horses and cattle do not, I believe, make any *danger-signal* s."—*Darwin: Descent of Man* (1871), pt. i., ch. iii., vol. i., p. 74.

2. *Railway Engin.*: A signal, generally a semaphore extended horizontally by day and a red light at night, to indicate to the engineer of any train that there is an obstruction or obstacle involving danger ahead of him, and to warn him to stop his train.

"Barrough did therein, not *dangerless* prenaile."

Warner: Albiôn's Eng., bk. xi., c. 67.

dân'-gêr-ôus, *daungerous, *daungerouse, a. [O. Fr. & Fr. *dangerueux*.]

1. Niggardly, parsimonious, sparing.

"My wages ben full streyt and eke full smale, My lord to me is hard and *daungerous*."

Chaucer: C. T., 7, 008, 7, 009.

2. Full of or involving danger; hazardous, risky, unsafe.

"That winding leads through pits of death, or else Instructs him how to take the *dangerous* ford."

Thomson: Autumn, i, 160, 1, 161.

3. Producing, or likely to produce, danger or risk.

"No, Caesar shall not: *danger* knows full well That Caesar is more *dangerous* than he."

Shakesp.: Julius Caesar, ii. 2.

¶ Crabb thus discriminates between *dangerous*, *hazardous*, and *perilous*: "It is *dangerous* for a youth to act without the advice of his friends; it is *perilous* for a traveler to explore the wilds of Africa; it is *hazardous* for a merchant to speculate in time of war: experiments in matters of policy or government are always *dangerous*; a journey through deserts that are infested with beasts of prey is *perilous*; a military expedition conducted with inadequate means is *hazardous*." (*Crabb: Eng. Synon.*)

dân'-gêr-ôus-lý, adv. [Eng. *dangerous*; -ly.] In a dangerous manner; perilously, hazardously.

"Oh! too convincing—*dangerously* dear— In woman's eye the unanswerable tear."

Byron: Corsair, ii. 15.

†dân'-gêr-ôus-nêss, s. [Eng. *dangerous*; -ness.] The quality or state of being dangerous; danger, risk, peril.

"I shall not need to mind you of judging of the *dangerousness* of diseases, by the nobleness of that part affected."—*Boyle*.

dân'-gle, v. i. & t. [Dan. *dangle*=to dangle, to bob; *dingle*=to dangle or swing about; Sw. dial. *dangla*=to swing; *dingla*=to dangle; Icel. *dingla*=to dangle. (Skeat.)]

2. The act of swinging about or causing to dangle.

II. Fig.: The act or habit of hanging about women.

Dân'-i-el (iel as yel), s. [Heb. *Daniel*, or *Dani*=my judge, or judge of, and *El*=God. Thus *Daniel* means either God [is] my judge, or the judge of God, i. e., who does justice in God's name.] *Script.*: Three, if not four, or even five, persons mentioned in the Bible.

(1) A son of David, called also Chileab (1 Chron. iii. 1; 2 Sam. iii. 3).

(2) A very celebrated Hebrew prophet, who was carried when he was young to Babylon, in the third year of Jehoiakim (B. C. 604), brought up with other young men for the king's service, held high office under successive kings, saw visions, and prospered till at least the third year of Cyrus (Dan. vi. 28; x. 1). [¶ *The Book of Daniel*.] His Babylonish name, Belteshazzar, means the Prince of Bel, or the Prince whom Bel favors.

(3) A descendant of Ithamar, who returned to Judea with Ezra (Ezra viii. 2).

(4) A priest who sealed the covenant with Nehemiah (Neh. x. 6). Probably he is the same as 3.

(5) One who was held up for admiration for his righteousness and for his wisdom in Ezekiel's time (Ezek. xiv. 20; xxviii. 3). He is almost certainly the same as No. 2, the only shade of doubt arising from the fact that *Daniel* the prophet was very young at that time. But it rests on other historical evidence that he did actually rise to great eminence at a remarkably early period of life.

¶ The Book of Daniel:

Scripture Canon: One of the most important prophetic books of the Old Testament, honored by quotations on the part of our Lord (Matt. xxiv. 15; Mark xiii. 14); containing one of the most remarkable Messianic prophecies existing (Dan. ix. 24-27) [Seventy Weeks], and in symbolic language, and to a certain extent in subject, resembling the New Testament Apocalypse, to which it stands in a certain relation.

Daniel commences in Hebrew, which goes on to chapter ii., and the middle of verse 4, then Aramaean takes its place to the end of chapter vii., after which Hebrew is resumed, continuing to the end of the book. Gesenius places the Hebrew of Daniel in the same class with that of Esther, Ecclesiastes, 1st Chronicles, and Jonah. He deems it somewhat purer than that of Ezra, Nehemiah, Zechariah, and Malachi. The Aramaean is not like that of the "Targums," Translations or Paraphrases, about the commencement of the Christian era, but like that of Ezra. Startling as it may appear, there are what look uncommonly like four Greek words written in Hebrew letters (Dan. iii. 5, 7, 10, 15).

The Jewish Church received the Book of Daniel as canonical. They placed it, however, not among the other prophets, but among the "Kethubim" (Holy Writings), the Hagiographa of the Greeks, between Esther and Ezra. The early Christian Church regarded it as inspired, and received it with much veneration, as the immense majority of Christians in every church do to the present day.

The date of its composition has been the subject of much controversy, and its settlement in one direction or another has a bearing on more than chronology. Porphyry, who in the third century wrote a work in fifteen books against Christianity, devoted the whole of the twelfth one against Daniel. He maintained that it was written, not by Daniel in Babylonian or Persian times, but by a Jew of Palestine in the time of Antiochus Epiphanes, "and that Daniel did not so much predict future events as narrate past ones." What doubtless operated with him to produce this view was the fact that the prophecies of Daniel, and especially ch. xi., are very specific to the time of Antiochus Epiphanes (B. C. 175-164), then they become vague, and remain so for the whole period intervening between that king and Messianic times. The English deist, Collins, in the early part of the eighteenth century, took the same view. Subsequently on the continent Corrodi, Eichhorn, Bertholdt, Gesenius, Bleek, De Wette, Lücke, and others followed in the same direction, many of them impugning the correctness of the narrative. More recently advocates for the late date of Daniel have not been wanting, even within the Christian Church, the noble Dr. Arnold of Rugby, England, leading the way. Hengstenberg and others on the continent, with the Rev. Dr. Pusey, Mr. Bosanquet, &c., have been the able defenders of the older view.

Mr. Bosanquet, it should be mentioned, has a scheme of chronology of his own, by which he places the final destruction of Jerusalem by Darius, whom he believes to have been the well-known Darius Hystaspis, in B. C. 492, in place of B. C. 538, i. e., forty-six years lower than the common view, and reduces the whole range of dates connected with the Jewish monarchy twenty-five years. He also makes two Cyruses, and believes that the conqueror of Babylon was the son, and not the father of Cambyses. For the apocryphal additions to the Book of Daniel see BEL AND THE DRAGON, also SUSANNA.

Dān-ī-ēl-īte, *s. & a.* [Proper name *Daniel*, and suff. -ite.]

A. As subst.: A member of an order founded in 1876 by a life-long abstainer and vegetarian, T. W. Richardson, to bring about the general adoption of a non-animal diet. The name is derived from the refusal of the prophet to partake of the "king's meat." (Dan. i. 8-16.)

B. As adj.: Of or belonging to the Danielites. *Daniell, proper name.* [From John Frederick Daniell, F. R. S., who received the Copley medal from the Royal Society, England, in 1837 for this invention; he died in 1845.]

Daniell's battery, *s.* The double-fluid battery invented by Daniell. It consists of a jar of glass or earthenware, in which fits a plate of copper, bent into cylindrical form. Within the copper is a porous cup containing the zinc. The liquids used are a saturated solution of sulphate of copper in the outer cell, and of sulphuric acid in the inner cell or porous cup. To the copper a perforated shell or jacket is often attached for holding crystals of sulphate of copper, so that the solution may be kept at the point of saturation. [GALVANIC BATTERY.]

Daniell's cell, *s.* Same as DANIELL'S BATTERY. **Daniell's hygrometer**, *s.* A hygrometer in which a glass bulb containing a thermometer placed in ether is cooled by evaporation till dew is deposited.

Daniell's pyrometer, *s.* A pyrometer for measuring very high temperatures by the expansion of a metallic rod.

Dān-īsh, *a. & s.* [Eng. *Dan(e)*; -ish.]

A. As adj.: Of or pertaining to Denmark or the Danes.

"Hardicane thus dead, the English, rejoicing at this unexpected riddance from the Danish yoke, sent over to Elfred."—*Milton: Hist. Eng.*, vi.

B. As subst.: The language of the Danes.

Dānīsh balance, *s.* A form of the steelyard, the inverse of the Roman or Chinese. The weight and load are suspended at the respective ends, and the suspension-loop is shifted along the beam till equilibrium is attained. The weight of the goods is thus to the weight of the *bob* reciprocally as their respective distance from the loop.

***Dān-īsm** (1), *s.* [Eng. *Dan(e)*; -ism.] An idiom or peculiarity of the Danish language.

†dān-īsm (2), *s.* [Gr. *daneisma* = a loan.] The lending of money upon usury.

Dān-īte, *s.* [Proper name *Dan*, and suff. -ite.] A member of a band existing among the Mormons, for the purpose of dealing, as avengers of blood, with the "Gentiles." They are said to have been organized about 1837. They derive their name from Jacob's blessing to his son Dan (Gen. xlix. 17).

dānk, *a. & s.* [Cogn. with Icel. *dökk* = a pit, a pool; *dökk* = black, dark; *dögg* = dew. (*Skeat.*)]

A. As adj.: Damp, moist; exhaling cold, damp vapors.

"Content to rear his whitened wall
Beside the dank and dull canal?"
Scott: Marmion, lii. (Introd.)

***B. As substantive:**

1. Dampness, moisture, humidity.

"The rawish dank of clumsy winter ramps
The fluent summer's vein;"
Marston: Antonio and Melinda (Prol.).

2. The sea.

"Off they quit
The dank, and rising on stiff pinions, tour
The mid aerial sky." *Milton: P. L.*, vii. 440-42.

***dānk**, ***doṅk**, *v. i.* [DANK, *a.*] To make damp or moist.

"Deowes donketh the downes."
Lyric Poems, p. 44.

†dānk-īsh, *a.* [Eng. *dank*; -ish.] Rather dank.

"... a dark and dankish vault at home."
Shakesp.: Comedy of Errors, v. 1.

***dānk-īsh-nēss**, *s.* [Eng. *dankish*; -ness.] The quality or state of being dankish; dampness.

Danne-rōg, *s.* [Dan., lit. = the cloth of the Danes.] A Danish order of knighthood instituted in 1219, revived in 1693, and reconstituted in 1808.

dān-nē-mōr-īte, *s.* [Ger. *dannemorit*.] Named from Danemora in Sweden, where there are large iron mines.

Min.: A variety of amphibole. Dana calls it iron-manganese amphibole.

dān-nēr, *v. i.* [DANDER.] To saunter, to stroll about.

"Lang, lang they danner'd to and fro,
Wha miss'd a kinsman or a beau?"
Mayne: Siller Gun, p. 86.

dan-seūge, *s.* [Fr.] A female dancer on the stage.

Dāns-kēr, *s.* [Dan. *dansk* = Danish.] A Dane.

"... what Daners in are Paris."
Shakesp.: Hamlet, ii. 1.

Dā-nū-bī-ān, *a.* [Eng. *Danub(e)*; -ian.] Of or connected with the Danube; bordering on the Danube.

dā-ōur-īte, *s.* [Named from Daouria, a country east of Lake Baikal in Siberia, where it is found; Eng. suff. -ite (*Min.*).]

Min.: A mineral, also called Rubellite (q. v.). It is a variety of Tourmaline.

dāp, *v. i.* [A variant of *dip* (q. v.).] To fish by letting the bait fall gently into the water.

"He even tried dapping with the natural fly."—*Blackmore: Alice Lorraine*, vol. ii., ch. i.

***dā-pāt-īc-āl**, *a.* [Lat. *dapaticus*, from *dapes* = a feast.] Sumptuous in cheer. (*Bailey.*)

dāp-ēd-ī-dæ, *s. pl.* [Mod. Lat. *dapedium*, and suff. -ide.]

Palæont.: In Prof. Owen's classification the ninth family of his Lepidoganoidei, a sub-order of Ganoidian fishes. (*Prof. Owen: Palæont.*, ed. 1860.) The tail fin is slightly heterocercal; scales interlocked by pegs and sockets; back teeth obtuse.

dāp-ēd-ī-ūm, **dāp-ēd-ī-ūs**, *s.* [Gr. *dapidion*, dimin. from *dapedon* = the floor of a chamber.]

Palæont.: A genus of fossil fishes, belonging to the family Dapediæ (q. v.). They are peculiar to the Lias. The arrangement of the scales resembles

a tessellated pavement. It is compressed and deep-bodied; front teeth typically notched or bifurcate. The body is rapidly contracting, and terminates in an equally-lobed tail.

dāph-nāds, *s. pl.* [Eng. *daphn(e)*, and suff. -ad.]

Bot.: Lindley's English name for the Thymeleaceæ.

dāph-nāl, *a. & s.* [Lat. *daphn(e)* = a laurel-tree or bay-tree, and adj. suff. -al.]

A. As adj.: Pertaining to the genus *Daphne* or the order Thymeleaceæ.

B. As substantive:

(1) *Sing.:* A plant of the order Thymeleaceæ.

(2) *Pl.:* Lindley's name for the alliance including the Daphnads and Laurels.

"Natural order of Daphnals."—*Lindley: Veg. Kingd.* (3d ed.), p. 629.

¶ *Daphnal alliance:* [DAPHNALES.]

dāph-nā-lēs, *s. pl.* [Pl. of Mod. Lat. *daphnalis* = daphnal (q. v.).]

Bot.: The Daphnal alliance. An alliance of perigenous Exogens. The flowers are monochlamydeous, the carpel solitary, an amygdaloid embryo without albumen. Lindley includes under it. Thymeleaceæ, Proteaceæ, Lauraceæ, and Cassythaceæ.

Dāph-nē, *s.* [Lat. *daphne*; Gr. *daphnē* = the laurel, or rather the bay-tree.]

1. *Anc. Myth.:* One of the nymphs of Diana, who was said to have been turned into a laurel-tree.

2. *Astron.:* An asteroid, the forty-first found. It was discovered by Goldschmidt on March 22, 1856.

3. *Bot.:* A genus of plants belonging to the Thymeleaceæ (q. v.). Orifice of the calyx without appendages, stamens eight to ten, inclosed within the calyx, stigma simple, fruit succulent. *Daphne laureola* is the Spurge Laurel. It is an evergreen. *D. mezereum* has deciduous leaves and very fragrant flowers. They are all found in the temperate districts of Asia and Europe. The bark of the root, as well as that of the branches, of *D. mezereum* is used in decoction as a diaphoretic in cutaneous and syphilitic affections. In large doses it is an irritant poison, causing hypercatharsis. Used externally it acts as a vesicant. It contains a ventral crystalline principle, called Daphnein (q. v.). The fruit is poisonous. The barks of *D. gnidium*, *D. alpina*, *D. cneorum*, *D. pontica*, and *D. laureola* have similar properties. The berries of the last are poisonous to all animals except birds. The inner bark of *D. lagetta*, when cut into thin pieces after maceration, assumes a beautiful net-like appearance, whence it has received the name of Lace-bark. (*Balfour, &c.*)

dāph-nē-s, *s. pl.* [Eng., &c., *daphn(e)*; Lat. adj. fem. pl. suff. -eæ.]

Bot.: A section of the order Thymeleaceæ with hermaphrodite or rarely unisexual flowers, and plano-convex cotyledons.

dāph-nēin, *s.* [DAPHNIN.]

dāph-nē-tin, *s.* [Mod. Lat. *daphne*; *t* connective; Eng. suff. -in (*Chem.*) (q. v.).]

Chem.: Obtained by boiling a solution of Daphnin in dilute hydrochloric acid. It crystallizes in small needle-shaped monoclinic prisms, having a strong refracting power, soluble in boiling water and in boiling alcohol, melting at 220°. Nitric acid colors it red; ferric chloride gives a green color, which is destroyed by the addition of acid. Daphnetin reduces in the cold an alkaline cupric solution. It gives a yellow precipitate with plumbic acetate.

dāph-nī-ē, *s.* [Greek *daphnē*; Latin pl. adj. suff. -ia.]

Zool.: A genus of Entomostraca, order Cladocera, family Daphniadæ. *Daphnia pulex* is the Common Water-flea. The head is large, rounded above and in front; superior antennæ very small; the head produced into a more or less prominent beak; eyes spherical, with about twenty lenses; jaws composed of a strong body ending in four horny spines, three of which curve inward. The antennæ act as oars, by which the animals project themselves by a series of jerks through the water. They are frequently very numerous in ponds and ditches, which they often color, especially when the water is stagnant, with an appearance of blood. *D. pulex* is a favorite and interesting microscopic object.

dāph-nī-ā-dæ, **dāph-nī-l-dæ**, *s. pl.* [Lat. *daphnia* (q. v.), and fem. pl. adj. suff. -idæ.]

Zool.: A family of Entomostraca, order Coepoda. The head is protruded beyond the shell.

dāph-nīn, **dāph-nīne**, *s.* [Fr. *daphnine*.]

Chem.: A crystalline glucoside obtained from the bark of *Daphne alpina* and *D. mezereum*. The alcoholic extract of the bark is exhausted with water, the solution precipitated by plumbic acetate, the precipitate washed with water, and decomposed by H₂S, the filtrate evaporated to dryness and

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mātē, cūb, cūre, unite, cūr, rāle, fāl; trȳ, sȳrian. æ, æ = ē; ey = ā. qu = kw.

crystallized out of alcohol. Daphnin forms colorless transparent prisms, $C_{15}H_{10}O_9 + 2H_2O$, and is isomeric with Aesculin. It melts at 200° , and then decomposes, yielding Daphnetin. Heated with aqueous acids it yields Daphnetin and glucose. Ferric chloride (neutral) gives a bluish color with Daphnin.

da-pí-chō, da-pí-cō, *s.* [For etymology see definition.]

Comm.: The South American name of the dirty white spongy caoutchouc which exudes from the roots of *Siphonia elastica*. It is blackened over an open fire, and used for making stoppers. It is also called Zaspis. (Watts: *Dict. Chem.*, vol. ii., p. 305.)

***dāp'-l-fēr**, *s.* [Lat., from *dapes*=a feast, and *fero*=to bear, to carry.] One who carried the meat to the table; a steward; afterward the chief steward or butler of any honor or manor.

"Thou art all for inlandish meat, and outlandish sawces; thou art the *dapifer* to thy plate, or the cup-bearer to thy appetite."—Reeve: *God's Plea for Nineveh*, 1657.

dāp'-pēr, *daper, *dapyr, *a.* [Dut. *dapper*; O. H. Ger. *taphar*; Ger. *täpfer*=valiant, courageous. Trench attributes the degeneracy in meaning of this word in English to the depression of the Saxons after their conquest by the Romans.] Spruce, smart, brisk, active, neat.

"*Dapir* or *praty*. *Elegans*."—Prompt. Parv.

¶ A contemporary of Spenser, who wrote a glossary on the poet's *Shepherd's Calendar* for the exposition of old words, includes "*dapper*" among them, but it has since thoroughly revived.

***dāp'-pēr-līng**, *s.* [Eng. *dapper*, and dimin. suff. *-ling*.] A dandiprat, a little fellow.

dāp'-ple, a. & s. [Icel. *depill*=a spot. Cog. with Eng. *dip* and *dimple*. (Skeat.)]

A. As adj.: Spotted; variegated with shades or spots of different colors.

¶ Used in composition with the name of a color to express that that color is variegated with spots of another color; as, *Dapple-bay, dapple-gray*.

"O swiftly can speed my dapple-gray steed,
Which drinks of the Tievot clear."

Scott: *Lay of the Last Minstrel*, i. 24.

B. As substantive:

1. A spot, a mark.

"As many eyes upon his body, as my gray mare hath dapples."—Stdney: *Arcadia*, bk. ii., p. 271.

2. A dappled or spotted horse.

"Be it Dapple's bray
Or be it not, or be it whose it may."

Cowper: *The Needless Alarm*.

***dāp'-ple, v. t.** [DAPPLE, *a.*] To spot, to streak, to variegate with spots or shades of color.

"Before the wheels of Phœbus, round about
Dapples the drowsy east with spots of gray."

Skeat: *Much Ado about Nothing*, v. 3.

dāp'-pled, pa. par. or a. [DAPPLE, *v.*]

***dāp'-pliŋg, pr. par., a. & s.** [DAPPLE, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of marking with dapples or spots.

***dāp'-stēr, s.** [DABSTER.] An expert, a dab, a dabster.

"... a *dapster*, thorough-skilled, ready-handed."—Barnes: *Early England & the Saxon English* (1869), p. 126.

dāp'-tūs, s. [Gr. *daptō*=to devour, to feed on.]

Entom.: A genus of coleopterous insects belonging to the family Harpalidae.

dar, dart, s. The Dace (q. v.).

"*Hic capita, a dar.*"—Wright: *Vol. of Vocab.*, p. 253.

da-rāp'-ti, s. [A word of no etymology.]

Logic: An arbitrary name for a mode of syllogisms in the third figure, in which the Middle Term is the subject of both premises. Taking X to represent the Major Term, Y the Minor, and Z the Middle, the scheme of this figure is— $\begin{matrix} Z & X \\ Y & X \\ Y & X \end{matrix}$ and a syl-

logism in *dārApTI* would stand thus: All Z is X; all Y is Y, ∴ some Y is X; that is, from two Universal Affirmatives (A) we arrive at a Particular Conclusion (I). This mode is valid, but useless, in the first figure, but may be employed in the fourth. [LOGIC, SYLLOGISM.]

dar'-bles, s. Handcuffs; fetters; manacles.

dar-bōt-tle, s. [Eng. *dark*=dark (?), and *bottle*.] A plant, *Centaurea nigra*.

dar'-bŷ, s. [Etym. doubtful.]

Build. (Plastering): A float-tool used by plasterers in working on ceilings especially. It is $3\frac{1}{2}$ feet long and 7 inches wide, with two handles on the back by which it is manipulated. (Knight.)

bōl, bōy; pōut, jōwl; cat, gell, chorus, chin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist. ph = f. -cian, -tian = shān. -tion, -sion = shūn; -tīon, -sion = shūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bel, del.

Dar'-bŷ-ltes, s. [From Mr. Darby, see def.]

Ch. Hist.: The followers of Mr. Darby, a very prominent personage among the Plymouth Brethren, and, in the opinion of some, their founder. A schism taking place among the brethren, Mr. Darby, with others, seceded from those with whom he had been formerly associated. The name Darbyites has never been acknowledged by the Plymouth Brethren themselves.

***darce, s.** The Dace (q. v.).

"Roche, *darce*, makerelle."—Babees Book, p. 156.

***dard, s.** [Fr.=a dart.] A spout, a small aperture.

"Through the spikes of the trident are made three dards or spouts."—Dr. Harris: *Descr. of the Palace at Loo* (1699), p. 51.

dāre (1), *dar, *dear, *dur, *durren, *der (pref. **dorst, *dorste, *durste, *dore, dard, durst; pa. par. darded*), *v. i. & t.* [A. S. *ic dæra*=I dare; pret. *ic dorste*=I dared, *we durston*=we dared or durst; infin. *durran*=to dare; Goth. *dars*=I dare, *daursta*=I durst, *daurstan*=to dare; O. H. Ger. *tar*=I dare, *torsta*=I dared, *turren*=to dare. Cogn. with Gr. *tharsō*=to be bold, *thrasys*=bold, daring. (Skeat.)]

A. Intransitive:

1. To dare, to venture, to have courage or strength of mind for any act or purpose; to be bold or adventurous enough.

"Therefore *dur* not the marchauntes passen there."

Maundeville, p. 271.

2. To be able, to have reason or grounds for doing anything; as, *I dare say, I dare assure you.*

"... my robe,
And my integrity to heaven, is all
I dare now call mine own."

Shakesp.: *Henry VIII.*, iii. 2.

3. To be willing or ready to do any act.

"... I dare be bound again,
My soul upon the forfeit, that your lord
Will never more break faith advisedly."

Shakesp.: *Merchant of Venice*, v. 1.

B. Transitive:

1. To venture on, to attempt, to risk.

"What man dare, I dare."

Shakesp.: *Macbeth*, iii. 4.

"And, sure of glory, dare immortal deeds."

Pope: *Homer's Iliad*, xi. 374.

2. To challenge, to defy.

"Unless a brother should a brother dare,
To gentle exercise and proof of arms."

Shakesp.: *Henry IV.*, Pt. I., v. 2.

3. To terrify, to daunt.

"Those mad mischiefs
Would dare a woman."

Beaumont & Fletcher: *Maid's Tragedy*, iv. 1.

***dāre (2), *daare, *dear, *daryn, v. i. & t.** [Cogn. with O. H. Ger. *tarnjan*=*tarnjan*; A. S. *dernan*=to lie hid, *dearc*, *deorc*=dark, hidden. (Mätzner.)]

A. Intransitive:

1. To lie hid, to hide, to keep out of sight.

"He mighte not dare or be priuy."—Wycliffe: *Mark* vii. 24.

"*Daryn*, or *drowpyn*, or *prively* to be hydde. *Latito, lateo*."—Prompt. Parv.

2. To droop, to be frightened, to tremble.

"The kyng dares for dowte, dye as he scholde."

Morte Arthure, 3,226.

B. Transitive:

1. To be hidden or concealed from; to escape notice of.

"It *daarthis* hem willinge this thing."—Wycliffe: *2 Pet.* iii. 5.

2. To catch birds, especially larks, by causing them to crouch and hide, by means of a mirror or mirrors fixed on scarlet cloth, or of a hawk either carried on the wrist or kept hovering over the spot where the birds lie. A similar practice is even now sometimes followed with a kite, cut in shape of a hawk, and kept steady over the birds.

"They doe so insult over, and restrain them, never Hoby so dared a lark."—Burton: *Anat. Melancholy*, p. 654.

***dare (3), v. i.** [A. S. *thurban*; Icel. *thaurfa*; Goth. *thaurban*; O. H. Ger. *durfan*=to have need.] To want, to have need.

***dāre (1), s.** The Dace (q. v.).

***dāre (2), s.** [DARE (1), *v.*]

1. Boldness, daring, dash.

"It lends a luster and more great opinion,
A larger dare to our great enterprise."

Shakesp.: *Henry IV.*, Pt. I., iv. 1.

2. A challenge, a defiance.

"Sextus Pompeius

Hath given the dare to Cæsar."

Shakesp.: *Antony and Cleopatra*, i. 2.

***dāre, a.** [DARE (2), *v.*] Stupid, dull.

"Drowpane and dare."—Houlate, i. 15.

***dāre'-fūl, a.** [Eng. *dare*; *-ful* (l).] Full of defiance.

"We might have met them *dareful*, beard to beard,
And beat them backward home."

Shakesp.: *Macbeth*, v. 5.

†dār'-ēr, s. [Eng. *dare* (1), *v.*; *-er*.] A challenger; one who dares or defies.

"Don Michael, Leon; another *darer* come."

Beaumont & Fletcher: *Rule a Wife*, iii. 5.

darg, dargue, *dark, s. [Prob. a contr. or corruption of *daywork*.]

1. A day's work.

"I canna gang in—I have a lang day's *darg* afore me."

Scott: *Heart of Mid-Lothian*, ch. xxvi.

2. The quantity of work done in a day.

"... the men, even at the reduced rates, are making better wages now than they obtained, when rates were 20 to 30 per cent. higher with the restricted *darg*."—*Colliery Guardian*.

***darg-days, s. pl.** Cottars in Scotland were formerly bound to give the labor of a certain number of days to the superior, in lieu of rent, which were called "*darg-days*"—*i. e.*, days of work.

darg, v. t. [DARG, *s.*] To be employed on day-work or by the day.

darg'-ēr, s. [Eng. *darg*; *-er*.] One who works by the day.

dār'-ic, *darick, s. [Gr. *dareikos*, prob. from Darius, King of Persia, either, as Herodotus states, Darius Hystaspis, or, in the opinion of some, an earlier monarch.]

Numis.: A gold coin current in Persia, Asia Minor, &c. It was of the value of about \$5.29, and weighed about 130 gr. On the *obverse* is the figure of a crowned archer kneeling with a bow and long javelin, on the *reverse* a rude indentation. There is no inscription. Darics are mentioned in Xenophon's *Anabasis*, so they would be in circulation about 400 B. C. They are also mentioned under the name of *adarkonim* in some of the later Old Testament books, viz., in 1 Chron. xxix. 7 and Ezra viii. 27.

"He repaired at the length unto Cimon, and brought him home to his own door two bowls, the one full of daricks of gold, and the other full of daricks of silver, which be pieces of money so called, because that the name of Darius was written upon them."—North: *Plutarch*, p. 415.

dar-I-I', s. [A word of no etymology.]

Logic: An arbitrary name for a mode of syllogisms in the first figure, in which the Middle Term is made the subject of the Major and the predicate of the Minor premise. By this mode we arrive at a Particular Conclusion from a Universal and a Particular premise, *e. g.*, (A) All men are mortal. (I.) John is a man. (I.) Therefore John is mortal. [LOGIC, SYLLOGISM.]

dār'-lŋg (1), pr. par., a. & s. [DARE (1), *v.*]

A. As pr. par.: In senses corresponding to those of the verb.

B. As adjective:

1. In a good sense: Bold, brave, courageous, fearless, stout, hardy.

"The gate, judge if the echoes rung!
Onward his *daring* course he bore."

Scott: *Bridal of Triermain*, iii. 23.

2. In a bad or depreciatory sense: Presumptuous, audacious.

"Weak, *daring* creatures!"

Pope: *Homer's Odyssey*, xiii. 169.

C. As substantive:

1. In a good sense: Boldness, bravery, courage, stoutness.

"Chance aids their *daring* with unhop'd success."

Dryden: *Virgil's Æneid*, v. 282.

2. In a bad sense: Presumption, audacity, hardihood.

¶ Crabb thus discriminates between *daring* and *bold*: "These terms may be both taken in a bad sense, but *daring* much oftener than *bold*; in either case *daring* expresses more than *bold*; he who is *daring* provokes resistance and courts danger; but the *bold* man is contented to overcome the resistance offered to him: a man may be *bold* in the use of words only; he must be *daring* in actions; he is *bold* in the defense of truth; he is *daring* in military enterprise." (Crabb: *Eng. Synon.*)

***daring-hardy, a.** Audacious, presumptuous, fool-hardy.

"On pain of death, no person be so bold
Or daring-hardy as to touch the lists."
Shakesp.: *Richard II.*, i. 3.

***där-ing** (2), *pr. par., a. & s.* [DARE (2), v.]

C. As subst.: The act or process of catching birds by means of a mirror or a hawk.

***daring-glass, s.** A mirror used to dare larks; hence, any fascination.

"... *daring-glasses* or decoys to bring men into the snares."—Gauden: *Tears of the Church*, p. 197.

där-ing-lý, adv. [Eng. *daring* (1); -ly.]

1. Bravely, courageously, fearlessly.

"Your brother, fir'd with his success,
Too *daringly* upon the foe did press."
Halifax.

2. Audaciously, presumptuously.

"Some of the great principles of religion are every day openly and *daringly* attacked from the press."—Atterbury.

***där-ing-ness, s.** [Eng. *daring*; -ness.] The quality of being daring; boldness, daring.

"All the deep *daringness* of thought and deed
With which the Dives have gifted him."
Moore: *Veiled Prophet of Khorassan*.

dark, *darck, *derk, *derke, *derc, *deork, *dirk, *dirke, *dorke, *durk, *durke, a., s. & adv. [A. S. *deorc*.]

A. As adjective:

1. Literally:

1. Destitute of or without light. (Opposed to light.)

2. Approaching to black, dull. (Opposed to bright or light colored.)

"In Muscovy the generality of the people are more inclined to have *dark* colored hair than flaxen."—Boyle.

3. Of a brownish color. (Opposed to fair.)

"Their complexion is rather *darker* than that of the Ojibweians."—Cook: *Third Voyage*, bk. v., ch. iii.

4. Opaque. (Opposed to transparent.)

5. Shaded, gloomy.

"No! not for these will he exchange
His *dark* Lochaber's boundless range."
Scott: *Marmion*, iii. (Introd.)

II. Figuratively:

*1. Deprived of light—i. e., of sight; blind.

"The eye of Ysrael weren *derke* for greet eelde."—Wycliffe: *Gen.* xlviii. 10.

2. Not enlightened by knowledge; ignorant, untaught.

"The age wherein he liv'd was *dark*; but he
Could not want sight, who taught the world to see."
Denham: *Progress of Learning*, 63, 64.

3. Obscure, ambiguous, mysterious; hard to explain or understand.

"But what have been thy answers, what but *dark*,
Ambiguous, and with double sense deluding."
Milton: *P. R.*, i. 434, 435.

4. Hidden, concealed, not open.

"Thei that . . . wenten bi *derke* weies."—Wycliffe: *Prov.* ii. 13.

5. Morally black, wicked, atrocious.

"The dedes whiche are inward *derke*."
Gower, i. 63.

*6. Gloomy, cheerless.

"All men of *dark* tempers, according to their degree of melancholy or enthusiasm, may find convents fitted to their humors."—Addison: *On Italy*.

7. Unfavorable, disheartening, discouraging, dismal.

*8. Reticent, secret, not open.

"The *dark* unrelenting Tiberius . . ."—Gibbon.

9. Applied, in racing slang, to a horse which has never appeared in public.

"This *dark* brother to Reveller had been almost lost sight of."—*London Daily Telegraph*.

B. As substantive:

1. Literally:

1. Darkness, obscurity, absence of light; night time.

"When it drew to the *derk* and the daie slaked."
Alisaunder: *Fragment*, 714.

*2. A dark spot, or part.

II. Figuratively:

1. Want or absence of moral or intellectual enlightenment; ignorance.

"Till we ourselves perceive by our own understandings, we are as much in the *dark* and as void of knowledge as before."—Locke.

2. A state of obscurity; the background.

"All he says of himself is, that he is an obscure person; one, I suppose he means, that is in the *dark*."—Atterbury.

3. Secrecy, privacy.

***C. As adv.:** In the dark, without light.

"I see no more in you
Than without candle may go *dark* to bed."
Shakesp.: *As You Like It*, iii. 5.

Crabb thus discriminates between *dark*, *obscure*, *dim*, and *mysterious*: "*Darkness* expresses more than *obscurity*: the former denotes the total privation of light; the latter only the diminution of light. *Dark* is opposed to light: *obscure* to bright. *Dark* may be used either in the natural or moral sense; *obscurity* only in the moral sense; in this case the former conveys a more unfavorable idea than the latter; *darkness* serves to cover that which ought not to be hidden; *obscurity* intercepts our view of that which we would wish to see; the former is the consequence of design; the latter of neglect or accident: the letter sent by the conspirator in the gunpowder plot to his friend was *dark*; all passages in ancient writers which allude to circumstances no longer known must necessarily be *obscure*; a corner may be said to be *dark* or *obscure*, but the former is used literally and the latter figuratively; the owl is obliged, from the weakness of its visual organs, to seek the *darkest* corners in the daytime; men of distorted minds often seek *obscure* corners, only from disappointed ambition. *Dim* expresses a degree of *darkness*, but it is employed more in relation to the person seeing than to the object seen. The eyes are said to grow *dim*, or the sight *dim*. The light is said to be *dim*, by which things are but *dimly* seen. *Mysterious* denotes a species of the *dark*, in relation to the actions of men; where a veil is intentionally thrown over any object so as to render it incomprehensible as that which is sacred. *Dark* is an epithet taken always in the bad sense, but *mysterious* is always in an indifferent sense. We are told in the Sacred Writings that men love *darkness* rather than light, because their deeds are evil. Whatever, therefore, is *dark* in the ways of men is naturally presumed to be evil; but things may be *mysterious* in the events of human life, without the express intention of an individual to render them so. The speeches of an assassin and conspirator will be *dark*: any intricate affair which involves the characters and conduct of men may be *mysterious*." (Crabb: *Eng. Synon.*)

Dark is used largely in composition with the names of colors, to express the deepness of shade of the color: as *dark-blue*; *dark-brown*; *dark-gray*; *dark-red*, &c. Obvious compounds are: *Dark-browed*, *dark-colored*, *dark-haired*, *dark-skinned*.

dark ages, s. pl. An epithet frequently applied to the middle ages, when exaggerated views were entertained as to the amount of ignorance then existing. Hallam makes it to span a little more than 1,000 years, commencing with the invasion of France by Clovis, A. D. 486, to the invasion of Naples by Charles VIII. in 1495.

A. As adj.: Pertaining or relating to Charles Darwin or his biological views.

"The second reason is a somewhat Darwinian one. There seems to exist among words, even as among living beings, a struggle for existence, terminating in the 'survival of the fittest.'"—*Beames: Comp. Gram. Aryan Lang. of India*, vol. i. (1872) Introduct., p. 72.

B. As subst.: A follower of Charles Darwin. [DARWINISM.]

Dar-win'-ic-al, a. [From (Charles) Darwin, and Eng. adj. suff. -ical.] Pertaining or relating to Charles Darwin or his views.

Dar-win'-ic-al-ly, adv. [Eng. *Darwinical*; -ly.] Of reasoning: After the manner of Charles Darwin.

Dar-win-ism, s. [Named after Charles Darwin, M. A., LL.D., F.R.S., the grandson of Dr. Erasmus Darwin, author of the *Botanic Garden*, published in 1781; the *Zoonomia*, or *Laws of Organic Life*, given to the world in 1796; and the *Phytologia*, or *Philosophy of Agriculture and Gardening*, sent forth in 1800. The son of Dr. Erasmus Darwin was an eminent physician practicing at Shrewsbury, England, in which town Mr. Charles Darwin was born, in February, 1809. He was educated at Shrewsbury, Edinburgh, and Cambridge. He first became known through going (without salary) as naturalist with the *Beagle* surveying ship of war, which, between December, 1831, and December, 1836, circumnavigated the globe. In 1839 he married his cousin, Miss Emma Wedgwood, and had ultimately a family of five sons and two daughters. Between 1842 and 1846 he published three important works, one of which—that on Coral-reefs—revolutionized the views till then held on the formation of the Pacific Islands. On November 24, 1859, he gave to the world the first edition of his immortal work on the *Origin of Species*; on January 7, 1860, the second appeared. The one we quote, printed in 1882, is stated to be the sixth edition, with additions and corrections to 1872. The work has been translated into most, if not all, civilized languages. In 1871 Mr. Darwin, in his *Descent of Man*, extended the views advanced in the *Origin of Species* to the human race. His last great work, one announcing great discoveries in connection with the earthworm, was called *The Formation of Vegetable Mould*. When the *Origin of Species* and the *Descent of Man* were sent forth, many replies were published by religious men who deemed his views completely antagonistic to Revelation; but when he died, on April 19, 1882, his merits were acknowledged on all sides. Admirers considered him the Sir Isaac Newton of biology, while even those who could not assent to his views believed that Westminster Abbey was his fitting resting-place, and in a circular appealing for contributions to a memorial in his honor two of the most prominent names are those of the Archbishops of Canterbury and York.]

Biol., Hist., &c.: The views, especially regarding the origin of species and the descent of man, expressed in detail and advocated with much earnestness, but with perfect scientific candor, by Mr. Charles Darwin. [ETYM.]

Just before the publication of Mr. Darwin's first great work on the subject, the vast majority of naturalists believed that each species, whether of animals or of plants, was a separate creation. It was known that it might run into "varieties," might be improved by cultivation, or might help to originate a "hybrid" between it and another species, in which case the hybrid was sterile, but it was deemed quite a canon of natural science that it could undergo no farther change. Mr. Darwin followed a small but distinguished school of naturalists in setting wholly aside this canon, and accepting instead of it the transmutation of species. [TRANSMUTATION.] Mr. Darwin's views as to how species originated, arrived at independently about the same time by Mr. Alfred Russel Wallace, and foreshadowed by Aristotle, Matthews, and others, may be embodied in the following postulates or propositions:

(1) That a certain amount of variability exists in every animal or plant. No children of the same parents are quite alike, and the circumstances of the life of each tend to increase the original variation. It is the same with animals and plants. Variation is so great under domestication that it has excited universal notice. Witness the case of tame pigeons, dogs, cats, or cattle. Similar changes go on at a slower rate in nature among wild animals and plants.

(2) Animals and plants, when not checked in their increase, tend to multiply at a geometrical ratio. Malthus long ago pointed out that this is the case with man, and it is the same with inferior animals and plants. Each species would singly fill the earth were it not checked by others.

(3) Hence there is a continuous struggle for existence among all organized beings in the world, individuals of each species battling against those of all other species, and yet more severely against those of their own.

(4) Speaking broadly, those best adapted for the struggle will be the victors in it, while those less adapted to it will be defeated and die. This is called by Mr. Darwin, Natural Selection.

(5) As the offspring of any animal or plant tends to be in most respects like its parent, and as the less improved forms are likely to be vanquished and perish, each race will ultimately be continued by the individuals in it more highly organized than the rest. Sexual preferences will produce a selection tending in the same direction.

(6) The result will be an endless progression, evolving higher species, genera, families, orders, classes, if not even sub-kingsdoms themselves, the infinitely varied forms being each adapted to the circumstances by which it is surrounded. Man is believed by Mr. Darwin to have possibly descended at a highly remote period, from "a group of marine animals resembling the larvæ of existing Ascidians" (a lowly type of mollusks). The line of our ancestry ran next through the Ganoid fishes, the Amphibians, the Monotremata, the ancient Marsupials, the early progenitors of the Placental Mammals, the Lemnidae, the Simiade, the Anthropoid Apes, and a species covered with hair, both sexes having beards, the ears pointed and capable of movement, great canine teeth present in the males, the body provided with a tail, the foot prehensile, the habits arboreal, the birthplace some warm forest-clad land.

¶ Darwinism was and is, to a certain extent, misunderstood by the general public. When first it was broached it was held as teaching, among other views, that—

"A very tall pig, with a very long nose, Puts forth a proboscis quite down to his toes, And then by the name of an elephant goes."

Here the transformation is in the lifetime of one animal. Mr. Darwin's transformations demand for their accomplishment vastly extended geological ages, and at the end of them the pig does not become the elephant. He held that at a remote point of bygone geological time an animal, which was neither a pignora elephant, but had the characteristics common to both, existed. It gave rise to more specialized forms; the same process took place with them till the pig came at last from an ancestor not so specialized as itself, and the elephant from another. It is difficult, if not impossible, to harmonize Darwinism with the views regarding creation entertained by the great majority of the people; with Theism it has not necessarily any controversy. With regard to the origin of life Mr. Darwin believes that it may have "been originally breathed by the Creator into a few forms or into one." Thus not merely a God, but a Creator, is recognized.

dar-win-ite, s. [Named after Charles Darwin.] [DARWINISM.]

Min.: The same as WHITNEYITE (q. v.).

däs-çil'-îl-dæ, s. pl. [Mod. Lat. *discillus*, and fem. pl. adj. suff. -ide.]

1. **Ordinary Language**:

1. The formula appended to a letter, deed, &c., to denote the year, month, and day when such letter or deed was signed or executed.

"My father's promise ties me not to time;

And bonds without a date, they say, are void," Dryden: *Spanish Friar*, iii. 3.

2. The point of time at which anything happened, or is appointed to happen.

"... his days and times are past, And my reliance on his fracted dates Have smit my credit."—Shakesp.: *Timon*, ii. 1.

*3. Duration, continuance; time generally.

"Could the declining of this fate, O friend, Our date to immortality extend?" Denham: *Sarpedon's Speech to Glaucus*.

4. The period of time during which any person or thing is in existence.

*5. An end or conclusion.

"What time would spare, from steel receives its date:

And monuments, like men, submit to fate." Pope: *Rape of the Lock*, iii. 171, 172.

II. **Law**: A deed may be good, although it mentions no date, or has a false date, or even if it has an impossible date, as the 30th of February, provided the real day of its being dated or given, that is delivered, can be proved. (*Blackstone*: *Comment.*, bk. ii., ch. xii.)

¶ For the difference between *date* and *time*, see **TIME**.

***date-broke**, a. Not met or provided for on the appointed day.

"How goes the world, that I am thus encounter'd

With clamorous demands of date-broke bonds?" Shakesp.: *Timon of Athens*, ii. 2.

däte (2), s. & a. [O. Fr. *date*; Fr. *datte*; Dan. *dattel*; Dut. *dadel*; Ger. *dattel*; Prov. *datil*, *datil*; Sp. *datil*; Port. *datile*; Ital. *dattero*, all from Lat. *dactylus* = a date; Gr. *daktylos* = a finger, from the shape of the fruit.]

A. **As substantive**:

Ord. Lang. & Bot.: The English name of the fruit of the palm belonging to the genus *Phoenix*, and particularly the species *Phoenix dactylifera*; also that of the tree itself. For its botanical characters see **PHENIX**. It is the palm-tree of Scripture and of classic writers. It still flourishes in Egypt, Arabia, Syria, Persia, and the adjacent regions; and is of immense importance to their inhabitants. The fruit is made into a conserve with sugar. The stones, when ground, are eaten by camels, or may be formed into ornaments. The leaves are made into couches, baskets, bags, &c.; the fibers into ropes; the trunk split into spars for fences, the framework of houses, &c., and the juice is used for the manufacture of arrack. An analogous species, *P. sylvestris*, is the most common palm in the interior of India; from its juice a drink called by the natives *toddy* is made. There are other species.

B. **As adj.**: Pertaining to the date, resembling the date. [A.]

dä-tis-cæ, s. [Etym. unknown.]

1. **Bot.**: A genus of plants, the typical one of the small order *Datisceæ* (q. v.). *Datisca cannabina* is found in the south of Europe; it is used in Candia, Italy, and elsewhere as a substitute for Peruvian bark, in fevers as well as in gastric and scrofulous diseases. It, moreover, furnishes a yellow dye.

2. **Comm.**: The leaves of *Datisca cannabina*, Bastard Hemp, contain a yellow dye which is prepared by precipitating the aqueous decoction with plumbic acetate, decomposing the precipitate with sulphuric acid, and evaporating the filtrate. *Datisca* yellow is a brown translucent mass insoluble in cold alcohol, soluble in water. It is used to dye silk. A concentrated decoction of the plant, mixed with a little potash, can be used as a yellowink.

dät-is-cæ-gē-æ, s. pl. [Mod. Lat. *datiscæ* (a), and Lat. fem. pl. adj. suff. -acæe.]

Bot.: Datisceads. An order of Diclinox Exogens, alliance Cucurbitales. The species are either branched herbs or trees of some size. Leaves alternate, without stipules. Flowers in axillary racemes or panicles; calyx of the male flower divided into three to four pieces, those of the female ones adherent, three to four-toothed. Stamens, three to seven; ovary, one to three-celled, with three to four parietal placentae; seeds many. Fruit capsular, one-celled. Lindley enumerated three genera, and estimated the known species at four. They are scattered over North America, Asia, and the southeast of Europe.

dä-tis-cæds, s. pl. [Mod. Lat. *datiscæ* (a), and pl. suff. -ads.]

Bot.: The name given by Lindley to the order Datisceæ.

dä-tis-gē-æ, s. pl. [DATISCEÆ.]

dät-is-gēt-in, s. [Mod. Lat. *datisca*, t connective, and Eng. suff. -in (Chem.).]

Chem.: $C_{15}H_{10}O_6$. Obtained by boiling datiscin with dilute sulphuric acid. Datiscecin is deposited in colorless, tasteless needles, which are nearly insoluble in water, easily soluble in alcohol. Nitric acid converts it into picric acid. It is soluble in aqueous alkalis, and reprecipitated by acids.

dä-tis-cin, **dät-is-cine**, s. [Mod. Lat. *datiscæ* (a), and Eng. suff. -in, -ine (Chem.).] (q. v.).

Chem.: $C_{21}H_{22}O_{12}$. A glucoside closely allied to salicin. Obtained from the leaves of *Datisca cannabina*; also from the roots by treating the alcoholic extract with water to precipitate resin, and evaporating the filtrate; this is redissolved in alcohol, and the resin precipitated with water till the

dā-tūr-a, s. [Arab. *tātorah*=the plant-genus described below.]

Bot.: A genus of Solanaceæ, tribe Datureæ. The calyx and corolla are infundibulate, the latter much the larger of the two, both five-lobed; capsule four-celled. *Datura stramonium* is the Thorn Apple, better known in this country as the Jamestown Weed, the name arising from a poisoning among the Virginian settlers by its use. It is found on dung-hills, in waste places, &c. When taken internally it is a powerful narcotic; medically it is used in mania, convulsions, epilepsy, ticdouloureux, &c. When smoked it palliates the symptoms in asthma. *D. tulula* and *metel* are similarly used. The seeds of these two latter species are said to have been used to produce the frenzied ravings of the priests in the Delphic and some other temples. The Peruvians use for the same purpose *D. sanguinea*, manufacturing from it also an intoxicating beverage.

dā-tūr-ī-na, dā-tūr-ī-a, dā-tūr-ine, dā-tūr-in, s. [Eng. *datur(a)*, and suff. *-ina, -ine* (Chem.) (q. v.).]

Chem.: A mixture of two alkaloids, atropine and hyoscyamine, both of which, when heated, yield tropane acid $C_8H_9O_3$, and tropine, $C_8H_{15}NO$. Pure atropine, $C_{17}H_{23}NO_3$, melts at 107°; strongly heated with nitric acid it yields picric acid. Daturine is very poisonous, and is obtained from *Datura stramonium* and *Atropa belladonna*.

dāub, *dauben, *dawbyn, v. t. & i. [O. Fr. *dauber*, from Lat. *dealbo*=to whiten, to plaster; *albus*=white (Skeat).]

A. *Ordinary Language*:

1. *Literally*:

1. In the same sense as B. 1.

"... he abode with him three days."—Judges xix. 4.

2. Among the Jews the day began at sunset. Our practice of commencing it at midnight was borrowed at first from the Romans.

3. The whole time or period of a single revolution of the earth on its axis; a period of twenty-four hours.

"How many hours bring about the day?

How many days will finish up the year?"

Shakespeare: *Henry VI.*, Pt. III., ii. 5.

3. Daylight, light.

"The west yet glimmers with some streaks of day."

Shakespeare: *Macbeth*, iii. 3.

4. Daytime; the period during which it is light.

2. The best time of life, the prime.

3. (Pl.). Life, lifetime.

"Honor thy father and thy mother: that thy days may be long upon the land which the Lord thy God giveth thee."—Exod. xx. 12.

4. An appointed or fixed time.

"Or if my debtors do not keep their day."—Dryden.

5. A day appointed for the commemoration of any event.

"Then call we this the field of Agincourt,
Fought on the day of Crispin Crispianus."

Shakespeare: *Henry V.*, iv. 7.

6. A contest, a battle, an engagement.

"To quit the plunder of the slain,
And turn the doubtful day again."

Scott: *Marmion*, vi. 33.

B. *Technically*:

1. *Astron.*: The time taken by the earth to revolve once on its axis. This varies according to the method adopted in making the calculation.

2. A solar day is the interval between the time of the sun's coming to the meridian and returning to it again. Similarly a sidereal day is the interval between the time of a star's coming to the meridian and again returning to it on the immediately subsequent night. A mean solar day is twenty-four hours long. A mean sidereal day is about 23 hours, 56 minutes, and 4 seconds. The reason of the difference is that the sun appears to go slowly to the east through the stars, which makes them reach the meridian in a shorter time than he does, if the estimate be made by sun-time. An apparent day is the interval which exists between two successive transits of the sun across the meridian. An astronomical day is a day beginning at one P. M. and continuing to the next. It is divided into 24 hours, not into two periods of 12 hours each.

3. *Scripture Harmony*: Some harmonists, comparing Gen. i. with the teachings of geology, consider day in that chapter to mean an indefinitely long period of time. Hugh Miller, modifying this view, and combining with it the vision hypothesis of Mr. James Sime, made the days the times taken for the successive visions given to Moses of the sequence of events in the geological period of the earth's history.

C. *Special phrases and compounds*:

1. A dog will have his day: [See C. 5.]

"Let Hercules himself do what he may,

The cat will mew, and dog will have his day."

Shakespeare: *Hamlet*, v. 1.

2. Day in bank, Day in bank:

English Law: A day in which appearance may be made in the Court of Common Pleas. Several such days exist at intervals of about a week. On some one of them all original writs must be made returnable. They are therefore often called the returns of that term. (Blackstone: *Comment.*, bk. iii., ch. xviii.)

3. Day of the Lord (literally Jehovah), Day of God:

(1) *Generally*:

Scrip.: Any day during which some striking judgment or other awe-inspiring Divine operation is witnessed. In Joel ii. 1 the reference is to the destruction of the crops by locusts. See verses 2-11, also 20, 25.

"Behold, the day of the Lord cometh, and thy spoil shall be divided in the midst of thee."—Zech. xiv. 1.

(2) *Specialty*:

(a) The first advent of Christ (Matt. iv. 5, 6).

(b) The second advent (2 Thess. v. 2) or the day of judgment. It is sometimes called shortly "that day" (2 Tim. iv. 1, 8).

(c) The day or time when all things shall be dissolved (2 Peter iii. 10-12).

4. Day of Grace:

(1) *Law*: A day given as a favor beyond the time when an appearance in court or other legal act ought in strict propriety to be carried out.

(2) *Comm.* (Pl.): A certain number of days allowed over and above the time specified on the face of a bill (payable otherwise than on demand). In this country three days of grace are allowed, so that a bill becomes due upon the third day of grace, and not earlier, unless it fall upon a Sunday, or legal holiday, in which cases the bill becomes due the day before. In Austria and England three, and in Russia ten, days of grace are allowed; no other countries in Europe allow them.

de-a-con (pron. *dēkn*), ***deakne**, ***decon**, ***de-con**, ***dekene**, ***dekyn**, ***diakne, s.** [A. S. *deacon*, *diacon*; Dut. *diaken*; Sw. & Dan. *diaconus*; Ger. *diakon*; Fr. *diacre*; Prov. *diacre*, *diaque*; Sp., Port., & Ital. *diacono*; Lat. *diaconus*, all from Gr. *diakonos* = (as subst.) (1) a servant, a waiting-man, . . . (2) a minister of the church, especially a deacon, a deaconess; (as adj.) serving, serviceable; probably from *diōkō* = to cause to run, to pursue.]

I. Ord Lang.: In the same sense as II.

II. Technically:

1. Ecclesiol. & Ch. Hist.:

(1) In Scripture: Omitting the passages in which *diakonos* has a general meaning, three portions of the New Testament refer to the ecclesiastical officers so denominated. In Phil. i. 1 they are mentioned in conjunction with the "bishops," and were evidently of inferior authority to them, for they are mentioned last. In 1 Tim. iii. 6-13 the proper qualifications requisite for their office, as well as the character which their wives should possess, are pointed out, but no mention is made of the precise duties which they had to discharge. In Rom. xvi. 1 Phebe is described as a servant or deaconess of the church at Cenchrea, and in commendation of her it is stated that she had been a succor of many, the Apostle Paul himself being among the number. There is a very general opinion that the first institution of the order of deacons is narrated

in Acts vi., but as the functionaries there elected are not specially called deacons some doubt must remain upon the identification. If the officers whose election is described in Acts vi. were deacons, then the special duty of that order of men was the distribution of the church alms to the poor. A "daily ministration" took place in the early apostolic times to widows who could not support themselves unaided. The majority of these could speak only Aramaic; a minority, Jewish by descent like the former, were Grecians, i. e., spoke Greek, or at least their husbands had done so. The majority monopolized all the attention of the alms-givers, and the representatives of the minority had to complain of neglect. The apostles, being appealed to, felt that it would interfere with the success of their spiritual work if they became mixed up with disputes about the apportionment of money, and, expressing their unwillingness "to leave the Word of God to serve tables," they advised or commanded that seven men of honest report, i. e., of honorable reputation, full of the Holy Ghost and wisdom, should be sought and appointed almsmen to the church. Their acceptance of this office did not preclude them from discharging higher functions, for of the seven men elected one was Stephen, the first martyr. (Acts vi. 5, 8-11, &c.)

(2) In modern churches:

(a) In the Methodist Episcopal Churches: The junior order of the priesthood, the novitiate being first ordained a deacon, and then after a time, if satisfactory conditions have been fulfilled—such as progress in grace and gifts, and the probation of character—elevated to the full priesthood or eldership—the latter the highest order in the church—the Bishops occupying not a superior ecclesiastical order but holding a merely supervisory office.

(b) In the Churches of Rome and England: A deacon is a spiritual officer ranking beneath the bishops and priests or presbyters. The diaconate may be held at twenty-three years of age (DIACONATE), the priesthood not till twenty-four.

(c) In the Presbyterian Churches: The orders here are teaching elders, or ministers, ruling elders, generally called simply elders (these two orders looking after the spiritual affairs of the congregation); and deacons (now gradually being displaced in many places by managers), to attend to the more secular matters.

(d) In the Congregational, Baptist, and some other Churches: Deacons are spiritual officers ranking immediately under the minister, and looking after both the spiritual and the temporal concerns of the congregations.

***deā'-cōn-ēss, *dea-con-isse, s.** [Eng. *deacon*; *-ess*.]

Ecclesiastical:

1. A female deacon in the early Christian Church.
2. A term sometimes applied to a sister-of-mercy or those ladies who live in community and follow the rule of the Lutheran deaconesses.

¶ Deaconesses existed in the first century, and were generally respectable matrons or widows charged to look after the poor and perform other offices of utility to the church. (*Mosheim: Ch. Hist.*, cent. i., pt. ii., ch. ii., § 10.) The office of deaconesses lapsed in the Western Church in the fifth and sixth centuries, and in the Greek Church about the twelfth. It has been recently revived in this country, in Germany, and to a certain extent in England.

***deā'-cōn-hood, s.** [Eng. *deacon*, and *hood*.]

1. The same as DEACONSHIP (q. v.).
2. A number of deacons taken collectively.

†deā'-cōn-rŷ, s. The office or dignity of a deacon.

" . . . the deacons of all those churches should make up a common deaconry . . ."—*Goodwin: Works*, vol. iv., pt. iv., p. 188.

deā'-cōn-shīp, s. [Eng. *deacon*, and *ship*.] The office, dignity, or ministry of a deacon.

" . . . a common deaconship . . ."—*Goodwin: Works*, vol. iv., pt. iv., p. 188.

* (2) Causing or threatening death; deadly, mortal.

"So should a murderer look, so dead, so grim."
Shakesp.: Mids. Night's Dream, iii. 2.

(3) Without life or spirit.

"Dead for two years before his death was he."
Tennyson: Aylmer's Field, 387.

* (4) Deadly pale; pale as death.

"Honest Iago, that look'st dead with grieving."
Shakesp.: Othello, ii. 3.

(5) Still, motionless, perfectly calm.

"... dead calms are in the ocean,
When not a breath disturbs the drowsy main."—*Lee*.

(6) Having lost the power of procreation, growth, or vegetation; as, A dead branch.

"Being not weak in faith, he considered not his own body now dead," ...—*Rom.* iv. 19.

† (7) Without natural force, power, or efficacy; as, A dead fire.

(8) Flat, stale, tasteless, rapid; having lost the natural life.

"Pale wyne whyche is deade and vinewed . . . Mucidum vinum."—*Huloet*.

(9) Destitute of ardor or warmth; cooled down, abated.

"... my love to her is dead."
Shakesp.: Two Gent. of Ver., ii. 6.

(10) Dull, frigid; wanting in animation or spirit.

"How cold and dead does a prayer appear, that is composed in the most elegant forms of speech," ...—*Addison*.

(11) Not presenting the resemblance of life or spirit; dull, flat.

"... I must touch the same features over again, and change the dead coloring of the whole."—*Dryden*.

(12) Dull, heavy; not sharp or clear.

"... the bell seemed to sound more dead than it did when just before it sounded in the open air."—*Boyle*.

(13) Dull, gloomy, melancholy.

"... a view of the most gay season in the midst of that which is the most dead and melancholy."—*Addison*.

(14) Deep, still, undisturbed.

"... the dead darkness of the night."—*Hayward*.

(15) Useless, unprofitable, unemployed.

"... he will take care not to let so glorious an attribute lie dead and useless by him."—*Addison*.

(16) Empty, vacant.

"Naught but a blank remains, a dead void space."
Dryden.

(17) Certain or unerring as death; as, A dead shot, a dead certainty. [*Colloquial*.]

(18) No longer in use, unspoken, disused; as, A dead language.

II. Technically:

1. *Mech., Building, &c.*:

(1) Lusterless (as of some kinds of unpolished or unburnished metallic surfaces). Also of color without brilliancy; as, A dead color. [*DISTEMPER*.]

(2) False (as of imitation doors and windows, put in as architectural devices to balance parts).

(3) Motionless; as, The dead spindle of a lathe, which does not rotate; a dead-lock; the dead-center of a crank.

(4) Opaque; as, a dead-light or shutter over a cabin window.

(5) Solid, without light or opening; as, A dead-wall, a dead-plate, or unperforated portion of a furnace-grate; the dead-wood of a ship.

(6) Useless; as, Dead steam—that is, exhausted; a dead-head, a feeding-head or sillage-piece; a dead-weight; deads in mining, the useless substances which inclose the ore.

(7) Soundless; as, A dead-floor, which absorbs the sound.

(8) Flat; as, A dead-smooth file, having the least possible height of teeth. [*DEAD-LEVEL*.]

2. *Law*: Accounted as one civilly dead; deprived of all rights of citizenship.

3. *Theology*:

(1) In a state of spiritual death.

"... dead in trespasses and sins."—*Ephes.* ii. 1.

(2) Not productive of good works; not springing of a true and lively faith.

"... purge your conscience from dead works," ...—*Heb.* ix. 14.

† (1) Crabb thus discriminates between *dead*, *deceased*, and *departed*: "As an epithet, *dead* is used collectively; *departed* is used [generally] with a noun only; *deceased* generally without a noun, to denote one or more according to the connection.

There is a respect due to the *dead*, which cannot be violated without offense to the living. It is a pleasant reflection to conceive of departed spirits as taking an interest in the concerns of those whom they have left. All the marks on the body of the deceased indicated that he had met with his death by some violence." (*Crabb: Eng. Synon.*)

see LIFELESS.

B. As substantive:

1. *Ordinary Language*:

1. *Lit. (pl.)*: Those who have died or are dead; the departed.

2. *Fig.*: Depth, stillness; the height or acme of any period of time; as, The dead of night, the dead of winter.

"He reached the camp-fires at dead of night," ...—*Macaulay: Hist. Eng.*, ch. xvi.

II. *Mining*: Non-metalliferous rock excavated around a vein or in forming drifts, levels, shafts, cross-courses, &c. Many veins are too narrow for working and the walls have then to be cut into to afford space. Such work, as yielding nothing, is called dead-work or tut-work, and the proceeds are deads or attle, to be got rid of as economically as possible, by sending up to the surface, or filling up the gunnies and goafs of old workings. (*Knight*.)

C. *As adv.*: Completely, quite, entirely; as, in dead-drunk, dead-beat, dead-ripe, dead-against, &c.

dead account, s.

Bank: An account standing in the name of a person deceased.

"When the probate of a will is lodged at the Bank, the stock specified only is placed at the command of the executors. But should there be any other funds in the name of the deceased party, the word 'deceased' is placed against his name; and this prevents unauthorized persons from receiving the interest. By the rules of the Bank also no more stock can be added to that which is technically termed a dead account."—*Francis: History of the Bank of England*.

dead-alive, dead-and-alive, a. Without spirit or animation; dull, spiritless.

dead-angle, s.

Fort.: The space in front of a parapet which is out of view of the soldiers in the work, and which they cannot fire upon.

dead arsesmart, s. *Polygonum Persicaria*, of which Gerard says, "It doth not bite as the other doth." The other is *P. Hydropiper*. (*Britten & Holland*.)

dead-axle, s. An axle which runs but does not communicate motion, as distinguished from a driving axle, which is a live axle.

dead-beat, a. & s.

A. *As adj.*: Quite exhausted; unable to move.

B. *As subst.*: A worthless, lazy fellow who sponges on others. (*U. S. Collog.*)

Dead-beat escapement:

Hor.: An escapement also known as the escapement of repose, invented by Graham about 1700, and intended to isolate the going works more completely from the pendulum. The seconds-hand in the dead-beat stands still after each drop, whereas in the recoil escapement there is a back-lash to the train.

The working surfaces of the pallets of the anchor in this escapement are curved concentrically with the axis of oscillation of the anchor. When a pallet escapes from one tooth and allows a partial rotation of the scape-wheel, a tooth on the opposite side is arrested by the other pallet, but without giving any back-lash to the wheel, which would cause a recoil to the train of gearing. The term dead-beat is to contradictingly distinguish it from the recoil escapement, in which the working faces are curved eccentrically in relation to their axis of oscillation so as to offer a slight impediment to the motion of the wheel. This impediment causes a slight recoil of the scape-wheel, which is communicated to the train. The pallets in the recoil escapement are both check and impulse, but in the dead-beat one is simply check and the other gives a slight impulse at the moment of escaping. The impulse given to the pallet is communicated to the pendulum, to overcome the friction on the pendulum bearing and the resistance of the air, and thereby keep the beats of the pendulum isochronous. The cylinder or horizontal escapement is a dead-beat escapement for watches, and was also invented by Graham. (*Knight*.)

*dead-bed, *ded-bed, *dede-bed, s. A death-bed.

"On his dead-bed he lay."
Childe of Bristowe.

dead-bell, *dede-bell, s.

1. The passing-bell.

2. A ringing in the ears. So called from the superstition that it forbodes death.

dead-born, a. Falling flat or spiritless; dull, not spirited or animated.

"All, all but truth drops dead-born from the press."
Pope: Epit. to Sat., ii. 26.

dead-broke, s. Entirely out of cash; bankrupt.

dead-candle, *dede-candle, s. A light seen by the superstitious, and believed by them to presage death.

dead-center, s.

Mach.: One of the two points in the orbit of a crank, in which it is in line with the connecting-rod. It is also called a Dead-point (q. v.).

dead-coloring, s.

Painting: A first layer of color forming a basis for that which succeeds it. It is called dead because it has no gloss, and is to be hidden by the finishing coats. (*Knight*.) [*DISTEMPER*.]

*dead-deal, *dede-deal, s. A stretching-board for a dead body.

dead-dipping, s. The process of giving by the action of an acid a dead pale yellow color to brass. (*Weale*.)

*dead-doing, a. Destructive; causing death; fatal, mortal.

"Make up some fierce dead-doing man."
Butler: Hudibras.

*dead-dole, *dede-dole, s. A dole given away at funerals.

dead-door, s.

Ship-building: A door fitted in exterior rabbets, to protect a cabin-window or cover an opening when the lights are carried away. (*Knight*.)

dead-drunk, a. So drunk as to be insensible and incapable of action.

dead-earth, s. A fault in a telegraph line which consists in the wire being thoroughly grounded or connected to the earth.

dead-eye, s.

Nautical:

1. A block without a sheave, probably so named from a fancied resemblance to a death's head or skull. Such are those flat, round blocks fixed in the channels, and having eyes for the lanyards by which the shrouds are set up. The circumferential groove for the shroud is called the score. The dead-eye is also known as a ram-block.

2. The crow-feet dead-eyes are cylinders with a number of holes for the lines composing the crow's-foot. Also called a Euphroe or Uvrow.

3. The eye-bolt or staple on the gunwale of a canal-boat to which the towing-line is bent. The line is retained by a key of wood, which passes through the eye and is cast loose by pulling out or breaking the key. (*Knight*.)

dead-fall, s.

Machinery:

1. A dumping-platform at the mouth of a mine.

2. A trap in which a falling gate, board, or log drops upon the game and kills it. Used especially for vermin. (*Knight*.)

dead-file, s. A file which cuts so fine and close that its operations are practically noiseless. [*DEAD-SMOOTH FILE*.]

dead-flat, s. The midship bend or frame having the greatest breadth.

dead-floor, s. [*DEADENING, C. II. 1.*]

dead-flue, s. A flue bricked up at bottom and discontinued.

dead-freight, s.

Comm. Law: The freight or hire paid by a charterer for unoccupied space in a ship, when he has not supplied sufficient cargo to fill the whole ship.

dead-gold, s. The unburnished surface of gold or gold-leaf, from the electro bath or the hands of the gilder. Parts of objects are frequently left unburnished as a foil to the brilliant and lustrous burnished portions. Gilders call it matt. [*GILD-ING*.] (*Knight*.)

dead-ground, s.

Mining: A body of non-metalliferous rock dividing a vein, which passes on each side of it. The vein is said to take horse, in allusion to its straddling the intervening rock.

dead-head, s.

1. *Ordinance*: An extra length of metal cast on the muzzle end of a gun in order to contain the dross and porous metal which floats on the sounder metal beneath. When cooled and solid the dead-head is cut off.

2. *Foundry*: That piece on a casting which fills the ingate at which the metal entered the mold; a feeding-head or sillage-piece.

3. *Lathe*: The tail-stock of a lathe containing the dead-spindle and back-center; in contradistinction to the live-head or head-stock at the other end of the sheers, which contains the live-spindle.

4. *Naut.*: A block of wood used as an anchor-buoy. (*Knight*.)

5. One who habitually obtains admission to places of entertainment, &c., without payment; one who is on the freelist, a sponger. (*U. S. Slang*.)

"Poor hopelessly abandoned loafers, wearing plainly the stamp of deadhead on their shameless features."—*A. C. Grant: Bush-life in Queensland*, 1881, ii. 235.

bōil, bōy; pōut, jōwl; cat, cēll, choruss, chin, bench; go, gem; thin, thīs; sin, as; expect, Xenophon, exist. ph = f.

***dēaf-ing**, *pa. par., a. & s.* [DEAF, v.]

A. & B. *As pr. par. & particip. adj.:* (See the verb.)

C. As substantive:

1. The act of making deaf, or deafening.
2. The state of being or remaining unwilling to hear.

"It is enough, my hearing shall be punish'd,
With what shall happen, 'gainst the which there is
No deafing, but to hear."
Beaum. & Fllet.: Two Noble Kinsmen, v. 1.

dēaf-lŷ, *adv.* [Eng. *deaf*; -ly.]

1. *Lit.:* Without sense of sounds.
2. *Fig.:* Obscurely, dimly, not clearly.

dēaf-nēss, ***dēf-nēs**, *s.* [Eng. *deaf*; -ness.]

I. Ordinary Language:

1. *Lit.:* The state or quality of being deaf, or without a sense of sounds; inability to receive sounds, wholly or in part.

"Those who are deaf and dumb, are dumb by consequence of their deafness."—Holder.

2. *Fig.:* Unwillingness or refusal to listen to another.

"I found such a deafness, that no declaration from the bishops could take place."—King Charles.

II. Path.: Deafness is found in all degrees, ranging from a total inability to receive sounds, the sense of hearing being entirely absent, to a defect in that sense by which the ear is unable accurately to distinguish or appreciate slight or faint sounds. Dumbness is a frequent consequence of total deafness, even when there is no natural defect in the organs of speech. Those who are deaf and dumb generally communicate their thoughts by means of a manual alphabet. Of late years, however, Profs. Melville and Graham Bell, the inventors of "Visible Speech," have succeeded in teaching them to communicate by the motion of the lips. This system is now largely adopted in the government schools of this country.

dēal, ***dālen**, ***deale**, ***dealen**, ***dalen**, ***dele**, ***deilen**, *v. t. & i.* [A. S. *dēalan*; O. S. *dēliān*; Dut. *deelen*; O. H. Ger. *teilan*; Goth. *dailjan*; Icel. *dēila*; Dan. *dēle*.] Originally to *deal* and to *dole* were but two different ways of writing the same word (Trench).] [DOLE, v.]

" . . . as man *deals* with the inferior animals the Cromwellian thought himself at liberty to *deal* with the Roman Catholic."—Macaulay: Hist. Eng., ch. xix.

¶ For the difference between *deal* and *to part*, see PART.

dēal, ***dale**, ***dæl**, ***dæle**, ***deale**, ***del**, ***dele**, ***deille**, ***delle**, ***dole**, *s.* [A. S. *dæl*; Dut. & Dan. *deel*; O. H. Ger. *teil*; Ger. *theil*; Goth. *dails*=a part, a portion.] [DEAL, v., DOLE.]

I. Ordinary Language:

- *1. A share, a division, a part, a portion.

"*Dele* or parte. *Porcio.*"—Prompt. Parv.

- *2. A share, a participation in, a portion.

"Their tresour and their meles
He toke to his own *deles*."
Rich. Cœur de Lion, 2, 221.

3. The act of distributing or sharing; a dole, [DOLE.]

4. An indefinite quantity more or less; generally qualified by the adj. *great*, and is then equivalent to a considerable degree, proportion, or extent.

"Sorting and puzzling with a *deal* of glee
Those seeds of science called his A B C."
Couper: Conversation, 13, 14.

5. A business transaction; a negotiation of a character usually not creditable to the participants. (*U. S. Collog.*)

¶ **A great deal** is also used adverbially, with the sense of greatly, considerably.

"There is, indeed, store of matters, fitter and better, a great *deal*, for teachers to spend time and labor in."—Hooker.

II. Technically:

1. **Cards:** The act or process of dealing cards to the players.

2. **Carpentry:**

(1) *In this country:* A plank 12 feet long, 11 inches wide, and 2½ inches thick. Deals are sawed of other sizes, but are reduced to that cubic dimension in computing them.

(2) *In England:* Lumber not exceeding 3 inches in thickness and 9 inches wide. The word is applied especially to the wood of the fir. If the planks are 7 inches or less in width, they are called battens [BATTEN], and if less than 6 feet long, deal-ends. Fifty cubic feet of deals are a load, and 100 feet superficial are a square.

¶ Crabb thus discriminates between *deal*, *portion*, and *quantity*: "*Deal* always denotes something great, and cannot be coupled with any epithet that does not express much: *quantity* is a term of relative import; it either marks indefinitely the how, or so much of a thing, or may be defined by some epithet to express much or little: *portion* is of itself altogether indefinite, and admits of being qualified by any epithet to express much or little: *deal* is a term confined to familiar use, and sometimes substituted for *quantity*, and sometimes for *portion*. It is common to speak of a *deal* or a *quantity* of paper, a great *deal* or a great *quantity*

of money; likewise of a great *deal* or a great *portion* of pleasure, a great *deal* or a great *portion* of wealth; and in some cases *deal* is more usual than either *quantity* or *portion*, as a *deal* of heat, a *deal* of rain, a *deal* of frost, a *deal* of noise, and the like; but it is altogether inadmissible in the higher style of writing. *Portion* is employed only for that which is detached from the whole; *quantity* may sometimes be employed for a number of wholes. We may speak of a large or small *quantity* of books; a large or a small *quantity* of plants or herbs; but a large or small *portion* of food, a large or small *portion* of color." (Crabb: Eng. Synon.)

deal-apple, *s.* The cone of *Pinus sylvestris*.

deal-fish, *s.* [So named from its likeness to a deal or board.]

déan (1), ***deen**, ***deene**, ***dene**, *s.* [O. Fr. *deien*; Fr. *doyen*; Lat. *decanus*=(1) an officer over ten men, (2) a prior set over ten monks, (3) a dean; *decem*=ten.]

1. **Eccles.**: A certain ecclesiastical officer or dignitary (English Established Church) usually attached to a cathedral. Though the great body of the English clergy are connected with parishes, yet some are retained in cathedrals for the assistance of the bishop in the celebration of divine service, and in other offices. [CHAPTER.] Over these the dean presides. There are four sorts of deans and deaneries recognized by the English law. The first is a dean who has a chapter, consisting of canons, as a council assistant to the bishop in matters spiritual, relating to religion, and in matters temporal, relating to the temporalities of his bishopric. They are also responsible for the fabric and maintenance of the cathedral over which they have jurisdiction, and for the management of the cathedral estates. To them belongs also the right of electing the bishop, under a *Congé d'élire*. [CONGÉ D'ÉLIRE.] But this first class does not include deans of collegiate churches, as Westminster and Windsor, who yet have no connection with episcopal sees, nor does it include the deans of the Chapels Royal. The second sort is a dean who has no chapter and yet is prescriptive, and has cure of souls; he has a peculiar, and a court wherein he holds ecclesiastical jurisdiction, but he is not subject to the visitation of the bishop or ordinary: such is the dean of Battle in Sussex. The third dean is ecclesiastical also, but the deanery is not prescriptive but donative, nor has it any cure of souls. The fourth dean is he who is usually called the rural dean, having no absolute judicial power in himself, but he is to order the ecclesiastical affairs within his deanery and precinct, by the direction of the bishop or of the archdeacon, and is a substitute of the bishop in many cases. (Stephens: *Laws relating to the Clergy*, &c.)

"Pride may be pampered while the flesh grows lean, Humility may clothe an English dean." Couper: *Truth*, 118.

¶ **Dean of the Province of Canterbury**: The Bishop of London, by whom under a mandate from the Archbishop, the Bishops of the Province are summoned to meet in Convocation.

2. **Universities**:

(1) **American**: The secretary or registrar of a faculty or department.

(2) **English**: The head of a faculty. At Oxford and Cambridge the dean of a college is a resident Fellow, usually in Holy Orders, who is responsible for the performance of divine worship in the college chapel, and also for the discipline of the undergraduates. If the dean is a layman he appoints a chaplain.

3. **English Law**:

(1) **Dean of Faculty**: The president of an incorporation of barristers. Specially the president of the incorporation of Advocates, in Edinburgh.

(2) **Dean of the Arches**: The lay judge of the Court of Arches.

4. **Scots Law**:

Dean of a Guild:

(1) A magistrate of a royal burgh, who was also head of a guild or merchant company.

(2) The magistrate to whom it belongs to take care that all buildings within the burgh be agreeable to law, neither encroaching on private property nor on the public streets or passages; and that houses in danger of falling be thrown down. (*Erskine*.) He has his court, the Dean of Guild Court, over which he presides, and which has jurisdiction over all matters relating to buildings, weights and measures, police, &c.

5. **Mining**: The end of a level or gallery.

déan (2), *s.* [DENE.] A sandy valley; a narrow valley.

A. Ordinary Language:

I. Literally:

1. The state of being dead; that state of any animal, being, or plant in which the vital functions have totally and permanently ceased to act; the extinction of life.

"Warm'd in the brain the smoking weapon lies,
The purple death comes floating o'er his eyes,"
Pope: *Homer's Iliad*, xx. 551, 552.

2. This state personified.

"... his name that sat on him was Death, . . ."—*Rev.* vi. 8.

3. The act or state of dying; the manner of dying; decease.

"Thou shalt die the *deaths* of them that are slain in the midst of the seas."—*Ezek.* xxvii. 8.

4. The state or condition of the dead.

"In swinish sleep
Their drenched natures lie, as in a death,"
Shakespeare: *Macbeth*, i. 7.

5. That which causes death; the agent or instrument of death.

(1) Of persons:

"All the endeavors Achilles used to meet with Hector, and be the death of him, . . ."—*Broome: View of Epic Poetry.*

(2) Of things:

"And there the quiver, where now guiltless slept
Those winged *deaths* that many a matron wept,"
Pope: *Homer's Odyssey*, xii. 15, 16.

6. Mortality, destruction.

"In riddles and affairs of death,"
Shakespeare: *Macbeth*, iii. 5.

II. Figuratively:

1. A skeleton, or figure of a skeleton.

"I had rather be married to a *death's* head, with a bone in his mouth, than to either of these."—*Shakespeare: Merchant of Venice*, i. 2.

*2. Murderous proclivities or actions; murder.

"... in this, not to suffer a man of death to live."—*Bacon.*

3. Destruction; anything deadly.

"... they cried out, and said, O thou man of God, there is *death* in the pot."—*2 Kings* iv. 40.

4. Capital punishment; as, to be sentenced to death.

5. The state of being considered civilly dead.

*6. Total loss or extinction, a death-blow; as, "This was the *death* of all his hopes."

7. Anything exceedingly dreadful or dreaded.

"It was *death* to them to think of entertaining such doctrines."—*Atterbury.*

B. Technically:

I. Theology:

1. A state of spiritual alienation from God; the state of being spiritually dead.

2. Eternal separation from God, and condemnation to everlasting punishment, called the "second death" in *Rev.* ii. 11.

"We pray that God will keep us . . . from everlasting death."—*Church Catechism.*

II. Physiol.: Death sometimes happens from decay of nature, as in old age, but more frequently from accident or disease. Death has been divided into somatic and interstitial, i. e., death of the whole body, and death of a part. The three principal modes of dying begin at the heart, the brain, or the lungs. (1) (a) By syncope when the action of the heart stops from loss of blood, or decline of aortic pressure, indicated by anemia (q. v.). (b) By asphyxia, when the contractile movements of the heart stop from loss of nerve-power, indicated by fainting, as distinct from syncope. (c) By starvation, in which fainting and syncope become united. (2) Death by coma commences at the brain, indicated by profound stupor, with stertorous breathing. (3) Death by asphyxia, or suffocation, commences at the lungs, when the respiratory functions are suspended, as when the entry of air into the lungs is impeded or prevented, accompanied generally by convulsions, finally tremor of the limbs, and relaxation of the muscles and sphincters. The heart may not cease beating for three minutes and fifteen seconds, and the pulse may be even felt, after every other sign of life is gone. The physiological cause of sudden death is still very imperfectly understood. Molecular death (of the individual tissues and organs) follows more closely on somatic death in warm-blooded than in cold-blooded animals. In man the duration of the powers of the brain, generative system, and other

organs and structures, is longest when they have been exercised in moderation, and is curtailed by excess; but their entire or partial disuse does not lead to increased duration of activity, as atrophy is induced, which is injurious. When the organization has lost its vitality, and all power of action has gone, then death ensues, so that it is entirely untrue that "the dead body may have all the organization it ever had while alive." Death, then, is the cessation of vitality or organization in action.

¶ (1) *The death*: Generally means either a violent death, or one in accordance with judicial sentence.

"He that curseth father and mother, let him die the death."—*Matt.* xv. 4.

(2) *To death, To the death*: Mortally, fatally, so as to cause or be followed by death.

"A vengeful canker eat him up to death."
Shakespeare: *Sonnets*, 99.

¶ *Death* is frequently found used as an imprecation.

"Death and damnation!"—*Shakespeare: Othello*, iii. 3.

¶ Crabb thus discriminates between *death*, *decease*, *demise*, and *departure*: "*Death* is a general or a particular term; it marks in the abstract sense the extinction of life, and is applicable to men or animals, to one or many. *Departure*, *decease*, and *demise* are particular expressions, suited only to the condition of human beings. *Departure* is a Christian term, which carries with it an idea of a passage from one life to another; *decease* is a technical term in law, which is introduced into common life to designate one's falling off from the number of the living; *demise* is substituted for *decease* sometimes in speaking of princes. *Death* of itself has always something terrific in it; but the Gospel has divested it of its terrors: the hour of *departure*, therefore, for a Christian, is often the happiest period of his mortal existence. *Decease* presents only the idea of leaving life to the survivors. Of *death* it has been said, that nothing is more certain than that it will come, and nothing more uncertain than when it will come. Knowing that we have here no resting place of abode, it is the part of wisdom to look forward to our *departure*: property is in perpetual occupancy; at the *decease* of one possessor, it passes into the hands of another." (*Crabb: Eng. Synon.*)

*2. To fight or contend with arms.

"Over that his cote-armour in which he wold debate."

Chaucer: C. T., 15, 274.

¶ Crabb thus discriminates between *to debate* and *to deliberate*: "Both these words mark the act of pausing or withholding the decision, whether applicable to one or many. To *debate* supposes always a contrariety of opinion; to *deliberate* supposes simply the weighing or estimating the value of the opinion that is offered. Where many persons have the liberty of offering their opinions, it is natural to expect that there will be *debating*; when any subject offers that is complicated and questionable, it calls for mature *deliberation*. It is lamentable when passion gets such an ascendancy in the mind of any one, as to make him *debate* which course of conduct he shall pursue; the want of *deliberation*, whether in private or public transactions, is a more fruitful source of mischief than almost any other." (*Crabb: Eng. Synon.*)

(2) For the difference between *to debate* and *to consult*, see *CONSULT*.

..."—Rom. i. 14.

(2) One who fails in any duty or obligation.

"As we forgieve our *dettours*."—Wycliffe: Select Works, iii. 95.

II. *Law*: Debtors have been subjected to imprisonment in almost all countries and times. Imprisonment for debt is now abolished in the United States, except in cases where fraud is proved to have entered into matters connected with the contraction of the debt. During many centuries the law of England was that a debtor should be imprisoned. This was changed in November, 1861, when none were to be imprisoned except fraudulent debtors, and those in confinement up to that date were released. Laws passed in 1869 abolished the penalty of imprisonment even for fraudulent debtors unless in special circumstances, and those in prison were set free.

B. As adj.: Of or pertaining to a debt, as the *debtor side* of an account—the *debit-side* (*q. v.*).

"When I look upon the *debtor side*, I find such innumerable articles, that I want arithmetic to cast them up
..."—Addison.

debtor-executor, *s.*

Law: One who is at once a person's debtor and his executor when he dies. At law his appointment releases him from his debt, but equity requires him to add it to the assets of the testator's estate. (Wharton.)

Bot.: A plant which has ten stamens.

dec-ān-dri-ā, *s.* [Eng. *decander*, and Lat. adj. pl. suff. -ia.]

Bot.: The name given by Linnaeus to the tenth class of plants in his system. They are distinguished by having ten stamens.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, plt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāl; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

děc-ăn-drî-ăn, děc-ăn'-droûs, a. [Eng. *decander*; -ian, -ous.]

Bot.: Having ten stamens.

dě-câne, s. [Latin *dec(em)* = ten; suff. -ane (Chem.).]

Chem.: A hydrocarbon ($C_{10}H_{22}$), boiling between 155° and 162°. Obtained by heating turpentine oil to 275° for twenty-four hours with sixty parts of hydriodic acid. It can also be obtained from Cubebene (q. v.).

děc-ăn-gu-lar, a. [Gr. *deka* = ten, and Eng. *angular* (q. v.).]

Geom.: Having ten angles.

dě-cânt', v. t. [Fr. *décanter*, from Ital. *decantare*, from *de* = down, and *canto* = a side, a corner; hence, to lay or lower a bottle on its side.] To pour out gently; to pour wine from the bottle into another vessel, as a decanter (q. v.).

"They attend him daily as their chief,
Decant his wine, and carve his beef." *Swift*.

***dě-cânt-âte (1), v. t.** [Ital. *decantare*.] To decant, to pour out.

***dě-cânt-âte (2), v. t. & i.** [Lat. *decantatus*, pa. par. of *decanto*.]

1. **Trans.**: To speak much of, to celebrate.

"Yet were we not able sufficiently to decantate, sing, and set forth his praises."—*Bacon: Works*, l. 182.

2. **Intrans.**: To speak much or often.

"These men impudently decantate against the ceremonies."—*Gauden: Tears of the Church*, p. 99.

***dě-cânt-â-tion, s.** [Fr.]

1. **Ord. Lang.**: The act of decanting or pouring a liquid from one vessel to another; the pouring of a clear liquid from the sediment. In starch-making and operations on a similar scale it is performed by siphons.

2. **Chem.**: The separation of a clear liquid from a precipitate or deposit by inclining the vessel and suffering the liquid to run out. The glass should not be filled above three-quarters of its depth, as otherwise the stream of liquid which runs out on inclining the vessel makes too sharp an angle with the side, and a portion of it may run down the edge. A wet glass rod should be held, in a nearly vertical position, against the edge of the glass, so as to cause the stream of liquid to run down it. This prevents the liquid from running down the sides of the vessel, and also causes it to fall into the lower vessel without splashing.

dě-cânt-ěd (1), pa. par. or a. [DECANT.]

***dě-cânt-ěd (2), a.** [Lat. *decanto* = to speak much of.] Commonly spoken or reported.

"This decanted notion of a popular action."—*Forbes: Suppl. Decrees*, p. 29.

dě-cânt-ěr, s. [Eng. *decant*; -er.]

1. One who decants liquors.

2. A large glass vessel used to contain wine which has been decanted from the lees, &c., and from which it can be poured into the wine-glasses.

dě-cânt-îng, pr. par., a. & s. [DECANT.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of pouring liquors gently from one vessel into another, so as to free them from the lees, &c.

děc-ăph-yl-lôûs, a. [Gr. *deka* = ten, and *phyl-lon* = a leaf.]

Bot.: An epithet applied to those flowers, the perianths of which have ten leaves.

***dě-căp-îl-âl-ize, v. t.** [Pref. *de* = away, from; Eng. *capital*; suff. -ize.] To reduce from the rank or position of capital.

"... if Rome could not be decapitalized without war ..."—*London Daily Telegraph*.

dě-căp-îl-âte, v. t. [Low Lat. *decapitatus*; Lat. *de* = away, and *caput* (genit. *capitis*) = the head.] To cut off the head or top; to behead.

"Hedge-row ashes may the oftener be decapitated, ..."—*Evelyn: Silva*, l. 1, § 2.

dě-căp-îl-ăt-ěd, pa. par. or a. [DECAPITATE.]

dě-căp-îl-ăt-îng, pr. par., a. & s. [DECAPITATE.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of cutting off the head or top; decapitation.

dě-căp-îl-â-tion, s. [Fr.] The act of cutting off the head; beheading.

"... corporal punishment and decapitation."—*Lewis: Cred. Early Roman Hist.* (1855), ch. xi, § 1, vol. i, p. 415.

děc-ă-pôd, a. & s. [Gr. *deka* = ten, *pous* (genit. *podos*) = a foot.]

A. As adj.: Of or pertaining to the Decapoda (q. v.).

"Associated with the skeletons of the fishes are the remains of some new phyllopod and decapod crustaceans."—*London Times*.

B. As subst.: One of the Decapoda.

dě-căp-ô-dă, s. pl. [DECAPOD.]

Zoology:

1. A section of one of the great classes (Cephalopoda) into which the sub-kingdom Mollusca is divided. The Decapoda have eight arms, and two tentacles, originating within the circle of the arms, making ten so-called feet or cephalic processes. The tentacles are longer than the arms, are more or less retractile, and serve to seize prey which may be beyond the reach of the latter, or to moor the animal safely in a stormy sea. The shell is horny and translucent in the Calamaries, when it is termed the pen or *gladius*, a calcareous bone, so called, or *sepiostaire* in the Cuttle-fishes, and a delicate spiral-chambered tube in Spirula. In all it is internal, and, with the exception of Spirula, unattached to the body by any muscles, but merely loosely lodged in the mantle. The shells of the fossil forms present various modifications in shape. The Decapods chiefly frequent the open sea, appearing periodically, like fishes, in great shoals on the coasts and banks, either in pursuit of food or, in the case of females, when seeking for favorable spawning places. The families are (1) Teuthidae, (2) Sepiitidae, (3) Sepiidae, (4) Spirulidae (q. v.).

2. The highest order of Crustaceans. [CRUSTACEA.] Members of this order have five pairs of ambulatory thoracic legs, of which the first pair is modified to form nipping-claws, some of the other pairs behind this being chelate as well. The whole of the thoracic segments are united with those of the head into a single piece (*cephalothorax*), and the gills are contained in cavities at the sides of the thorax. The order Decapoda includes the greater number of the stalk-eyed Crustaceans. Their earliest appearance in geological time is in the Carboniferous formation, where they are represented by the genus *Anthracopalemon*, while the higher forms of the order are very abundant in Tertiary rocks, and especially in the London clay.

3. Decapoda are subdivided into (1) Brachyura, Crabs, (2) Anomura, Hermit Crabs, (3) Macroura, Lobsters and Shrimps.

dě-căp-ô-dal, a. [Eng. *decapod*; -al.] Of or belonging to the order of Decapoda; ten-footed.

dě-căp-ô-dôis, a. [Eng. *decapod*; -ous.] The same as DECAPODAL (q. v.).

dě-car-bôn-âte, v. t. [Pref. *de* = away, from, and Eng. *carbonate* (q. v.).] To rid or clear of carbonic acid.

dě-car-bôn-îz-â-tion, s. [Pref. *de* = away, from, and Eng. *carbonization* (q. v.).] The act or process of ridding or clearing of carbon; as in the process of conversion of cast-iron into malleable iron or steel. [CARBONIZING-FURNACE.] Cast-iron particles are exposed to a strong heat in contact with some peroxide of iron, by which it is deprived of its carbon and rendered tough.

dě-car-bôn-ize, v. t. [Pref. *de* = away, from, and Eng. *carbonize* (q. v.).] To rid or clear of carbon.

dě-car-bôn-îz-ěd, pa. par. or a. [DECARBONIZE.]

dě-car-bôn-îz-îng, pr. par., a. & s. [DECARBONIZE.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act or process of freeing from carbon; decarbonization.

decarbonizing-furnace, s. A furnace in which superfluous carbon is burned out of a metal. The term is a very general one, and may include the boiling and puddling furnaces in which cast-iron is heated to make the metal malleable.

dě-car-bûr-îz-â-tion, s. [Pref. *de* = away, from, and Eng. *carburation* (q. v.).] The act or process of freeing from carbon; decarbonization.

"A new process for the production of steel by the partial decarbonization of cast iron."—*Academy*, Feb. 15, 1871, p. 141.

***dě-card', v. t. & i.** [DISCARD.]

A. Transitive:

1. **Ord. Lang.**: To cast off, to discard.

"You have cast those off, discarded them."—*Fletcher*.

2. **Cards**: To discard or throw away a card from a hand.

B. Intransitive:

Cards: To discard.

"Can you discard, madam?"

Dumb Knight (Dodsley, iv. 485).

***dě-car-din-âl-ize, v. t.** [Pref. *de* = away, from, and Eng. *cardinalize* (q. v.).] To remove or degrade from the rank or position of cardinal. (*Howell*.)

***dě-car-nâ-tion, s.** [Formed with the pref. *de* = away, from, on analogy of *incarnation* (q. v.).] The putting off or laying aside of carnality or fleshly lusts.

"For God's incarnation inableneth man for his own decarnation, as I may say, and devesture of carnality."—*Mountgout: Devout Essays*, Treat. ii, § 1.

***děc-ă-stich, s.** [Gr. *deka* = ten, and *stichos* = a row, a line, a verse.] A verse or short poem consisting of ten lines.

"According to your friendly request, I send you this decastich."—*Howell: Lett.*, l. vi. 27.

děc-ă-styl, a. & s. [Gr. *deka* = ten, and *stulos* = a pillar, a column.]

A. As adj.: Applied to those temples which have a portico containing ten columns in a line; containing ten columns.

B. As subst.: A portico or colonnade consisting of ten columns in front.

děc-ă-syl-lăb-lyc, a. [Gr. *deka* = ten, and Eng. *syllabic* (q. v.).] Having or containing ten syllables.

"Not that Dryden's rhyme composition is seen so clearly in his odes as in his decasyllabic poems."—*Athenæum*, May 7, 1881.

dě-cây', *dē-căle, v. i. & t. [O. Fr. *decaer*, from Lat. *de* = down, from, and *cado* = to fall.]

A. Intransitive:

1. To decline gradually from a state of soundness or perfection to one less sound or perfect; to become gradually impaired; to fall or waste away, to deteriorate.

"But thou wast worthy ne'er to have decayed."
Couper: On the Death of the University Beadle.

2. To fade away, to pass away.

"Till in the vault of heaven the stars decay."
Pope: Homer's Odyssey, xi. 468.

B. Transitive:

1. To impair; to make less sound or perfect; to cause to fail.

"Infirmité, that decays the wise, doth ever make the better fool."—*Shakespeare: Twelfth Night*, l. 5.

*2. To destroy.

"... every day that comes, comes to decay
A day's work in him." *Shakespeare: Cymbeline*, i. 5.

*3. To slacken, to abate.

"Decayeth his pace, as a man weary."
Putterham: Eng. Poetie, bk. ii, ch. iii.

dě-cây', *dē-căle, *dē-căye, s. [DECAY, v.]

1. The act or state of declining gradually from a state of soundness or perfection to one less sound or perfect; deterioration, wasting, or failing.

"Has life's fair lamp declin'd by slow decays?"
Pope: Homer's Odyssey, xi. 208.

2. Anything which causes decay or deterioration.

"... he that plots to be the only figure among cyphers, is the decay of a whole age."—*Bacon*.

*3. A mark or sign of decay or deterioration.

"She has been a fine lady, and paints and hides her decays very well."—*Ben Jonson*.

4. A consumption.

"They have a charm also whereby they try if persons be in a decay or not, ..."—*Brand: Orkney*, p. 62.

5. A decline in worldly prosperity; want.

"And if thy brother be waxen poor, and fallen in decay with thee; then thou shalt relieve him."—*Levit. xxv. 35*.

[Crabb thus discriminates between *decay*, *decline*, and *consumption*: "The direction expressed by both these actions [*decay* and *decline*] is very similar; it is a sideward movement, but *decay* expresses more than *decline*. What is *decayed* is fallen or gone; what *declines* leads toward a fall or is going; when applied, therefore, to the same objects, a *decline* is properly the commencement of a *decay*. By *decay* things lose their perfection, their greatness, and their consistency; by *decline* they lose their strength, their vigor, and their luster; by *consumption* they lose their existence. *Decay* brings to ruin; *decline* leads to an end or expiration. There are some things to which *decay* is peculiar, and some things to which *decline* is peculiar, and other things to which both *decay* and *decline* belong. The corruption to which material substances are particularly exposed is termed *decay*; the close of life, when health and strength begin to fall away, is termed the *decline*; the decay of states in the moral world takes place by the same process as the decay of fabrics in the natural world; the decline of empires, from their state of elevation and splendor, is a natural figure drawn from the decline of the setting sun. Consumption is seldom applied to anything but animal bodies." (*Crabb: Eng. Synon.*)

***dě-cây'-ă-ble, a.** [Eng. *decay*; -able.] Capable of or liable to decay.

"Were his strength decayable with time."—*Adams: Works*, iii. 3.

bôl, bôy; pôut, jôw!; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aș; expect, Xenophon, exist. ph = f.
-cian, -tian = șan. -tion, -sion = șun; -tîon, -șion = zhûn. -tious, -cious, -sious = șûs. -ble, -dle, &c. = bel, del.

dě-cây'ed, *pa. par. or a.* [DECAY, *v.*]
dě-cây-êd-něss, *s.* [Eng. *decayed*; -*ness*.] A state of being decayed or deteriorated.

"... weakness and sickness of body, *decayedness* of understanding, . . ."—*Whole Duty of Man, Duty to Parents*, § xiv.

dě-cây-êr, *s.* [Eng. *decay*; -*er*.] That which causes decay.

dě-cây-lîng, *pr. par., a. & s.* [DECAY, *v.*]
A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As subst.*: The act or state of becoming decayed; decay.

"These indeed are not
 So subject to decayings as the face."
Massinger: City Madam, i. 1.

dě-cêase, *s.* [Fr. *décès*, from Lat. *decessus*=a departing: *de*=away, from, and *cedo*=to go.] Death; departure from this life.

"Lands are by human law, in some places, after the owner's *decease*, divided unto all his children . . ."—*Hooker*.

¶ For the difference between *decease* and *death*, see **DEATH**.

dě-cêase, *v. i.* [DECEASE, *s.*] To depart this life, to die.

"... the first, when he had married a wife, *deceased*, and, having no issue, left his wife . . ."—*Matt. xxii. 25*.

dě-cêas'ed, ***deceassyd**, *a. & s.* [Eng. *decease*(e); -*ed*.]

A. *As adjective*:

*1. *Gen.*: Departed, gone, passed away.

"O all ye blest ghosts of deceased loves."
F. Beaumont: An Elegy.

*2. *Spec.*: Departed this life; dead.

B. *As subst.*: A person who has died.

dě-cêas-lîng, *pr. par., a. & s.* [DECEASE, *v.*]

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As subst.*: Decease, death.

***dě-cêde**, *v. i.* [Lat. *cedo*: *de*=away, from, and *cedo*=to go, to yield.] To go away, to depart, to secede.

"Moderation in what they *decided* from Rome."
Fuller: Ch. Hist., V. iii. 25.

***dě-cêd-ent**, *a. & s.* [Lat. *decidens*, *pr. par. of de-cedo*=to go away, to depart.]

A. *As adj.*: Departing, going away, removing.

B. *As substantive*:

1. One who has given up an office.

2. Deceased, dead.

***de-cêipt**, *s.* [DECEIT, *s.*]

dě-cêit, ***de-cêipt**, ***de-cêite**, ***de-ceyt**, ***de-ceyte**, ***desceit**, ***dessate**, ***dissait**, ***dyssayt**, *s.* [O. Fr. *decepte*, from Lat. *deceptus*, *pa. par. of decipio*=to deceive.] [DECEIVE.]

1. *Ordinary Language*:

1. The act of deceiving, misleading, or cheating any person; any act or practice intended to cause what is false to pass for what is true; fraud, cheating, double-dealing.

"Deceyte or begyllynge. *Fraus*."—*Prompt. Parv.*

2. That which deceives, misleads, or cheats; deceitfulness, trickery, deception, duplicity.

3. A stratagem or artifice.

"His demand
 Springs not from Edward's well-meant honest love,
 But from deceit bred by necessity."
Shakesp.: Henry VI., Pt. III., iii. 3.

II. Law: Any trick, device, plot, collusion, craft, or false representation intended to defraud another.

"He is a merchant, the balances of *deceit* are in his hand . . ."—*Hos. xii. 7*.

¶ (1) Crabb thus discriminates between *deceit* and *deception*: "A *deceiver* is full of *deceit*; but a *deception* may be occasionally practiced by one who has not this habit of *deceiving*. *Deceit* is a characteristic of so base a nature, that those who have it practice every species of *deception* in order to hide their characters from the observation of the world. The practice of *deceit* springs altogether from a design, and that of the worst kind; but a *deception* may be practiced from indifference, if not innocent motives, or may be occasioned even by inanimate objects. A person or a [course of] conduct is *deceitful*: an appearance is *deceptive*."

(2) He thus discriminates between *deceit*, *duplicity*, and *double-dealing*: "The former two may be applied either to habitual or particular actions, the latter only to particular actions. There may be much *deceit* or *duplicity* in a person's character or in his proceedings; there is *double-dealing* only where dealing goes forward. The *deceit* may be more or less veiled; the *duplicity* lies very deep,

and is always studied whenever it is put into practice. *Duplicity* in reference to actions is mostly employed for a course of conduct; *double-dealing* is but another term for *duplicity* on particular occasions. Children of reserved characters are frequently prone to *deceit*, which grows into consummate *duplicity* in ripper years; the wealthy are often exposed to much *duplicity* when they choose their favorites among the low and ignorant; nothing gives rise to more *double-dealing* than the fabrication of wills."

(3) He thus further discriminates between *deceit*, *fraud*, and *guile*: "*Deceit* is here, as in the preceding article, indeterminate when compared with *fraud*, which is a specific mode of deceiving; *deceit* is practiced only in private transactions; *fraud* is practiced toward bodies as well as individuals, in public as well as private; a child practices *deceit* toward its parents; *frauds* are practiced upon the government, on the public at large, or on tradesmen; *deceit* involves the violation of moral law, *fraud* that of the civil law. A servant may *deceive* his master as to the time of his coming or going, but he *defrauds* him of his property if he obtains it by any false means. *Deceit*, as a characteristic, is indefinite in magnitude; *guile* marks a strong degree of moral turpitude in the individual. The former is displayed in petty concerns; the latter, which contaminates the whole character, displays itself in inextricable windings and turnings that are suggested in a peculiar manner by the author of all evil." (Crabb: *Eng. Synon.*)

dě-cêit-fûl, ***dyseatful**, *a.* [English *deceit*; -*ful*(l).]

1. Full of deceit or deception; deceiving, cheating, fraudulent.

"... neither shall a *deceitful* tongue be found in their mouth."—*Zeph. iii. 13*.

2. Delusive, disappointing expectation.

"Conceit *deceitful*, so compact, so kind."
Shakesp.: Rape of Lucrece, 1,423.

dě-cêit-fûl-lîy, *adv.* [Eng. *deceitful*; -*ly*.] In a deceitful manner; with intent to deceive; fraudulently.

"And after the league made with him he shall work *deceitfully*, . . ."—*Dan. xi. 23*.

dě-cêit-fûl-něss, ***dyseatfulness**, *s.* [English *deceitful*; -*ness*.] The quality or state of being deceitful; a tendency to deceive; a deceitful or fraudulent habit.

"... the *deceitfulness* of riches, . . ."—*Matt. xiii. 22*.

***dě-cêit-lěss**, *a.* [Eng. *deceit*; -*less*.] Free from deceit or deception; guileless, honest, true.

"... he that should call Satan an unclean devil should imply that some devil is not unclean; or *deceivable* lusts, some lusts *deceitless*!"—*Bp. Hall: Old Rel.*, § 2.

dě-cêiv-a-ble, ***de-ceyv-a-ble**, ***disseyvable**, *a.* [Eng. *deceivable*(e); -*able*.]

*1. Capable of being deceived; open or subject to deceit.

"Man was not only *deceivable* in his integrity, but the angels of light in all their clarity."—*Broune: Vulgar Errors*.

*2. Deceitful, fraudulent, deceptions.

"... there's something in't
 That is *deceivable*."
Shakesp.: Twelfth Night, iv. 3.

dě-cêiv-a-ble-něss, *s.* [Eng. *deceivable*; -*ness*.] The quality or state of being deceivable.

"And with all *deceivableness* of unrighteousness in them that perish, . . ."—*2 Thess. ii. 10*.

dě-cêiv-a-blîy, *adv.* [Eng. *deceivable*(e); -*ly*.] In a deceivable or deceitful manner; deceitfully.

***dě-cêiv-ançe**, ***desceyvance**, *s.* [O. Fr. *deceyance*.] Deceit, deceitfulness.

"Here of a *desceyvance* thei conseld him to do."

Robert de Brunne, 133.

***dě-cêiv-ant**, ***dě-cêiv-aunt**, *a.* [O. Fr. *decevant*.] Deceitful.

"That thou be nought *deceivaunt*."

Gower, i. 82.

dě-cêive, ***decayve**, ***deceyve**, ***disceyve**, ***disseyve**, ***dyssayve**, ***dysave**, ***dyssave**, *v. t. & i.* [O. Fr. *deceivre*, *deceveir*, from Lat. *decipio*=to take away, deceive: *de*=away, from, and *cipio*=to take.]

A. Transitive:

1. To mislead intentionally; to cause to mistake; to impose upon; to cheat, to delude.

2. To disappoint, to frustrate one's expectation or hope.

"I now believ'd
 The happy day approach'd, nor are my hopes *deceiv'd*."
Dryden.

¶ With of before the thing expected.

"The Turkish general, *deceiv'd* of his expectation, withdrew his fleet twelve miles off."—*Knolles*.

3. To deprive or take from stealthily, to rob.

"... so *deceive* and rob them of their nourishment."
Bacon.

*4. To while away, to cause to pass pleasantly.

"These occupations oftentimes *deceived* the listless hour."
Wordsworth: (Ogilvie)

B. Intrans.: To cheat, to mislead, to cause to mistake, to delude.

"Can those too flatter, and can Jove *deceive*?"
Pope: Homer's Iliad, xii. 186.

¶ Crabb thus discriminates between *deceive*, *to delude*, and *to impose upon*: "Falsehood is the leading feature in all these terms: they vary, however, in the circumstances of the action. To *deceive* is the most general of the three: it signifies simply to produce a false conviction; the other terms are properly species of *deceiving*, including accessory ideas. A *deception* does not always suppose a fault on the part of a person *deceived*, but a *delusion* does. A person is sometimes *deceived* in cases where *deception* is unavoidable; he is *deluded* through a voluntary blindness of the understanding. . . . *Deception* is practiced by an individual on himself or others; a *delusion* is commonly practiced on one's self; an *imposition* is always practiced on another. Men *deceive* others from a variety of motives: they always *impose upon* them for purposes of gain or the gratification of ambition. Men *deceive* themselves with false pretenses and false confidence; they *delude* themselves with vain hopes and wishes." (Crabb: *Eng. Synon.*)

dě-cêived, *pa. par. or a.* [DECEIVE.]

dě-cêiv-êr, ***de-ceyv-ar**, ***deceyver**, ***disseyver**, *s.* [Eng. *deceive*(e); -*er*.] One who deceives; a cheat.

"For there are many unruly and vain talkers and *deceivers*, . . ."—*Titus*, i. 10.

¶ Crabb thus discriminates between *deceiver* and *impostor*: "*Deceiver* is a generic term; *impostor* specific: every *impostor* is a species of *deceiver*: the words have, however, a distinct use. The *deceiver* practices *deception* on individuals; the *impostor* only on the public at large. The false friend and the faithless lover are *deceivers*; the assumed nobleman who practices *frauds* under his disguise, and the pretended prince who lays claim to a crown to which he was never born, are *impostors*." (Crabb: *Eng. Synon.*)

***dě-cêiv-êr-le**, *s.* [Eng. *deceive*; -*rie*=*-ry*.] A course of deceitful conduct.

dě-cêiv-lîng, *pr. par., a. & s.* [DECEIVE.]

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As subst.*: The act of misleading, cheating, or deluding; a deceit.

"... they everlastingly perish in their own *deceivings*."—*Bunyan: Pilgrim's Progress*, pt. i.

dě-cêm, *a.* [Lat.] A numerical adjective, ten, which is largely used in composition in English, with the meaning of *ten*, *tenth*, or *tenfold*.

Dě-cêm-běr, *s.* [Lat.]

1. *Originally*: The tenth month of the year, the Roman year beginning in March, and not, as with us, in January.

2. *Now*: The twelfth and last month of the year, when the sun is at its greatest distance south of the equator. It contains thirty-one days.

***Dě-cêm-běr-lîy**, *a.* [Eng. *December*; -*ly*.] Like December; wintry, cold.

"The many bleak and *decemberly* nights of a seven years' widowhood."—*Sterne: Tristram Shandy*, v. 208.

dě-cêm-děn-tâte, *a.* [Lat. *decem*=ten, *dentatus*=toothed, *dens*=a tooth.] Having ten teeth or points.

dě-cêm-fîd, *a.* [Lat. *decem*=ten, and *fido* (perf. tense *fidi*)=to cut, to divide.]

Bot.: An epithet applied to the perianths of flowers which are divided into ten divisions or parts; ten-cleft.

dě-cêm-lôc-u-lâr, *adj.* [Latin *decem*=ten, *locul(us)*=a little bag, a cell, and Eng. adj. suff. -*ar*.]

Bot.: Ten-celled; having ten receptacles or cells for seeds.

***dě-cêm-pě-da**, *s.* [Lat., from *decem*=ten, and *pes* (genit. *pedis*)=a foot.] A ten-foot rod, used by surveyors and architects in taking measurements.

***dě-cêm-pě-dal**, *a.* [Lat. *decem*=ten, *pedalis*=of the length of a foot, *pes*=a foot.] Ten feet in length.

***dē-ċeņce**, *s.* [DECENCY.]

dē-ċeņ-ċy, ***dē-ċeņ-āle**, *s.* [Fr., from Lat. *decencia*=what is becoming, neut. pl. of *decens*, pr. par. of the imp. verb *dececi*=it is becoming.]

*1. The quality or state of being decent or becoming; suitability to character; propriety.

"And must I own, she said, my secret smart, What with more decency were in silence kept?"—*Dryden: Virgil's Æneid*, x. 95, 96.

2. Propriety of form; proper form or formality; becoming manners or behavior, decorum.

" . . . the offices of religion stript of all the external decencies of worship, . . ."—*Atterbury*.

3. Spec.: Decent or modest words or actions; a freedom from anything obscene or ribald.

"Immodest words admit of no defence; For want of decency is want of sense."—*Roscommon: Essay on Translated Verse*.

¶ Crabb thus discriminates between *decency* and *decorum*: "*Decency* respects the conduct; *decorum* the behavior; a person conducts himself with *decency*; he behaves with *decorum*. *Indecency* is a vice; it is the violation of public or private morals; *indecorum* is a fault; it offends the feelings of those who witness it. Nothing but a depraved mind can lead to *indecent* practices; indiscretion and thoughtlessness may sometimes give rise to that which is *indecorous*. *Decency* enjoins upon all relatives, according to the proximity of their relationship, to show certain marks of respect to the memory of the dead: regard for the feelings of others enjoins a certain outward *decorum* upon every one who attends a funeral." (Crabb: *Eng. Synon.*)

dē-ċeņe, *s.* [Lat. *decem*=ten; Eng. suff. -ene.] Chem.: A hydrocarbon, C₁₀H₁₈. Obtained, along with decene, C₁₀H₁₆, by heating turpentine oil for some hours with twenty parts of hydriodic acid. It boils at 165°, and has an alliaceous odor.

"... who *decides* so often, and who examines so seldom, ..."—*Pope: Homer's Odyssey* (Postscript).

*2. To make up one's mind on a point; to come to a decision.

*3. To be determined or settled.

"At last I thought, Since ye are thus divided, I print it will; and so the case *decided*."

Bunyan: Apology.

† Crabb thus discriminates between *determine*, and *to conclude upon*: "The idea of bringing a thing to an end is common to the signification of all these words; but *decide* expresses more than *determine*, and *determine* more than *conclude*. *Decide* and *determine* are both employed in matters relating to ourselves or others; *conclude* is employed in matters that respect the parties only who *conclude*. As it respects others, to *decide* is an act of greater authority than to *determine*; a parent *decides* for his child; a subordinate person may *determine* sometimes for those who are under him in the absence of his superiors. In all cases, to *decide* is an act of greater importance than to *determine*. The nature and character of a thing is *decided upon*; its limits or extent are *determined on*. A judge *decides on* the law and equity of the case; the jury *determine as to* the guilt or innocence of the person. An individual *decides in* his own mind on any measure, and the propriety of adopting it; he *determines in* his own mind as to how, when, and where it shall be commenced. To *determine* and *conclude* are equally practical; but *determine* seems to be more peculiarly the act of an individual; *conclude* may be the act of one or many. We *determine by* an immediate act of the will; we *conclude on* a thing by interference and deduction. Caprice may often influence in *determining*; but nothing is *concluded on* without deliberation and judgment. Many things may be *determined on* which are either never put into execution, or remain long unexecuted; but that which is *concluded on* is mostly followed by immediate action. To *conclude on* is properly to come to a final *determination*." (Crabb: *Eng. Synon.*)

dē-çid-ëd, *pa. par.* or *a.* [DECIDE.]

A. As pa. par.: In senses corresponding to those of the verb.

B. As adjective:

1. Of things:

(1) Settled, determined, adjudged.

(2) Clear, evident, unambiguous; that cannot be doubted or mistaken.

"... every member of an oppressed church is a man who has a very decided preference for that church."—*Macaulay: Hist. Eng.*, ch. xiii.

C. As subst.: The act of determining or settling a case, question, or contention; decision.

dē-çid-îng-lý, *adv.* [Eng. *deciding*; -ly.] Decisively, decidedly.

1. Botany:

(1) (*Of leaves, &c.*): Falling, not permanent; an epithet applied to those organs which detach themselves after fulfilling their functions. Most of the trees of this country have deciduous leaves. Those trees which are called evergreen, as the Pines and

(3) Strong, determined, resolute.

"... compelled the Privy Council to take *decided steps*."—*Macaulay: Hist. Eng.*, ch. xiii.

2. *Of persons*: Determined, resolute, unhesitating, unwavering.

† (1) Crabb thus discriminates between *decided*, *determined*, and *resolute*: "A man who is *decided* remains in no doubt; he who is *determined* is uninfluenced by the doubts or questions of others; he who is *resolute* is uninfluenced by the consequences of his actions. A *decided* character is at all times essential for a prince or a minister, ... a *determined* character is essential for a commander, or any one who has to exercise authority; a *resolute* character is essential for one who is engaged in dangerous enterprises. Pericles was a man of a *decided* temper which was well fitted to direct the affairs of government in a season of turbulence and disquietude; Titus Manlius Torquatus displayed himself to be a man of a *determined* character, when he put to death his victorious son for a breach of military discipline; Brutus, the murderer of Caesar, was a man of *resolute* temper."

(2) He thus discriminates between *decided* and *decisive*: "*Decided* marks that which is actually decided; *decisive* that which appertains to decision. *Decided* is employed for persons or things; *decisive* only for things. A person's aversion or attachment is *decided*; a sentence, a judgment, or a victory is *decisive*. A man of a *decided* character always adopts *decisive* measures. It is right to be *decidedly* adverse to everything which is immoral; we should be cautious not to pronounce *decisively* on any point where we are not perfectly clear and well grounded in our opinion." (Crabb: *Eng. Synon.*)

dē-çid-ëd-lý, *adv.* [Eng. *decided*; -ly.] In a decided manner; clearly, plainly, unmistakably.

(1) *Decima plena de tonis*: A major tenth.

(2) *Decima non plena de tonis*: A minor tenth.

(3) *Decima quarta*: A fourteenth, or octave of the seventh.

(4) *Decima quinta*: A fifteenth or double octave.

(5) *Decima tertia*: A thirteenth, or octave of the sixth. (*Stainer & Barrett*.)

dēç-i-mäl, *a. & s.* [Lat. *decimus* = the tenth.]

A. As adjective:

I. Ordinary Language:

1. Of or pertaining to ten; counted or proceeding by tens.

"... it is hard to go beyond eighteen, or, at most, four-and-twenty *decimal* progressions, without confusion."—*Locke*.

*2. Of or pertaining to tithes.

"Causes testamentary, *decimal*, and matrimonial."—*Heylin: Hist. of Presbyt.*, 469. (*Davies*.)

II. *Math.*: [DECIMAL ARITHMETIC.]

B. As substantive:

*1. Any number expressed in a decimal notation, on a scale of tens.

*2. A decimal fraction (q. v.).

decimal arithmetic.

Mathematics:

*1. The common system of arithmetic, in which the figures represent a different value, progressing or decreasing by tens: the value increasing tenfold for each place nearer to the left hand, and decreasing tenfold for each place nearer the right hand.

*2. That part of the science of numerical calculation which treats of decimal fractions.

decimal fraction.

Math.: A fraction whose denominator is 10, or some power of ten, that is some multiple of 10, into itself, as 100, 1,000, &c. Thus $\frac{3}{10}$, $\frac{1}{100}$, $\frac{1}{1000}$ are decimal fractions, but for convenience the denominator is usually omitted, and its place supplied by a dot or point placed on the left hand side of as many figures of the numerator as there are ciphers in the denominator: thus the fractions given above are usually written $\frac{3}{10}$, $\frac{1}{100}$, ciphers being added on the left hand side where the number of figures in the numerator is not equal to that of the ciphers in the denominator.

decimal measure. A measure, the unit of which is divided into ten equal parts.

decimal notation.

Math.: The system of numerical calculation by tens.

"... it is a species of order extremely obvious to all who use the *decimal notation*."—*Burke: Abridg. of Eng. History*, bk. ii., ch. vii.

decimal system. A system of weights and measures in which the values of the several weights, &c., proceed by multiples of ten. [METRIC SYSTEM.]

"And claims for ever, as his royal right, The event and sure decision of the fight."—*Couper: Expostulation*, 363.

II. Fig.: The quality of being decided; a decided, resolute, or determined character; resolution, firmness.

B. Law: The judgment given in a court of law.

¶ Crabb thus discriminates between *decision*, *judgment*, and *sentence*: "*Decision* conveys none of the collateral ideas which are expressed by *judgment* and *sentence*; a *decision* has no respect to the agent; it may be said of one or many; it may be the *decision* of the court, of the nation, of the public, of a particular body of men, or of a private individual; but a *judgment* is given in a public court, or among private individuals: a *sentence* is passed in a court of law, or at the bar of the public. A *decision* specifies none of the circumstances of the action; it may be a *decision* according to one's caprice, or after mature deliberation; a *judgment* is always passed either in a court of law, and consequently by virtue of authority; or it is passed by an individual by the authority of his own *judgment*: a *sentence* is always passed by the authority of law, or the will of the public." (Crabb: *Eng. Synon.*)

dē-ql'-sive, a. [Fr. *décisif*, from Lat. *decisus*, from *decido*=to decide (q. v.).]

¶ Decks may run from stem to stern, or be but partial. Some fishing-craft have a partial deck, forming a cuddy. Vessels are classed, for some purposes, by the number of their decks; as, single-decked, two-decked, three-decked. In three-decked ships the decks above the water-line are known as the upper or spar, main, middle, gun or lower deck. In two-decked ships, the upper or spar, main, and gun-deck. In frigates and merchant-vessels, the upper and main decks. The deck next below the water-line is the orlop-deck in two or three-deckers, but is known as the lower deck in vessels of the lower grades. The after part of the orlop-deck is the cock-pit. A passage round the orlop-deck, to get at the ship's side for repairs during action, is called the wing-passage. On this deck are the cabins and berths of officers and men. A complete deck over the main-deck is the spar or flush-deck. The fore-castle is the foremost part, and the quarter-deck the aftermost part, of the spar-deck; the waist is the space amidships. A small deck at the after end is the poop or round-house, and usually extends to the mizzen. Above it is the poop-deck. A similar deck at the forward end is called the topgallant-fore-castle. A transverse deck extending across the middle of the vessel is called a hurricane-deck, bridge-deck, or bridge. It is common in steam-vessels, covering the space below the paddle-boxes. Detached buildings on a deck are deck-houses. The openings in a deck are ladder-ways or hatchways. *Tween-decks* is the space below the spar-deck. The former is covered by a hood or covering called a companion. The coverings of a hatchway are hatches. The raised ledges around the hatchway are coamings in the fore and aft direction; head-ledges in the parts athwartships. Glasses inserted in holes made in a deck are called deck-lights, and serve to light cabins below. (Knight.)

B. As adjective:

¶ (1) Declaration of Independence:

United States History: After the outbreak of hostilities between the American colonies and the mother country, it became necessary to lay before the world a statement of the causes leading up to and justifying this appeal to arms on the part of the colonists, and raising the revolt above the crime of treasonous rebellion. A committee was appointed by the state delegates who had met to formulate a plan of action, and to this committee, of which Thomas Jefferson, of Virginia, was the leading spirit, was intrusted the task of drawing up a declaration explanatory and justificatory of the position taken by the colonists. The declaration is said to have been written by Jefferson, although it is alleged that the influence of Thomas Paine is clearly to be discerned in its text. After long debate, and great hesitation, the members of the congress affixed their names to the paper, and on the 4th of July, 1776, was given to the world the document now known everywhere as the palladium of this great republic, and of which the great English historian, Henry Thomas Buckle, says:

"In 1776 the Americans laid before Europe that noble Declaration, which ought to be hung in the nursery of every king, and blazoned on the porch of every royal palace."—Buckle.

(2) Declaration of Rights:

Eng. Hist.: A declaration drawn up by Parliament, and presented to William III. and Mary on their acceptance of the Crown of England, 1689. In it Parliament claimed the right of Englishmen to keep arms for their own defense; that the election of members of Parliament ought to be free; that no excessive fines or unusual punishments should be inflicted; that money should not be raised without the consent of Parliament; that a standing army must not be raised or kept up in times of peace without the consent of Parliament, &c. These articles were afterward embodied in the Bill of Rights. [BILL, B. II.]

"The Declaration of Rights was therefore turned into a Bill of Rights."—Macaulay: *Hist. Eng.*, ch. xiv.

(2) Declaration of Indulgence:

Eng. Hist.: A declaration or proclamation issued by Charles II. in 1672, professing to favor the Non-conformists, in giving them liberty to adopt and practice their own methods of worship, which had been curtailed by the Conventicle and Five Mile Acts. Parliament, however, suspecting that its real object was to benefit the Roman Catholics, passed in the following year the Test Act. [TEST.]

"On the 4th of April appeared the memorable Declaration of Indulgence."—Macaulay: *Hist. Eng.*, ch. vii.

(3) Declaration of War:

Polit.: A public proclamation by the State in which it declares itself to be at war with another Power.

dē-clār'-a-tive, a. [Fr. *déclaratif*.]

"He declared therefore that he abhorred the thought of a standing army."—Macaulay: *Hist. Eng.*, ch. xxiii.

4. To make a declaration or avowal of one's views; to declare one's self.

(1) With *for*=in favor of any person or thing.

"Like fawning courtiers, for success they wait,
And then come smiling, and declare for fate."
Dryden.

(2) With *against*=in opposition to any person or thing.

"The internal faculties of will and understanding decreeing and declaring against them."—Taylor.

II. Law:

1. To make a declaration of the cause of action against the defendant.

2. To make a simple declaration or affirmation in lieu of a solemn affirmation or oath.

¶ To declare off: To refuse to proceed with any undertaking, contract, or engagement; to renounce.

¶ Crabb thus discriminates between *to declare*, *to publish*, and *to proclaim*: "The word *declare* does not express any particular mode or circumstance of making known, as is implied by the others; we may *declare* publicly or privately; we *publish* and *proclaim* only in a public manner; we may *declare* by word of mouth, or by writing; we may *publish* or *proclaim* by any means that will render the thing most generally known. In *declaring*, the leading idea is that of speaking out that which passes in the mind; in *publishing*, the leading idea is that of making public or common; in *proclaiming*, the leading idea is that of crying aloud; we may therefore often *declare* by *publishing* and *proclaiming*: a declaration is a personal act; a proclamation is of general interest." (Crabb: *Eng. Synon.*)

For the difference between *to declare* and *to discover*, see DISCOVER; for that between *to declare* and *to express*, see EXPRESS; and for that between *to declare* and *to profess*, see PROFESS.

B. As adjective:

1. *Ord. Lang.*: Decked out, adorned, ornamented, embellished.

2. *Arch.*: An epithet applied to the Middle, or Perfect, Pointed style of architecture in England, which lasted from about the end of the thirteenth to the end of the fourteenth century. This style exhibits the most complete stage of development in Pointed architecture, combined with elegance and richness of form. Its most distinguishing features is the tracery of the windows, the patterns of which consisted at first of geometrical figures, such as circles and trefoils, but subsequently become more complicated with undulating and intersecting lines. The application of ornament was also freer, both in its nature and in its treatment. The normal form of the piers of the nave in ornate churches was diamond-shaped. The Decorated style was preceded by the Early Pointed style, and succeeded by the Perpendicular. [PERPENDICULAR, POINTED.]

***dē-cor-ti-cāt-lŷg**, *pr. par.* *a. & s.* [DECORTICATE.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act or process of stripping the bark, peel, or husk from; decortication.

***dē-cor-ti-cā-tion**, *s.* [Fr. *décortication*; Lat. *decortication*.] The act or process of stripping the bark, peel, or husk from.

"Decortication, the putting off the outward bark of trees: also the peeling or unhusking of roots."—*Miller: Gard. Diet.*

dē-cor-ti-cā-tōr, *s.* [Eng. *decorticate*(e); -*or*.] A process or a machine for removing the hull from grain. In the hominy-mill the fibrous envelope is taken from the corn, which may be left nearly intact otherwise, if desired. The process is sometimes performed by a preliminary steaming, followed by rubbing or rasping. Decortication was practiced by the Romans, the whole grain being pounded in mortars with some abrasant which rasped off the cuticle or bran. Mills for decortication are known in England as barley-mills, that grain being principally used as human food in the condition known as pearl barley. The barley-mill has a roughened exterior, and revolves in a wooden casing. The middle portion of the latter is lined with sheet-iron pierced like a grater with holes, the sharp edges of which turn upward. In Germany grain is decorticated between stones set at such a distance apart as to rasp the bran off the grain without mashing the latter. (*Knight*.)

dē-cōr-ūm, *s.* [Lat. neut. sing. of *decorus*=becoming, seemly, from *deceat*=it becomes, is fitting.]

1. *Ord. Lang.*: Decency and propriety of conduct and words; an observance of the laws of good society.

***dē-cōurt**, *v. t.* [Pref. *de*=away, from, and Eng. *court*, *s.* (*q. v.*)] To drive or expel from court.

" . . . if he be but decourted, . . ."—*Cabbala: To His Sacred Majesty*, ab Ignolo.

dē-cōy, *v. t.* [Formed by prefixing *de* to O. Fr. *coi*, *coy*=tame, quiet. (*Skeat*.) From the subst. (*Wedgwood*.)]

1. To allure, lure, or entice into a trap or cage; to draw into a snare; to entrap.

"A fowler had taken a partridge, who offered to decoy her companions into the snare."—*L'Estrange*.

2. To allure or attract; to draw

"Did to a lonely cot his steps decoy."

Thomson: *Castle of Indolence*, ii. 6.

dē-cōy, **duck-coy**, *s. & a.* [DECOY, *v.* *Wedgwood* suggests a corruption from *duck-coy*, the name given in the Fens to the ponds or traps for wild fowl. He compares Dut. *kooi*=a cage, an inclosure, a sheepfold; and the Norfolk dialect *coy*=a decoy for ducks, a coop for lobsters.]

A. As substantive:

1. *Literally:*

1. A pond or inclosed water into which wild fowl are decoyed; a place for entrapping wild fowl. The pond is entered by numerous channels covered over with light net or wire-work. The wild fowl are enticed into these channels by tame ducks trained for the purpose, or else by food scattered on the surface of the water. As soon as they have gone some distance up the channel, the decoy-man with his dogs appears and drives them into the nets at the upper end of the pond.

"Decoys, vulgarly duck-coys."—*Sketch of the Fens, in Gardner's Chron.*, 1849.

2. A tame duck, or a likeness of one, used to decoy wild fowl into the channels leading to the decoy.

II. *Fig.*: Anything intended to act or acting as an allurement into a snare; an allurement into temptation or danger.

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of alluring or attracting by means of a decoy. (*Lit. & fig.*)

dē-crēase, ***de-crece**, ***de-crese**, *v. i. & t.* [O. Fr. *decroistre*, *decrestre*; Port. *decrecer*; Ital. *decrecere*, from Lat. *decreresco*, from *de*=away, from, and *creresco*=to increase.]

A. Intrans.: To become less, to become diminished in size, bulk, quantity or quality; to wane, to fail.

"Thanne begynne the ryvere for to wane, and to decrece lytyl by lytyl."—*Maundeville*, p. 44.

B. Trans.: To make less, to diminish; to reduce in size, bulk, quantity, or quality; to cause to wane or fail.

"Nor cherish'd they relations poor, That might decrease their present store."—*Prior: An Epitaph*.

dē-crēase, *s.* [O. Fr. *decreois*.]

I. Ordinary Language:

1. The act, process, or state of becoming less or diminished in bulk, size, quantity, or quality; diminution.

"By weak'ning toil and hoary age o'ercome, See thy decrease, and hasten to thy tomb."—*Prior: Solomon*, iii. 728.

2. The amount, quantity, or extent by which anything becomes less.

II. *Astron.*: The wane of the moon.

" . . . they differ from those that are set in the decrease of the moon."—*Bacon*.

dē-crēas-lŷg, *pr. par.* *a. & s.* [DECREASE, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act, process, or state of becoming less or diminishing.

"Never such joy was since the world begun, As in the ark, when Noah and his beheld The olive leaf, which certainly them told, The flood decreased."—*Drayton*

decreasing function, *s.*

Math.: In analysis one quantity is a decreasing function of another when it decreases as the other increases.

decreasing series, *s.*

Math.: A series is said to be decreasing when each term is less than the preceding one. Thus, a geometrical progression is decreasing when the ratio is less than 1. In any series whatever if the quotient obtained by dividing any term by the preceding is numerically less than 1, the series is decreasing. [PROGRESSION.]

dē-crēas-lŷg-lŷ, *adv.* [Eng. *decreasing*; -*lŷ*.] In a decreasing or diminishing manner.

¶ *Decreasingly pinnate*:

Bot.: A term applied to a pinnate leaf in which the leaflets diminish insensibly in size from the base to the apex. Example, those of *Vicia sepium*.

***dē-crē-ā-tion**, *s.* [Pref. *de*=away, from, and Eng. *creation* (*q. v.*)] The undoing or destruction of creation.

" . . . the continual decreation and annihilation of the souls of the brutes, . . ."—*Cudworth: Intel. System*, p. 45.

dē-crēe, ***de-cre** (Eng.), ***de-creet**, ***de-creit** (Scotch), *s.* [O. Fr. *decret*; Sp., Port. & Ital. *decreto*, from Lat. *decretum*, neut. sing. *pa. par.* of *decreo*=to decree.]

A. Ordinary Language:

1. *Literally:*

1. An edict, law, or ordinance made by any superior authority for the government, guidance, or regulation of subordinates.

"Then watz demed a decree bi the duk seluen."—*E. Eng. Allit. Poems; Cleanliness*, 1,745.

2. An edict, order, or ordinance made by a council or legally-constituted body, for the administration of business within its own jurisdiction.

*II. *Fig.*: A fixed and established rule.

"When he made a decree for the rain, and a way for the lightning of the thunder."—*Job* xlviii. 28.

B. Technically:

1. *Law:*

(1) The judgment or decision of a judicial court in any matter.

"The decree is either interlocutory or final."—*Blackstone: Comment*, bk. iii., ch. xviii.

(2) The award or decision of an umpire in any case submitted to his arbitration.

2. *Theology*: The predetermined purpose of God concerning future events.

"The last leaf which by Heaven's decree Must hang upon a blasted tree."—*Wordsworth: White Doe of Rylstone*, ii.

3. *Eccles.*: A judicial decision of the Papal Court at Rome; an ordinance, which is enacted by the pope himself, by and with the advice of his cardinals in council assembled, without being consulted by any one thereon. (*Ayliffe*.) [DECRETAL.]

¶ Crabb thus discriminates between *decree*, *edict*, and *proclamation*: "A decree is a more solemn and deliberative act than an edict; on the other hand an edict is more authoritative: a decree is the decision of one or many; an edict speaks the will of an individual: councils and senates, as well as princes, make decrees; despotic rulers issue edicts. Decrees are passed for the regulation of public and private matters; they are made known as occasion requires, but are not always public; edicts and proclamations contain the commands of the sovereign authority, and are directly addressed by the prince to his people. An edict is peculiar to a despotic government; a proclamation is common to a monarchical and an aristocratic form of government:

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sire, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ=ē; ey=ā. qu=kw.

the ukase in Russia is a species of *edict*, by which the emperor makes known his will to his people; the king of England communicates to his subjects the determinations of himself and his council by means of a proclamation." (Crabb: Eng. Synon.)

dé-crée, v. t. & i. [DECREE, s.]

A. Transitive:

I. Ordinary Language:

1. To establish, determine, fix, or decide by a decree.

C. As substantive:

1. The act or process of wasting or calcining in strong heat, so as to cause a constant crackling.

2. The act of crackling, as salt in a strong heat.

dé-crêp-it-â-tion, s. [Fr. *décrépitation*.]

1. **Ord. Lang.:** The crackling or bursting noise made by several salts and minerals when wasted or exposed to a strong heat in a crucible.

2. **Chem.:** The crackling noise which several salts make when suddenly heated, accompanied by a violent exfoliation of their particles, due to the sudden conversion into steam of the water which is mechanically inclosed between the solid particles of the body; or to the unequal expansion of the laminae of which the mineral is composed in consequence of their being imperfect conductors of heat. The true cleavage of minerals may be often detected in this way, for they fly asunder at their natural fissures. (*Watts: Dict. Chem.*)

***dé-crêp-it-ness**, s. [English *decrepit*; -ness.] The same as *decrepitude* (q. v.).

" . . . from wailing infancy to querulous decrepitness . . ."—Barrow, vol. iii., Ser. 8.

dé-crê-al, a. & s. [Lat. *decretalis*=containing a decree; *decretum*=a decree.]

A. As adj.: Pertaining to or containing a decree.

"A decretal epistle is that which the pope decrees . . ."—Ayliffe: *Parergon*.

B. As substantive:

***I. Singular:**

1. **Gen.:** A letter containing or embodying a decree or authoritative order.

2. **Spec.:** A letter of the Pope determining a point or question in ecclesiastical law.

II. Plural:

1. **Gen.:** A book or collection of decrees or edicts; a corpus of laws.

2. **Spec.:** A collection or body of decrees, rescripts, mandates, edicts, and general resolutions of the Papal Council for the determination of points in ecclesiastical law or discipline. (*Haydn*, &c.)

"Traditions and decretals were made of equal force, and as authentic as the sacred charter itself."—Hosel: *Vocal Forest*.

¶ When the occupant of the See of Rome was only one of many bishops, it was customary to submit to the episcopal body in general any difficult points of doctrine or discipline requiring to be decided. As he rose above his colleagues in power and dignity, such questions came to be submitted to him individually rather than to them in common. In the twelfth century his decisions in such cases acquired the force of law. The term decretals applied to them was intended to recall the term decrees used of the Emperor's decisions in the old Roman Empire. The decretals had the force of law throughout the church, and were received with implicit obedience till the Papacy began to decline, early in the fourteenth century.

Successive collections of these decretals were made. In the sixth century, Dionysius Exiguus, the distinguished chronologer who calculated the Christian era, made a collection of Papal decisions, but candidly confessed that he could find none

earlier than the pontificate of Symmachus, who succeeded Damasus I. in A. D. 385. In the ninth century, a man of a different spirit issued what professed to be an earlier series, from Clement I. to Damasus I., A. D. 384. He addicted to them the signature of Isidore, an eminent Spanish bishop in the sixth century. The word *peccator* (sinner) was appended to Isidore's name, in token of humility. Transcribers, not knowing why this term was used, altered it to *mercator* (=merchant); the author is therefore called Isidorus Mercator, or the Pseudo-Isidorus. The decretal epistles which he sent forth were accepted as genuine in the middle ages, and were used in support of the papal claims; they are now universally given up as forgeries. About A. D. 1141 or 1151 Gratian, a monk of Bologna, completed his "*decretum*," or *Concordia Discordantium Canonum*. Raymond of Pennaford, a Catalanian and general of the Dominican order, compiled five books of decretals, which Gregory IX. ordered to be added to the work of Gratian. They were published about A. D. 1230. Near the end of the century a sixth book was added by direction of Boniface VIII., about A. D. 1298. The decretals constitute a portion of what is called *Canon Law* (q. v.). The Clementines were collected by Clement V. in 1313.

¶ **Decretal Order:**

¶ (Rabb thus discriminates between to dedicate, to consecrate, to devote, and to hallow: "There is something more positive in the act of dedicating.")

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; plne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rôle, fūll; trŷ, Sŷrian. æ, œ=ē; ey=ā. qu=kw.

than in that of *devoting*; but less so than in that of *consecrating*. To *dedicate* and *devote* may be employed in both spiritual and temporal matters: to *consecrate* and *hallow* only in the spiritual sense; we may *dedicate* or *devote* anything that is at our disposal to the service of some object; but the former is employed mostly in regard to superiors, and the latter to persons without distinction of rank: we *dedicate* a house to the service of God; or we *devote* our time to the benefit of our friends or the relief of the poor; we may *dedicate* or *devote* ourselves to an object; but the former always implies a solemn setting apart springing from a sense of duty; the latter an entire application of one's self from zeal and affection: in this manner he who *dedicates* himself to God abstracts himself from every object which is not immediately connected with the service of God: he who *devotes* himself to the ministry pursues it as the first object of his attention and regard: such a *dedication* of one's self is hardly consistent with our other duties as members of society; but a *devotion* of one's powers, one's time, and one's knowledge to the spread of religion among men is one of the most honorable and sacred kinds of *devotion*. To *consecrate* is a species of formal *dedication* by virtue of a religious observance; it is applicable mostly to places and things connected with religious works: *hallow* is a species of informal *consecration* applied to the same objects: the church is *consecrated*; particular days are *hallowed*." (Crabb: Eng. Synon.)

dēd-i-cā-te, a. [Lat. *dedicatus*.]

dēed (1), ***deed**, ***dēde**, *s.* [A. S. *dād*; O. Fris. *dēde*; Goth. *gādēds*; O. H. Ger. *dal*; Ger. *that*; Dut. & Dan. *daad*; Swed. *dād*; Icel. *dadh*.]

I. Ordinary Language:

1. An action or thing done, or effected, whether good or bad.

"Only add
Deeds to thy knowledge answerable."
 Milton: *P. L.*, xii., 581, 582.

2. A noble or illustrious exploit or performance; an achievement.

"Thousands were there, in darker frame that dwelt,
 Whose deeds some nobler poem shall adorn."
 Dryden: *Annus Mirabilis*, clxxxv.

*3. The power of acting or action.

"Nor knew I not
 To be with will and deed created free."
 Milton: *P. L.*, v. 547, 548.

4. Fact, reality. [¶ 4.]

"David therefore sent out spies, and understood that Saul was come in very deed."—1 Sam. xxvi. 4.

II. Law: An instrument in writing or in print, or partly in each, comprehending the term of a contract or agreement, and the evidence of its due execution between parties legally capable of entering into a contract or agreement.

¶ (1) *Deed of assignment:*

Law: A deed by which an insolvent conveys to a third party, called an assignee, his entire (or specified) property, to be administered and distributed among his creditors. In the various states there are different restrictions as to modes of procedure in execution of such instruments.

(2) *Deed of composition:*

Law: A deed by which an insolvent person comes to an arrangement with his creditors, they agreeing to accept a certain percentage of their debt in lieu of the whole.

(3) *Deed of covenant:*

Law: A covenant entered into by means of a separate deed.

(4) *In deed, *In dede*: In fact, in truth, in reality. (Now generally written as one word, and employed as an adverb.)

¶ Crabb thus discriminates between *deed*, *exploit*, *achievement*, and *feat*: "The first three words rise progressively on each other: *deed*, compared with the others, is employed for that which is ordinary or extraordinary; *exploit* and *achievement* are used only for the extraordinary; the latter in a higher sense than the former. *Deeds* must always be characterized as good or bad, magnanimous or atrocious, and the like: *exploit* and *achievement* do not necessarily require such epithets; they are always taken in the proper sense for something great. *Exploit*, when compared with *achievement*, is a term used in plain prose; it designates not so much what is great as what is real: *achievement* is most adapted to poetry and romance; it soars above what the eye sees and the ear hears, and affords scope for the imagination. Martial *deeds* are as interesting to the reader as to the performer: the pages of modern history will be crowded with the *exploits* of Englishmen both by sea and land, as those of ancient and fabulous history are with the *achievements* of their heroes and demigods. An *exploit* marks only personal bravery in action; an *achievement* denotes elevation of character in every respect, grandeur of design, promptitude in execution, and valor in action. An *exploit* may be executed by the design and at the will of another; a common soldier or an army may perform *exploits*. An *achievement* is designed and executed by the *achiever*; Hercules is distinguished for his *achievements*; and in the same manner we speak of the *achievements* of knight-errants or of great commanders. *Feat* approaches nearest to *exploit* in signification: the former marks skill, the latter resolution." (Crabb: *Eng. Synon.*)

deed-achieving, *a.* Performing noble exploits.

"By deed-achieving honor newly named—
 What is it?—Coriolanus must I call thee?"
 Shakesp.: *Coriolanus*, ii. 1.

deer, *der, *dere, *deor, s. [A. S. *deór*; O. S. *dier*. Cognate with O. Fris. *diar*, *dier*; Goth. *dius*; O. H. Ger. *tior*; Ger. *thier*; Dut. *dier*; Dan. *dýr*; Icel. *dýr*; Lat. *fera*; Gr. *thér*=a wild beast.]

1. Zool.: The true Deer (*Cervide*) are a family of the Ruminants distinguished chiefly by the nature of the horns or antlers, which, with the single exception of the Reindeer, are borne by the males only. They are bony throughout, are annually shed and reproduced at the breeding season, increasing each time in size and the number of branches until, in the old males of some species, they attain an enormous size. The antlers are carried upon the frontal bone, and are produced by a process not unlike that by which injuries of osseous structures are made good in man. At first they are covered with a sensitive skin or "velvet," but as development proceeds this skin dries up and peels off; a bony ridge or "burr" being formed on the antler just above its base of attachment to the frontal bone. When fully developed the antlers consist of a main stem or "beam," carrying one or more branches or "tynes." When first produced, in the second year after birth, the antler consists only of the "beam," the animal being then termed a "brocket." The next year a basal branch or "brow-tyne" is developed; it is then termed a "spayed;" and in the following year a second branch or "tres-tyne," directed forward, appears above the former, the hinder portion of the beam constituting the "royal." Should the antler develop further, it is by the more or less complete branching of these tynes; the "royal-tyne," in particular, being very liable to become subdivided in

successive years. The Musk-deer and the Water-deer of China have no horns. Deer are very generally distributed, but none have yet been discovered in either Australia or South Africa. The largest living form is the True Elk (*Alces palmatus*) or Moose, while the Indian Muntjacs are among the smallest, the Chevrotains being now placed in a group by themselves. Except the Reindeer (*Cervus tarandus*), no member of the group has been completely domesticated.

***B. Intrans.**: To become disfigured or spoiled.

"Which of thy derks cloudy face
Makest the worldes light deface."

Gower, ii. 97.

* *Crabb* thus discriminates between to deface, to disfigure, and to deform: "Deface expresses more than either deform or disfigure. To deface is an act of destruction; it is the actual destruction of that which has before existed: to disfigure is either an act of destruction or an erroneous execution, which takes away the figure: to deform is altogether an imperfect execution, which renders the form what it should not be. A thing is defaced by design; it is disfigured either by design or accident; it is deformed either by an error or by the nature of the thing. Persons only deface: persons or things disfigure: things are most commonly deformed of themselves. . . . A statue may be defaced, disfigured, or deformed; it is defaced when any violence is done to the face or any outward part of the body; it is disfigured by the loss of a limb; it is deformed if made contrary to the perfect form of a human being. Inanimate objects are mostly defaced or disfigured, but seldom deformed; animate objects are either disfigured or deformed, but not defaced. A person may disfigure himself by his dress; he is deformed by the hand of nature." (*Crabb: Eng. Synon.*)

"Defauty. Defectuous."—*Prompt. Parv.*

dě-fēas-ānce, ***dě-fēaz-ānce**, ***dě-fēas-aunce**, s. [Fr. *défaisance*.] [DEFAISANCE.]

I. Ordinary Language:

*1. A defeat, conquest, or overthrow.

"After his foe's defeasance, . . ."
Spenser: *F. Q.*, I. xii. 12.

2. The act of annulling or abrogating any contract or stipulation.

II. Law:

1. A condition relating to a deed, which, being performed, the deed is defeated or rendered void; or a collateral deed made at the same time with a feoffment or other conveyance, containing certain conditions on the performance of which the estate then created may be defeated or totally undone. A defeasance on a bond, or recognizance, or judgment recovered, is a condition which, when performed, defeats or undoes it, in the same manner as a defeasance of an estate. (*Blackstone: Comment.*, ii. 17.)

2. The writing in which a defeasance is contained.

dě-fēas-ānced, ***dě-fēaz-ānced**, a. [Eng. *defeasance*(e); -ed.] Subject to defeasance.

***dě-fēas-ant**, ***dě-fēs-ant**, s. [O. Fr.] A defeasance.

"Defesants, warrants, or thy mittimusess."—*Barry: Merry Tricks*, iii. 1.

***dě-fēas-i-ble**, ***de-fes-i-ble**, adj. [O. Fr. *défaissable*; Fr. *défaire*=to make void.] That may be annulled or abrogated. (Now only used in the negative comparative indefeasible, q. v.)

"He came to the crown by a defeasible title, so was never well settled."—*Davies*.

***dě-fēas-i-ble-nēss**, ***de-fes-i-ble-nēs**, s. [Eng. *defeasible*; -ness.] The quality or state of being defeasible.

dě-fēat, s. [DEFEAT, v. In Fr. *défaite*.]

1. The overthrow or discomfiture of an army.

"Too well I see and rue the dire event
That with sad overthrow and foul defeat
Hath lost us heaven."—*Milton: P. L.*, i. 134-36.

2. The state of being overthrown or discomfited; as, He suffered a defeat.

3. A frustrating, disappointing, or nullifying.

"... the defeat of Julian's impious purpose to rebuild the temple of Jerusalem . . ."—*Warburton: Divine Legation*, bk. ii. (notes).

*4. An act of violence; destruction, undoing, ruin.

"And made defeat of her virginity,"

Shakesp.: *Much Ado about Nothing*, iv. 1.

dě-fēat, v. t. [O. Fr. *defait*, *desfait*, pa. par. of *defaire*, *desfaire*=to undo; *de* (des)=Lat. *dis*=away, apart, and *faire* (Lat. *facere*)=to do, to make.]

1. To overthrow, to discomfit, to vanquish; as one army defeats another.

"They invaded Ireland, and were defeated by the Lord Mountjoy."—*Bacon*.

*2. To undo or destroy.

"My stronger guilt defeats my strong intent,"

Shakesp.: *Hamlet*, iii. 3.

3. To frustrate, disappoint, nullify, or thwart.

"... his designs were defeated, his desires thwarted, his offers refused, . . ."—*Barrow: Sermons*, i. 1.

4. To render null and void.

"A defeazance on a bond, or recognizance, or judgment recovered, is a condition which, when performed, defeats or undoes it."—*Blackstone: Comment.*, bk. ii, ch. 18.

5. To resist successfully; to baffle, to foil.

*6. To spoil, to undo, to disfigure.

"... defeat thy favour with an usurped beard . . ."
—*Shakesp.: Othello*, i. 3.

† (1) Crabb thus discriminates between *defeat*, *to foil*, *to frustrate*, and *to disappoint*: "*Defeat* and *foil* are both applied to matters of enterprise; but that may be *defeated* which is only planned, and that is *foiled* which is in the act of being executed. What is rejected is *defeated*: what is aimed at or purposed is *frustrated*: what is calculated on is *disappointed*. The best concerted schemes may sometimes be easily *defeated*: where art is employed against simplicity the latter may be easily *foiled*: when we aim at what is above our reach, we must be *frustrated* in our endeavors; when our expectations are extravagant, it seems to follow of course that they will be *disappointed*. Design or accident may tend to *defeat*, design only to *foil*, accident only to *frustrate* or *disappoint*." (*Crabb: Eng. Synon.*)

(2) For the difference between *defeat* and *to beat*, see *BEAT*; for that between *defeat* and *to baffle*, see *BAFFLE*.

"I practised a way to defecate the dark and muddy oil of amber."—*Boyle.*

*2. *Fig.*: To purify or clear from any extraneous mixture.

"We defecate the notion from materiality, and abstract quantity, place, and all kind of corporeity from it."—*Glanville.*

dēf-ē-cāte, ***dēf-ē-cāte**, *a.* [Lat. *defecatus*, *pa. par.* of *defecare*=to purify from dregs, &c.: *de*=away, from, and *fec* (genit. *fecis*)=dregs, lees.]

1. *Lit.*: Purified, clarified, or cleared of dregs, lees, or other foulness.

"This liquor was very defecate, and of a pleasing golden color."—*Boyle.*

2. *Fig.*: Purified or cleared of any extraneous mixture.

"... no absurdities to our more defecate faculties."
—*Glanville: Vanity of Dogmatizing, ch. xi.*

dēf-ē-cāt-ēd, **dēf-ē-cāt-ēd**, *pa. par.* or *a.* [DEFECATE, *v.*]

dēf-ē-cāt-ing, **dēf-ē-cāt-ing**, *pr. par., a. & s.* [DEFECATE, *v.*]

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As subst.*: Defecation.

dēf-ē-cā-tion, **dēf-ē-cā-tion**, *s.* [Lat. *defecatio*, from *defecatus*.]

1. *Literally*:

1. The act or process of purifying from dregs, lees, &c.; clarification, purification.

2. The act of discharging feces; evacuation of the bowels.

"The spleen and liver are obstructed in their offices of defecation, whence vicious and dreggish blood."—*Harvey.*

*II. *Fig.*: The act of clearing or freeing from any extraneous mixture.

"His abstinence from meat might be a defecation of his faculties."—*Taylor: Great Exemplar, i. 9.*

dēf-ē-cā-tion-ist, *s.* [Eng. *defecation*; *-ist*.] One who practices or is in favor of defecation.

dēf-ē-cā-tōr, *s.* [Lat.]

Sugar-manufac.: An apparatus for the removal from a saccharine liquid of the immature and feculent matters which would impair the concentrated result.

dēf-ēct, *s. & a.* [Lat. *defectus*=a want, from *defectus*, *pa. par.* of *deficio*=to be wanting, to fail.]

A. *As substantive*:

1. A want, absence of something necessary; insufficiency, failure.

"... neither of them was fully aware of the defects of their army."—*Macaulay: Hist. Eng., ch. xiv.*

2. Any natural physical want or imperfection, blemish, or failure.

"Men, through some defect in the organs, want words, yet fail not to express their universal ideas by signs."—*Locke.*

3. A moral want or imperfection; a failing.

"Sometimes occasion brings to light
Our friend's defect long hid from sight."
—*Cowper: Friendship.*

4. A fault, a mistake, an error.

"We had rather follow the perfections of them whom we like not, than in defects resemble them whom we love."
—*Hooker.*

¶ For the difference between *defect* and *imperfection*, see IMPERFECTION; for that between *defect* and *blemish*, see BLEMISH.

B. *As adj.*: Deficient, defective, imperfect.

"Where though their service was defect and lame
Th' Almighty's mercy did accept the same."
—*Taylor: Works (1630).*

***dēf-ēct**, *v. t. & t.* [DEFECT, *s.*]

"... the inquiries of most defected by the way, and tired within the sober circumference of knowledge."—*Broune: Vulgar Errors.*

B. *Trans.*: To damage, to injure.

"Who is't will say so, men may much suspect,
But yet, my lord, none can my life defect."
—*Troubles of Queen Elizabeth (1639).*

***dēf-ēct-ī-bīl-ī-tē**, *s.* [Eng. *defectible*; *-ity*.] The quality or state of being defectible; deficiency, imperfection.

"... the defectibility of that particular tradition."
—*Lord Digby: To Sir Ken. Digby.*

***dēf-ēct-ī-ble**, *a.* [Eng. *defect*; *-able*.] Imperfect, defective, deficient.

"The extraordinary persons, thus highly favored were for a great part of their lives in a defectible condition."—*Hale: Prim. Origin of Mankind.*

dēf-ēc-tion, *s.* [Fr. *défection*; Lat. *defectio*.]

1. A want, a deficiency.

2. A failure in duty; an apostasy, a falling away.

"That since the flowers of Eden felt the blast,
That after man's deflection laid all waste,"
—*Cowper: Conversation, 751, 752.*

3. A falling away from allegiance; desertion of one's lord; revolt.

"... by the voluntary deflection of him who ought to have been our protector."—*Macaulay: Hist. Eng., ch. x.*

¶ Crabb thus discriminates between *defection* and *revolt*: "Defection is a general, *revolt* a specific term; that is, it denotes a species of *defection*. *Defection* is applicable to any person or thing to which we are bound by any obligation; *revolt* is applicable only to the government to which one is bound. There may be a *defection* from religion, or any cause that is held sacred; a *revolt* is only against a monarch or the supreme authority. *Defection* does not designate the mode of the action; it may be quietly made or otherwise; a *revolt* is an act of violence, and always attended with violence. The *defection* may be the act of one; a *revolt* is properly the act of many." (Crabb: *Eng. Synon.*)

***dēf-ēc-tion-ist**, *s.* [Eng. *defection*; *-ist*.] One who supports or is in favor of defection.

***dēf-ēc-tious**, *a.* [Eng. *defect*; *-ious*.] Full of defects; defective, imperfect.

"Perchance in some one *defectious* piece, we may find a blemish."—*Sidney: Apology for Poetry.*

dēf-ēct-īve, *a.* [Fr. *défectif*, from Lat. *defectivus*; Sp. & Port. *defectivo*; Ital. *difettivo*.]

A. *Ordinary Language*:

1. *Lit.*: Wanting in the proper or just quantity; deficient, imperfect.

"Nor will polished amber . . . be found a long time deflection upon the exactest scales."—*Broune: Vulgar Errors.*

II. *Figuratively*:

1. Wanting or imperfect in any physical quality.

"Sheds every hour a clearer light
In aid of our defective sight."
—*Cowper: Epistle to Lady Austen.*

2. Imperfect, not complete, faulty.

"The only remaining account of the debate is *defective* and confused."—*Macaulay: Hist. Eng., ch. xv.*

3. Wanting or imperfect morally and intellectually.

"If it renders us perfect in one accomplishment, it generally leaves us *defective* in another."—*Addison.*

4. Failing in duty, faulty, blamable.

"Our tragedy writers have been notoriously *defective* in giving proper sentiments to the persons they introduce."—*Add son.*

B. *Technically*:

1. *Gram.*: Wanting one or more of the usual forms of declension or conjugation, as a defective noun or verb.

2. *Mus.*: [DIMINISHED, IMPERFECT.]

¶ Crabb thus discriminates between *defective* and *deficient*: "Defective expresses the quality or property of having a *defect*. [BLEMISH.] Deficient is employed with regard to the thing itself that is wanting. A book may be *defective* in consequence of some leaves being *deficient*. A deficiency is therefore often what constitutes a *defect*. Many things, however, may be *defective* without having any deficiency, and vice versa. Whatever is misshapen, and fails either in beauty or utility, is *defective*; that which is wanted to make a thing complete is *deficient*. It is a *defect* in the eye when it is so constructed that things are not seen at their proper distances; there is a *deficiency* in a tradesman's accounts when one side is made to fall short of the other. Things only are said to be *defective*; but persons may be termed *deficient* either in attention, in good breeding, in civility, or whatever else the occasion may require." (Crabb: *Eng. Synon.*)

¶ *Defective hyperbolic*:

Math.: A curve having two infinite branches and but one rectilinear asymptote.

dēf-ēct-īve-lē, *adv.* [Eng. *defective*; *-ly*.] In a defective manner; imperfectly.

"The poets used to express it sometimes *defectively*, and sometimes more fully."—*Abp. Usher. Answer to the Jesuit Malone, p. 299.*

***dēf-ēct-īve-nēss**, *s.* [Eng. *defective*; *-ness*.] The quality or state of being defective; imperfection, deficiency, faultiness.

"... the defectiveness of some other particular,"
—*Addison.*

***dēf-ēct-u-ōs-ī-tē**, *s.* [Fr. *defectuosité*; Sp. *defectuosidad*; Ital. *difettosità* as if from a Lat. *defectuositas*.] The same as DEFECTIVENESS (q. v.).

"Those acts, wherein man conceives some perfection, are in the sight of God *defectuosities*."—*W. Mountagu: Devout Essays, ii. 135.*

***dēf-ēct-u-ōs**, *a.* [Lat. *defectuosus*; Fr. *défectueux*; Sp. & Port. *defectuoso*; Ital. *difettoso*.] Defective, deficient, imperfect, faulty.

"Nothing in nature or in providence, that is scant or *defectuos*, can be stable or lasting."—*Barrow: Serm., ii. 15.*

***dēf-ē-dā-tion**, ***dēf-ē-dā-tion**, *s.* [Fr. *défection*, from Lat. *de* (intens.), *fecdo*=to befoul.] A making foul or dirty; a staining or defiling.

"... successive crops
Of defecations oft will spot the skin."
—*Grainger: Sugar Cane, iv.*

dēf-ēnce, **dēf-ēnce**, ***de-fens**, ***dif-fence**, ***dif-fense**, *s.* [Fr. *défense*; Sp. & Port. *defensa*; Ital. *difesa*, from Lat. *defensa*=a defending, from *defensus*, *pa. par.* of *defendo*=to defend. (Skeat.)]

A. *Ordinary Language*:

1. *Literally*:

1. The act of defending, protecting, or guarding.

2. That which defends, protects, or guards; a protection; anything which affords, or is intended to afford, security or protection.

"That England, being empty of *defence*,
Hath shook and trembled at the ill neighborhood."
—*Shakesp.: Henry V., i. 2.*

3. The science of defending or guarding against enemies; military skill.

"He is, said he, a man of great *defence*,
Expert in battell, and in deeds of arms."
—*Spenser: F. Q., V. ii. 5.*

II. *Figuratively*:

1. A vindication, apology, or justification, whether in words or writing.

"Alexander beckoned with his hand, and would have made his *defence* unto the people."—*Acts xix. 33.*

*2. A prohibition.

"My wol not certain broken youre *diffence*."
—*Chaucer: Troilus, iii. 1,250.*

B. *Technically*:

1. *Fort.*: That part which flanks another work.

2. *Law*:

(1) The vindication made by or for a defendant in any case.

"Defence, in its true legal sense, signifies not a justification, protection, or guard which is now its popular signification; but merely an opposing or denial (from the French verb *defender*) of the truth or validity of the complaint."—*Blackstone: Comment., bk. iii., ch. xx.*

(2) The side or part of the defendant.

"The examination and cross-examination of the witnesses for the *defence*."—*London Daily Telegraph.*

¶ *Line of defence*:

Fort.: A continuous line or succession of fortified places.

¶ Crabb thus discriminates between *defence* and *protection*: "Defence requires some active exertion either of the body or mind; protection may consist only of the extension of power in behalf of any particular. A *defence* is successful or unsuccessful; a *protection* weak or strong. A soldier *defends* his country; a counsellor *defends* his client; a prince *protects* his subjects." (Crabb: *Eng. Synon.*)

***defence-month**, *s.* The same as FENCE-MONTH (q. v.).

"The Fence-Month by the Ancient Foresters was called the *Defence-month*, and is the Fawning-time; during which Watch and Ward is kept."—*W. Nelson: Laws Conc. Game, p. 77.*

***dēf-ēnce** ***de-fensyn**, *v. t.* [DEFENSE, *s.*]

1. To defend or protect with fortifications; to fortify.

"The city itself he strongly fortifies,
Three sides by six it well *defenced* has."
—*Fairfax.*

"Defensyn. Defenso, munio."—*Prompt. Parv.*

2. To defend, to maintain.

"This Gospel . . . she hath maintained in her own countries without change, and *defenced* against all kingdoms that sought change."—*Lyly: Euphues and His England.*

***dēf-ēnc-ī-ble**, *a.* [DEFENSIBLE.] Capable of defence.

"... making the place which nature had already fortified much more by art *defensible*."—*Speed: Henrie II., bk. ix., ch. vi., § 56.*

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, sȳrian. æ, œ = ē; ey = ā. qu = kw.

***dě-fěn'-cion**, *s.* [Lat. *defensio*.] A defense.

"... no *defencion* could take place, ..."—*For: Book of Martyrs*, p. 159.

dě-fěnd, ***defende**, ***defenden**, ***diffende**, *v. t. & i.* [Lat. *defendo*=to strike down, to ward off; from *fendo*=to strike; Fr. *défendre*; Sp. & Port. *defender*; Ital. *difendere*.]

A. Transitive:

I. Ordinary Language:

*1. To ward or keep off, to repel.

"Great Jove defend the mischiefs now at hand."
—*Ferrez & Porrez* (Dodsley, i. 129).

2. To protect, to guard; to ward or repel attacks from.

"Deliver me from mine enemies, O my God! defend me from them that rise up against me."—*Ps.* liv. 1.

3. To support, to maintain, to vindicate, to uphold by power or argument.

"Here let them end it, and God defend the right."
—*Shakesp.: Henry VI.*, ii. 3.

4. To hedge about, to make secure.

"And here the access a gloomy grove defends,
And here th' innavigable lake extends."
—*Dryden: Virgil; Æneid*, vi. 340, 341.

*5. To hedge about with restrictions; to forbid, to prohibit.

"Shal I than only be defended to use my right?"
—*Chaucer: Boethius*, p. 34.

II. Law:

1. To maintain one's own cause against a charge or demand.

"For it would be ridiculous to suppose that the defendant comes and *defends* (or, in the vulgar acceptation, justifies), the force and injury, in one line, and pleads that he is not guilty of the trespass complained of, in the next."
—*Blackstone: Comment.*, bk. iii., ch. xx.

2. To plead a cause for a defendant.

B. Intransitive:

I. Ordinary Language:

*1. To protect, to act as a guard or protection; to make defense.

"Lay down our proportions to defend
Against the Scot."
—*Shakesp.: Henry V.*, i. 2.

*2. To forbid.

"God defend his grace should say us nay!"
—*Shakesp.: Richard III.*, iii. 7.

***II. Law:** To appear in court and make a defense of a case.

*Crabb thus discriminates between *to defend*, *to protect*, and *to vindicate*: "*Defend* is a general term; it defines nothing with regard to the degree and manner of the action; *protect* is a particular and positive term, expressing an action of some considerable importance. Persons may *defend* others without distinction of rank or station: none but superiors *protect* their inferiors. *Defense* is an occasional action; *protection* is a permanent action. A person may be *defended* in any particular case of actual danger or difficulty; he is *protected* from what may happen as well as what does happen. *Defense* respects the evil that threatens; *protection* involves the supply of necessities and the affording comforts. To *vindicate* is a species of *defense* only in the moral sense of the word. Acts of importance are *defended*: those of trifling import are commonly *vindicated*. . . . *Defense* is employed in matters of opinion or conduct, *vindicate* only in matters of conduct." (*Crabb: Eng. Synon.*)

dě-fěnd'-a-ble, ***dě-fěnd'-i-ble**, *a.* [Eng. *defendible*.] Capable of being defended.

"... easily *defendible* by the power of man's reason and art, ..."—*Derham: Physico-Theology*, bk. v., ch. vi.

dě-fěnd'-ant, ***dě-fěn'-dent**, *a. & s.* [Fr. *défendant*, *pr. par. de défendre*=to defend.]

A. As adjective:

I. Ordinary Language:

1. Defending; acting on the defense.

"Now growling, spluttering, wailing, such a clutter,
'Tis just like puss defendant in a gutter."
—*Dryden: Epitogue to The King and Queen*.

2. Defensive; fit for defense.

"With men of courage and with means defendant."
—*Shakesp.: Henry V.*, ii. 4.

II. Law: In the position of a defendant.

"... then cometh an officer and arresteth the party defendant."—*Hackluyt: Voyages*, vol. i., p. 240.

B. As substantive:

I. Ordinary Language:

1. One who defends, protects, or guards another against danger; a defender, a protector.

"... conveniently fight the defendants on the wall."
—*Wilkins: Mathematical Magic*.

2. One who defends a cause.

"But the defendant doth that plea deny,
And says in him thy fair appearance lies."
—*Shakesp.: Sonnets*, 46.

II. Law: A person accused or summoned into court, who defends, denies, or opposes the demand or charge, and asserts his own right.

*Crabb thus discriminates between *defendant* and *defender*: "The defendant defends himself; the defender defends another. We are *defendants* when any charge is brought against us which we wish to refute; we are *defenders* when we undertake to rebut or refute the charge brought against another." (*Crabb: Eng. Synon.*)

dě-fěnd'-əd, *pa. par. & a.* [DEFEND.]

***dě-fěnd'-ēe**, *s.* [Eng. *defend*; -ee.] One who is defended.

dě-fěnd'-ēr, ***dě-fěnd'-ōr**, *s.* [Eng. *defend*; -er.]

I. Ordinary Language:

1. One who defends or protects another.

"... without a friend and defender."—*Bunyan: Pilgrim's Progress*, pt. ii.

2. One who supports, maintains, or upholds a cause.

"Undoubtedly there is no way so effectual to betray the truth, as to procure it a weak defender."—*South*.

II. Technically:

1. Law:

(1) *U. S. and Eng.*: An advocate who pleads the case for a defendant.

(2) *Scots Law*: A defendant.

2. *Hist. (pl.)*: A faction in Ireland, which took its origin from a quarrel between residents of Market Hill on July 4, 1784. Their friends joined them, and many battles were fought. The Defenders were Roman Catholics; their opponents, who were ultimately called Peep-o'-day Boys, were Presbyterians, or at least Protestants. [PEEP OF DAY.] (*Haydn*.)

**Defender of the Faith* (*Pidei defensor*): A title generally believed to have been bestowed by Pope Leo X. on Henry VIII., in 1521, for his treatise on the Seven Sacraments, written in opposition to Luther. The title has ever since been retained by the sovereigns of England. But Chamberlayne says the title belonged to the kings of England before 1521, and in proof of his assertion appeals to several charters granted to the University of Oxford; so that Pope Leo's Bull was only a rennovation of an ancient right.

**(1)* Crabb thus discriminates between *defender*, *advocate*, and *pleader*: "A *defender* exerts himself in favor of one that wants support; an *advocate*, from the Latin *advoco*, to call or speak for, signifies one who is called to the assistance of another; he exerts himself in favor of any cause that offers; a *pleader*, from *plea* or *excuse*, signifies him who exerts himself in favor of one who is in distress. A *defender* attempts to keep off the threatened injury by rebutting the attack of another: an *advocate* states that which is to the advantage of the person or thing *advocated*: a *pleader* throws in *pleas* and *extenuations*; he blends entreaty with argument. Oppressed or accused persons and disputed opinions require *defenders*; that which falls in with the humors of men will always have *advocates*; the unfortunate and the guilty require *pleaders*." (*Crabb: Eng. Synon.*)

(2) For the difference between *defender* and *defendant*, see DEFENDANT.

dě-fěnd'-līg, *pr. par., a. & s.* [DEFEND.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of protecting, guarding, or maintaining.

***dě-fěnd'-rěss**, ***dě-fěnd'-rěsse**, *s.* [Eng. *defender*; -ess.] A female defender.

"... Queen's majesties usual stile of England, France, and Ireland, *defendresse* of the faith, &c."—*Stowe: Queen Elizabeth* (an. 1586).

dě-fěn'-ār-ā-tion, *s.* [Lat. *de=of*, and *fenere*=to lend on usury.]

Law: The act of lending money on usury. (*Wharton*.)

***dě-fěns'-a-tive**, *s. & a.* [Formed as if from a Lat. *defensativus*; from *defenso*=to defend.]

A. As substantive:

1. *Ord. Lang.*: A defense, a protection, a guard.

"A very unsafe *defensive* it is against the fury of the lion."—*Brownie: Vulgar Errors*.

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act or process of explaining or determining; a definition.

***dē-fīn'-ish, v. t.** [Fr. *definir*; Lat. *definio*.] To define, to explain.

" . . . any such thyng as I have defynished a little here before."—*Chaucer: Boethius, bk. v.*

dē-fī-nīte, a. & s. [Lat. *definitus*, *pa. par. of definio*=to define; Fr. *défini*.]

A. As adjective:

1. **Ordinary Language:**

1. Bounded by certain limits; limited, determinate.

" . . . had the sight of the goddess, who in a definite compass can set forth infinite beauty."—*Sidney.*

2. Fixed, certain, determinate.

"We learn, for example, that the water of our rivers is formed by the union, in definite proportions, of two gases, oxygen and hydrogen."—*Tyndall: Frag. of Science (3d ed.), i. 8.*

3. Determinate, defined, or fixed in meaning; exact, precise.

4. Resolved, determined, free from hesitation; precise.

"For idiots, in this case of favor, would
Be wisely definite." *Shakesp.: Cymbeline, i. 6.*

II. Technically:

1. **Gram.:** [DEFINITE ARTICLE.]

2. **Log.:** [DEFINITE TERM.]

3. **Chem.:** [DEFINITE PROPORTIONS.]

4. **Bot.:** The same as terminal or centrifugal. Terminating in a single flower. When stamens are under twenty they are said to be definite. (*Bal-four*.) [DEFINITE INFLORESCENCE.]

† Crabb thus discriminates between *definite* and *positive*: "The understanding and reasoning powers are connected with what is *definite*: the will with what is *positive*. A *definite* answer leaves nothing to be explained: a *positive* answer leaves no room for hesitation or question. It is necessary to be *definite* in giving instructions, and to be *positive* in giving commands. A person who is *definite* in his proceedings with another puts a stop to all unreasonable expectations; it is necessary for those who have to exercise authority to be *positive*, in order to enforce obedience from the self-willed and contumacious." (*Crabb: Eng. Synon.*)

***B. As subst.:** Anything defined, determined or explained.

" . . . the general, again, is nothing else but a *definite* of the special."—*Ayliffe.*

definite article, s.

Gram.: The article or demonstrative adjective *the*, so called because it defines or limits the noun to which it belongs. In the oldest English it was inflected like an adjective for number, gender, and case. [THE, ARTICLE.]

definite inflorescence, s.

Bot.: The same as CENTRIFUGAL INFLORESCENCE (q. v.).

definite peace, s.

Hist.: The name given to the treaty signed at Paris, September 3, 1763, by which Great Britain acknowledged the independence of the United States. (*Townsend.*)

definite proportions, s. pl.

Chem.: The relative proportions in which bodies unite to form compounds. [EQUIVALENT, *s.*]

definite term, s.

Log.: A term which defines or determines a particular class of things, or a single person, in contradistinction to an *indefinite term*, which does not mark out any particular object.

dēf'-in-īte-lŷ, adv. [Eng. *definite*; -*ly*.] In a definite or determinate manner; definitively.

dēf'-in-īte-nēss, s. [Eng. *definite*; -*ness*.] The quality or state of being definite; certainty, exactness, determinateness.

"[To] reveal the purpose for which it was created with definiteness of expression."—*Dr. Dresser, in Cassell's Technical Educator, pt. ii., p. 378.*

dēf-in-ī-tion, s. [Lat. *definitio*, from *definio*=to limit, to define; Fr. *définition*; Ital. *definizione*; Sp. *definición*.]

I. Ordinary Language:

1. The act or process of defining or describing anything by its qualities and circumstances.

2. A brief description or explanation of anything by its qualities and circumstances; an explanation of a word or term.

"The *definitive* of the crime, the amount of the penalty, remained unaltered."—*Macaulay: Hist. Eng., ch. xvi.*

II. Technically:

1. **Logic:** Archbishop Whately regards a definition as being an expression explanatory of that which is defined, *i. e.*, separated as by a boundary from everything else; an expression which explains any term so as to separate it from everything else. John Stuart Mill states that the simplest and most correct notion of a definition is a proposition declaratory of the meaning of a word—namely, either the meaning which it bears in common acceptance, or that which the speaker or writer, for the particular purpose of his discourse, intends to annex to it. (*J. S. Mill: Logic, bk. i., ch. viii.*) According to Whately, definitions are divided into those which are essential and those which are accidental. An *essential* definition states what are regarded as the constituent parts of the essence of that which is to be defined, while an *accidental* definition is one which lays down what are regarded as circumstances belonging to it—*viz.*, as properties or accidents, such as causes, effects, &c. Accidents in the narrowest sense cannot be employed in a description—*i. e.*, in an accidental definition of any species, while not properties but accidents generally of the kind called inseparable are used in discriminating an individual. An *essential* definition is divided into a physical—*i. e.*, a natural—and a logical—*i. e.*, a metaphysical—definition. [† (4).] Another division is into nominal and real definitions. [† (6) & † (8).] To be perfect a definition should be (1) adequate—*i. e.*, neither too extensive nor too narrow; (2) it should be plainer than that which it is intended to explain; and (3) it should be couched in a convenient number of appropriate words. (*Whately: Logic, bk. ii., ch. v., § 6.*)

2. **Nat. Science:** Linnaeus, in his *Systema Naturæ*, defined the species under each genus, not by stating only, and in the fewest possible words, the point or points discriminating them from the other known species of the same genus. That system is now used chiefly, if not exclusively, in analytical tables. Discriminating characters are not enough, unless one is sure that all the species of the genus existing, or that ever have existed, are before him; also his distinctive characters will fail to identify the species. If, for instance, there was in Linnaeus' time a genus of plants with two known species, one with ovate and one with lanceolate leaves, *Folia ovatis* and *Folia lanceolatis* would have been enough to discriminate them. But perhaps by this time the two species have been raised by fresh discovery to twenty, thirteen of them with ovate leaves and seven with lanceolate ones, in which case the Linnaean characters are not enough to discriminate them. Lengthened definitions are consequently now given, all the essential characters being enumerated instead of simply one or two. The Linnaean method employs the metaphysical definition [† (4)], that which superseded it is the physical definition [† (7)].

† (1) *Accidental definition:* [II. 1.]

† (2) *Essential definition:* [II. 1.]

† (3) *Logical definition:*

Logic: A definition consisting of the genus and difference. Thus if a planet be defined as a wandering star, star is the genus and wandering points out the difference between a planet and an ordinary type of star. It is sometimes called also a metaphysical definition.

† (4) *Metaphysical definition:* The same as *Logical definition* (q. v.). The term metaphysical is used to imply that a dual conception of the object is merely a mental one, and not inherent in the object itself.

† (5) *Natural definition:*

Logic: The same as a *Physical definition* (q. v.).

† (6) *Nominal definition:*

Logic: A definition which explains only the meaning of the term defined. It is opposed to a *Real definition* (q. v.).

† (7) *Physical definition:*

Logic: A definition made by enumerating such parts as are actually separable, as the hull, masts, &c., of a ship, the leaves, petal, &c., of a rose.

(8) *Real definition:*
Logic: A definition which explains the nature of the thing signified by a particular name. (*Whately.*)
¶ Crabb thus discriminates between *definition* and *explanation*: "A definition is correct or precise; an *explanation* is general or ample. The definition of a word defines or limits the extent of its signification: it is the rule for the scholar in the use of any word; the *explanation* of a word may include both *definition* and *illustration*: the former admits of no more words than will include the leading features in the meaning of any term; the latter admits of an unlimited scope for diffuseness on the part of the explainer." (*Crabb: Eng. Synon.*)

dě-fin-ī-tion-əl, a. [Eng. *definition*; -al.] Of or pertaining to a definition; of the nature of a definition.

dě-fin-ī-tive, a. & s. [Lat. *definitivus*; from *definitus*, pa. par. of *definire*; Fr. *définitif*.]

A. As adjective:

1. *Ordinary Language:*

1. Limiting or determining the extent; determinate, exact.

2. Final, conclusive, positive, exact.

"Other authors write often dubiously, even in matters wherein is expected a strict and definitive truth."—*Brownie: Vulgar Errors.*

*3. Determined, peremptory, absolute.

"Never crave him: we are definitive."

Shakesp.: Measure for Measure, v. 1.

***II. Law:** Final, conclusive; opposed to *provisional* or *interlocutory*.

"This was not a definitive sentence, but a sentence interlocutory, as it is termed in that court."—*State Trials: Duke of Buckingham* (an. 1626).

***B. As substantive:**

Gram.: A word used to define or limit the extent of the signification of an appellative or common noun. Such are the definite article and the demonstrative pronouns.

"... as they can do no more than in some manner define or determine, they may justly for that reason be called *definitives*."—*Harris: Hermes, i. 3.*

dě-fin-ī-tive-ly, adv. [Eng. *definitive*; -ly.]

1. Determinately, expressly, positively.

"... definitively set down by Moses."—*Brownie: Vulgar Errors.*

2. Finally, conclusively, definitely

"... from that to a national synod, which must definitely end all."—*Sturpe: Life of Whitgift.*

dě-fin-ī-tive-ness, s. [Eng. *definitive*; -ness.]

The quality or state of being definitive; decisiveness, positiveness, definiteness.

***dě-fin-ī-tude, s.** [Eng. *definit(e)*; -ude.] Definitiveness.

"Destitute of the light and definitude of mathematics."—*Sir W. Hamilton.*

***dě-flx, v. t.** [Lat. *deflexus*, pa. par. of *defigere*=to fix, or fasten down: *de*=down, and *figo*=to fix.] To fix, or settle, to fasten.

"The country parson is generally sad, because he knows nothing but the cross of Christ, his mind being deflexed on, and with those nails wherewith his Master was."—*Herbert: Country Parson, ch. xxvii.*

***dě-flā-grā-bil-ī-tē, s.** [Eng. *deflagrable*; -ity.]

Chem.: Combustibility; the quality of taking fire and becoming totally consumed.

"We have spent more time than the opinion of the ready deflagrability, if I may so speak, of saltpeter did permit us to imagine."—*Boyle: Works, i. 362.*

***dě-flā-grā-ble, a.** [As if from a Lat. *deflagrabilis*, from *deflagro*=to consume by fire.]

Chem.: Capable of being totally consumed by fire; combustible.

"Our chemical oils ... the more inflammable and deflagrable."—*Boyle: Works, i. 538.*

***dě-flā-grāte, v. t. & i.** [Lat. *deflagratus*, pa. par. of *deflagro*=to consume by fire; *de* (intens.), and *flagro*=to burn.]

A. Trans.: To set fire to and consume totally by deflagration.

B. Intrans.: To be rapidly consumed in fire.

***dě-flā-grāt-ēd, pa. par. or a.** [DEFLAGRATE.]

dě-flā-grāt-ing, pr. par., a. & s. [DEFLAGRATE.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act or process of consuming totally by fire: deflagration.

deflagrating mixtures, s. pl.

Chem.: Combustible mixtures, made with niter, the oxygen of which promotes their combustion.

dě-flā-grā-tion, s. [Lat. *deflagratio*; from *deflagro*=to consume by fire.]

Chem.: The sudden combustion of a substance for the purpose of producing some change in its composition by the joint action of heat and oxygen.

It is usually performed by projecting in a red-hot crucible, in small portions at a time, a mixture of about equal parts of the body to be oxidized, and nitrate or chlorate of potash or other energetic oxidizer. (*Knight.*)

"I excited ... as many deflagrations as I could."—*Boyle: Works, iii. 89.*

dě-flā-grāt-ōr, s. [Lat.]

Elect.: An instrument for producing intense heat. It was generally a form of the voltaic battery. Such was used by Davy in 1807-8, when he decomposed soda, potash, borax, and lime. (*Knight.*) Here the deflagrator is a simple voltaic arrangement, consisting of two large sheets of copper and zinc rolled together in a spiral, but preserved from direct contact by bands of leather or horsehair. The whole is immersed in a vessel containing acidulated water, and the two plates are connected outside the liquid by a conducting-wire. (*Ganot.*)

dě-flēct, v. t. & t. [Lat. *deflecto*: *de*=away, from and *flecto*=to turn.]

A. Intransitive:

1. *Lit.:* To turn or move to one side; to deviate, to become deflected.

"At some parts of the Azores the needle deflecteth not, but lieth in the true meridian . . ."—*Brownie: Vulgar Errors.*

*2. *Fig.:* To deviate or swerve from the right course.

"That principle . . . can every moment deflect from the line of truth and reason."—*Warburton: Nat. and Revealed Relig., Ser. 2.*

***B. Trans.:** To bend, or cause to turn to one side, or from a straight line.

"Sitting with their knees deflected under them, to show their fear and reverence."—*Lord: Discov. of the Banians* (1690), p. 72.

dě-flēct-ēd, pa. par. or a. [DEFLECT.]

A. As pa. par.: (See the verb.)

B. As adjective:

1. *Ord. Lang.:* Turned or bent to one side or from a straight line.

2. *Bot.:* The same as DEFLEXED (q. v.).

dě-flēc-tion, *dě-flēx-ion, s. [Fr. *déflexion*; Lat. *deflexio*, from *deflexus*, pa. par. of *deflecto*=to turn aside.]

I. Ord. Lang.: A turning aside, a deviation; a departure from the straight line or course; a causing to bend or give way from a straight line. (*Lit. & fig.*)

"... from the dimensions of those orbits, we calculate the amount of deflection, in either, from their tangents, in equal very minute portions of time, . . ."—*Herschel: Astron.* (1858), § 530.

II. Technically:

1. *Naut.:* The deviation or departure of a ship from its true course.

2. *Optics:* A deviation of the rays of light toward the surface of an opaque body.

3. *Math.:* The distance by which a curve deviates or departs from another curve, or from a straight line.

4. *Mech., Engin., &c.:* The measurement of the distance by which any material deflects or gives way from a straight line under a load.

dě-flēct-ive, a. [Eng. *deflect*; -ive.] Causing deflection.

deflective forces, s. pl.

Mech.: Those forces which, acting upon a moving body, cause it to deviate from its course, or to move in another direction.

dě-flēc-tōm-ē-tēr, s. [Eng. *deflect*; o connective; Gr. *metron*=a measure.] An instrument for measuring the deflection of a rail by a weight in rapid motion. (*Knight.*)

dě-flēct-ōr, s. [Lat.] A plate, diaphragm, or cone in a lamp, furnace, or stove, to bring the flame and gases into intimate contact and improve the combustion. (*Knight.*)

dě-flēx-ed, a. [Lat. *deflexus*=bent down.]

Bot.: Curved downward.

***dě-flēx-ūre, s.** [Lat. *deflexus*.] A bending down or aside; a deflection.

dě-flōr-āte, a. [Low Lat. *defloratus*, from Lat. *deffloro*=to lose its blossoms: *de*=away, from, and *flor* (genit. *floris*)=a flower.]

Bot.: An epithet applied to a flower when it has discharged its farina, pollen, or fecundating dust; also to a plant when its flowers have fallen.

dě-flōr-ā-tion, s. [Fr. *défloration*, from Low Lat. *defloratus*.]

1. *Lit.:* The act of deflowering; the taking away of a woman's virginity; ravishing.

2. *Fig.:* A selection of the most beautiful and valuable parts of anything.

"The laws of Normandy are, in a great measure, the defloration of the English laws, and a transcript of them."—*Hale.*

dě-flōur, *de-flōre, dē-flōw-ēr, *de-flōwre, v. t. [Fr. *déflorer*, from Low Lat. *deffloro*.]

***I. Lit.:** To take away flowers from; to deprive of flowers.

"... deflowering the gardens."—*Mountagu: Devout Essays, pt. 1, treat. 19, § 6.*

II. Figuratively:

1. To take away a woman's virginity; to ravish.

"As is the lust of an eunuch to deflower a virgin; so is he that executeth judgment with violence."—*Ecclesiasticus xx. 4.*

*2. To cull the most beautiful or best parts from.

"The which book Robert Bishop of Herforde deflored."—*Trevisa, i. 39.*

*3. To take away, to rob.

"For soone comes age, that will her pride deflowere."—*Spenser: F. Q., II. xii. 75.*

dě-flōur-ed, dē-flōw-ēred, pa. par. or a. [DE-FLOUR.]

dě-flōur-ēr, dē-flōw-ēr, s. [Eng. *deflower*; -er.] One who takes away a woman's virginity; a ravisher.

"I have often wondered that those deflowers of innocence, . . . are not restrained by humanity."—*Addison.*

dě-flōur-ing, pr. par., a. & s. [DEFLOUR.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of taking away a woman's virginity; ravishing, defloration.

***dē-flōw, v. i.** [Lat. *defluo*: *de*=down, and *fluo*=to flow.] To flow down.

6. *Bot.*: A change in the form of a plant, arising from the loss, removal, abortion, or new development of any organs.

"There is thus traced a *degradation*, as it is called, from a flower with three stamens and three divisions of the calyx, to one with a single bract and a single stamen or carpel."—*Balfour: Botany*, § 649.

7. *Nat. Hist.*: The state of a type which presents a degraded form; degeneration.

degradation products.

Biol.: Products brought into existence through changes causing degradation in the substance of organized substances. Examples, the mucilage of quince seeds, linseed, and possibly also lignin and cork. (*Thomé*.)

dē-grāde, *v. t. & i.* [Fr. *dégrader*; Sp. & Port. *degradar*; Ital. *degradare*; from Lat. *degrado*=to deprive of rank: *de*=away, from, and *gradus*=rank.]

A. Transitive:

I. Ordinary Language:

1. To deprive of rank; to reduce from any rank, office, or dignity. [DISGRACE.]

"... to degrade him, to reprimand him publicly, was impossible."—*Macaulay: Hist. Eng.*, ch. xiii.

2. To lower morally and intellectually; to debase, to sink.

3. To diminish the value or estimation of; to bring into contempt; to lessen.

"Nor shalt thou, by descending to assume Man's nature, lessen or degrade thine own."
Milton: P. L., iii. 303, 304.

II. *Geol.*: To wear away or down; to reduce in height or magnitude, as by the action of water, &c.

B. Intransitive:

*I. *Ord. Lang.*: To degenerate; to become degraded or degenerated.

II. Technically:

1. *Nat. Hist.*: To become degraded or degenerated in type; to degenerate; to exhibit degraded forms.

2. *Univ.*: To take a lower degree than one is entitled to; to omit to take a degree at the proper time; to descend from a higher to a lower class.

"As he lost ... the whole of the ensuing term, he was obliged to degrade, as it is called, i. e., to place his name on the list of the year below."—*Farrar: Julian Home*, ch. xxvi., p. 348.

¶ (1) Crabb thus discriminates between to *degrade* and to *disgrace*: "In the general or moral application, *degrade* respects the external station or rank; *disgrace* refers to the moral estimation or character; one is often *disgraced* by a *degradation*, and likewise when there is no express *degradation*; whatever is low and mean is *degrading*; whatever is immoral is *disgraceful*; it is *degrading* for a nobleman to associate with prize-fighters and jockeys; it is *disgraceful* for him to countenance the violation of the laws which he is bound to protect: it is *degrading* for a clergyman to take part in the ordinary pleasures and diversions of mankind in general; it is *disgraceful* for him to indulge in any levities: Domitian *degraded* himself by the meanness of the employment which he chose; he *disgraced* himself by the cruelty which he mixed with his meanness: King John of England *degraded* himself as much by his mean compliance when in the power of the barons, as he had *disgraced* himself before by his detestable tyranny and oppression. The higher the rank of the individual the greater his *degradation*; the higher his character, or the more sacred his office, the greater his *disgrace*, if he act inconsistently with its dignity; but these terms are not confined to the higher ranks of life; there is that which is *degrading* and *disgraceful* for every person, however low his station: when a man forfeits that which he owes to himself, and sacrifices his independence to his vices, he *degrades* himself below the scale of a rational agent; he thereby forfeits the good opinion of all who know him, and thus adds *disgrace* to his *degradation*." (*Crabb: Eng. Synon.*)

(2) For the difference between to *degrade* and to *disparage*, see *DISPARAGE*; for that between to *degrade* and to *humble*, see *HUMBLE*.

2. *Geol.*: Wearing down or dissolving, or tending to wear down or dissolve, elevated parts of the earth's surface, and to carry down the detritus to lower levels. The term is applied to atmospheric influence, the action of water, &c.

C. As *subst.*: The act of depriving of a dignity; degradation, debasement.

dē-grād-īng-lŷ, *adv.* [Eng. *degrading*; *-ly*.] In a degrading, debasing, or disgraceful manner.

"This is what Bishop Taylor *degradingly* calls virtue and precise duty."—*Coventry: Philemon to Hydaspes*, Conv. 1.

***dē-grā-vā-tion**, *s.* [As if from a Lat. *degravatio*, from *degravatus*, *pa. par.* of *degravo*=to press or weigh down: *de*=down, and *gravis*=heavy.] The act of making heavy or of pressing down.

dē-grēe, ***dē-grē**, *s.* [Fr. *dégré*, from Lat. *de*=down, and *gradus*=a step.]

A. Ordinary Language:

I. Literally:

1. A step, a stair.

"These twelve *degrees* weren brode and stayre."
E. Eng. Allit. Poems; Pearl, l. 621.

2. In the same sense as B. 2.

3. In the same sense as B. 3.

4. In the same sense as B. 7.

II. Figuratively:

1. A step or movement toward an end; a step of progression.

"... scorning the base *degrees*

By which he did ascend."
Shakesp.: Julius Caesar, ii. 1.

2. A measure of quality or condition; a proportion; a certain amount.

"... they will stun you to that *degree*, that you will fancy your ears were torn in pieces."—*Dryden*.

3. A step or measure of increase or decrease.

"Poesy

Admits of no *degrees*; but must be still

Sublimely good, or despicably ill."

Roscommon: Art of Poetry.

4. Quality, rank, station, or position.

"You know your own *degrees*, sit down."

Shakesp.: Macbeth, iii. 4.

*5. An order or class.

"The several *degrees* of angels may probably have larger views."—*Locke*.

B. Technically:

1. *Geneal.*: A certain distance or remove in the line of descent, determining the proximity of blood.

"And these descended in the third *degree*."

Pope: Homer's Iliad, v. 678.

2. *Geom.*: The 360th part of the circumference of a circle. The circumference of every circle is supposed to be divided into 360 equal parts, each of which is called a degree. Each degree is again divided into 60 minutes, and each minute into 60 seconds. The sign of a degree is a small circle written or printed at the top of the last figure denoting the number of degrees. Thus ninety degrees is written 90°. [MINUTE, SECOND.] An angle is said to contain so many degrees or parts of a degree as there are in the arc subtended by an equal angle at the center of a circle. [ARC.] So we say that a star is so many degrees above the horizon, as there are degrees in the angle subtended by the arc between the star and the horizon. A *degree of latitude* is the 360th part of the earth's surface north or south of the equator, measured on a great circle forming the circumference of the earth at right angles to the equator. A *degree of longitude* is the 360th part of the earth's surface east or west of a fixed meridian. [MERIDIAN.] Since the length of a degree depends upon the magnitude of the circumference of the circle of which it forms a part, it is manifest that the length of every degree of longitude is greatest at the equator, and diminishes gradually as it approaches the poles. At the equator a degree of longitude measures 60 geographical or 69½ statute miles. The length of a degree of latitude on the contrary, owing to the fact that the figure of the earth is not a perfect circle, increases as it nears the poles. The geographical position of any town or place is fixed by the number of degrees or parts of degrees in the latitude and longitude at their point of intersection. [LATITUDE, LONGITUDE.]

"... shall the shadow go forward ten *degrees*, or go back ten *degrees*?"—2 *Kings* xx. 9.

3. *Gram.*: The degrees of comparison of an adjective or adverb are those inflections which denote the different degrees of the same quality. They are three in number, the *positive*, the *comparative*, and the *superlative*. [See these words.]

4. Mathematics:

(1) *Alg.*: A term used to denote the class of an equation according to the highest power of the unknown quantity. Thus, if the index of the unknown quantity be 3 or 4, the equation is said to be of the third or fourth degree respectively.

(2) *Arith.*: (See extract.)

"A degree consists of three figures—viz., of three places, comprehending units, tens, and hundreds; so three hundred and sixty-five is a degree."—*Cocker: Arithmetick*.

5. *Math. Instruments, &c.*: The divisions of the lines upon several kinds of mathematical and philosophical instruments, as thermometers, barometers, &c. In thermometry the unit of measure varies according to the scale, being $\frac{1}{180}$ of the distance between the freezing and boiling points in the Centigrade scale, $\frac{1}{90}$ in Réaumur's, and $\frac{1}{180}$ in Fahrenheit's.

6. *Music (Degree of a scale)*: A step in the tonal ladder. It may consist of a semitone, a tone, or (in the minor scale) of an augmented tone. (*Stainer & Barrett*.) When the notes are on the same line or space they are in the same degree. The interval of a second is one degree, the interval of a third two degrees, and so on, irrespective of the steps being tones or semitones. Hence, also, notes are in the same degree when they are natural, flat, or sharp, of the same note, as C and C sharp, E and E flat; and they are in different degrees when, though the same note on an instrument of fixed intonation, they are called by different names, as F sharp and G flat, C sharp and D flat. (*Grove*.)

boil, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -cious, -ble, -dle, &c. = bel, del.

7. *University*: A title of honor or mark of distinction conferred on such members of a university as have passed through all the exercises required of them, as a testimony of proficiency in certain arts and sciences. [BACHELOR, DOCTOR, MASTER.] Honorary degrees are those conferred on persons distinguished in any path of life, who are not members of the university by which the degrees are conferred. The Archbishop of Canterbury has also the privilege of conferring degrees.

† *By degrees*: Gradually; by little and little.
 "At first, progressive as a stream they seek
 The middle field; but, scattered by degrees,
 Each to his choice, soon whiten all the land."
Cowper: Task, i. 292-94.

**dē-grēe*, v. t. [DEGREE, s.] To advance step by step.

"I will degree this noxious neutrality one peg higher."
Hackett: Life of Williams, ii. 189. (Davies.)

**dē-grēd*, a. [Eng. *degre(e)*; -ed.] Placed in a position or rank.

"We that are degreed above our people."—*Heywood: Rape of Lucrece.*

**dē-grēe*-*ing*-*ly*, adv. [Eng. *degree*; -ing, -ly.] By degrees, step by step.

"Degreelying to grow to greatness."—*Feltham: Resolves, i. 97.*

**dē-gūst*, v. t. [Lat. *degusto*.] To taste.
 "A coupe du vin, Madam, I will degust, and gratefully."
C. Reade: Cloister and Hearth, ch. ii.

**dē-gūst*-*tion*, s. [Lat. *degustatio*, from *degusto*=to taste.] A tasting.
 "It is no otherwise even in carnal delights, the degustation whereof is wont to draw on the heart to a more eager appetite."—*Bishop Hall: Soul's Farewell to Earth, § 9.*

**dē-gūst*-*ed*, pa. par. or a. [DEGUST.]

**dē-gūst*-*ing*, pr. par., a. & s. [DEGUST, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of tasting; degustation.

**dē-gūst*-*it*, a. [Fr. *déguiser*=to disguise.] Disguised.]

"And ay to thame come Repentance amang,
 And maid thame chere degysit in his wede."
King's Quhair, iii. 8.

**dē-his* *ce*, v. i. [Lat. *dehisco*=to gape.]

1. *Ord. Lang.*: To gape, to open, to yawn.

2. *Bot.*: To open, as the capsules or anthers of plants.

"... they may dehiscce by the dorsal suture."—*Balfour: Botany, § 532.*

**dē-his*-*gen*-*ce*, s. [Latin *dehiscens*, pr. par. of *dehisco*.]

1. *Ord. Lang.*: A gaping, an opening, a yawning.

2. *Bot.*: The opening of capsules and of the cells of anthers for the discharge of their contents. This takes place either by clefts, by hinges, or by pores.

When the anther-lobes are erect, the cleft takes place lengthwise along the line of the suture, constituting longitudinal dehiscence. At other times the slit takes place in a horizontal manner, from the connective to the side, as in *Alchemilla arvensis* and in *Lemna*, where the dehiscence is transverse. When the dehiscence takes place by the ventral and dorsal sutures, as in the legume of the Pea and Bean, it is called sutural. When composed of several united carpels, the valves may separate through the dissepiments, so that the fruit will be resolved into its original carpels, as in *Rhododendron*, *Colchicum*, &c. This dehiscence, in consequence of taking place through the lamellæ of the septum, is called septival. Loculicidal dehiscence is where the union between the edges of the carpels is persistent, and they dehiscce by the dorsal suture, or through the back of the loculements, as in the Lily and Iris. Sometimes the fruit opens by the dorsal suture, and at the same time the valves or walls of the ovaries separate from the septa, leaving them attached to the center, as in *Datura*. This is called septicidal dehiscence, and may be looked upon as a modification of the loculicidal. (*Balfour: Botany, &c.*)

Dehiscence.
 1. Dehiscence Anther of Begonia (longitudinal).
 2. Dehiscence Anther of Lemna (transverse).
 3. Dehiscence Capsule of Hibiscus (loculicidal).

**dē-his*-*gent*, a. [Lat. *dehiscens*, pr. par. of *dehisco*.]

1. *Ord. Lang.*: Gaping, yawning, opening.

2. *Bot.*: Opening; as the capsules of a plant, the cells of anthers, &c.

"... the fruit opens between the two vascular bundles, either at the ventral or dorsal suture, so as to allow the seeds to escape, and then it is dehiscens."—*Balfour: Botany, § 530.*

**dē-hōn*-*ēs*-*tāte*, v. t. [Lat. *dehonestatus*, pa. par. of *dehonesto*: *de*=away, from, and *honesto*=to honor.] To disgrace.

"The excellent and wise power he took in this particular, no man can dehonestate or reproach."
J. Taylor: Sermon Preached at the Funeral of the Lord Primate. (Trench: On some def. in our Eng. Dict., p. 19.)

**dē-hōn*-*ēs*-*tā*-*tion*, s. [Lat. *dehonestatio*, from *dehonesto*=to dishonor.] A disgracing or dishonoring; disgrace.

"Who can expiate the infinite shame, dehonestation, and infamy which they bring?"—*Bishop Gauden: Hieraspistes, p. 482.*

**dē-hors*' (s silent), prep. [Fr.]

Law: Outside of, without; foreign to or irrelevant.

**dē-hort*' v. t. [Lat. *dehortor*=to dissuade; *de*=away, from, and *hortor*=to encourage.] The opposite of exhort; to dissuade from anything, to advise to the contrary.

"He proceeds to admonish and dehorth her from unworthy society."—*Dr. Richardson: On the Old Testament, p. 341.*

† Trench well calls this a word whose place neither dissuade nor any other exactly supplies. He evidently means that while dissuade implies that the advice against a certain course of conduct has proved successful, dehorth suggests no more than that it has been given.

**dē-hor*-*tā*-*tion*, s. [Lat. *dehortatio*, from *dehortor*.] A dissuading from anything; an advising to the contrary; a counseling against anything.

"Did they never read these dehortations?"—*Ward: On Infidelity.*

**dē-hor*-*tā*-*tive*, a. [Lat. *dehortat(us)*, pa. par. of *dehortor*; Eng. adj. suff. -ive.] Dissuasive, dehortatory.

**dē-hor*-*tā*-*tōr*-*ŷ*, a. [Lat. *dehortatorius*, from *dehortor*.] Dissuasive; counseling or advising against; pertaining to dissuasion.

"The text, you see, is a dehortatory charge to avoid the offense of God."—*Sp. Hall: Remains, p. 108.*

**dē-hort*-*ed*, pa. par. or a. [DEHORT.]

**dē-hort*-*er*, s. [Eng. *dehort*; -er.] One who dissuades from or advises against anything; a dissuader.

**dē-hort*-*ing*, pr. par., a. & s. [DEHORT.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of dissuading; dehoration.

"When God deists from his gracious and serious dehorting."—*Gaule: Mag-Astro-Manoe, p. 29.*

**dē-hū*-*man*-*ize*, v. t. [Pref. *de*=away, from; Eng. *humanize* (q. v.).] To deprive of humanity or of natural feeling and tenderness; to brutalize. (*Kingsley.*)

**dē-hūsk*' v. t. [Pref. *de*=away, from; Eng. *husk* (q. v.).] To deprive of the husk; to shell.

"Wheat dehusked upon the floor."—*Drant: Horace; Epistle to Numilius.*

**dē-hy*-*dra*-*cēt*-*ic*, a. [Eng. *dehydr(ate)*; *acetic*.] [DEHYDRATION.]

dehydracetic acid, s.

Chemistry: $C_2H_3O_4$. An acid crystallizing in needles obtained by heating aceto-acetic-ethyl-ether, $CH_3COCH_2COOC_2H_5$, to 250°. It melts at 108°, and boils at 229°. It is slightly soluble in alcohol or water, easily soluble in ether. It is a monobasic acid.

**dē-hy*-*dra*-*tion*, s. [Lat. *de*=down; Gr. *hudor*=water, and Eng. Fr. &c., suff. -ation.]

Chem.: The removal of water from a body in which it is found as an element.

**dē-i*-*am*-*ba*, s. [A native African word.]

Pharm.: Congo tobacco, a plant growing wild in the marshy districts of Congo, the flowers of which produce a narcotic effect when smoked.

**dē-i*-*cide*, s. [Fr. *déicide*, from Lat. *deus*=God, and *cædo*=to kill.]

1. The putting to death of God in the person of our Lord.

"How by her patient victor Death was slain,
 And earth profan'd, yet bless'd, with deicide."
Prior: I am that I am.

2. One concerned in putting our Lord to death.

**deic*-*tic*, a. [Greek *deiktikos*=showing, from *deiknumi*=to show, to point out.]

Logic: Direct; applied to reasoning which proves directly.

**deic*-*tic*-*al*, a. [Eng. *deictic*; -al.] Direct, deictic.

**deic*-*tic*-*al*-*ly*, adv. [Eng. *deictical*; -ly.] In a direct manner; directly, definitely.

"Christ spake it deictically."—*Hammond: Works, i. 708.*

**deid*, s. [DEATH.]

**dē-if*-*ic*, a. [Latin *deificus*, from *deus*=God, and *facio* (pass. *fio*)=to make.] Making god or divine; deifying, god-making.

**dē-if*-*ic*-*al*, a. [Eng. *deific*; -al.] The same as DEIFIC (q. v.).

"The ancient catholic fathers were not afraid to call this Supper . . . a deifical communion."—*Homilies; Sermon I, On the Sacrament.*

**dē-if*-*ic*-*ation*, **dē-if*-*ic*-*ation*, s. [Fr.]

1. *Lit.*: The act of deifying or making god; the raising to the rank of a god; the state of being made a god.

"Through what reacion He hath deification."
Gower, ii. 158.

2. *Fig.*: An excessive praise or worship of.

"[He] ran into deifications of my person, pure flames, constant love, . . ."—*Tatter, No. 33.*

¶ When one whom we greatly love dies, all faults and failings of the deceased are forgotten, and the individual mourned for stands forth to the imagination as deserving of boundless veneration, and as almost a perfect model to ourselves, creatures of toil and of sin. Wherever, a sin Christian countries, monotheism has been cordially accepted, this veneration tends to stop short of actual worship; where polytheism flourishes there is no check upon it, and the individual mourned for is simply raised to the level of the inferior gods, becoming a deified hero or heroine. This process in the case of Alcibiades, celebrated in one of the dramas of Euripides as having died for her husband, is thus described in Anstices's Greek Choric Poetry:

"We will not look on her burial sod
 As the cell of sepulchral sleep;
 It shall be as the shrine of a radiant god,
 And the pilgrim shall visit that blest abode,
 To worship and not to weep."

The Greeks called deification apotheosis, and there is reason to believe that some of the divinities they adored were originally men. The Romans thus raised to the skies Romulus, and after a long interval quite a crowd of emperors. So also Rama, Hunooman, and various other Hindu divinities, seem originally to have lived as ordinary earthly heroes, who were elevated on dying to the skies.

Nay, the process of deification has not stopped in India; it is in full operation at the present day, some of the deities created being Englishmen. In 1857 a sect at least temporarily arose called the Nykkul Sens, or worshippers of the brave General Nicholson, mortally wounded at the siege of Delhi, and an officer whose heroism greatly impressed the natives in the early wars carried on by the British in the East. He has long been worshipped in part of Western India, the offerings deemed most acceptable to the "god" being those he had loved in life—strong liquor and cigars. [APOTHEOSIS, CONSECRATION.]

**dē-i*-*fied*, pa. par. or a. [DEIFY.]

**dē-i*-*fied*, **dē-i*-*fied*, s. [Eng. *deify*; -er.] One who deifies; an idolater.

"... so signal an interposition of Heaven [the Flood] against the first deifiers of men, should have given an effectual check to the practice."—*Coventry: Philemon to Hydaspes, Conv. 3.*

**dē-i*-*form*, a. [Low Lat. *deiformis*, from Lat. *deus* (genit. *dei*)=God, and *forma*=form, shape.]

1. Of a godlike form or appearance.

"If the final consummation
 Make the creature deiform."
H. More: Song of the Soul.

2. In accordance with or conformable to the will of God.

"How exactly deiform all its motions and actions."—*Scott: Christian Life, pt. i, ch. iii.*

**dē-i*-*form*-*ly*, s. [Eng. *deiform*; -ity.]

1. Godlike form or character.

"Thus the soul's numerous plurality
 I've prov'd, and shew'd she is not very God;
 But yet a decent deiformity
 Have given her."
H. More: Song of the Soul, iv. 27.

2. Conformity or accordance with the will of God.

"The short and secure way to divine union and deiformity being faithfully performed, . . ."—*Spiritual Conquest (1651), iv. 36.*

dē-ī-fy, v. t. [Fr. *déifier*, from Lat. *deus*=God, and *facio* (pass. *fio*)=to make; Sp. and Port. *deificar*; Ital. *deificare*.]

I. Lit.: To make a god of; to raise to the rank of God; to adore as a god.

"The seals of Julius Cæsar, which we know to be antique, have the star of Venus over them, . . . as a note that he was deified."—Dryden.

II. Figuratively:

1. To love or regard idolatrously.

"Persuade the covetous man not to deify his money, and the proud man not to adore himself."—South.

2. To make godlike.

"By our own spirits are we deified."

Wordsworth.

3. To praise excessively; to extol as a god.

"He did again so extol and deify the pope."—Bacon.

***dēip-ar-ous**, a. [Lat. *deiparus*, from *deus*=god, and *pario*=to bear, to bring forth.] Bearing or bringing forth a god; an epithet applied to the Blessed Virgin.

dēip-nōs-ō-phist, s. [Gr. *deipnosophistēs*, from *deipnon*=a feast, and *sophistēs*=a sophist.] One of an ancient sect of philosophers famed for their learned conversation at meals.

dē-īsm, s. [Fr. *déisme*, from Lat. *deus*=a god.] The doctrines or tenets of a deist; the system of belief which admits the being of a God, and acknowledges several of His perfections, but denies not only the existence but the necessity of a divine revelation.

"Halifax had been during many years accused of scepticism, deism, atheism."—Macaulay: Hist. Eng., ch. xi.

dē-īst, s. [Fr. *déiste*, from Lat. *deus*.] [THEIST.] One who admits the being of a God, but denies the existence or even necessity of a divine revelation, believing that the light of nature and reason are sufficient guides in doctrine and practice; a believer in natural religion only; a freethinker.

¶ Etymologically the words *deist* and *theist* are the same in meaning, only *deist* is from Latin and *theist* from Greek. Conventionally, however, they are widely different in import; the term *theist* being applied to any believer in God whether that believer be a Christian, a Jew, a Mohammedan, &c., or a deist properly so called. A *deist* is, as the definition states, one who believes in God but disbelieves in Christianity, or more generally in revelation.

dē-īst-ic, **dē-īst-ic-al**, a. [Eng. *deist*; -ic, -ical.] Pertaining to deism or the deists; containing the doctrines of deism.

" . . . who have taken the pen in hand to support the deistical or antichristian scheme of our days."—Watts.

¶ **Deistic Controversy**:

Ch. Hist.: A controversy which arose in England in the seventeenth and eighteenth centuries, between those who believed and those who disbelieved in revelation; the latter, however, not occupying the atheistic standpoint, but accepting as a settled point the being of a God. [DEIST.] The first, in point of time, of the celebrated English deists was Lord Herbert of Cherbury, the publication of whose work, *De Veritate*, which appeared in Paris in 1624, commenced the controversy. There followed, on the same side, Hobbes, Tindal, Morgan, Toland, Bolingbroke, Paine, and others. The standard work on the subject is the Rev. Dr. John Leland's *Deistical Writers*. Leland's work was first published in A. D. 1754.

dē-īst-ic-al-īy, adv. [English *deistical*; -ly.] After the manner of deists.

***dē-īst-ic-al-nēss**, s. [Eng. *deistical*; -ness.] The quality or state of being deistical; deism.

dē-ī-tāte, a. [Formed on a supposed analogy from *deity*.] Made God, deified.

"One person and one Christ, who is God incarnate, and man deitate."—Abp. Cranmer to Bp. Gardiner, p. 350.

Dē-ī-ty, s. [Fr. *déité*, from Lat. *deitas*, the Latin equivalent of the Gr. *theotēs*. "Hanc divinitatem, vel ut sic dixerim deitatem; nam et hoc verbo uti jam nostros non piget, ut de Græco expressius transferunt id quod illi *theotēta* appellant"—(This [word] divinity or rather that which has been spoken of [or denominated] *deity*; for heretofore this word did not exist to vex us until they brought from Greece that word they call *Theotēta*, &c.—Augustin. *De Civitate Dei*, vii. l. (Trench: *Synonyms of the New Testament*, p. 10.) The Latin *deus* is cognate with A. S. *Þiw* (the name of a god still preserved in our *Tuesday*, A. S. *Tiwesdæg*; Icel. *Þivi*=a god; O. H. Ger. *Ziu*=the God of War; Wel. *daw*; Gael. & Ir. *dia*=god; Gr. *Zeus*=Jupiter; Sansc. *deva*=a god; *daiva*=divine; the root being seen in Sansc. *div*=to shine. (Skeat.)]

*1. Godhead; divinity; the nature and essence of God.

"We mean to hold what anciently we claim Of deity or empire."—Milton: P. L., v. 723, 724.

2. God, the Supreme Being. (Preceded by the definite article.)

"The more he contemplated the nature of the Deity . . ."—Addison.

3. A fabulous god or goddess; a heathen object of worship.

"Will you suffer a temple, how poorly built soever, but yet a temple of your deity, to be razed?"—Sidney.

*4. Divine qualities or character.

"Nor can there be that deity in my nature, Of here and everywhere."

Shakesp.: Twelfth Night, v. 1.

¶ Crabb thus discriminates between *Deity* and *divinity*: "*Divinity*, from *divinus*, signifies the divine essence or power; the *deities* of the heathens had little of *divinity* in them; the *divinity* of Our Savior is a fundamental article in the Christian faith." (Crabb: *Eng. Synon.*)

Dē-jān-ir-ā, s. [Gr.]

1. *Class. Myth.*: The daughter of Cæneus, king of Ætolia, and wife of Hercules.

2. *Astron.*: An asteroid, the 157th found. It was discovered by Borely on December 1, 1875.

*2. To throw down; to lower, to debase.

"Many things about a house [are] proper to be looked at by them [wives] which a man of an excellent spirit will hardly deject his thoughts to think of."—H. Percy (Ninth Earl of Northum.): *Instruct.*

*3. To diminish, to depress, to spoil.

"It dejecteth the appetite."—Venner: Treat. on Tobacco, p. 409.

dē-jēct, a. [Lat. *dejectus*.] Dejected, cast down, disheartened, dispirited.

"And I of ladies most deject and wretched,

That sucked the honey of his music vows,"

Shakesp.: Hamlet, iii. l.

B. Med.: Evacuation of excrements; a going to stool.

"... not only to provoke dejection, but also to attenuate the chyle."—Ray: *On the Creation*.

*Crabb thus discriminates between *dejection*, *depression*, and *melancholy*: "*Dejection and depression are occasional, and depend on outward circumstances; melancholy is permanent, and lies in the constitution. Depression is but a degree of dejection: slight circumstances may occasion a depression; distressing events occasion a dejection: the death of a near and dear relative may be expected to produce dejection in persons of the greatest equanimity; lively tempers are most liable to depressions; melancholy is a disease which nothing but clear views of religion can possibly correct.*" (Crabb: *Eng. Synon.*)

***dě-jěct-ly**, *adv.* [Eng. *deject*, *a.*; -*ly*.] Dejectedly.
